## Commonwealth of Kentucky

Transportation Cabinet

July 20, 2021

CALL NO. 200
CONTRACT ID NO. 211325
ADDENDUM \# 1

```
Subject: Metcalfe-Barren Counties, 121GR21D025-NHPP
    Letting July 23, 2021
    (1) Revised - General Summary - Pages 26-29 of 174
    (2) Revised - Paving Areas - Page 30 of 174
    (3) Revised - Paving Summary - Page 31 of 174
    (4) Revised - Typical Sections - Page 52 of 174
    (5) Revised - Traffic Control Plan - Pages 107-112 of 174
    (6) Revised - Material Summary - Pages 131-133 of 174
    (7) Revised - Proposal Bid Items - Pages 172-174 of 174
```

Proposal revisions are available at http://transportation.ky.gov/Construction-
Procurement/.
If you have any questions, please contact us at 502-564-3500.
Sincerely,

Rachel Mills,

Rachel Mills, P.E.
Director
Division of Construction Procurement

NOTES:

1. Quantities from all other summary sheets have been carried over and included in this General Summary Sheet.
2. For traffic tapers at the ends of project.
3. For maintenance of traffic.
4. Includes 12,514 tons from pavement summary, 382 tons from erosion summary, 3,802 tons from guardrail summary, 45 tons for slide repair, and 77 tons for drainage failure no. 7 .
5. Includes 559 tons from erosion summary, 249 tons from slide repair, and 40 tons from drainage failure repairs.
6. Includes 61 tons from pavement repair summary and 13 tons for slide area repair.
7. Used for slide area repair.
8. Includes 61 tons from pavement repair summary and 11,935 tons from paving summary.
9. Ditching and Shouldering (Special) includes all excavation and backfill necessary for fill slope erosion.
10. For removing striping between MP 29.285 to MP 30.232 .
11. Inlcudes 205 sqyd for drainage failure repairs and 48,000 sqyd for use during Ditching and Shouldering, as directed by the Engineer.
12. Includes 85 sqyd from drainage failure repairs, and 6,305 sqyd from drainage repair summary.
13. Includes 340 tons from drainage failure repairs, 1,152 ton from drainage repair summary, and 170 from erosion summary.
14. Includes 4 feet from drainage repair summary, and 41 feet from drainage failure repair.
15. Inlcudes 1 from drainage repair summary, and 3 from drainage failure repairs.
16. For wrapping pipe trench backfill.
17. For striping bridges.

$\xlongequal{\text { LN } 9008 \text { SUPERELEVATED CUT/FILL SECTION }}$

US 68/KY 80 (EXIT 27) RICHT SUPERELEVATED SECTION

## TRAFFIC CONTROL GENERAL

Except as provided herein, maintain and control traffic in accordance with the current editions of the Standard Specifications and Standard Drawings. Except for the roadway and traffic control bid items listed, all other items of work, described herein, necessary to maintain and control traffic, will be paid for with the lump sum bid price to "Maintain and Control Traffic". All lane closures used on the project shall be in compliance with the appropriate Standard Drawings. Do NOT use cones for lane closures or shoulder closures.

Contrary to Section 106.01, traffic control devices used on this project may be new or used in like-new condition at the beginning of the work and maintained in like-new condition until completion of the work. Traffic Control Devices will conform to current MUTCD.
Reduce the speed limit in work areas of the Parkway to 55 miles per hour and establish double fines for work zone speeding violations. The extent of these areas within the project limits will be restricted to the proximity of actual work areas as determined by the Engineer. Notify the Engineer a minimum of 12 hours prior to using the double fine signs. At the beginning of the work zone, the "WARNING FINE DOUBLED IN WORK ZONE" signs will be dual mounted. At the end of the work zone, the "END DOUBLE FINE" signs will be dual mounted as well. Remove or cover the signs when the highway work zone does not have workers present for more than a two-hour period of time. Payment for the signs will be at the unit bid price for signs erected. Any relocation or covering of signs will be incidental to "Maintain and Control Traffic."
Night work will be allowed on this project. Obtain approval from the Engineer for the method of lighting prior to its use.

