

Project Procurement Information

To ensure the ongoing sharing of information, the Brent Spence Management Team (BSMT) has posted the DRAFT Instructions to Offerors (ITO), the DRAFT Progressive Design-Build Contract (PDBC), a DRAFT PDBC Definitions exhibit, and the DRAFT project's Technical Requirements at the following link: [2/13/2023 DRAFT BSB Contract](#). The BSMT is providing these DRAFTs to help identify and resolve concerns regarding the procurement, terms and conditions, the project's Technical Requirements, and evaluation/selection criteria. The BSMT will entertain questions through the *Comment or Questions* portal on the [Project Procurement Website](#)'s, or will take questions directly through the following email: bsbprocurement@dot.ohio.gov. The BSMT will regularly update these documents until the release of the Final RFP scheduled for Feb 17, 2023. Updates and/or revisions will be identified with each subsequent release. *Elements/Project Considerations* document will no longer be updated as this recently released information is more comprehensive. The [Reference Information Documents \(RIDs\)](#) have also been updated. Links to these documents can also be found under the *DRAFT Contract Documents* on the [Brent Spence Project Procurement Website](#).

Interested Lead Offerors should contact the BSMT at the bsbprocurement@dot.ohio.gov email address if the Lead Offeror would like to hold a one-on-one meeting prior to Final RFP. The BSMT will attempt to reasonably accommodate requests.

When the [Brent Spence Project Procurement Website](#) or DRAFT documents are updated, notification will be distributed.
