Executive Summary

This Environmental Overview has been prepared for the KY 8 – Licking River Bridge Scoping Study in Campbell and Kenton Counties, Kentucky (Item #6-1086.00). The purpose of the Scoping Study is to identify and evaluate transportation options to replace KY 8 (4th Street) bridge over the Licking River on the Campbell and Kenton County line. This bridge provides a critical multimodal link between the communities of Covington and Newport, Kentucky. The purpose of this environmental overview is to identify environmental resources of significance, potential jurisdictional features, and other environmental areas of concern that should be considered during project development. Natural and human environment resources within the study area were identified from secondary sources, as well as a pedestrian survey conducted on September 17, 2015. Based on this information, the key environmental features within the study area include:

Surface Streams: The KY 8 bridge crosses the Licking River and its associated FEMA floodway and 100-year floodplain. Additional 100-year floodplain associated with the Ohio River west (downstream) of the Licking River confluence is also present.

Threatened and Endangered Species: There are 11 federal-listed endangered and one threatened mussel species that have the potential to occur in the study area. The Licking River may provide suitable habitat for these medium to large river species which include clubshell, fanshell, northern riffleshell, orangefoot pimpleback, pink mucket, purple cat's paw, rabbitsfoot, ring pink, rough pigtoe, sheepnose, snuffbox, and spectaclecase. The potential for mussels and mussel habitat to occur in the study area should be considered during project development. Potential summer roost and foraging habitat for the federal endangered Indiana bat (*Myotis sodalis*) and the federal threatened northern long-eared bat (*Myotis septentrionalis*) occur in the narrow riparian corridor along both banks of the Licking River.

Hazardous Materials Concerns: Twenty-eight (28) potential hazardous materials sites were identified within or immediately adjacent to the study area, including 2 state hazardous waste (SHWS) record sites, 13 underground storage tank (UST) sites, 3 brownfield sites, 8 RCRA record sites, and several additional sites of potential concern including historical auto stations, historical cleaners, 3 Non-NPL CERCLIS record sites, and an auto salvage business.

Section 4(f)/6(f) Resources: James Taylor Park is located at the confluence of the Licking and Ohio Rivers in Newport (Campbell County). This public park is subject to Section 4(f) regulations (as part of a US Department of Transportation funded project), including impact avoidance, minimization and mitigation requirements.

Environmental Justice (EJ): Based on a review of a Socioeconomic Study prepared for the project, both block groups in Campbell County within the study area have minority resident percentages which exceed both county and state levels. Also, 4 out of 5 block groups in the study area have percentages of low income populations higher than the counties and state levels. Therefore, environmental justice is a potential issue in the study area.

Cultural and Historic Resources: There are portions of four (4) National Register of Historic Places (NRHP)-listed historic districts (Newport Courthouse Square Historic District, Licking Riverside Historic District, Ohio Riverside Historic District, and Covington Downtown Commercial Historic District) within the study area. In addition, there are a total of twenty-eight (28) previously surveyed sites, including: Hearne House (NRHP-listed individually); the Dan Carter Beard House (a designated National Historic Landmark [NHL]); 23 individually surveyed sites that contribute to the three historic districts in Covington (Kenton County); two sites which may potentially contribute to the Covington Downtown Commercial Historic District; and one site which may potentially contribute to the Ohio Riverside Historic District. The existing KY 8 Licking River Bridge appears eligible for listing in the NRHP. There are no NRHP-listed archaeological sites within the current study area. However, previous surveys have identified six recorded archaeological sites within and/or adjacent to the current study area. Very little of the study area has been surveyed for archeological resources, but based on a review of historic maps, the area has the potential for additional historic archaeological sites to be present. Due to the heavily modified nature of the soils within the study area, the potential for intact buried prehistoric archaeological deposits is reduced, unless they consist of deeply buried cultural horizons. However, it is likely that house lots, industrial or commercial lots, or other areas contain intact historic features, deposits, or midden.

Community Resources: Community resources and sensitive noise receptors in the study area include numerous single and multi-family residential housing units in Newport, apartment, condominium, and townhouse complexes in Covington, 2 churches, 1 school, and 1 park.

Environmental Overview

Stantec Consulting Services, Inc. has prepared this Environmental Overview as part of the KY 8 Licking River Bridge Scoping Study (KYTC Item #6-1086.00) being conducted for the Kentucky Transportation Cabinet (KYTC) District 6. This overview identifies known natural and human features which occur within the study area that should be considered during project development. The KY 8 alignment under review begins at the intersection with KY 17 in Kenton County and ends at the intersection with KY 9 in Campbell County, Kentucky (see **Figure 1**). The study area extends as a 1,000 foot buffer around the existing KY 8 alignment from begin point to end point, for a total area of 171 acres (0.27 square mile), within the cities of Covington in Kenton County and Newport in Campbell County (see **Figure 2**).

Table 1 below provides a summary of the features that were identified within the study area. Natural environment features within the study area are identified on **Figures 3.1** and **3.2** and human environment features are identified on **Figures 4.1** and **4.2**. The information listed in Table 1 and shown on the attached mapping was obtained from secondary sources and a pedestrian survey conducted on September 17, 2015. A photo inventory of the study area also is attached (**Attachment 8**), which highlights environmental features throughout the study area and shows representative views of land uses in the study area. This information provides an overview of resources of significance within the study area as well as other environmental issues of potential concern. More detailed environmental studies may be required as the project is further developed in accordance with the National Environmental Policy Act (NEPA).

Table 1: Environmental Resources/Features in the KY 8 Licking River Bridge Study Area Campbell and Kenton Counties, KY

Environmental Category	Resource/Feature	Source/Information
USGS Streams	Licking River (approximately 2,300 linear feet of channel) is the only USGS stream located within the study area. The Licking River is not classified as Special Use Waters within the study area as defined by the KDOW. It is designated as fully supporting WAH (warmwater aquatic habitat) and DWS (drinking water supply), while partially supporting PCR (primary contact recreation). Watersheds in the study area include Licking (HUC-8: 05100101) and Middle Ohio-Laughery (05090203). The study area is within a Zone III Source Water Assessment and Protection Program (SWAPP; KDOW, 2013) area, associated with the Northern Kentucky Water District and the Licking River basin.	Source: USGS 24K NHD dataset (2004), ESRI USGS map service layer, KDOW 305b and 303(d) tables (2012a), KDOW (2015a and 2015b), KDOW SWAPP (2013)
Other Streams	No additional surface streams are mapped or evident in the study area due to the highly developed, urban nature of the project area vicinity.	Source: USGS maps, ESRI topo maps service layer, field survey

Table 1: Environmental Resources/Features in the KY 8 Licking River Bridge Study Area Campbell and Kenton Counties, KY

Environmental Category	Resource/Feature	Source/Information
Wetlands	With the exception of the Licking River (designated L1UBH - lacustrine, limnetic, unconsolidated bottom), no NWI wetlands are mapped in the study area or vicinity. No mapped hydric soils occur in the study area or vicinity.	Source: KEPPC 24K NWI map dataset (2002), USDA SSURGO KY603 (2012)
Ponds	No ponds occur within the study area due to the highly developed, urban nature of the study area vicinity.	Source: KEPPC 24K NWI map dataset (2002), ESRI Aerial map service layer, aerial photo review (USDA, 2014)
USFWS Species List	Indiana bat (endangered) and northern long-eared bat (threatened) have the potential to occur in Campbell and Kenton Counties. Nine endangered mussels have the potential to occur in the study area including clubshell, fanshell, northern riffleshell, orangefoot pimpleback, pink mucket, purple cat's paw, ring pink, rough pigtoe and sheepnose. Running buffalo clover (endangered) has the potential to occur in the study area. Potential summer roost and foraging habitat for Indiana bat and northern long-eared bat (riparian woodlands) are confined to the narrow riparian corridor along both banks of the Licking River. No Priority Swarming or Maternity Sites for Indiana bat or mapped northern long-eared bat habitat occur in the study area or vicinity. All nine federally-listed mussel species have the potential to occur in the study area as the Licking River may provide suitable habitat for these medium to large river species. Habitat for running buffalo clover may be present in the study area along the banks of the Licking River and associated footpaths.	Source: USFWS IPaC Trust Resource Report (2015b), Indiana bat and northern long-eared bat habitat areas map (2015a), KYTC Environmental Overview web map (2015a), ESRI Aerial map service layer, NatureServe (2015)
KDFWR Species List	KDFWR lists 42 additional (beyond the 11 species listed by USFWS, above) State and Federal Threatened, Endangered, and Special Concern Species as occurring (either recently or historically) in Campbell and Kenton Counties. These include: • The federal and state endangered snuffbox and spectaclecase mussels • The federal and state threatened rabbitsfoot mussel • 14 state endangered species (2 fish, 1 amphibian, 8 birds, 3 mussels) • 11 state threatened species (6 birds, 2 mussels, 2 insects, 1 reptile) • 13 state special concern species (2 fish, 2 amphibians, 7 birds, 1 gastropod, 1 mammal) • 1 historical record of the state listed American Bittern	Source: KDFWR - Species Lists for Campbell and Kenton Counties, ESRI Aerial map service layer

