A. Pre-Bid Conference

The meeting was convened at 10:30 A.M (Central Time) by Tom Mathews of KYTC.

Question and Answer

Q: Nick S. Frangopoulos from Vimas Painting Co., Inc. stated that when painting the clearance gauges normally 7 days are specified to check water levels and asked if historically the Green River goes up and down so they would know a specific time of year to anticipate doing that work.

A: Tom Mathews stated that he would have to find out about low and high water levels but with the completion of this project being November 15, they should have no problem being able to complete this task. **Consideration will determined by the Engineer if long periods of high water levels are present during the contract that will not permit access to portion of the pier faces that will be receiving coatings.**

Q: Tom Mathews from KYTC asked if a vendor's warehouse would be used for a paint storage site.

A: Mike Baase stated that if available, that would be up to the Central Office Division of Materials.

Q: Tom Mathews from KYTC asked if the district knew where the storage site for waste material would be for this project.

A: Brad Houck stated they could put it under the south end of the bridge.

Q: Michael Baase from KYTC asked if the contractor uses the access under the bridge and puts gravel down will they be required to remove that at the end of the project and what are the easement limitations on both ends of the bridge.

A: Tom Mathews stated that he would discuss that when he gets to the traffic control notes. **See Questions and Answers under Proposal Information for this Proposal.**

Q: Nick S. Frangopoulos from Vimas Painting Co., Inc. asked who is responsible to de-energize the bridge.

A: Brad Houck stated KYTC would do it.

Q: Mike Baase from KYTC asked how much noticed would be required from the contractor to get the bridge de-energized.

A: Brad Houck stated two weeks.

Q: Mike Baase from KYTC asked if they could do this thru the section supervisor.

A: Brad Houck stated yes.

Q: Stephen Harp from Judy C. Harp asked about the timing of doing the steel repairs.

A: Tom Mathews stated they could use single temporary lane closures or there will be a lane closure allowed between June 1 and July 31 and they could coordinate when they wanted to do the work with the contractor.

Q: Stephen Harp from Judy C. Harp stated that they needed to jack considering dead and live loads and depending on when it is done they be could be totally under live load and asked if KYTC would rather them have a temporary lane closure.

A: Tom Mathews stated yes.

Q: Nick S. Frangopoulos from Vimas Painting Co., Inc. asked during June 1 and July 31 when KYTC is suggesting a tunnel with a permanent lane closure, will KYTC stop any oversized loads from coming across the bridge.

A: Brad Houck stated KYTC would advertise it and do everything possible to stop the oversize loads from crossing the bridge.

Meeting was adjourned at approximately 11:00 A.M.