## PROJECT PHASING AND CONSTRUCTION PROCEDURES

The Contractor shall maintain a minimum of one 11-foot lane in each direction.
Use a lane closure at all times when work is performed in the adjacent lane or adjacent shoulder. Traffic shall not be allowed to travel on milled surface. Shoulders are NOT to be used as temporary travel lanes unless otherwise directed or approved by the Engineer. If shoulders are utilized, perform any maintenance of the shoulder as deemed necessary by the Engineer to maintain traffic, and this work shall be considered incidental to "Maintain and Control Traffic.". All removal of existing striping shall be by water blasting, unless otherwise directed by the Engineer, and this work shall be considered incidental to "Maintain and Control Traffic", except for areas from MP 29.285 to MP 30.232. Remove edge lines as necessary and approved by the Engineer throughout the project. Paint temporary edge lines through the lane closure.

Access to ramps at the US 68 interchange shall be maintained.
The US 68 / KY 80 Ramps may be closed, one at time. Closure can occur from 6:00 PM to 6:00 AM Monday through Thursday and on no holidays. The closure shall be for a maximum of 2 nights.
Access to Drainage Failure No. 1 may need to be from Beaver Creek Road. Contractor is responsible for any coordination with Metcalf County for any traffic control on this road. To gain access and unloading of equipment the Contractor shall maintain one lane of traffic with signing and flagmen - as approved by the Engineer. Contractor is responsible for any damage to Beaver Creek Road.

The Engineer will determine exact locations of pavement repairs, if any, at the time of construction. Once removal of pavement at a repair location has begun, work continuously
within the parameters outlined above to complete the work and eliminate the "hole". Place Type III Barricades immediately in front of pavement repair areas. Type III Barricades shall be considered incidental to "Maintain and Control Traffic." Once pavement removal at a site has begun, full depth replacement must be completed within the time a lane closure is allowed.

Note that lane shifts are required throughout the project. Stripe according to the Standard Drawings and MUTCD.

The Contractor must notify the Engineer at least fourteen (14) days prior to beginning construction in either direction.

## PHASE 1

Maintain one lane of traffic in each direction. Short lane closures, as approved by the Engineer, shall be used for pavement repairs. Shoulder closures will be allowed as approved by the Engineer.

Phase 2 and Phase 3 shall be done in segments a maximum of 8 miles in length per direction. Once Phase 2 is complete in a segment, the Contractor shall complete Phase 3 before moving to a different segment.

PHASE 2
Shift traffic to the outside lane. Close the inside lane and shoulder to traffic. Mill existing inside lanes. Complete pavement and base failure repairs of inside lanes and shoulders. Pave the inside lanes and shoulders. Once the pavement has been removed, the Contractor must work continuously until the pavement has been replaced back to existing grade.

## PHASE 3

Shift traffic to the inside lane Mill existing outside lane. Complete pavement and base failure repairs of outside lanes and shoulders. Pave outside lanes and shoulders. Once the pavement has been removed, the Contractor must work continuously until the pavement has been replaced back to existing grade.

## PHASE 4

Complete rehab operations, construct concrete wedge curb, guardrail, and guardrail end treatments. Place permanent striping and markers using temporary lane closures as directed by the Engineer. Phase 4 may be performed during closures for milling and paving, as directed by the Engineer.

## RAMPS

The US 68 / KY 80 ramps may be closed, one at time. Mill existing lane. Pave lane and shoulders. Once the pavement has been removed, the Contractor must work continuously until the pavement has been replaced back to existing grade. This construction can be done concurrent with Phase 2 and Phase 3.

## LANE AND SHOULDER CLOSURES

Limit the lengths of lane and shoulder closures to only that needed for actual operations in accordance with the phasing specified herein and a maximum of 8 miles in each directions at one time, or as directed by the Engineer. Limit lane closures to allow a minimum of one lane open per direction at any given time

Other than the holidays listed in the current standard specifications, the Engineer may specify additional days and hours when lane closures are not allowed. Do not leave lane closures in place during prohibited periods.

TRAFFIC CONTROL PLAN CUMBERLAND PARKWAY - BARREN AND METCALFE COUNTIES PAGE 3 OF 6

All lanes and shoulders shall be open during winter shutdown.
Contrary to Section 112, lane and shoulder closures will NOT be measured for payment, but are considered incidental to "Maintain and Control Traffic."