Table 1: Environmental Resources/Features in the KY 8 Licking River Bridge Study Area Campbell and Kenton Counties, KY

Environmental Category	Resource/Feature	Source/Information
	The spectaclecase has the potential to occur in the study area (Licking River). The snuffbox and rabbitsfoot are typically found in smaller streams which are not present. Due to the highly developed nature of the study area, no suitable habitat for the other listed species would be expected to be present.	
KSNPC Species Database	There are 26 records of federal or state endangered, threatened, or special concern listed species within one mile of the study area. These include: • 17 mussels (15 federal-endangered, 1 federal-threatened); • 2 aquatic snails (historical records); • 2 fishes; and • 1 each vascular plant, insect, amphibian, breeding bird and mammal. The KSNPC data response specifically highlights in the project vicinity (1-mile) an historical record for Eastern Hellbender and recent records for Peregrine Falcon, in addition to records within 10-miles for Indiana bat (acoustical record only) and Barn Owl. See the USFWS and KDFWR sections above for additional discussion of listed species and their habitats.	Source: KSNPC Natural Heritage Database response (October 9, 2015), KSNPC County Report (2014)
Groundwater	Six (6) water wells occur within the study area, all listed as monitoring wells and associated with two properties along 5th Street, between Central Ave. and Columbia St. in Newport. No wellhead protection areas or mapped karst areas occur in the study area.	Source: KGS Water Wells GIS map, data repository and dataset layer (2015), KDOW Wellhead Protection Areas data download (2012)
Karst	The project area is underlain by bedrock with limited or no potential for karst development, with bedrock with moderate potential is located in the immediate vicinity. No sinkholes, indicative of karst bedrock, are mapped in the study area or vicinity.	Source: Karst Occurrence in Kentucky map (Paylor and Currens 2002), KGS (2003)
Floodplain	FEMA 100-Year floodplain occurs along the Licking River and the Ohio River west (downstream) of the Licking River confluence.	Source: FEMA National Flood Hazard Layers for Campbell County (2014) and Kenton County (2015), Kentucky
Floodway	FEMA designated floodway is present along the Licking River extending from the base of the levee in Campbell County to the top of bank in Kenton County.	Source: FEMA National Flood Hazard Layers for Campbell County (2014) and Kenton County (2015), Kentucky
Farmlands	No soils identified as 'Prime farmland' or 'Farmland of statewide importance' are present in the study area or vicinity. In addition, there are no active farms in the study area.	USDA SSURGO KY603 (2012)

Table 1: Environmental Resources/Features in the KY 8 Licking River Bridge Study Area Campbell and Kenton Counties, KY

Environmental Category	Resource/Feature	Source/Information
Hazardous Materials	Database records review summary: 24 sites of potential concern occur within the study area, including 2 state hazardous waste (SHWS) records, 3 Brownfields records, 6 RCRA records and 13 UST records (1 active). An additional 56 records are mapped within 0.25 mile of the study area including 3 CERCLIS and 10 SHWS records. Field survey indicated 4 additional potential hazardous materials concern sites including 2 manufacturing and 2 automotive service businesses, all located around 6th Street, 7th Street and Brighton Street in Newport. Summary: Aerial photography, topographic mapping and field survey indicate 28 potential hazardous materials sites are in or immediately adjacent to the study area, including 13 UST sites, 8 RCRA sites, 3 Brownfields sites, and several additional sites of potential concern (including historical auto stations, KY SHWS records, historical cleaners, Non-NPL CERCLIS records, auto salvage).	Source: Environmental Data Resources (EDR 2015), USEPA Envirofacts (2015a), aerial photo review (USGS DOQQ, 2012), ESRI USGS map service layer, field survey
Section 4(f)	James Taylor Park, located at the confluence of Licking and Ohio Rivers in Newport (Campbell County) is the only public park and Section 4(f) resource located in the study area. Bernadette Watkins Park, shown on mapping at 6th and Patterson in Newport, is no longer present and has been redeveloped as the Northern Kentucky Scholar House, a housing and education project. The Northern Kentucky Police Memorial at the entrance to the Suspension Bridge in Covington is located within the study area, however it is considered a not-likely Section 4(f) resource as the site is a dedicated memorial, not a park or recreation area.	Source: ESRI USA Parks dataset (2015), Kentucky Geography Network LocalParks dataset (2007), field survey
Section 6(f)	Based on current Land and Water Conservation Fund (LWCF) records, the only LWCF property in the study area was the Bernadette Watkins Park (6th and Brighton, Newport). However, this park has been recently developed for housing and education use as the Northern Kentucky Scholar House. Therefore, there are no Section 6(f) resources in the study area.	Source: National Park Service (2015), ESRI Aerial map service layer, field survey
Air Quality	The study area is in a Non-attainment Area for 8-hour ozone (2008 standard) and a Maintenance area for PM 2.5 (1997 standard) for the transportation-related criteria pollutants for which the EPA has established National Ambient Air Quality Standards (NAAQS). Portions of Campbell County adjacent to the study area are in a Non-attainment Area for Sulfur Dioxide (2010 standard). There are no project level concerns for air quality as the project will not increase roadway capacity. Two USEPA air emissions facilities are located within the study area.	Source: KYTC (2015b), USEPA Green Book (2015b), USEPA Envirofacts (2015)

Table 1: Environmental Resources/Features in the KY 8 Licking River Bridge Study Area Campbell and Kenton Counties, KY

Environmental Category	Resource/Feature	Source/Information
Noise	Noise sensitive land use areas are located throughout the study area (Activity Category "B" and "C" land uses – consisting of numerous single and multi-family residences, 2 churches, 1 school, 1 park and 1 public library). The study area is urbanized and contains high-density residential areas, which include a mixture of single and multi-family residential housing units, low-income apartment complexes in Newport and apartment, condominium and townhome complexes in Covington.	Source: KYTC Noise Policy (2011), field survey
Environmental Justice	The project area includes portions of Census Tracts 501 and 532 in Campbell County and 670 in Kenton County. Based on a review of the Socioeconomic Study prepared for the project, the percentages of minority residents in 4 out of 5 study area block groups range between 18.7% and 29.5%, greater than the percentages of minority population in Kenton and Campbell Counties. A review of low income population data indicates that the block groups in Campbell County included in the study area have very high rates of low income residents (between 24% and 44%) compared to the populations of the counties, state, and country, which range between 13.0% and 18.8%. Therefore, environmental justice is a potential issue in the study area.	Source: US Census, ACS 5-year data, 2009-2013, as presented in Project *Socioeconomic Study* (Thelen, 2015)
Cultural - Archaeology	Based on a review of National Register of Historic Places (NRHP) and Office of State Archaeology (OSA) records, it was determined that there are no archaeological sites listed on the NRHP within the current study area. However, previous surveys have identified six recorded archaeological sites within and/or adjacent to the current study area. Of the six sites, three were recommended for NRHP inclusion, one was not evaluated for NRHP listing, and two were considered to be ineligible for NRHP. In addition, based on a review of historic maps, the current study area has the potential for additional historic archaeological sites. Due to the heavily modified nature of the soils within the study area, the potential for intact buried prehistoric archaeological deposits is reduced, unless they consist of deeply buried cultural horizons. However, it is likely that house lots, industrial or commercial lots, or other areas contain intact historic features, deposits, or midden.	Source: *An Archaeological Records Review for the KY 8 Licking River Bridge Replacement in Campbell and Kenton Counties, Kentucky (Item No. 6-1086.00),* prepared by CRA (2015a)
Cultural - Historic	Based on a review of Kentucky Heritage Council (KHC) records and a windshield survey of the project area, the following resources were identified: The KY 8 Licking River Bridge appears eligible for listing in the NRHP (previous report assessment). Campbell County: one (1) historic district (the Newport Courthouse Square Historic District) currently listed on the National Register of Historic Places (NRHP) located within the	Source: *Cultural Historic Records Review and Windshield Survey for the Proposed KY 8 Licking River Bridge Replacement in Campbell and Kenton Counties, Kentucky,* prepared by CRA (2015b)

Table 1: Environmental Resources/Features in the KY 8 Licking River Bridge Study Area Campbell and Kenton Counties, KY

