Payment

Payment of the contract lump sum amount for "maintain and control traffic" shall be full compensation for all items necessary to maintain and control traffic on this project. All traffic control items shall remain the property of the contractor when the work is complete.

FE02 002 0100 B00008N 22.41

Maintain one usable 12 foot lane. Flagging or traffic signals shall be used. If traffic signals are used the Contractor shall use flagging to minimize impact on school bus traffic when school is in session. The Contractor shall be responsible for establishing the dates and times when school bus traffic will impact the job site. The Contractor will be permitted to briefly close the structure to traffic using flagging to move any equipment that exceeds the 41 ton weight limit (See Special Note for Weight Limits on Structure) across the structure as directed by the Engineer. The equipment must be centered on the structure and shall not exceed 82 tons.

FE02 002 0100 B00009N 25.12

Maintain one usable 12 foot lane. Flagging or traffic signals shall be used. If traffic signals are used the Contractor shall use flagging to minimize impact on school bus traffic when school is in session. The Contractor shall be responsible for establishing the dates and times when school bus traffic will impact the job site. The Contractor will be permitted to briefly close the structure to traffic using flagging to move any equipment that exceeds the 38 ton weight limit (See Special Note for Weight Limits on Structure) across the structure as directed by the Engineer. The equipment must be centered on the structure and shall not exceed 76 tons.

To accommodate the planting and harvest seasons the contractor may be required clear the bridge for passage of agricultural equipment during the planting and harvest seasons. This will only require the removal of traffic cones/barrels, contractor's equipment in the lane closure and all other items that would obstruct the passage of the agricultural equipment. All temporary striping, signage, etc. will be permitted to remain. The time period will be for no longer than two hours. The two hour time period will be scheduled with coordination between the Department and the Agricultural Community to have the least impact on the Contractor's production. All cost to clear the bridge for passage as required shall be included in the unit price bid each for "Clear Bridge".