## SIGNS

Additional traffic control signs in addition to normal lane closure signing detailed on the Standard Drawings may be required by the Engineer. Additional signs needed for lane closures may include, but are not limited to, dual mounted LEFT/RIGHT LANE CLOSED 1 MILE, LEFT/RIGHT LANE CLOSED 2 MILES, LEFT/RIGHT LANE CLOSED 3 MILES, SLOWED/STOPPED TRAFFIC AHEAD. Signage for reduced speed limits and double fine work zones will be furnished, relocated, and maintained by the Contractor.
Contrary to Section 112, individual signs will be measured only once for payment, regardless of how many times they are set, reset, removed, and relocated during the duration of the project. Replacements for damaged signs or signs directed to be replaced by the Engineer due to poor legibility or reflectivity will not be measured for payment.
A quantity of signs has been included for lane shifts, "Roadwork Ahead" signs on entrance ramps, and extra Double Fine signs and Speed Limit signs between interchanges to be paid for only once no matter how many times they are moved or relocated.
Traffic control signs in addition to normal lane closure signing detailed in the Standard Drawings may be required by the Engineer.

## FLASHING ARROWS

Flashing arrows will be paid for once, no matter how many times they are moved or relocated. The Department WILL NOT take possession of the flashing arrows upon completion of the work.

## PORTABLE CHANGEABLE MESSAGE SIGNS

Provide portable changeable message signs in advance of and within the project at locations to be determined by the Engineer. If work is in progress concurrently in both directions provide additional portable changeable message signs. Place portable changeable message signs one mile in advance of the anticipated queue at each lane closure. As the actual queue lengthens and/or shortens relocate or provide additional portable changeable message signs so that traffic has warning of slowed or stopped traffic at least one mile but not more than two miles before reaching the end of the actual queue. The locations designated may vary as the work progresses. The messages required to be provided will be designated by the Engineer. The portable changeable message signs will be in operation always. In the event of damage or mechanical/electrical failure, the Contractor will repair or replace the Portable Changeable Message Sign immediately. Portable Changeable Message Signs will be paid for once, no matter how many times they are moved or relocated. The Department WILL NOT take possession of the signs upon completion of the work.

## BARRELS

Barrels are to be used for channelization or delineation and will be incidental to "Maintain and Control Traffic" according to Section 112.04.01. Replacement of damaged barrels due to poor condition or reflectivity, as directed by the Engineer, will not be measured for payment.

## TRUCK MOUNTED ATTENUATORS

Furnish and install MUTCD approved Truck Mounted Attenuators (TMAs) in advance of work areas when workers are present less than 12 feet from traffic. If there is less than 500 feet between work sites, only a single TMA will be required at a location directed by the Engineer. Locate the TMAs at the individual work sites and move them as the work zone moves within the project limits. All details of the TMA installations shall be approved by the Engineer. TMAs will not be measured for payment but are incidental to Maintain and Control Traffic. The Department WILL NOT take possession of the TMAs upon completion of the work.

## PAVEMENT MARKINGS

If lane closures are in place during nighttime hours, remove or cover the lenses of raised pavement markers that do not conform to the traffic control scheme in use, or as directed by the Engineer. Replace or uncover lenses before a closed lane is reopened to traffic. No direct payment will be made for removing and replacing or covering and uncovering the lenses but will be incidental to "Maintain and Control Traffic".

Place temporary and permanent striping in accordance with Section 112 and Section 714, except that:

1. Temporary and permanent striping will be 6 " in width;
2. If the Contractor's operations or phasing requires temporary markings which must be subsequently removed from the ultimate pavement, an approved removable lane tape will be used;
3. Edge lines will be required for temporary striping;
4. Existing, temporary, or permanent striping will be in place before a lane is opened to traffic; and
5. Permanent striping will be Extruded Thermoplastic Marking.

Removal of existing and temporary striping shall be incidental to "Maintain and Control Traffic."