Environmental Category	Resource/Feature	Source/Information
	study area. Kenton County: three (3) historic districts - Licking Riverside Historic District, Ohio Riverside Historic District, and Covington Downtown Commercial Historic District; and a total of twenty-eight (28) previously surveyed individual sites, including: the Hearne House, which is listed individually in the NRHP; the Dan Carter Beard House, which is designated a National Historic Landmark (NHL); 23 individually surveyed sites that contribute to the three historic districts; two sites which may potentially contribute to the Downtown Commercial Historic District; and one site which may potentially contribute to the Ohio Riverside Historic District.	
Churches	There are two churches located within the study area: West 7th Street First Church of God (7th and Isabella) in Newport and Garrard Street Church of Christ (218 Garrard) in Covington.	Source: ESRI USGS map service layer, ESRI Aerial map service layer, GoogleMaps, KDOW Watershed Viewer (2015b), field survey
Schools	There are no primary or secondary schools located within the study area. Gateway Community & Technical College (higher education) has its North Central Area Health Education Center at 501 Greenup Street in Covington.	Source: ESRI USGS map service layer, ESRI Aerial map service layer, GoogleMaps, KDOW Watershed Viewer (2015b), field survey
Cemeteries	There are no cemeteries located within the study area.	Source: ESRI USGS map service layer, ESRI Aerial map service layer, GoogleMaps, KDOW Watershed Viewer (2015b), field survey
Public Services	There are multiple public service and utility facilities located within the study area including: Campbell County: County Courthouse County Detention Center (Jail) Regional Juvenile Detention Center Kentucky Probation & Parole Office Northern Kentucky Scholar House (housing assistance) Neighborhood Foundations (The Housing Authority of Newport) Newport Floodwall along Licking River Sanitation District 1 Fourth Street Flood Structure Kenton County: County Administration Building County Public Library	Source: ESRI USGS map service layer, ESRI Aerial map service layer, GoogleMaps, KDOW Watershed Viewer (2015b), field survey

Table 1: Environmental Resources/Features in the KY 8 Licking River Bridge Study Area Campbell and Kenton Counties, KY		
Environmental Category	**Resource/Feature**	**Source/Information**
Residences and Businesses	Residential land use in the study area includes a mixture of single and multi-family urban residential housing units, low-income apartment complexes in Newport and apartment, condominium and townhome complexes in Covington. Most of the residential neighborhoods have recently been or are currently experiencing gentrification / redevelopment activities. The study area includes a portion of the Covington Central Business District (3 blocks plus) in addition to retail businesses in Newport along 5th Street and an industrial area adjacent to the Licking River between 6th and 7th Streets. Project Description

NAME

KY 8 Licking River Bridge

PROJECT CODE

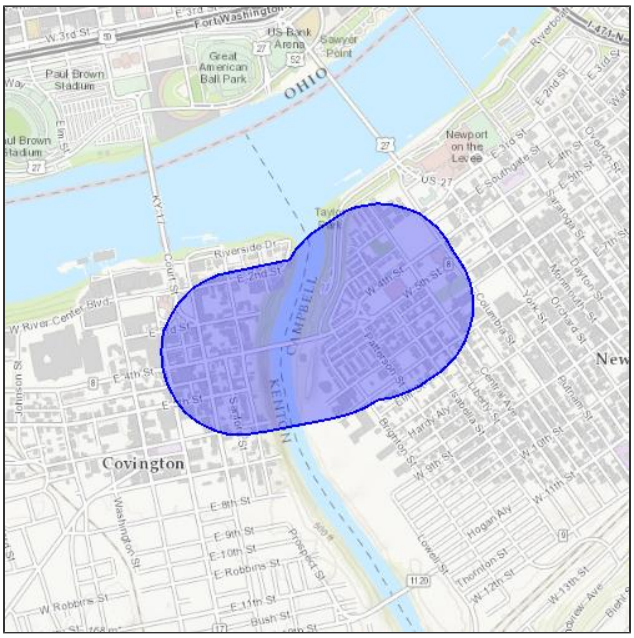

DG3LU-7H7RN-DSDL5-YE2IQ-A4YHYU

LOCATION

Campbell and Kenton counties, Kentucky

DESCRIPTION

Scoping Study to assess replacement of bridge over Licking River, including potential realignment of approach roads

U.S. Fish & Wildlife Contact Information

Species in this report are managed by:

Kentucky Ecological Services Field Office
J C Watts Federal Building, Room 265
330 WEST BROADWAY
Frankfort, KY 40601-8670
(502) 695-0468

Endangered Species

Proposed, candidate, threatened, and endangered species that are managed by the Endangered Species Program and should be considered as part of an effect analysis for this project.

This unofficial species list is for informational purposes only and does not fulfill the requirements under Section 7 of the Endangered Species Act, which states that Federal agencies are required to "request of the Secretary of Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action." This requirement applies to projects which are conducted, permitted or licensed by any Federal agency.

A letter from the local office and a species list which fulfills this requirement can be obtained by returning to this project on the IPaC website and requesting an Official Species List from the regulatory documents section.

Flowering Plants

Running Buffalo Clover Trifolium stoloniferum — **Endangered**

CRITICAL HABITAT
No critical habitat has been designated for this species.

https://ecos.fws.gov/speciesProfile/profile/speciesProfile.action?spcode=Q2RE

Mammals

Indiana Bat Myotis sodalis — **Endangered**

CRITICAL HABITAT
No critical habitat has been designated for this species.

https://ecos.fws.gov/speciesProfile/profile/speciesProfile.action?spcode=A000

Northern Long-eared Bat Myotis septentrionalis — **Threatened**

CRITICAL HABITAT
No critical habitat has been designated for this species.

https://ecos.fws.gov/speciesProfile/profile/speciesProfile.action?spcode=A0JE

Critical Habitats

Potential effects to critical habitat(s) within the project area must be analyzed along with the endangered species themselves.

There is no critical habitat within this project area

Migratory Birds

Birds are protected by the Migratory Bird Treaty Act and the Bald and Golden Eagle Protection Act.

Any activity which results in the take of migratory birds or eagles is prohibited unless authorized by the U.S. Fish and Wildlife Service (1). There are no provisions for allowing the take of migratory birds that are unintentionally killed or injured.

You are responsible for complying with the appropriate regulations for the protection of birds as part of this project. This involves analyzing potential impacts and implementing appropriate conservation measures for all project activities.

Bald Eagle Haliaeetus leucocephalus — **Bird of conservation concern**
Year-round
https://ecos.fws.gov/speciesProfile/profile/speciesProfile.action?spcode=B008

Black-billed Cuckoo Coccyzus erythropthalmus — **Bird of conservation concern**
Season: Breeding
https://ecos.fws.gov/speciesProfile/profile/speciesProfile.action?spcode=B0HI

Blue-winged Warbler Vermivora pinus — **Bird of conservation concern**
Season: Breeding

Cerulean Warbler Dendroica cerulea — **Bird of conservation concern**
Season: Breeding
https://ecos.fws.gov/speciesProfile/profile/speciesProfile.action?spcode=B09I

Chuck-will's-widow Caprimulgus carolinensis — **Bird of conservation concern**
Season: Breeding

Dickcissel Spiza americana — **Bird of conservation concern**
Season: Breeding

Fox Sparrow Passerella iliaca — **Bird of conservation concern**
Season: Wintering

Henslow's Sparrow Ammodramus henslowii — **Bird of conservation concern**
Season: Breeding
https://ecos.fws.gov/speciesProfile/profile/speciesProfile.action?spcode=B09D

Kentucky Warbler Oporornis formosus — **Bird of conservation concern**
Season: Breeding

Least Bittern Ixobrychus exilis — **Bird of conservation concern**
Season: Breeding

Prairie Warbler Dendroica discolor — **Bird of conservation concern**
Season: Breeding

Prothonotary Warbler Protonotaria citrea — **Bird of conservation concern**
Season: Breeding

Red-headed Woodpecker Melanerpes erythrocephalus — **Bird of conservation concern**
Year-round

Rusty Blackbird Euphagus carolinus — **Bird of conservation concern**
Season: Wintering

Sedge Wren Cistothorus platensis **Bird of conservation concern**

Season: Migrating

Short-eared Owl Asio flammeus **Bird of conservation concern**

Season: Wintering

https://ecos.fws.gov/speciesProfile/profile/speciesProfile.action?spcode=B0HD

Wood Thrush Hylocichla mustelina **Bird of conservation concern**

Season: Breeding

Worm Eating Warbler Helmitheros vermivorum **Bird of conservation concern**

Season: Breeding

Refuges

Any activity proposed on National Wildlife Refuge lands must undergo a 'Compatibility Determination' conducted by the Refuge. If your project overlaps or otherwise impacts a Refuge, please contact that Refuge to discuss the authorization process.

There are no refuges within this project area

Wetlands

Impacts to NWI wetlands and other aquatic habitats from your project may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal Statutes.

Project proponents should discuss the relationship of these requirements to their project with the Regulatory Program of the appropriate U.S. Army Corps of Engineers District.

