

Bridge Cleaning and Painting CID 202953 Cumberland County CID 202958 Boyd County Virtual Pre-Bid Meeting Minutes

Meeting Name	Meeting Date	Project Team Attendees	Contractor Attendees
Pre-Bid Meeting	September 16, 2020	Tom Mathews, KYTC Daryl Greer, KYTC Tim Blain, KYTC	Garry Manous, Atsalis Bros. Painting Jason Stokes, APBN Nomiki Zembillas, Elite Contractors Phillip Klimis, Euro Paint Evelyn Klimis, Euro Paint
Project Number CID 202953 CID 202958	Time 9:00 AM	O'Dail Lawson, KYTC Stewart Gilreath, KYTC Mark Foster, KYTC	Manuel Gialousis, Gulf Coast Contracting Brad Wilder, Intech Contracting Byron Ogger, Intech Contracting Michael Xipolitas, KMX Painting Andreas Troumouliaris, Legend Painting Kaliopy Vavoulas, Legend Painting John Kerpelis, M & J Painting Michael Kerpelis, M & J Painting Rebecca Smith, M & M Services Phil Maunery, M & M Services
	Location Conference Call	Tracy Taylor, KYTC David Robbins, KYTC Michael Edward, KYTC Tamra, Wilson, KYTC Jason Dean, KYTC Joe Callahan, KYTC Rick, Daily, KYTC Matt Dillon, KYTC Phil Brown, WV	Ioannis Kolouris, North Star Painting Michael Mihas, North Star Painting Nick Kolouris, North Star Painting Vladimir Bozovic, Olympus Painting Contractors Nick Mavromatis, Olympus Painting Contractors Mary Jo Tirikos, Panther Industrial Painting Jim Klimis, Seminole Equipment Savvas Damolos, Seminole Equipment George Pappas, Southern Road and Bridge Nick Hazimihalas, Spartan Contracting
		DC53 Rodney Skaggs	

Attendance

Tom Mathews took attendance at the beginning of the meeting.

An additional attendance affidavit is required to be sent to Tom Mathews by COB on September 17, 2020.

Introduction

The pre-bid meeting was opened with a brief overview of the project team and schedule.

1. This pre-bid meeting is for the Cumberland County and Boyd County Bridge Cleaning and Painting Projects. Attendance at this virtual meeting is required in order to be eligible to submit a bid on the project.
2. The purpose of the meeting is to introduce the project and provide an opportunity for the contractors to pose questions.

Meeting Presentation

Tom Mathews (KYTC) presented an overview of the project repairs using a PowerPoint presentation.

Question & Answers

1. Byron Ogger and Nomiki Zembillas:
Question: Will the slide presentation be made available to bidders?
Answer: The PowerPoint presentation will be uploaded on the KYTC Contract Procurement website under Project Related Information. The PowerPoint presentation should not be considered part of the Contract Documents and should be used for information purposes only
2. Brad Wilder:
Question: Do we paint the support brackets for the utility on the US 60 Bridge? (202958 Boyd County).
Answer: The bracket attached to the girder will be cleaned and painted. The pipe hanger will not be cleaned and painted. The Contractor will take all measures to protect the pipe hangers and utility attached.

