Special Note for Subgrade Stabilization

The plans and bid items on this project reflect Lime Stabilized Roadbed (sq yd) and Lime (ton) for the subgrade stabilization. The KYTC Geotechnical Branch has determined based on available testing data that cement is also a suitable product for stabilization. The Contractor will have the option of using either stabilization material on this project. If the Contractor elects to use Cement and Cement Stabilized Roadbed the unit bid prices for Lime and Lime Stabilized Roadbed, respectively, will be paid.