DATA LIMITATIONS

The Service's objective of mapping wetlands and deepwater habitats is to produce reconnaissance level information on the location, type and size of these resources. The maps are prepared from the analysis of high altitude imagery. Wetlands are identified based on vegetation, visible hydrology and geography. A margin of error is inherent in the use of imagery; thus, detailed on-the-ground inspection of any particular site may result in revision of the wetland boundaries or classification established through image analysis.

The accuracy of image interpretation depends on the quality of the imagery, the experience of the image analysts, the amount and quality of the collateral data and the amount of ground truth verification work conducted. Metadata should be consulted to determine the date of the source imagery used and any mapping problems.

Wetlands or other mapped features may have changed since the date of the imagery or field work. There may be occasional differences in polygon boundaries or classifications between the information depicted on the map and the actual conditions on site.

DATA EXCLUSIONS

Certain wetland habitats are excluded from the National mapping program because of the limitations of aerial imagery as the primary data source used to detect wetlands. These habitats include seagrasses or submerged aquatic vegetation that are found in the intertidal and subtidal zones of estuaries and nearshore coastal waters. Some deepwater reef communities (coral or tuberficid worm reefs) have also been excluded from the inventory. These habitats, because of their depth, go undetected by aerial imagery.

DATA PRECAUTIONS

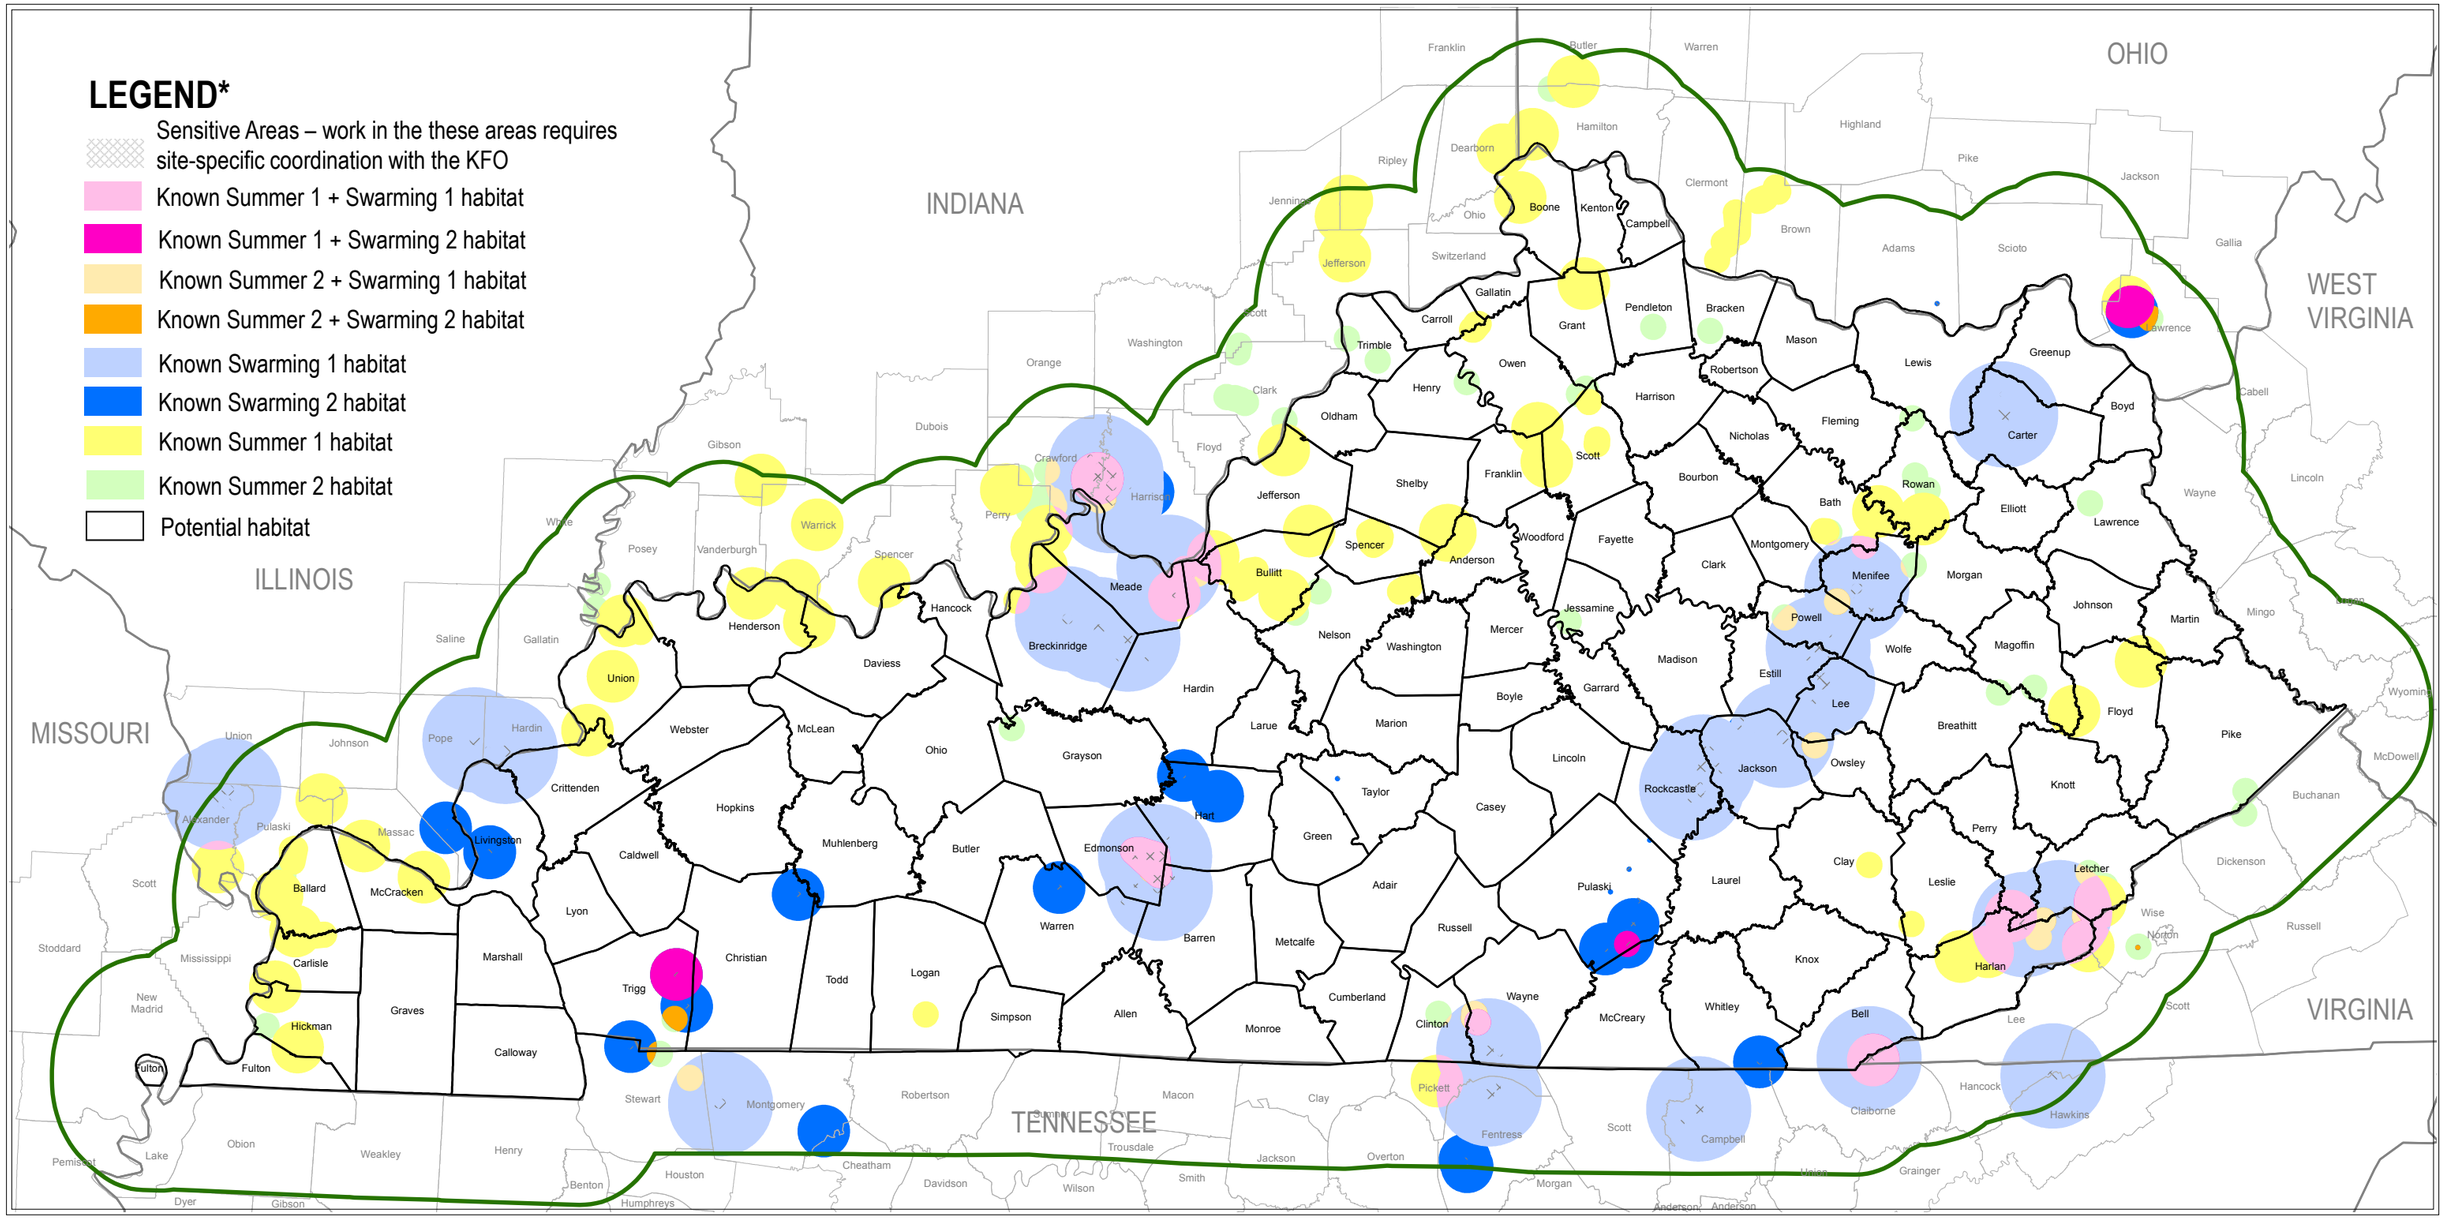

Federal, state, and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, state, or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate federal, state, or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

Data Request 16-031

Dear Mr. Leopold:

This letter is in response to your data request of September 8, 2015 for the KY_8_Licking_River_Bridge_Project (Campbell and Kenton County).We have reviewed our Natural Heritage Program Database to determine if any of the endangered, threatened, or special concern plants and animals or exemplary natural communities monitored by the Kentucky State Nature Preserves Commission occur near the project area on the Covington and Newport USGS Quadrangles, as shown on the map provided. Please see the attached reports for more information, which reflect analysis of the project area with three buffers applied:

1-mile for all records – 25 records
5-mile for aquatic records – 25 records (all presumed historic or extirpated)
5-mile for federally listed species – 16 records (all presumed historic or extirpated)
10-mile for mammals and birds – 8 records

Cryptobranchus alleganiensis alleganiensis (Eastern Hellbender, KSNPC endangered, federal species of management concern) has been found historically in the vicinity of the project and is a species that is found in running waters of fairly large streams and rivers. Multiple other mussel species have also been recorded within one and five miles of the project. Please see attached records for more information.

Myotis sodalis (Indiana myotis, federally listed endangered, KSNPC endangered) is known from only an acoustical record within ten miles of the project. A thorough survey for this species should be conducted by a qualified biologist if suitable habitat will be disturbed. In order to avoid impacts to bats, bottomland forests and riparian corridors, particularly near caves, should not be disturbed.

Falco peregrinus (Peregrine Falcon, KSNPC endangered, federal species of management concern) typically nests on rocky cliffs, bluffs, or dirt banks and has been recorded within one mile of the project. Ideal locations include undisturbed areas with a wide view, near water, and close to plentiful prey. Substitute man-made sites include tall buildings, bridges, rock quarries, and raised platforms.

Tyto alba (Barn Owl, KSNPC special concern) can be found in hollow trees, old buildings, barns, silos and other abandoned structures. Before demolition of existing structures, it should be determined that these birds are not present.