3. Jim Klimis:
Question: Will the square footage for each bridge be provided?
Answer: The square footage will be posted under the KYTC Contract Procurement website under Project Related Information. The square footage posted should not be considered part of the Contract Documents and should be used for information purposed only.
4. Brad Wilder:
Question: Is all the new steel on the Cumberland bridges from last year's project to be blasted and painted? The KY 90 bridge has a new stringer and floor beam cantilever. (202953 Cumberland County)
Answer: All structural steel will be cleaned and painted.
5. Brad Wilder:
Question: Can we close the sidewalk on the KY 90 bridge? (202953 Cumberland County)
Answer: Yes, the sidewalk can be closed.
6. Byron Ogger:
Question: It is imperative that any periods that we cannot have closures be clearly identified prior to Bid? (202953 Cumberland County)
Answer: A list of tentative times will be posted under KYTC Contract Procurement website under Project Related Information. These may vary. The department will coordinate with the USACE and the Contractor if these dates will vary. There will be a week notice for the closures.
7. Brad Wilder:
Question: Are we able to use all the existing access points through the flood wall or over the levee? It appears that some of these locations require crossing private property to access. (202958 Boyd County)
Answer: The Contractor will be responsible for obtaining any private property to access areas the inside the flood wall.
All public property can be used for access.
8. Brad Wilder:
Question: Is the US 60 side walk to remain open? (202958 Boyd County)
Answer: Yes, the side walk will remain open.
9. Jim Klimis:
Question: Will tool cleaning be permitted on the wood catwalk (202953 Cumberland County)
Answer: Yes, tool cleaning will be permitted for this.
10. Mary Joe Tirikos:
Question: Clarify the protection of the wood catwalk? (202953 Cumberland County).
Answer: The Contractor shall take necessary measures to protect the wood portion of the catwalk from any damage from cleaning and painting operations. Overspray will not be considered as a damage.
Sidewalk fencing will not be cleaned and painted (202958 Boyd County)
11. Garry Manous:
Question: Does all steel grit and disposable material go the recycling company.
Answer: Just any unusable steel grit and all disposable material will go to the recycling company.
12. Manuel Gialousis:
Question: If the structure is briefly closed to traffic to move equipment that exceeds the weight limit, is it understood that the equipment can be two time the amount shown in the special note for weigh limit on structure?
Answer: Yes, one piece of equipment that exceed the weight limit at a time.
13. Manuel Gialousis:
Question: Does the lane closure have to be removed each night? (202958 Boyd County)
Answer: Yes, lane must be open if not working.
14. Manuel Gialousis:
Question: Can the lane closure remain if working day and night shifts for 24 hours? (202958 Boyd County)
Answer: The lane closure will be permitted to remain as long as legitimate work is being performed. Additional measures will have to be met (lighting, etc.) in order to allow working 24 hours that will be discussed further at future pre- construction meeting.

No other questions were asked, and the meeting adjourned at 10:30 am.

End of Minutes.

SEPTEMBER 25, 2020

Elevation of the bridge south face, looking east at Spans 2-4.

Elevation of the bridge north face, looking east at Spans 2-4.

20-2958 BOYD COUNTY 010B00062N ~ US 60 over BIG SANDY RIVER

Elevation of the bridge south face, looking west from Abutment 7.

Elevation of bridge north face, looking west at Spans 4-6.

SPECIAL NOTE FOR BIDDING PREQUALIFICATION AND STAFFING

- ▶ Bidders shall be Pre-qualified under I18B – Bridge Painting to have a bid opened and read.
- ▶ The contractor(s) and or subcontractor(s) performing painting operations shall retain staff meeting the requirements listed below for the duration of this contract. Any production work conducted while not meeting these requirements shall not be eligible for payment. The contractor(s) and or subcontractor(s) performing painting operations personnel shall have been directly responsible for field operations of a structure painting project containing the requirements listed below.
- ▶ 1. A structure over a river or having multiple structures (more than three)
- ▶ 2. Having specific containment requirements
- ▶ 3. Maintaining vehicular traffic.
- ▶ The projects shall have been completed to the facility owners' satisfaction.
- ▶ The Contractor(s) and or Subcontractor(s) performing the repair operations required in this contract (not paint related) shall be Pre-qualified for appropriate work items.

SPECIAL NOTE FOR BRIDGE CLEANING AND PAINTING

▶ 1. DESCRIPTION.

- ▶ Perform all work in accordance with the Kentucky Transportation Cabinet, Department of Highway's Standard Specifications for Road and Bridge Construction and applicable Supplemental Specifications, the Standard Drawings, (current editions), this Note and Attached Detailed Drawings. Section references are to the Standard Specifications. This work consists of the following: (1) Furnish all labor, materials, tools, and equipment; (2) Cleaning and Painting; (3) Maintain and control traffic; and (4) Any other work specified as part of this contract.

▶ 2. CONSTRUCTION.

- ▶ All structural steel shall be cleaned and painted in accordance with the Kentucky Transportation Cabinet, Department of Highways Standard Specifications for Road and Bridge Construction (current edition) Section 614.
- ▶ All structural shall be Abrasive Blast Cleaned and Painted. See Section 614.03.09 for Abrasive Blast Cleaning and Painting.

