SPECIAL NOTE FOR ASPHALT PLUG JOINT SYSTEM WARRANTY

Retain responsibility for the Asphalt Plug Joint system for a period of 3 years from the date all work is complete in accordance with Section 105.12 of the Standard Specifications. The warranty bond must be properly executed by a surety company satisfactory to the Department, be payable to the Kentucky State Treasurer, and submitted prior to the start of the warranty period. One-year renewable warranty bonds are acceptable; however, proof of renewal is required. If proof of renewal is not received within 30 days prior to the bond's expiration, the Contract will be considered in default and the full amount of the bond will be forfeited to the Department.

The warranty bond is \$1,000,000.00 for the warranted work. The bond is intended to ensure completion of all required warranty work, including payments for all labor, equipment, materials, and lane rental needed to remediate any warranted asphalt plug joints.

Should joint failure occur **during any time during the warranty period**, perform all warranty work according to the Special Note. At the end of the warranty period, the Department will release the Contractor from further warranty work and responsibility, provided all previous warranty work has been completed and accepted by the Department.