I would like to take this opportunity to remind you of the terms of the data request license, which you agreed upon in order to submit your request. The license agreement states "Data and data products received from the Kentucky State Nature Preserves Commission, including any portion thereof, may not be reproduced in any form or by any means without the express written authorization of the Kentucky State Nature Preserves Commission." The exact location of plants, animals, and natural communities, if released by the Kentucky State Nature Preserves Commission, may not be released in any document or correspondence. These products are provided on a temporary basis for the express project (described above) of the requester, and may not be redistributed, resold or copied without the written permission of the Kentucky State Nature Preserves Commission's Data Manager (801 Schenkel Lane, Frankfort, KY, 40601. Phone: (502) 573-2886).

Please note that the quantity and quality of data collected by the Kentucky Natural Heritage Program are dependent on the research and observations of many individuals and organizations. In most cases, this information is not the result of comprehensive or site-specific field surveys; many natural areas in Kentucky have never been thoroughly surveyed, and new plants and animals are still being discovered. For these reasons, the Kentucky Natural Heritage Program cannot provide a definitive statement on the presence, absence, or condition of biological elements in any part of Kentucky. Heritage reports summarize the existing information known to the Kentucky Natural Heritage Program at the time of the request regarding the biological elements or locations in question. They should never be regarded as final statements on the elements or areas being considered, nor should they be substituted for on-site surveys required for environmental assessments. We would greatly appreciate receiving any pertinent information obtained as a result of on-site surveys.

If you have any questions or if I can be of further assistance, please do not hesitate to contact me.

Sincerely,

Sara Hines
Data Manager

KSNPC monitored aquatic species within 5 miles of the KY_8_Licking_River_Bridge_Project (Campbell and Kenton County))

EOCODE EOID	SNAME EO Type	SCOMNAME	GRANK	SRANK	SPROT	USESA	OTHER STATUS	IDENT	LASTOBS	PREC	EORANK	COUNTY	7.5 MINUTE QUADRANGLE	LAT	LONG	EPA WATERBODY	DIRECTIONS	HABITAT
IMBIV21110*012 603	*Lampsilis abrupta*	Pink Mucket	G2	S1	E	LE		Y	1980-pre	G	X	Kenton Campbell Boone	Covington Newport Addyston Burlington	[redacted]	[redacted]	050902030201 - Town of Newport-Ohio River 050902011208 - Ninemile Creek-Ohio River 050902030204 - Garrison Creek-Ohio River 050902030202 - Dry Creek-Ohio River	Ohio River, at Cincinnati, OH, Hamilton Co.	Large rivers in habitats ranging from silt to boulders, but apparently more commonly from gravel and cobble. Collected from shallow and deep water with current velocity ranging from zero to swift (Ahlstedt 1983, Bogan and Parmalee 1983, Buchanan 1980), but never standing pools of water (Lauritsen 1987).
IMBIV21130*015 3627	*Lampsilis ovata*	Pocketbook	G5	S1	E			Y	1988-pre	G	X	Kenton Campbell	Covington Newport	[redacted]	[redacted]	050902030201 - Town of Newport-Ohio River 050902030202 - Dry Creek-Ohio River	Ohio River at Cincinnati, OH.	Considered a large river species (Clench and Van Der Schalie 1944, Parmalee 1967, Stansbery 1976), but occurs in medium-sized streams in gravel, sand, or even mud (Parmalee 1967, Johnson 1970, Gordon and Layzer 1989). In the Lower Wabash and Ohio Rivers specimens were taken in deep water (6-10 feet or more) in current from sand or gravel.
IMBIV22020*006 1059	*Lasmigona compressa*	Creek Heelsplitter	G5	S1	E			Y	1985-pre	G	X	Kenton Campbell	Covington Newport	[redacted]	[redacted]	050902030201 - Town of Newport-Ohio River 050902030202 - Dry Creek-Ohio River	Ohio River, Cincinnati, Hamilton Co., Ohio.	Generally occurs in creeks, small streams, and headwaters of larger rivers in sand, fine gravel, or mud bottoms, usually in swift water below riffles (Clarke 1981; Goodrich and Van Der Schalie 1944; Parmalee 1967; Taylor 1980a, b).

MAP AND CHART 33
Series XII, 2001

KARST OCCURRENCE IN KENTUCKY

Randall L. Paylor and
James C. Currens

This map was compiled from a digital version of the 1:500,000-scale geologic map of Kentucky (Noger, M.C., comp., 1988, Geologic map of Kentucky: U.S. Geological Survey). The areas of potential karst development were delineated using stratigraphic units mapped on the geologic map. The classification of the potential for karst development was based on the field experience of the authors and other data. A number of isolated carbonate units that would not have otherwise been differentiated on the geologic map were newly digitized for this map.

