National Ambient Air Quality Standards (NAAQS), Particulate Matter (PM), Partial (P)						
EPA revoked the requirements for the 1997 8-hour ozone NAAQS; including Transportation Conformity requirements. Effective April 6, 2015						
Transportation Conformity requirements are still required for the 2008 Ozone Standard.						
EPA issued a final rule establishing the 2015 Ozone NAAQS at 70 ppb. Effective Oct. 1, 2015. Will not know until late spring/early summer of 2017 of impacted areas.						
EPA changed the initial designations of the 2012 PM2.5 NAAQS. Effective April 15, 2015.						
Transportation Conformity Requirements are still required for the 1997 PM2.5 Standard until October 24, 2016 as long as the area is not in nonattainment status.						
Unclassifiable Areas - Insufficient quality assured monitoring data to assess compliance with the 2012 annual fine particle standard.
