Qualified Labs Report Window

Navigation

Main Panel \ Materials Management \ Approved Lists Reports \ Qualified Labs Report

General Description

The Qualified Labs Report displays general laboratory information, laboratory qualifications, and expiration dates. The Qualified Labs Report may be generated by Geographic Area, Qualification Type, and Days to Expiration.

Procedure

In KYTC, Central Office Section Heads and DME's should generate this report from KQTL data to show laboratory qualifications and when a laboratory is expiring, as this data contains more detailed source information. There will be a new custom report to supply this information.

KYTC will not use the Qualified Labs Report in SiteManager.