This karst map should not be used for evaluating karst geologic hazards or hydrogeology at scales larger than 1:500,000. The base geologic map was digitized at 1:500,000 scale and is limited in precision to that scale. Because of the small scale of the original geologic map, lithostratigraphic units were consolidated into thicker chronostratigraphic units to create an area large enough to delineate on the geologic map. In some cases, the consolidation resulted in carbonates (limestone or dolomite) and noncarbonates (sandstone or shale, for example) being grouped; these rocks are not redivided on this map. Although the potential for karst development can be predicted from lithology, other factors such as relief and length of time the rock is exposed are also important and were not considered in the making of this map. Finally, areas where the near-surface bedrock is insoluble and closely underlain by soluble rock are common, particularly in the Eastern Pennyroyal. Conduits that pirate drainage commonly extend through ridges capped with insoluble rocks. Therefore, some areas mapped as having limited potential that are adjacent to areas of higher potential are actually karst, but cannot be differentiated on this map.

Karst is a terrane that is generally underlain by limestone or dolomite, where the topography is formed chiefly by the dissolving of rock. Karst landscapes are commonly characterized by sinkholes, sinking streams, closed depressions, subterranean drainage, large springs, and caves.

Karst regions are susceptible to unique problems such as sinkhole collapse, sinkhole flooding, and rapid groundwater pollution. Springs in karst areas are an important, productive source of groundwater. Rare biologic communities and endangered species can be found in the fragile underground environments developed in karst landscapes.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 10/25/2013 has revealed that there are 2 CERCLIS sites within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
COVINGTON GASLIGHT C	8TH AND GARRARD STRE	S 1/8 - 1/4 (0.165 mi.)	Q75	166
NEWPORT GASLIGHT	910 LOWELL ST	SSE 1/4 - 1/2 (0.302 mi.)	122	255

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there are 2 CERC-NFRAP sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/10/2015 has revealed that there are 4 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

KY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Protection's Uncontrolled Site Branch List.

A review of the KY SHWS list, as provided by EDR, and dated 06/22/2015 has revealed that there are 39 KY SHWS sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal leaking storage tank lists

KY PSTEAF: The Underground Storage Tank Branch (USTB) has ranked all PSTEAF reimbursable facilities requiring corrective action, in accordance with 401 KAR 42:290. Directive letters will be issued on the basis of facility ranking and available PSTEAF funding in sequential order as ranked. For example, Rank 2 facilities will be issued directives before Rank 3 facilities.

A review of the KY PSTEAF list, as provided by EDR, and dated 07/01/2015 has revealed that there is 1 KY PSTEAF site within approximately 0.5 miles of the target property.

NORB NIE SERVICE STA Facility Id: 54733	***1042 RUSSELL ST***	***SW 1/4 - 1/2 (0.445 mi.)***	***133***	***275***

KY SB193: The inventory indicates facilities that have performed permanent closure activities at a regulated underground storage tank facility and have known soil and/or groundwater contamination.

A review of the KY SB193 list, as provided by EDR, and dated 09/05/2006 has revealed that there are 7 KY SB193 sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

KY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Protection's Owner/Facility Report of All Tanks Regardless of Status list.

A review of the KY UST list, as provided by EDR, and dated 05/11/2015 has revealed that there are 35 KY UST sites within approximately 0.25 miles of the target property.

State and tribal Brownfields sites

KY BROWNFIELDS: The Kentucky Brownfield Program has created an inventory of brownfield sites in order to market the properties to those interested in brownfield redevelopment. The Kentucky Brownfield Program is working to promote the redevelopment of these sites by helping to remove barriers that prevent reuse, providing useful information to communities, developers and the public and encouraging a climate that fosters redevelopment of contaminated sites.

A review of the KY BROWNFIELDS list, as provided by EDR, and dated 05/05/2015 has revealed that there are 9 KY BROWNFIELDS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/10/2015 has revealed that there are 20 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 3 EDR MGP sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

THE CINCINNATI GASLI	MEHRING WAY	WNW 1/2 - 1 (0.803 mi.)	148	287

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 18 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 5 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Alias Comments: Not reported
Site Description: The Site was formerly operated by the Union Light, Heat and Power Co.used as a manufactured gas plant (MGP) dating back to the late 1800s. In the 1930s, the site stopped producing coal gas. The site is now used as a City park (Randolph Park), which includes a baseball field and a swimming pool. The potential threats associated with former MGPs involve the presence of coal tars, which consist of polycyclic aromatic hydrocarbons (PAHs). Several PAH constiituents, such as benzo(a)pyrene, are suspected probable human carcinogens, and an evaluation of the site is needed to address potential exposure issues.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the

ATLAS DRY CLEANERS CO INC (Continued) **1000156836**

National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US BROWNFIELDS:

Recipient name:	Covington, City of
Grant type:	Assessment
Property name:	114 PIKE ST.
Property #:	Not reported
Parcel size:	.12
Property Description:	The building housed a paint manufacturing facility from the early 1900s until the mid 1960s. City directories dated 1931, 1941, 1948, 1954, 1959, and 1964 list Boehmer Paint Company and KY Paint Works only in 1931. Apparently 114 West Pike Street was vacant from at least 1969 to 1989. In the 1999 and 2002 City directories, Taninos Restaurant is listed. The 2007 City directory does not have a listing for 114 West Pike Street. Fire Insurance Maps show a paint manufacturer in 1886, paint manufacturer and furniture store in 1894, a paint manufacturer in 1909, 1949, 1954, 1963, and 1980.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

HAZARDOUS WASTE BIENNIAL REPORTER

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA’s programs. The vision for ICIS is to replace EPA’s independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also

IPSCO TUBULARS (KENTUCKY) INC (Continued) **1000348832**

has the capability to track other activities occurring in the Region
that support Compliance and Enforcement programs. These include;
Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Status:	**Managed**
Description:	TEXACO SITE (Closed: Contained/Managed)This site was formerly a Texaco station. Brownfields assessment determined the presence of PAHs and lead not attributed to removed (regulated) USTs. Investigation determined the contamination was from the fill material historically used to grade the site. City of Bellevue proposed plan for management of the site by paving it and construction of commercial businesses. Plan was approved and implmented, then property was sold to BrandiCorp/D.R. Inn.

Description:	TEXACO SITE (Closed: Contained/Managed)This site was formerly a Texaco station. Brownfields assessment determined the presence of PAHs and lead not attributed to removed (regulated) USTs. Investigation determined the contamination was from the fill material historically used to grade the site. City of Bellevue proposed plan for management of the site by paving it and construction of commercial businesses. Plan was approved and implmented, then property was sold to BrandiCorp/D.R. Inn.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/26/2015

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/26/2015

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300

CRA Project No.: K15S016
October 27, 2015

Project Description

In October 2015, Cultural Resource Analysts, Inc. (CRA), personnel completed an archaeological records review for the proposed KY 8 Licking River bridge replacement in Campbell and Kenton Counties, Kentucky (Item No. 6-1086.00). The review was conducted at the request of Brian Aldridge of Stantec Consulting Services, Inc., on behalf of the Kentucky Transportation Cabinet (KYTC). The KYTC is exploring options to replace the KY 8 (Fourth Street) bridge over the Licking River on the Campbell and Kenton County line. This bridge provides a critical multimodal link between the communities of Covington and Newport, Kentucky. CRA is conducting this archaeological records review as part of the required environmental documentation. The study area that comprised the records review consisted of an approximately 610 m (2,000 ft) wide corridor, centered on existing KY 8 from KY 17 in Covington to KY 9 in Newport (Figure 1). The distance along KY 8 from KY 17 to KY 9 is approximately 885 m (2,904 ft). In total, the study area encompasses approximately 69.4 ha (171.5 acres) of land. Elevations for portions of the study area range from approximately 145 to 159 m (475 to 523 ft) above mean sea level (AMSL).

Records Review

A search of records maintained by the National Register of Historic Places (NRHP) (available at: http://nrhp.focus.nps.gov/natreghome.do?searchtype=natreghome) and the Office of State Archaeology (OSA, registration number not assigned) was conducted to: 1) determine if the study area had been previously surveyed for archaeological resources; 2) identify any previously recorded archaeological sites that were situated within the study area; 3) provide information concerning what archaeological resources could be expected within the study area; and 4) provide a context for any archaeological resources recovered within the study area. The NRHP records indicated that no archaeological sites listed on the NRHP were situated within the current study area.

OSA Geographic Information Systems data requested by CRA on October 1, 2015, was returned on October 5, 2015. The results were researched by Katherine McKinney of CRA at the OSA on October 6, 2015. The results of the OSA records review are depicted in Figure 1. The work at the OSA consisted of a review of professional survey reports and records of archaeological sites located within and/or adjacent to the study area. The study area is within the Covington (United States Geological Survey [USGS] 1981 [Photorevised 1987]), and Newport (USGS 1983 [Photorevised 1987]), Kentucky-Ohio, 7.5-minute series topographic quadrangles.

