SUBJECT: Revised Consultant Prequalification Criteria
for Traffic Engineering Services

Please be advised that any consultant engineering firm that was prequalified in Electrical Engineering Services prior to our separating this category into two sub-categories (signals and lighting) will remain prequalified until they are required to reapply. When reapplying, the company should then specify on the prequalification application whether they are applying for signal design, lighting design, or both.

Should you have any questions or need any additional information please do not hesitate to contact this office.