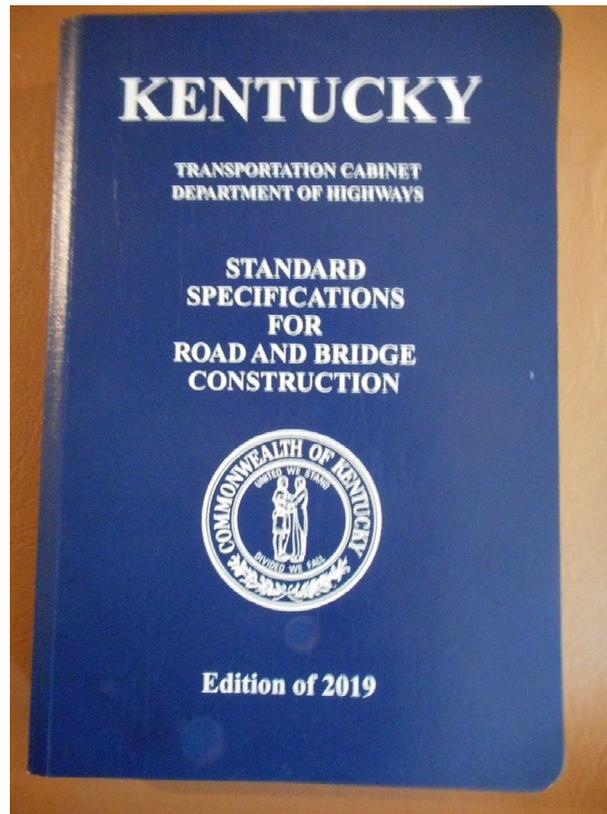

▶ **3. RECYCABLE MATERIAL.**

- ▶ Contrary to Section 614.03.09 section 5 transport and recycling the Contractor shall send all recyclable debris and complete their supplier profile form to the recycler listed below instead of the supplier profile form from the Division of Construction's website given.
- ▶ The recycler is: The Doe Run Company: Resource Recycling Division, HC1 Box 1395, HWY 10K, Boss, MO 65440, phone (573) 626-4813, fax (573) 626-3304, email www.doerun.com. The contractor will complete the Doe Run Supplier Profile Form and provide copies of it to both Doe Run and the Engineer prior to transporting the surface preparation debris.

▶ **4. DAMAGE TO STRUCTURE.**

- ▶ The Contractor shall bear all responsibility and expense for any and all damage to the structure including the new concrete coatings during the painting work, even to the removal and replacement of a fallen span, should the fallen span result from the Contractors actions.

KENTUCKY TRANSPORTATION CABINET'S 2019 STANDARD SPECIFICATION

KENTUCKY TRANSPORTATION CABINET'S 2019 STANDARD SPECIFICATION SECTION 614 MAINTENANCE CLEANING AND PAINTING STEEL BRIDGES

- ▶ Internet Link for Standard Specification Division 600 Structures and Concrete:
- ▶ <https://transportation.ky.gov/Construction/Standard%20and%20Supplemental%20Specifications/600%20Structures%20and%20Concrete%202019.pdf>
- ▶ Internet Link to order the Hard Copy of the Standard Specifications:
- ▶ <https://transportation.ky.gov/Organizational-Resources/Pages/Policy-Manual-Order-Information.aspx>

SPECIAL NOTE FOR SIGNS AND UTILITIES

- ▶ All utilities (electric see below), traffic signs shall be maintain and protected from damage.
- ▶ All electric power that shall on the structure shall be de-energized. The Contractor shall coordinate with the Department to have the power de-energized.

SPECIAL NOTE FOR WEIGHTLIMITS ON STRUCTURE ~ CID 202953

- ▶ 029B00012N is rated at 37 tons.
- ▶ 029B00027N is rated at 31 tons.
- ▶ No equipment, materials, vehicles, trailers nor combination of thereof exceeding the load rating of each structure listed above shall be placed on or drive across the structure. If the Contractor chooses to stage from the bridge deck he must submit a plan for approval by the KYTC Engineer showing placement and weight of all equipment.

SPECIAL NOTE FOR WEIGHTLIMITS ON STRUCTURE ~ CID 202958

- ▶ 010B00062N is rated at **55** tons.
- ▶ No equipment, materials, vehicles, trailers nor combination of thereof exceeding the load rating of each structure listed above shall be placed on or drive across the structure. If the Contractor chooses to stage from the bridge deck he must submit a plan for approval by the KYTC Engineer showing placement and weight of all equipment.