RE: Cultural Historic Records Review and Windshield Survey for the Proposed KY 8 Licking River Bridge Replacement in Campbell and Kenton Counties, Kentucky
CRA Project Number: K15S015
Contract Publication Series: 15-383

Dear Mr. Leopold,

In October 2015, Cultural Resource Analysts, Inc. (CRA), personnel completed a cultural historic records review and windshield survey for the proposed KY 8 Licking River Bridge Replacement in Campbell and Kenton Counties, Kentucky (Figures 1 and 2). The study was conducted at the request of Stantec Consulting Services, Inc., on behalf of the Kentucky Transportation Cabinet (KYTC) in support of the KY 8 Licking River Bridge Scoping Study. The purpose of the Scoping Study is to explore options to replace the KY 8 (Fourth Street) bridge over the Licking River on the Campbell and Kenton County line. This bridge provides a critical multimodal link between the communities of Covington and Newport, Kentucky. Investigations focused on a Study Area defined by the project team to include an approximately 2,000 ft wide corridor centered on existing KY 8 from KY 17 (Greenup Street) in Covington to KY 9 (Central Avenue) in Newport (Figures 1 and 2). The objective of the cultural historic records review and windshield survey was to identify National Register of Historic Places (NRHP) listed, eligible, or potentially significant properties in the Study Area that should be taken into consideration as project plans are developed. At the request of the project team, CRA was particularly focused on properly mapping known historic districts and identifying any additional potential historic districts located in the Study Area or within the larger viewshed of the project. An archaeological study is being conducted by CRA in conjunction with the cultural historic component; it will be submitted under separate cover (McAlpine and Bybee 2015).

CRA personnel completed a records review at the Kentucky Heritage Council (KHC) on October 8 and 15, 2015. GIS data provided by KHC (FY16-2270) indicated that there are 8 previously surveyed sites (CPN 4, 5, 6, 20, 23, 58, 59, and 61) with undetermined NRHP statuses and 1 NRHP-listed historic district (the Newport Courthouse Square Historic District) located within the Study Area in Campbell County and a total of 30 previously surveyed individual sites and 3 historic districts located within the Study Area in Kenton County. Eleven of the previously surveyed sites in the Kenton County portion of the Study Area have been reassigned new KHC Historic Resource site numbers, although the KHC GIS continues to utilize the old site numbers.

Corporate Headquarters
151 Walton Avenue
Lexington, KY 40508
office 859.252.4737
fax 859.254.3747
www.crai-ky.com

Therefore, in this report CRA refers to the new, current KHC Historic Resource site numbers but also indicates the previous site numbers. The 30 sites in Kenton County include 4 previously surveyed sites (KECO 16 [old number KEC 16], KEC 35, KECB 22 [KEC 38], and KECR 2 [KEC 136]) with undetermined NRHP statuses; the Hearne House (KECR 3 [KEC 21]), which is listed individually in the NRHP; the Dan Carter Beard House (KECO 18 [KEC 20]), which is designated a National Historic Landmark (NHL); the Champion Ice & Cold Storage Co. (KEC 6), which was removed from the NRHP following its demolition in 1987; the Licking Riverside Historic District, Ohio Riverside Historic District, and Covington Downtown Commercial Historic District; and 23 individually surveyed sites that contribute to these historic districts. These properties are summarized in Tables 2–6. It should also be noted that the City of Covington administers three Historic Preservation Overlay Zones within the Study Area; the boundaries for these zones roughly correspond with the boundaries for the three NRHP-listed historic districts.

The records review included a review of previous cultural historic resource reports on file at KHC. This review identified a total of five previous studies that overlap the Study Area, which are summarized in Table 1. The *Historical and Architectural Survey Baseline Study for the Proposed New Bridge Over the Ohio River Between Covington, Kentucky and Cincinnati, Ohio* report was completed in 1993 by Fred Mitchell of Historic Preservation Associates of Cincinnati, Ohio. The Study Area for the 1993 report overlaps with the Study Area for the proposed KY 8 Licking River Bridge replacement. A portion of the Covington Downtown Commercial Historic District and the Ohio Riverside Historic District overlap with both the 1993 and current Study Areas, but no previously surveyed resources for the 1993 report are included in the current Study Area. The Kenton County Building at 303 Court Street, which is located in the current Study Area, was identified in the 1993 report as less than 50 years of age. The Kenton County Building does not have a KHC Historic Resource site number and does not appear to be individually eligible for listing in the NRHP based upon field observations by CRA staff (Mitchell 1993:23–24).

The one-half-mile radius APE was reduced to a visual APE for the 2005 report entitled *A Cultural Historic Survey Report for Cincinnati Bell Wireless Telecommunications Tower CN-542 in Covington, Kenton County, Kentucky* completed by Margo Warminski of Environment and Archaeology, LLC. While the one-half-mile APE reached into the current Study Area, the reduced visual APE does not overlap with the current Study Area (Warminski 2005). Similar to the previous report, the *2008 Section 106 – Determination of Effect for the Proposed Collocation of Communications Antennas on a Roof Top Newport-CVG-354A 33 East 9th Street* by Lori Davenport-Parker of Civil and Environmental Consultants, Inc., had a one-half-mile APE that extended into the current Study Area but was reduced to a visual APE that did not overlap with the current Study Area (Davenport-Parker 2008). The *FCC Form 621 for the CBW CN-586-04 Collocation at 1 Dave Cowans Drive, Newport, Campbell County, Kentucky* report was completed in 2008 by Jodi Keller of Environmental Resources Management of Cincinnati, Ohio. The original one-quarter-mile APE for the collocation telecommunications equipment at 1 Dave Cowans Drive overlapped with the current Study Area for the proposed KY 8 Licking River Bridge replacement but was reduced to a visual APE immediately surrounding the proposed collocation after consultation with the KHC. The revised visual APE for the 2008 report does not overlap with the Study Area for the proposed KY 8 Licking River Bridge replacement (Keller 2008). Sheldon McLeod of the GPD Group in Akron, Ohio, completed the 2011 *Proposed Collocation at Newport on the Levee Telecommunications Cell Site, Newport, Kentucky* report. The one-half-mile APE for this 2011 report overlapped with the current Study Area for the current proposed KY 8 Licking River Bridge replacement but the visual APE was reduced to the immediate area of the collocation site, which is not in the vicinity of the current proposed Study Area (McLeod 2011).

Additionally, CRA personnel reviewed available reports and inventories regarding historic bridges in Kentucky to identify any past documentation of the KY 8 Licking River Bridge (059B00037N), which has not been formally surveyed for KHC. The 1996–1997 study of *Historic Highway Bridges in Kentucky, 1792-1950*, prepared by Wilbur Smith Associates, Inc., for the Kentucky Transportation

Cabinet, lists the bridge and identifies it as eligible for listing in the NRHP (Hudson 1997). More recently, the bridge was documented in the *Assessment of Kentucky's Historic Truss Bridges*, prepared by the University of Kentucky, College of Engineering's Kentucky Transportation Center in 2013. As described in that report, the bridge, known as the Veterans Memorial Bridge, was constructed in 1936. It is composed of a polygonal Warren through truss with verticals, two Warren deck truss spans, and 11 girder spans. The bridge is 1,002 ft long with a maximum span of 250 ft and a deck width of 36 ft. The report also states that the bridge appears eligible for listing in the NRHP (O'Connell et al. 2013).

Trent Spurlock and Sarah Reynolds of CRA completed the windshield survey on October 21, 2015, noting the current condition of previously surveyed resources and identifying undocumented resources and assessing them for potential significance. Both individual resources and larger neighborhoods and potential historic districts were assessed during the survey. The NHL-designated Dan Carter Beard House (KECO 18 [KEC 20]), associated with one of the principal creators of the Boy Scouts, and the NRHP-listed Hearne House (KECR 3 [KEC 21]), an imposing residence associated with a prominent local business person, are extant and retain those characteristics that make them designated and/or eligible for listing in the NRHP. Four NRHP-listed historic districts are partially situated in the Study Area for the proposed KY 8 Licking River Bridge replacement, three on the west side of the river in Covington (Ohio Riverside Historic District; Licking Riverside Historic District; and the Covington Downtown Commercial Historic District) and one (Newport Courthouse Square Historic District) at the northeastern boundary of the Study Area in Newport. The boundaries of these districts in the vicinity of the proposed project remain appropriate, and previously recorded contributing resources retain integrity and continue to contribute to each of the three NRHP-listed historic districts. No additional potential historic districts were identified by the windshield survey.

During the windshield survey, CRA's architectural historians noted the locations of four additional potentially significant resources in Kenton County, which are briefly described and pictured in Table 4 and mapped on Figures 1 and 2. One of these resources, the KY 8 Licking River Bridge, has not been previously surveyed and does not have a KHC Historic Resources site number, although previous bridge inventories indicate that it is eligible for listing in the NRHP. The remaining three potentially significant resources have been previously identified with an "undetermined" NRHP status in KHC's database. CRA recommends that one (KECO 16 [KEC 16]) potentially contributes to the Ohio Riverside Historic District and two (KEC 35 and KECB 22 [KEC 38]) potentially contribute to the Downtown Commercial Historic District.

