HARRY E. SYKES
EXECUTIVE DIRECTOR
OFFICE OF MINORITY AFFAIRS

As required by KRS 176, enacted by the 1982 General Assembly, this document submits the 1984-1986 biennial highway construction program and those projects comprising the four year planning program through fiscal year 1990. This highway program contains more than 900 projects and outlines the expenditure of \$2.5 billion of federal and state funds.

Two year (FY 85 and FY 86) preconstruction and construction projects indicated by an asterisk under SCOPE comprise those phases to be funded with monies expected to be available through fiscal year 1986 (See attached sheet). Projects or project phases indicated by double asterisks comprise the contingency list. These projects would be moved to the funded category should any of the numerous unforeseen project delays occur for the funded projects. I believe this procedure is an absolute necessity in order to ensure full usage of federal-aid funds.

This program reflects the sale of the \$300 million Economic Development bond issue. For the A-A Highway, the program earmarks \$215 million for the section from I-275 in Campbell County extending to Ky. 11 south of Maysville and includes design funds for the entire 116 mile route. The interchange with I-275 is to be funded with Interstate 4-R funds. The remaining \$85 million of the bond issue is designated for the State funded projects which are indicated by an asterisk. For identification purposes, state funded projects with an asterisk are the "A" list, and those with double asterisks make up list "B".

Certain categories of projects, by their nature, are undetermined at this time and are expected to be advanced as they are identified and individually approved. These include industrial access roads which are coordinated with the Commerce Cabinet and local match bridge replacement projects which are dependent on the availability of local matching funds.

I believe that accomplishment of this program will make significant progress in upgrading and meeting the most needs of Kentucky's highway system.

Sincerely,

Floyd G. Poore, Sec

Floyd G. Poore
Secretary