SPECIAL NOTE FOR PREVENTIVE MAINTENANCE ~ CID 202958

▶ DESCRIPTION.

- ▶ Perform all work in accordance with the Kentucky Transportation Cabinet, Department of Highway's Standard Specifications for Road and Bridge Construction and applicable Supplemental Specifications, the Standard Drawings, (current editions), this Note and Attached Detailed Drawings. Section references are to the Standard Specifications. This work consists of the following: (1) Furnish all labor, materials, tools, and equipment, (2) Bridge Cleaning, (3) Pressure Washing, (4) Concrete Coatings and (5) Any other work specified as part of this contract.

▶ 2. MATERIALS.

▶ Wash Water

- ▶ Use clean potable water for all pressure washing.

▶ Concrete Coatings

- ▶ See The Division of Material's list of approved materials for concrete coatings and Section 821.

▶ **3. CONSTRUCTION.**

▶ **A. Bridge Cleaning.**

- ▶ All debris shall be removed from the bridge components. See attached detailed drawings for each bridge addressing components having debris removal. Equipment for removing debris from the bridge components shall be determined by the Contractor, subject to the approval of the Engineer. The Contractor shall prevent any debris from entering any body of water, bridge drainage system, or traffic lanes. All debris removed shall be disposed of in a suitable off-site disposal facility. Prior to all cleaning work, the Contractor shall confirm that any bridge drainage system is not blocked by un-removable debris. A blocked drainage system is considered to be one from which debris cannot be removed using the means specified in this note. If the Engineer has been notified, and concurs that the drainage system is blocked prior to performing other cleaning work, then proceed at the direction of the engineer. If the Contractor does not inspect the bridge drainage system and notify the engineer prior to beginning work any blocked drains will be considered to be the result of the Contractor's operations, and all clearing and cleaning of the drainage system shall be done as part of the work of the specification. All vegetation present at areas of the bridge that are to be addressed in this proposal shall be removed as determined by the Engineer.
- ▶ **All cost to complete Debris Removal, Clean Deck Drains and Remove Vegetation shall as specified shall be included in the Lump Sum price for "Bridge Cleaning".**

▶ **Pressure Washing.**

- ▶ Specified bridge components shall be pressure washed. See attached detailed drawings for each bridge addressing components to be pressure washed. All equipment for pressure washing shall be operated at a minimum pressure of up to 4,000 psi with 0 degree spinner tip and/or fan tips as determined by the engineer at the working location with a minimum flow rate of 3.5 gal/minute provided that these pressures do not damage any components of the structure. Pressure and flow rates shall be reduced to a level satisfactory to the Engineer should any damage occur due to power washing procedures. Pressure washing shall be operated at a distance of approximately six inches from and perpendicular to the surface. All pressure washing wands shall be equipped with a gauge to accurately determine the amount of pressure used. Pressure washing of any bridge element will proceed from top of wash area to bottom of wash area. Wash water will not be released to a bridge element previously washed. Perform all pressure washing at temperatures above 40 degrees Fahrenheit.
- ▶ **All cost to complete Pressure Washing as specified shall be included in the Lump Sum price for Lump Sum price for “Bridge Cleaning”.**

▶ **Concrete Coatings Application.**

- ▶ Specified bridge components shall have concrete coating applied to as specified after debris removal and power washing. See attached detailed drawings for addressing the bridge components. Use compressed air to remove any loose debris from the surfaces that are to be coated after power washing. See concrete coating diagram.
- ▶ All coatings shall be applied within manufacturers recommended dry film thickness range. For recommended conditions for application, see Section 614.03.02 and coatings supplier specifications. Allow the surfaces to be coated to dry before any coating is applied. The coating must be applied to a clean and dry surface. All coating application shall be executed using brushes, rollers, etc. No spray application will be permitted.
- ▶ The Department requires acceptance testing of samples obtained on a per-lot basis per-shipment. The Division of Materials will perform acceptance testing. See Section 821.04.
- ▶ The finish coat shall be Light Gray for Concrete. See Section 821.02.
- ▶ **All cost to complete Concrete Coating Application as specified shall be included in the Lump Sum price for “Concrete Coatings”.**

▶ **Sequence of Work.**

▶ Complete work in the sequence listed below:

- ▶ 1. Bridge Cleaning
- ▶ 2. Pressure Washing
- ▶ 3. Concrete Coating Application

▶ **Inspection.**

▶ The Cabinet will provide inspection for all items required in this contract. Visual inspection will be required upon completion of each work item for each structure component or at the discretion of the Engineer at any time. All visual inspection shall be performed within arm's length distance.