Two of the previously identified resources in the KHC GIS indicated (CPN 20 and KECR 2 [KEC 136]) as having an undetermined NRHP status are included in Table 5. During the windshield survey CRA's architectural historians identified site CPN 20 in Newport and it appears much as it did when previously reported and thus remains ineligible for listing in the NRHP. During the windshield survey it was determined that Site KECR 2 (KEC 136) is located outside the current Study Area. In addition, CRA architectural historians identified the locations of seven previously identified sites (CPN 4, CPN 5, CPN 6, CPN 23, CPN 58, CPN 59, and CPN 61); all in Newport in Campbell County, which are no longer extant (see Table 6). One previously identified resource (KEC 6), according to the KHC GIS, was indicated as removed from the NRHP and demolished in 1987. This resource (KEC 6), situated in Covington, Kenton County, was determined by CRA staff to have actually been located outside the current Study Area when it was extant.

Three previously recorded resources were situated in or very near the Study Area for the KY 8 Licking Bridge replacement according to KHC GIS data, including the NRHP-listed Northern Bank of Kentucky (KEC 37); and the NRHP-eligible Boro Brothers Office Building (KEC 103) and Boro Brothers Confectionary and Saloon (KEC 104). After field inspection by CRA staff, all three were determined to have been located outside the current Study Area. The NRHP-listed Northern Bank of Kentucky (KEC 37) is extant, but the other two previously identified resources (KEC 103 and KEC 104) are no longer extant.

As previously noted, portions of three existing NRHP-listed historic districts are situated in the Study Area for the proposed KY 8 Licking River Bridge replacement in Covington: Ohio Riverside Historic District; Licking Riverside Historic District; and the Covington Downtown Commercial Historic District. One historic district, the Newport Courthouse Square Historic District, is situated on the east side of the river, just slightly overlapping the northeastern boundary of the Study Area. The Ohio Riverside Historic District is roughly bounded by the Licking River to the east, East Fourth Street to the south, the Ohio River to the north, and Sanford Alley to the west with an extension to the west to Court Avenue. The historic district is primarily comprised of residential and commercial structures exhibiting various forms and stylistic attributes from the second half of the nineteenth century (Figures 3–5). Parking lots and twentieth- and early-twenty-first-century infill can also be found in the historic district. The Licking Riverside Historic District is bounded to the north by East Fourth Street, by the Licking River to the east, East Eighth Street to the south, and generally by Greenup Street and Tobacco Alley to the west. This historic district is primarily filled with single and multi-family dwellings dating to the second half of the nineteenth and first half of the twentieth century (Figures 6–8). Only a small portion of the Covington Downtown Commercial Historic District is located in the west and southwest sections of the Study Area for the proposed KY 8 Licking River Bridge replacement. This small area of the overall historic district includes nineteenth-century commercial structures and the Masonic Hall (KECB 22 [KEC 38]), but also parking lots and infill from the second half of the twentieth century (Figures 9–10). Only the southwestern edge of the Newport Courthouse Square Historic District falls within the Study Area. This part of the district includes the rear yard of the courthouse, located behind a large rear addition. No contributing resources within the district fall within the Study Area. The boundaries for the four NRHP-listed historic districts situated partially in the Study Area for the KY 8 Licking River Bridge are appropriate at this time and do not need to be altered. Although the CRA architectural historians recognize modifications have taken place in that portion of the Covington Downtown Commercial Historic District within the Study Area, the existing NRHP boundary for the historic district continues to encompass an area that maintains its historic character and this portion of the district retains integrity for listing in the NRHP as a historic district.

Generally, there were few intact cultural historic sites observed in the eastern portion of the Study Area in Newport, Campbell County. Historically, the area has been densely populated and many historic structures and residences have been demolished. An earthen floodwall has been constructed along the Licking River in this portion of the Study Area and most of the structures have been demolished in the northeastern portion of the Study Area east of the Licking River and north of KY 8 (Figures 11–12). In the extreme northeast portion of the Study Area are two-story multi-family housing units constructed after 1960. To the immediate south of the eastern approach spans of the KY 8 Licking River Bridge are multi-family housing units dating to between 1949 and 1960 and another group dating to after 1960. The Public Housing in the United States NRHP Multiple Property Submission covers public housing from 1933 to 1949, which is prior to the construction of the housing units in the Study Area (Lusignan et al. 2004). It is very doubtful the multi-family housing units in Newport are eligible for listing in the NRHP, although additional research may be warranted, as portions are adjacent to the existing eastern approach and eastern spans of the bridge. The south and southeastern portion of the Study Area in Newport is primarily comprised of multi-family apartment complexes dating to the second half of the twentieth century (Figures 13–14). Commercial/industrial establishments are situated at the southwestern terminus of W. 6th Street. Most of the remaining historic housing stock in the Study Area in Newport is situated southeast of West Seventh Street. The remaining resources 50 years of age or older observed in this portion of Study Area are generally late-nineteenth- and early- to mid-twentieth-century residences. Most of these resources have numerous alterations or have deteriorated to an extent that they have diminished integrity and are unlikely to be eligible for listing in the NRHP (Figure 15). The windshield survey did not identify any structures in the eastern portion of the Study Area that appear individually eligible for listing in the NRHP, nor did it identify any potential historic districts.

The Study Area is more than adequate as a cultural historic APE for the proposed project as examined during the windshield survey. The western portion of the Study Area in Covington, Kenton County includes portions of three NRHP-listed historic districts. Two of the historic districts, the Ohio Riverside and Licking Riverside Historic Districts, are adjacent to the KY 8 Licking River Bridge. The western banks of the Licking River are lined with mature trees, obscuring the bridge from all but the closest dwellings in the adjacent historic districts (Figure 16). A two-story, flat-roof, government building constructed between 1949 and 1960 is the closest structure to the bridge in the Ohio Riverside Historic District (Figure 17) and this structure would be non-contributing to the historic district. To the south of this structure, on the opposite side of KY 8 (East Fourth Street) in the Licking Riverside Historic District, is a paved parking lot with a mortared stone wall along the sidewalk aligned with East Fourth Street. The clearest views of the bridge from the western side would be from the two-and-one-half-story dwelling on the northwest corner of East Fourth and Garrard Streets (in the Ohio Riverside Historic District) and south across the street from the Senator Richard P. Ernst House (KEC 176) at 405 Garrard Street in the Licking Riverside Historic District. Even from these two structures the bridge is partly to mostly obscured from view. The only direct views of the bridge is from the sidewalks aligned along either side of East Fourth Street (Figure 18) because of the mature vegetation, the built environment, and the distance of most of the buildings in the three historic districts from the KY 8 Licking River Bridge.

The east bank of the Licking River in Newport, Campbell County is also aligned with mature vegetation and trees, although the coverage is not as dense as along the opposite bank. The east bank is also lower than the west bank in Covington, Kenton County. With less vegetation coverage, the lower bank (therefore the bridge is higher from grade than on the west bank), and the loss of building stock, the bridge is more visible within the Newport portion of the Study Area (see Figures 11 and 12). As described previously, multi-family housing units dating to the second half of the twentieth century are located in the extreme northeast portion and to the immediate south of KY 8 (Fourth Street) of the Study Area. The majority of the Newport Courthouse Square Historic District, including the Campbell County Courthouse (CPN 142), is located just outside the northeast edge of the Study Area. A large addition has been constructed within the last eight years to the southwest of the original courthouse that blocks the view from the original block of the building to the KY 8 Licking River Bridge. Effects to other structures in the general area of the courthouse situated outside the Study Area are mitigated by the distance from the existing bridge and their orientation away from the bridge. The historic structures/housing stock dating to the late nineteenth to early twentieth century are found in the southeastern portion of the Study Area in Newport. The density of these structures and their distance obscures the view of the bridge (Figures 19 and 20). Thus, given the character of development along either side of the river, the windshield survey found that the Study Area appropriately encompasses the viewshed of the bridge and accounts for potential effects of the proposed project.

The attached tables and maps detail the extent of the Study Area and the locations and NRHP-eligibility recommendations of the identified resources. Three of the existing historic districts were listed in the NRHP in the 1970s and early 1980s and were not thoroughly surveyed and each individually contributing resource in most instances was not identified in the NRHP nominations. The portion of Newport in the Study Area has been vastly altered in recent decades, but the remaining historic building stock has not been thoroughly surveyed. Since the majority of the Study Area has not been subject to formal cultural historic survey, additional investigations such as a thorough baseline survey of a refined APE may be required as project plans are developed. If you have any questions, please do not hesitate to contact me at your convenience.

Sincerely,

Trent Spurlock
Architectural Historian, Principal Investigator