## BARRICADES

Barricades used for channelization or delineation, pavement repairs, and base failure repairs shall be incidental to "Maintain and Control Traffic". As directed by the Engineer replacements for damaged barrels to be replaced due to poor condition or reflectivity will not be measured for payment.

## PAVEMENT EDGE DROP-OFFS

Pavement edge drop-offs will be protected by a lane or shoulder closure. Lane closures will be protected with barrels, vertical panels, or barricades as shown on the Standard Drawings.

A pavement edge between opposing directions of traffic or lanes that traffic is expected to cross in a lane change situation shall not have an elevation difference greater than $11 / 2^{\prime \prime}$. Place warning signs (MUTCD W8-11 or W8-9A) in advance of and at 1500' intervals throughout the drop-off area. Dual posting on both sides of the traveled way shall be required. Pavement edges that traffic is not expected to cross, except accidentally, shall be treated as follows:

- Less than 2" - Protect with a lane closure.
- 2" to 4" - Protect with a lane closure. Place barrels, vertical panels, or barricades every 50 feet. Traffic cones may not be used in place of barrels, panels, and barricades at any time. Construct a wedge with compacted cuttings from milling, trenching, or asphalt

TRAFFIC CONTROL PLAN CUMBERLAND PARKWAY - BARREN AND METCALFE COUNTIES PAGE 5 OF 6
mixtures with a $3: 1$ or flatter slope, when work is not active in the drop-off area. Place Type III Barricades at the beginning of the lane closures, and place additional Type III Barricades spaced at 2,500 feet during the time the lane closure is in place.

- Guardrail Installation - All areas from which guardrail is removed shall be protected by a shoulder closure or other method approved by the Engineer until the new guardrail is installed.

## TRAFFIC COORDINATOR

Designate an employee to be Traffic Coordinator. The designated Traffic Coordinator must be certified by an agency qualified for training in this area. The Traffic Coordinator will inspect the project maintenance of traffic once every two hours during the Contractor's operations and at any time a lane closure is in place. The Traffic Coordinator will report all incidents throughout the work zone to the Engineer on the project. The Contractor will furnish the name and telephone number where the Traffic Coordinator can be contacted always.
During any period when a lane closure is in place, the Traffic Coordinator will arrange for personnel to be present on the project always to inspect the traffic control, maintain the signing and devices, and relocate portable changeable message boards as queue lengths change. The personnel will have access on the project to a radio or telephone to be used in case of emergencies or accidents.
This project is designated as a Significant Project in accordance with Section 112.03 .03 of the Kentucky Standard Specifications.

## COORDINATION OF WORK

The Contractor is advised that other projects may be in progress within or in the near vicinity of this project. The traffic control of those projects may affect this project and the traffic control of this project may affect those projects. The Contractor will coordinate the work on this project with the work of the other Contractors. In case of conflict, the Engineer will determine the relative priority to give to work phasing on the various projects.

## CONTRACTOR'S AND CONTRACTOR'S EMPLOYEES' VEHICLES

Do not use or allow employees to use median crossovers at any time except when inside lanes are closed for construction. In all other phases of construction, change vehicular direction of travel only at interchanges.

## INCIDENTAL TO MAINTENANCE OF TRAFFIC

As noted in above paragraphs the following items will not be measured but are considered incidental to "Maintain and Control Traffic."

- Lane and Shoulder Closures
- Barrels and Replacement of Damaged Barrels
- Type III Barricades
- Removal of Existing and Temporary Striping
- Relocations of Portable Changeable Message Signs
- Relocations of Flashing Arrows
- Relocation or Covering of Signs
- Replacement of Damage Signs
- Maintenance of Shoulders to Maintain Traffic
- Truck Mounted Attenuators
- Removing and Replacing or Covering and Uncovering of Pavement Marker Lenses
- Removal and reset of signs needed to complete shoulder and erosion repairs.

## MATERIAL SUMMARY

LOUIE B. NUNN CUMBERLAND PARKWAY (PK 9008) BEGINNING AT MP 20.1 EXTENDING EAST TO THE BARREN-METCALFE COUNTY LINE MP 22.357 ASPHALT PAVEMENT \& ROADWAY REHAB, A DISTANCE OF 2.26 MILES.
