

- c. It **may be** necessary to construct a perimeter ditch just inside the easement line to keep roadway water from entering coal company property.
  - d. The coal company has an approximate grading plan **that is available to the Contractors**. The coal company is supposed to leave this site according to the standard engineering practice for mining.
6. The earthwork quantities have not been adjusted for horizontal curvature.
  7. The following coal company person may be contacted prior to bids:

**Billy Stanford**

(606) 794-3816

8. There are no restrictions from the coal company as to how the ponds will be drained.
9. No clearing and grubbing will be paid for the waste sites.
