II. PROJECT PURPOSE AND NEED (cont.)

D. Modal Interrelationships

There are no direct modal interelationships that are affected by this project.

E. Social Demands & Economic Development

There are several schools, including the community college, that will benefit from a safer less congested route. There are no known future developments that would affect or be affected by this route.

F. Transportation Demand

The last actual counts for these sections from CTS are: Section 1 - 5,010, Section 2 - 3010. Traffic has declined slowly over the past 10 years for Section 1; however, Section 2 traffic flow has remained consistent over the same time period.

G. Capacity

There is congestion on this route including student drivers. Once the turn lanes are added, it is possible that capacity won't be as much of an issue.

H. Safety

This route is heavily used by school traffic. The majority of the crashes on this route are rear ends. There are several crashes at the intersections where turn lanes are being proposed. The Critical rate factor for this route ranges from 1.649 near US 68, to 0.9860 near Glass Avenue on down to 0.2910 near the end of the project.

I. Roadway Deficiencies

The route currently does not have turn lanes at two heavily traveled intersections.

Draft Purpose and Need Statement:

Need: KY 9007 (North Drive) is congested and has a lot of school traffic. There are several crashes (mostly rear ends) that lead to a high CRF for a lot of the project.

Purpose: To address the congestion and provide safer access to the schools.

III. PRELIMINARY ENVIRONMENTAL OVERVIEW			
A. Air Quality Project is in: Attainment area Nonattainment or Maintenance Area TIP Pg.#: PM 2.5 County TIP Pg.#:			
B. Archeology/Historic Resources Known Archeological or Historic Resources are present			
none known			
C. Threatened and Endangered Species			
no affect			
D. Hazardous Materials Potentially Contaminated Sites are present Potential Bridge or Structure Demolition			
not known			
E. Permitting Check all that may apply: Waters of the US MS4 area Floodplain Impacts Navigable Waters of the US Impacts Are 401/404 Permits likely to be required? Yes No Impacts to: Wetlands Stream/Lake/Pond ACE LON ACE NW ACE IP DOW IWQC Special Use Waters			
F. Noise Are existing or planned noise sensitive receptors adjacent to the proposed project?			
G. Socioeconomic Check all that may apply: ☐ Low Income/Minority Populations affected ☐ Relocations ✓ Local Land Use Plan available			
none known			
H. Section 4(f) or 6(f) Resources The following are present on the project: Section 4(f) Resources Section 6(f) Resources			
Ruff Park funded by Land and Water Conservation (LWC) grants			
None (Completely State funded)			
Anticipated Environmental Document:			

III. PRELIMINARY ENVIRONMENTAL OVERVIEW- continued			
This portion covers project 02-3700, which is a CMAQ project			
A. Air Quality			
Project is in: Attainment area Nonattainment or Maintenance Area PM 2.5 County			
STIP Pg.#: TIP Pg.#:			
B. Archeology/Historic Resources			
Known Archeological or Historic Resources are present			
none known			
C. Threatened and Endangered Species			
no affect			
D. Hazardous Materials			
☐ Potentially Contaminated Sites are present ☐ Potential Bridge or Structure Demolition			
culvert may have to be widened , but it is concrete and no haxardous material is anticipated			
E. Permitting			
Check all that may apply: Waters of the US MS4 area Floodplain Impacts Navigable Waters of the US Impacts			
Are 401/404 Permits likely to be required? Yes Vo Impacts to: Wetlands Stream/Lake/Pond			
☐ ACE LON ☐ ACE NW ☐ ACE IP ☐ DOW IWQC ☐ Special Use Waters			
F. Noise			
Are existing or planned noise sensitive receptors adjacent to the proposed project? \checkmark Yes \bigcirc No			
Is this considered a "Type I Project" according to the <a a="" href="KYTC Noise Analysis and Abatement Policy?" no<="" v="" yes="">			
G. Socioeconomic			
Check all that may apply: Low Income/Minority Populations affected Relocations Local Land Use Plan available			
All public buildings in construction area			
H. Section 4(f) or 6(f) Resources The following are present on the project: Section 4(f) Resources Section 4(f) Resources			
The following are present on the project: Section 4(f) Resources Section 6(f) Resources			
Anticipated Environmental Document:			

2/14/2013

IV. POSSIBLE ALTERNATIVES

A. Alternative 1: No Build

The no build does not address the purpose and need of the project.

B. Alternative 2

Construct 3 lanes from US 68 to Sanderson Drive. The third lane will be a two way left turn lane (TWLTL) and will be matched up with the left turn lanes that will be constructed at Glass Avenue (item 2-3700) and at the Community College (item 2-8706.00)

Planning Level Cost Estimate:

Total	\$15,800,000
Const	\$10,000,000
Utilities	\$2,000,000
R/W	\$2,400,000
Design	\$1,400,000
<u>Phase</u>	<u>Estimate</u>

IV. POSSIBLE ALTERNATIVES (cont.)

B. Alternative 3

Construct 5 lanes from US 68 to Sanderson Drive. The middle lane will be a two way left turn lane (TWLTL) and will be matched up with the left turn lanes that will be constructed at Glass Avenue (item 2-3700) and at the Community College (item 2-8706.00)

Planning Level Cost Estimate:

<u>Phase</u>	<u>Estimate</u>
Design	\$1,400,000
R/W	\$4,000,000
Utilities	\$2,000,000
Const	\$10,000,000
Total	\$17,400,000

V. Summary

This project is to widen KY 1007 to improve traffic flow and safety in this area that has a significant congestion due to school traffic. The two build alternates include a 3 lane and a 5 lane. Because it is too early to tell whether the widening will occur on both sides equally or on one side only, it was difficult to estimate the costs. Therefore the planning estimates for Design, Utilities, Construction are the same as the Highway plan numbers for both of these. The ROW is expected to increase for the 5 lane, so the highway plan number was used for the 3 lane, but was increased for the 5 lane.

Alt#	Description	D (\$)(SPP)	R (\$) <u>(SPP)</u>	U (\$) <u>(SPP)</u>	C (\$)(SPP)	Total (\$mil)
1	No Build	-	-	-	-	-
2	3 Lanes	1,400,000	2,400,000	2,000,000	10,000,000	15,800,000
3	5 Lanes	1,400,000	4,000,000	2,000,000	10,000,000	17,400,000
-	Current Hwy Plan Estimated Cost	1,400,000	2,400,000	2,000,000	10,000,000	15,800,000
-	Current Pre-Con Estimated Cost	1,400,000	2,400,000	2,000,000	10,000,000	15,800,000
