E. T. BREATHITT PARKWAY BASE FAILURE REPAIR

"BASE FAILURE REPAIR" The Engineer shall make the final determination as to the length and the exact location of each base failure repair. Locations shown on the plans may be modified or eliminated by the Engineer. The width will be the total lane width plus an additional Ift into the adjacent shoulder. The Engineer will determine if one or both lanes are repaired.

After all existing material has been removed to the dimensions shown, each course or backfill material shall be compacted to the proper density for the material being placed as required in the Standard Specifications.

The contract unit bid price per S0 YD for "Base Failure Repair" shall include saw cutting through the asphalt and PCC, removing the pavement, roadway excavation, perforated pipe-4 inch, crushed aggregate size no. 57, CL4 asphalt base 1.0D PG64-22, geotextile fabric type IV, and all incidentals necessary to complete the installation as detailed.

4 Inch Perforated Pipe will be placed at the low point of the trench.

Once work has begun, the contractor will work continously until the repair is completed.

The Contractor will allow 2 weeks minimum for the repairs to have traffic opened to allow for settlement prior to the mill and pave operation.

This detail to be used for repairs from MP 65.393 to MP 70.450
