SPECIAL NOTE FOR EDGE KEY

Construct edge keys at the beginning of project, end of project, at railroad crossings, and at ramps, as applicable. Unless specified in the Contract or directed by the Engineer, do not construct edge keys at intersecting streets, roads, alleys, or entrances. Cut out the existing asphalt surface to the required depth and width shown on the drawing and heel the new surface into the existing surface.

For edge key locations listed in the Contract’s ‘Milling Summary’, edge key construction and equipment must meet Section 408 of KYTC’s Standard Specifications. The Department will make payment for this work at the Contract unit price per ton for Asphalt Pavement Milling and Texturing, which shall be full compensation for all labor, materials, equipment, and incidentals for removal and disposal of the existing asphalt surface required to construct the edge key. Approximate edge key dimensions are listed within the Contract and consistent with Figure 1.

FIGURE 1

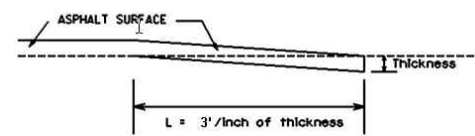

EDGE KEY

For edge key locations listed in the Contract’s ‘Edge Key Summary’, the Department will measure the edge key at the joint as the width of the pavement perpendicular to the centerline in linear feet. The Department will pay for this work at the Contract unit price per linear foot for Edge Key, which shall be full compensation for all labor, materials, equipment, and incidentals for removal and disposal of the existing asphalt surface required to construct the edge key. Approximate edge key dimensions are listed within the Contract and consistent with Figure 2.