▶ **Debris Removal:** Visual Inspection.

▶ **Power Washing:** Visual Inspection.

▶ **Concrete Coating:**

- ▶ Prime Coat Application Check for wet film thickness*, and defects in the Paint.
- ▶ Finish Coat Application Check for wet film thickness*, paint appearance, color and quality of application.

▶ **Verifying Field Conditions.**

- ▶ The Contractor shall be familiar with all conditions at each bridge site. The Cabinet will not consider any claims due to the Contractor having not familiarized themselves with requirements of this work.

▶ **Residual Lead.**

- ▶ Residual lead paint may still be on bridge. The Contractor is advised to take all necessary protective measures including worker safety and environmental regulations when performing surface preparation. The Department will not consider any claims based on residual lead paint.

▶ **Damage to the structure.**

- ▶ The Contractor shall bear all responsibility and expense for any and all damage to the structure during the repair work, even to the removal and replacement of a fallen span, should the fallen span result from the contractors actions.

▶ **MEASUREMENT.**

▶ **A. Bridge Cleaning.**

▶ The Cabinet will measure this item by Lump Sum, completed and accepted.

▶ **Concrete Coating.**

▶ The Cabinet will measure this item by Lump Sum, completed and accepted.

▶ **5. PAYMENT**

▶ **A. Bridge Cleaning (24981EC).**

▶ Payment at the contract unit price for “Lump Sum” is full compensation for Debris Removal, Deck Drain Cleaning, Pressure Washing and all incidental items required to complete this with as specified in this note and attached detailed drawings.

▶ **Concrete Coating (24982EC).**

▶ Payment at the contract unit price for “Lump Sum” is full compensation for applying the concrete coatings and all incidental items required to complete this work as specified in this note and attached detailed drawings.

SPECIAL NOTE FOR MAINTAIN AND CONTROL TRAFFIC

- ▶ All lane closures on this project shall be in accordance with Kentucky Department of Highways Standard Drawings **No. TTC-100, TTC-110 and the FHWA Manual for Uniform Traffic Control Devices (current editions) unless otherwise specified.** Lane closures should be used only when absolutely necessary and kept to the shortest duration possible in order to minimize disruption to the traveling public. No work will be conducted over unprotected traffic at any location. At the discretion of the Engineer, lane closures may be restricted on holiday weekends. The contractor must submit a traffic control plan for review and approval by the KYTC Engineer 14 days prior to the Pre-Construction Conference.

▶ **1. EMERGENCY REPAIRS AND COORDINATION WITH OTHER CONTRACTS**

- ▶ In the event it becomes necessary to make emergency repairs at this project by state forces or by other outside contractors, the (painting) contractor agrees to alter his work pattern as directed by the engineer so as not to interfere with the emergency work. The contractor shall be required to coordinate his efforts with those of any other contractor in the construction area.

▶ **2. TRAFFIC CONTROL DEVICES**

- ▶ The contractor will be required to furnish all traffic control devices whenever his operations endanger or interfere with vehicular traffic as determined by the engineer. The contractor shall furnish any additional traffic control devices necessary to protect traffic and his workmen. Any costs associated with the added traffic control devices (including arrow boards) shall be incidental to the contract lump sum amount for "maintain and control traffic." Placement of all devices for lane closures shall start and proceed in the direction of flow of traffic. Removal of devices shall start at the end of the construction area and proceed toward oncoming traffic. The contractor shall provide for the installation of all necessary traffic control devices before beginning work and their immediate removal as soon as work is suspended or completed. During the fully operational periods, when no lane closures are permitted, all equipment shall be totally removed from the job site. Traffic control signs shall be removed or covered (if left in a curb lane).

▶ **3. VEHICLES**

- ▶ The contractor's vehicles shall always move with and not across or against the flow of traffic. Vehicles shall enter or leave work areas in a manner that will not be hazardous to or interfere with normal roadway traffic. Vehicles shall not park or stop except within designated work areas.
- ▶ Personal vehicles will not be permitted to park within the state right-of-way. The contractor's vehicles will be prohibited from crossing the roadway and all pedestrian movement of the contractor's personnel on the roadway will be limited to within the closed work areas.

