

CALL NO. 302
CONTRACT ID. 142348
BARREN COUNTY
FED/STATE PROJECT NUMBER FD04SPP 005 0090 000-001
DESCRIPTION HAPPY VALLEY ROAD (KY 90)
WORK TYPE ASPHALT PAVEMENT & ROADWAY REHAB
PRIMARY COMPLETION DATE 7/31/2015

# **LETTING DATE:** November 21,2014

Sealed Bids will be received electronically through the Bid Express bidding service until 10:00 AM EASTERN STANDARD TIME November 21,2014. Bids will be publicly announced at 10:00 AM EASTERN STANDARD TIME.

NO PLANS ASSOCIATED WITH THIS PROJECT.

**REQUIRED BID PROPOSAL GUARANTY:** Not less than 5% of the total bid.

# PART I SCOPE OF WORK

## **ADMINISTRATIVE DISTRICT - 03**

CONTRACT ID - 142348 FD04SPP 005 0090 000-001 COUNTY - BARREN

PCN - MP00500901402 FD04SPP 005 0090 000-001

HAPPY VALLEY ROAD (KY 90) (MP 0.770) FROM 260 FEET WEST OF US 31W (0.770) EXTENDING EAST TO 300 FEET EAST OF US 31W (0.876) INCLUDING 170 FEET SOUTH APPROACH ON US 31W (MP 0.876), A DISTANCE OF 0.11 MILES.ASPHALT PAVEMENT & ROADWAY REHAB SYP NO. 03--4513.00.

GEOGRAPHIC COORDINATES LATITUDE 37:07:41.00 LONGITUDE 85:57:47.00

#### **COMPLETION DATE(S):**

COMPLETED BY 07/31/2015

SPECIFIED COMPLETION DATE - ALL ITEMS IN CONTRACT

## **CONTRACT NOTES**

#### PROPOSAL ADDENDA

All addenda to this proposal must be applied when calculating bid and certified in the bid packet submitted to the Kentucky Department of Highways. Failure to use the correct and most recent addenda may result in the bid being rejected.

#### **BID SUBMITTAL**

Bidder must use the Department's Expedite Bidding Program available on the Internet web site of the Department of Highways, Division of Construction Procurement. (www.transportation.ky.gov/construction-procurement)

The Bidder must download the bid file located on the Bid Express website (www.bidx.com) to prepare a bid packet for submission to the Department. The bidder must submit electronically using Bid Express.

#### JOINT VENTURE BIDDING

Joint venture bidding is permissible. All companies in the joint venture must be prequalified in one of the work types in the Qualifications for Bidders for the project. The bidders must get a vendor ID for the joint venture from the Division of Construction Procurement and register the joint venture as a bidder on the project. Also, the joint venture must obtain a digital ID from Bid Express to submit a bid. A joint bid bond of 5% may be submitted for both companies or each company may submit a separate bond of 5%.

#### UNDERGROUND FACILITY DAMAGE PROTECTION

The contractor is advised that the Underground Facility Damage Protection Act of 1994, became law January 1, 1995. It is the contractor's responsibility to determine the impact of the act regarding this project, and take all steps necessary to be in compliance with the provision of the act.

#### **SPECIAL NOTE FOR PIPE INSPECTION**

Contrary to Section 701.03.08 of the 2012 Standard Specifications for Road and Bridge Construction and Kentucky Method 64-114, certification by the Kentucky Transportation Center for prequalified Contractors to perform laser/video inspection is not required on this contract. It will continue to be a requirement for the Contractor performing any laser/video pipe inspection to be prequalified for this specialized item with the Kentucky Transportation Cabinet-Division of Construction Procurement.

#### SPECIAL NOTE FOR COMPOSITE OFFSET BLOCKS

Contrary to the Standard Drawings (2012 edition) the Cabinet will allow 6" composite offset blocks in lieu of wooden offset blocks, except as specified on proprietary end treatments and crash cushions. The composite blocks shall be selected from the Cabinet's List of Approved Materials.

# REGISTRATION WITH THE SECRETARY OF STATE BY A FOREIGN ENTITY

Pursuant to KRS 176.085(1)(b), an agency, department, office, or political subdivision of the Commonwealth of Kentucky shall not award a state contract to a person that is a foreign entity required by KRS 14A.9-010 to obtain a certificate of authority to transact business in the Commonwealth ("certificate") from the Secretary of State under KRS 14A.9-030 unless the person produces the certificate within fourteen (14) days of the bid or proposal opening. If the foreign entity is not required to obtain a certificate as provided in KRS 14A.9-010, the foreign entity should identify the applicable exception. Foreign entity is defined within KRS 14A.1-070.

