

CID 204206 | Allen Co. KY 100

Consent & Release Summary

Begin MP	End MP	Side	Owner(s)	Consent & Release Description	Status	Additional Notes
0.200	0.310	LT	Paul & Yvonne Hood	HSIP project work including pipe extension and HW replacement. Work may include ditching and laying back slopes as well. Existing two strand barbwire fence with t-posts is in poor condition and missing in spots. If necessary fence will be removed and replaced, off right-of-way, in like kind. Additional woven wire fence with barbed wire strand at culvert is in poor condition as well. If necessary it will be replaced as well, off right-of-way, after work is completed.	Signed	
2.100	2.300	LT	Mark & Robert Johnson	HSIP project work including ditching and shouldering. Work off of right-of-way may be needed for slope and ditching work. Existing woven wire fence with single strand barbed wire strand is in poor condition. Fencing will be replaced, off right-of-way, in like kind after work is completed. Temporary fencing will be installed for livestock containment as needed until permanent fencing is established. Fencing temporary and permanent shall be completed and performed in a workman-like manner for proper containment of livestock with wire gage equivalent to existing.	Signed	
2.300	2.520	LT	Jerd & Sandra Johnson	HSIP project work including ditching and shouldering. Work off of right-of-way may be needed for slope and ditching work. Existing woven wire fence with single strand barbed wire strand is in poor condition. If necessary fence will be replaced, off right-of-way, in like kind after work is completed. Temporary fencing will be necessary.	Signed	
3.430	3.960	LT & RT	Darla S., William E. & Seth Sisco	HSIP project work including work on curve 14 that includes curve widening, superelevation improvement, ditching and shouldering, and pipe extension. Existing five strand barbwire fence will be removed off R/W within improvement area and placed off R/W once complete. Fence will be replaced in like kind being a five strand barbwire fence with wood and metal posts. Temporary fencing for live stock will be installed for containment prior to removing existing fence. Two existing water meter access holes between station 189+15 and 189+45 will be restored allowing access if disturbed during construction. To accommodate KY 100's curve widening and new superelevation, shoulder slopes will be built or cut to approximate 3:1 slopes where possible. See cross sections for areas and extent of material that will be off R/W. Also field entrance at station 189+45 right will be reconstructed to maintain or improve its existing width and grade. Access and material will be required off R/W to properly construct this entrance. Resident entrance at station 188+76 left will reconstructed to maintain or improve existing width and grade.	Signed	
4.78-5.12	5.19-5.32	LT	Bobby C/O Kevin Britt	HSIP project work including pipe extension, HW replacement, and ditching and shouldering. Tree and brush removal as well as laying back slope may be necessary for proper ditching and shouldering of the KY 100 (Franklin Road) roadway. 4.78-5.12 existing fence looks to be composed of both woven wire and barbwire and is missing in spots. If so necessary it will be replaced in like kind off right-of-way after work is complete. 5-19-5.32 has no existing fencing.	Signed	
5.100	5.190	LT	Irvin & Martha Habegger	HSIP project work including ditching and shouldering. Tree and brush removal as well as laying back slope may be necessary for proper ditching and shouldering of the roadway. Existing fence that is to be disturbed for the project composed of woven wire or barbwire is missing in spots and overran be vegetation. If so necessary it will be replaced in like kind, off right-of way, after work is completed.	Signed	
6.850	6.870	RT	Charles & Gail Bennett	HSIP project work including pipe replacement and ditching and shouldering. Ditching off right-of-way may be required for proper drainage of ditch and pipe. Existing three plank wood fence will be replaced in like kind material and off right-of-way.	Signed	
7.000	7.210	RT	Jean McReynolds	HSIP project work including pipe extension and HW replacement. Work may require ditching off right-of-way for proper drainage of pipe. Existing two strand barbed wire fence with one of them electrified and metal t-posts is missing in areas along property. If necessary fence within project location will be replaced, off right-of-way, in like kind.	Signed	
7.580	7.630	RT	Frank & Patsy Goad	HSIP project work including pipe extension and HW replacement. Work on ditch slope will require moving existing woven wire fence with wood posts and two barbwire strands, one electrified. Fence will be replaced in like kind, off right-of-way, after work is completed.	Signed	
8.470	8.650	LT	Dell & John M. M.D. Hall	HSIP project work including pipe extension and HW replacement. Ditching off right-of-way may be required for proper drainage of cross drain. Existing 5 stranded barbwire fence with T and wood posts is missing sections along property. If necessary fence will be replaced, off right-of-way, in like kind after work is completed. Temporary fencing will be necessary.	Signed	
7.560	7.600	LT	Mackie Shelton	HSIP project work including pipe extension and HW replacement. Work off right-of-way may be required for placing embankment and working on pipe. Existing 5 stranded barbwire fence with T and wood posts will be replaced off right-of-way after work is completed.	Signed