▶ **4. TRUCK MOUNTED ATTENUATOR**

- ▶ Any lane or shoulder closure will include the use of a Truck Mounted Attenuator placed between oncoming traffic and equipment or vehicles.

SPECIAL NOTE FOR MAINTAIN AND CONTROL TRAFFIC ~ CID 20-2953

- ▶ **5. MISC.**
- ▶ The Contractor shall reduce the speed limit to **25 MPH** in areas signed for 35 MPH in and approaching the work zones 029B00012N.
- ▶ The Contractor shall reduce the speed limit to **45 MPH** in areas signed for 55 MPH in and approaching the work zones 029B00027N.
- ▶ The Engineer may elect to use Variable Message Boards when necessary.

▶ **029B00012N and 029B00027N**

- ▶ Maintain one usable 12 foot minimum lane. Flagging or traffic signals shall be used. If traffic signals are used the Contractor shall use flagging to minimize impact on school bus traffic when school is in session. The Contractor shall be responsible for establishing the dates and times when school bus traffic will impact the job site.
- ▶ Only one structure will be permitted to have lane closures at a time. Any lane closure on one structure must be removed before a lane closure will be permitted on the other structure.
- ▶ To accommodate the planting and harvest seasons the contractor may be required remove the lane for passage of agricultural equipment during the harvest season. This will only require the removal of traffic cones/barrels, contractor's equipment in the lane closure and all other items that would obstruct the passage of the agricultural equipment. All temporary striping, signage, etc. will be permitted to remain. The time period will be five consecutive days. The five consecutive day period will be scheduled with coordination between the Department and the Agricultural Community to have the least impact on the Contractor's production. The lane closure removal will be required one time for each structure. A minimum two week notice will be provided to the Contractor before the lane closure removal is requested. All cost to remove the lane closure shall be considered incidental to Lump Sum bid for Maintain and Control Traffic.
- ▶ To minimize lane closures the Contractor will be permitted to remove guardrail at bridge ends where there is room to stage equipment. If this option is used the guardrail must be removed and reinstalled by a contractor that is pre-qualified for this work item. The Contractor shall be responsible for any material required to stage equipment in these areas. This material must be removed and site restored to original condition as directed by the Engineer upon completion of the project. All cost associated with using this option shall be considered incidental to Lump Sum bid for Maintain and Control Traffic.
- ▶ The Contractor will be permitted to briefly close the structure to traffic using flagging to move any **equipment that exceeds load rating only**. (See Special Note for Weight Limits on Structure) across the structure as directed by the Engineer. The equipment must be centered on the structure and shall not exceed 2 times the load rating for the structure.

SPECIAL NOTE FOR MAINTAIN AND CONTROL TRAFFIC ~ CID 20-2958

▶ 5. STAGING IN RIGHT OF WAY AREAS

- ▶ The Contractor shall be responsible for any base material to park equipment on in right of way areas. This material must be removed and site restored to original condition as directed by the Engineer upon completion of the project.

▶ 6. MISC.

- ▶ The Engineer may elect to use Variable Message Boards when necessary

▶ 059B00046N

- ▶ Maintain one usable 12 foot minimum lane. All lane closures shall be removed when not working. Flagging or traffic signals shall be used. Equipment staging will be permitted in the right of way areas beneath the bridge at both the Kentucky Side and West Virginia Side on either side of the flood wall. The Contractor will be permitted to briefly close the structure to traffic using flagging to move any **equipment that exceeds load rating only**. (See Special Note for Weight Limits on Structure) across the structure as directed by the Engineer. The equipment must be centered on the structure and shall not exceed 2 times the load rating for the structure.

▶ **MEASUREMENT.**

- ▶ **A. Maintain and Control Traffic:** The Department will measure the quantity as “Lump Sum”.
- ▶ **B. Portable Changeable Message Sign:** The Department will measure the quantity for “Each”.

▶ **PAYMENT.**

- ▶ **A. Maintain and Control Traffic (02650):** Payment of the contract lump sum amount for "maintain and control traffic" shall be full compensation for all items necessary to maintain and control traffic as specified for this project. All traffic control items shall remain the property of the contractor when the work is complete.
- ▶ **B. Portable Changeable Message Sign (02671):** Payment at “each” shall be full compensation to furnish, install, maintain and remove all portable message signs as specified.