For all foreign entities required to obtain a certificate of authority to transact business in the Commonwealth, if a copy of the certificate is not received by the contracting agency within the time frame identified above, the foreign entity's solicitation response shall be deemed non-responsive or the awarded contract shall be cancelled.

Businesses can register with the Secretary of State at https://secure.kentucky.gov/sos/ftbr/welcome.aspx.

# SPECIAL NOTE FOR PROJECT QUESTIONS DURING ADVERTISEMENT

Questions about projects during the advertisement should be submitted in writing to the Division of Construction Procurement. This may be done by fax (502) 564-7299 or email to <a href="mailto-kytc.projectquestions@ky.gov">kytc.projectquestions@ky.gov</a>. The Department will attempt to answer all submitted questions. The Department reserves the right not to answer if the question is not pertinent or does not aid in clarifying the project intent.

The deadline for posting answers will be 3:00 pm Eastern Daylight Time, the day preceding the Letting. Questions may be submitted until this deadline with the understanding that the later a question is submitted, the less likely an answer will be able to be provided.

The questions and answers will be posted for each Letting under the heading "Questions & Answers" on the Construction Procurement website (www.transportation.ky.gov/contract). The answers provided shall be considered part of

this Special Note and, in case of a discrepancy, will govern over all other bidding documents.

## HARDWOOD REMOVAL RESTRICTIONS

The US Department of Agriculture has imposed a quarantine in Kentucky and several surrounding states, to prevent the spread of an invasive insect, the emerald ash borer. Hardwood cut in conjunction with the project may not be removed from the state. Chipping or burning on site is the preferred method of disposal.

# **INSTRUCTIONS FOR EXCESS MATERIAL SITES AND BORROW SITES**

Identification of excess material sites and borrow sites shall be the responsibility of the Contractor. The Contractor shall be responsible for compliance with all applicable state and federal laws and may wish to consult with the US Fish and Wildlife Service to seek protection under Section 10 of the Endangered Species Act for these activities.

#### **ACCESS TO RECORDS**

The contractor, as defined in KRS 45A.030 (9) agrees that the contracting agency, the Finance and Administration Cabinet, the Auditor of Public Accounts, and the Legislative Research Commission, or their duly authorized representatives, shall have access to any books, documents, papers, records, or other evidence, which are directly pertinent to this contract for the purpose of financial audit or program review. Records and other prequalification information confidentially disclosed as part of the bid process shall not be deemed as directly pertinent to the contract and shall be exempt from disclosure as provided in KRS 61.878(1)(c). The contractor also recognizes that any books, documents, papers, records, or other evidence, received during a financial audit or program review shall be subject to the Kentucky Open Records Act, KRS 61.870 to 61.884.

In the event of a dispute between the contractor and the contracting agency, Attorney General, or the Auditor of Public Accounts over documents that are eligible for production and review, the Finance and Administration Cabinet shall review the dispute and issue a determination, in accordance with Secretary's Order 11-004. (See attachment)

10/29/12

Steven L. Beshear Governor Lori H. Flanery Secretary

Room 383, Capitol Annex 702 Capital Avenue Frankfort, KY 40601-3462 (502) 564-4240 Fax (502) 564-6785

OFFICE OF THE SECRETARY

#### **SECRETARY'S ORDER 11-004**

#### FINANCE AND ADMINISTRATION CABINET

#### **Vendor Document Disclosure**

WHEREAS, in order to promote accountability and transparency in governmental operations, the Finance and Administration Cabinet believes that a mechanism should be created which would provide for review and assistance to an Executive Branch agency if said agency cannot obtain access to documents that it deems necessary to conduct a review of the records of a private vendor that holds a contract to provide goods and/or services to the Commonwealth; and

WHEREAS, in order to promote accountability and transparency in governmental operations, the Finance and Administration Cabinet believes that a mechanism should be created which would provide for review and assistance to an Executive Branch agency if said agency cannot obtain access to documents that it deems necessary during the course of an audit, investigation or any other inquiry by an Executive Branch agency that involves the review of documents; and

WHEREAS, KRS 42.014 and KRS 12.270 authorizes the Secretary of the Finance and Administration Cabinet to establish the internal organization and assignment of functions which are not established by statute relating to the Finance and Administration Cabinet; further, KRS Chapter 45A.050 and 45A.230 authorizes the Secretary of the Finance and Administration Cabinet to procure, manage and control all supplies and services that are procured by the Commonwealth and to intervene in controversies among vendors and state agencies; and

**NOW, THEREFORE**, pursuant to the authority vested in me by KRS 42.014, KRS 12.270, KRS 45A.050, and 45A.230, I, Lori H. Flanery, Secretary of the Finance and Administration Cabinet, do hereby order and direct the following:

- I. Upon the request of an Executive Branch agency, the Finance and Administration Cabinet ("FAC") shall formally review any dispute arising where the agency has requested documents from a private vendor that holds a state contract and the vendor has refused access to said documents under a claim that said documents are not directly pertinent or relevant to the agency's inquiry upon which the document request was predicated.
- II. Upon the request of an Executive Branch agency, the FAC shall formally review any situation where the agency has requested documents that the agency deems necessary to

- conduct audits, investigations or any other formal inquiry where a dispute has arisen as to what documents are necessary to conclude the inquiry.
- III. Upon receipt of a request by a state agency pursuant to Sections I & II, the FAC shall consider the request from the Executive Branch agency and the position of the vendor or party opposing the disclosure of the documents, applying any and all relevant law to the facts and circumstances of the matter in controversy. After FAC's review is complete, FAC shall issue a Determination which sets out FAC's position as to what documents and/or records, if any, should be disclosed to the requesting agency. The Determination shall be issued within 30 days of receipt of the request from the agency. This time period may be extended for good cause.
- IV. If the Determination concludes that documents are being wrongfully withheld by the private vendor or other party opposing the disclosure from the state agency, the private vendor shall immediately comply with the FAC's Determination. Should the private vendor or other party refuse to comply with FAC's Determination, then the FAC, in concert with the requesting agency, shall effectuate any and all options that it possesses to obtain the documents in question, including, but not limited to, jointly initiating an action in the appropriate court for relief.
- V. Any provisions of any prior Order that conflicts with the provisions of this Order shall be deemed null and void.

# SPECIAL NOTE FOR RECIPROCAL PREFERENCE

# Reciprocal preference to be given by public agencies to resident bidders

By reference, KRS 45A.490 to 45A.494 are incorporated herein and in compliance regarding the bidders residency. Bidders who want to claim resident bidder status should complete the Affidavit for Claiming Resident Bidder Status along with their bid in the Expedite Bidding Program. Submittal of the Affidavit should be done along with the bid in Bid Express.

BARREN COUNTY FD04SPP 005 0090 000-001

#### Contract ID: 142348 Page 11 of 82

#### SURFACING AREAS

The Department estimates the mainline surfacing width to vary 24-38 feet.

The Department estimates the total mainline area to be surfaced to be 4,222 square yards.

The Department estimates the shoulder width to vary 2-10 feet on each side.

The Department estimates the total shoulder area to be surfaced is included in the mainline surfacing area.

#### ASPHALT MIXTURE

Unless otherwise noted, the Department estimates the rate of application for all asphalt mixtures to be 110 lbs/sy per inch of depth.

#### INCIDENTAL SURFACING

The Department has included in the quantities of asphalt mixtures established in the proposal estimated quantities required for resurfacing or surfacing mailbox turnouts, farm field entrances, residential and commercial entrances, curve widening, ramp gores and tapers, and road and street approaches, as applicable. Pave these areas to the limits as shown on Standard Drawing RPM-110-06 or as directed by the Engineer. In the event signal detectors are present in the intersecting streets or roads, pave the crossroads to the right of way limit or back of the signal detector, whichever is the farthest back of the mainline. Surface or resurface these areas as directed by the Engineer. The Department will not measure placing and compacting for separate payment but shall be incidental to the Contract unit price for the asphalt mixtures.

#### **OPTION B**

Be advised that the Department will control and accept compaction of asphalt mixtures furnished on this project under OPTION B in accordance with Sections 402 and 403.

# SPECIAL NOTE FOR LIQUIDATED DAMAGES

The Department will assess Liquidated Damages in the following amounts for each hour or part of an hour a lane closure remains in place during periods prohibited by the Traffic Control Plan:

| 1 <sup>ST</sup> HOUR | $2^{ND}$ Hour | <b>EACH HOUR THEREAFTER</b> |
|----------------------|---------------|-----------------------------|
| \$ 1,000             | \$ 2,000      | \$3,000                     |

Contrary to section 108.09, the Department will assess Liquidated damages during the months of December through March.

Contrary to Section 108.09, the Department will assess Liquidated Damages regardless of whether seasonal limitations prohibit the Contractor from performing work on the controlling operation.

The Department will apply all liquidated damages accumulatively.

All other applicable portions of Section 108 apply.

BARREN COUNTY FD04SPP 005 0090 000-001 Contract ID: 142348 Page 13 of 82

## SPECIAL PROVISION FOR WASTE AND BORROW SITES

Obtain U.S. Army Corps of Engineer's approval before utilizing a waste or borrow site that involves "Waters of the United States". The Corps of Engineers defines "Waters of the United States" as perennial or intermittent streams, ponds or wetlands. The Corps of Engineers also considers ephemeral streams, typically dry except during rainfall but having a defined drainage channel, to be jurisdictional waters. Direct questions concerning any potential impacts to "Waters of the United States" to the attention of the appropriate District Office for the Corps of Engineers for a determination prior to disturbance. Be responsible for any fees associated with obtaining approval for waste and borrow sites from the U.S. Army Corps of Engineer or other appropriate regulatory agencies.

1-296 Waste & Borrow Sites 01/02/2012

# SPECIAL NOTE FOR PAVEMENT WEDGE AND SHOULDER SEPARATE OPERATION

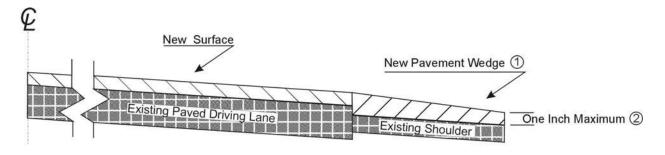

**1.0 MATERIALS.** Provide an Asphalt Mixture for Pavement Wedge conforming to Section 407 of the Standard Specifications or an Asphalt Surface Mixture conforming to Section 403 of the Standard Specifications, as applicable to the project, for the pavement wedge.

**2.0 CONSTRUCTION.** Place the Asphalt Mixture for Pavement Wedge or Asphalt Surface Mixture as a separate operation from the driving lane. Prime the existing shoulder with tack material as the Engineer directs before placing the wedge. Construct according to Sections 407.03 and 403.03 as applicable.

When the Engineer deems it appropriate to pave both the driving lane and the adjoining wedge monolithically, equip the paver with a modified screed that extends the full width of the wedge being placed and is tapered to produce a wedge. Obtain the Engineer's approval of the modified screed before placing shoulder wedge monolithically with the driving lane.

The wedge may vary in thickness at the edge of the driving lanes. Where existing site conditions permit, limit the outside edge thickness of the new paving limits to one inch above the existing shoulder wedge elevation. If an Asphalt Surface Mixture is furnished for the pavement wedge, texture according to Section 403.03.08.

The following sketch is primarily for the computation of quantities; however, the wedge will result in a similar cross-section where sufficient width exists. Do not construct a shoulder for placing the wedge unless specified elsewhere in the Contract.

- ① Slope varies, but is down from the driving lanes except on outside of some curves where superelevation controls.
- ② Where existing site conditions permit.
- **3.0 MEASUREMENT.** The Department will measure Asphalt Mixture for Pavement Wedge or Asphalt Surface Mixture placed as the pavement wedge according to Sections 403 and 407 as applicable.
- **4.0 PAYMENT.** The Department will make payment for the completed and accepted quantities of Asphalt Surface Mixtures placed as pavement wedge according to Section 403. The Department will make payment for the completed and accepted quantities of Asphalt Mixture for Pavement Wedge according to Section 407.

# SPECIAL NOTE FOR ASPHALT MILLING AND TEXTURING

Within twenty four hours of commencement of the 1¼ inch overall milling operation, begin milling the 4 and 8 inch milling cuts and backfilling with asphalt base as specified in the Traffic Control Plan. Continue paving operations continuously as specified in the Traffic Control Plan until completed. If paving operations are not begun or continued within these time periods, the Department will assess liquidated damages at the rate prescribed by Section 108.09 until such time as paving operations are begun and during periods when paving operations are suspended.

Take possession of the millings and recycle the millings or dispose of the millings off the Right-of-Way at sites obtained by the Contractor at no additional cost to the Department.

BARREN COUNTY FD04SPP 005 0090 000-001 Contract ID: 142348 Page 16 of 82

# SPECIAL NOTE FOR TYPICAL SECTION DIMENSIONS

Consider the dimensions shown on the typical sections for pavement and shoulder widths and thickness' to be nominal or typical dimensions. The Engineer may direct or approve varying the actual dimensions to be constructed to fit existing conditions. Do not widen existing pavement or shoulders unless specified elsewhere in this proposal or directed by the engineer.

1-3725 Typical Section Dimensions 01/02/2012

# TRAFFIC CONTROL PLAN FD04SPP 114 0234 012-013

#### TRAFFIC CONTROL GENERAL

Except as provided herein, maintain and control traffic in accordance with the Standard and Supplemental Specifications and the Standard and Sepia Drawings, current editions. Except for the roadway and traffic control bid items listed, all items of work necessary to maintain and control traffic will be paid at the lump sum bid price to "Maintain and Control Traffic".

Contrary to Section 106.01, furnish new, or used in like new condition, traffic control devices at the beginning of the work and maintain in like new condition until completion of the work.

#### PROJECT PHASING & CONSTRUCTION PROCEDURES

Except as specified in the specific requirements for Phase III below, do not erect lane closures during the following days and hours:

| 6:00 am – 7:00 pm        | Everyday of the week (7 Days) |  |
|--------------------------|-------------------------------|--|
| November 11, 2014        | Veteran's Day                 |  |
| November 27-30 2014      | Thanksgiving Holiday          |  |
| December 24-28, 2014     | Christmas Holiday             |  |
| December 31-Jan. 2, 2015 | New Year's Holiday            |  |
| April 3-5, 2015          | Easter Weekend                |  |
| May 22-25, 2015          | Memorial Day Weekend          |  |
| July 3-5, 2015           | Independence Day Weekend      |  |
| September 4-7, 2015      | Labor Day Weekend             |  |

The Engineer may specify additional days and hours when lane closures will not be allowed.

On non-holiday weekends, the Engineer may permit minor operations that do not require a lane closure and cause little disruption to traffic between the hours of 6:00 am and 7:00 pm

At locations with three or more lanes, maintain one lane of traffic in each direction at all times during construction. At locations with two lanes, maintain alternating one way traffic during construction. Provide a minimum clear lane width of 11 feet; however, provide for passage of vehicles of up to 16 feet in width. If traffic should be stopped due to construction operations, and a school bus on an official run arrives on the scene, make provisions for the passage of the bus as quickly as possible.

Traffic Control Plan Page 2 of 11

#### LANE CLOSURES

Do not leave lane closures in place during non-working hours.

#### **PHASING**

PHASE I – Mill entire area to be resurfaced, including shoulders, on KY 90 and the US 31W south approach.

PHASE II - Mill 4 inch depth cut in the two right lanes of KY 90 from milepoint 0.760 to 0.819. Backfill the trench with 4 inches of Class 3 Asphalt Base 1.00D PG76-22. Level and wedge and place temporary striping as necessary to reopen the lanes to traffic. Perform this phase in one continuous operation between the hours of 7:00 PM through 6:00 AM. Do not perform Phases II, III and IV concurrently.

PHASE III – Mill 8 inch depth cut in left lane (turn lane & shoulder) of KY 90 from milepoint 0.819 to 0.860. Work continuously to backfill the 8 inch trench with two lifts of 4 inches each of Class 3 Asphalt Base 1.00D PG76-22. Level and wedge and place temporary striping as necessary to reopen the lanes to traffic. Perform this phase in one continuous operation not to exceed 48 hours. Obtain the Engineer's approval of the scheduled closure seven calendar days in advance of beginning this phase. Do not perform Phases II, III, and IV concurrently.

PHASE IV – Mill 4 inch depth cut in the left lane of KY 90 adjacent to the 8 inch cut in Phase III from milepoint 0.819 to 0.880. Work continuously to backfill the 4 inch trench with 4 inches of Class 3 Asphalt Base 1.00D PG76-22. Level and wedge and place temporary striping as necessary to reopen the lanes to traffic. Perform this phase in one continuous operation between the hours of 7:00 PM through 6:00 AM. Do not perform Phases II, III and IV concurrently.

PHASE V – Maintain traffic on the backfilled areas. Level and wedge as directed by the Engineer until the Engineer determines that the asphalt base courses are adequately stabilized.

PHASE VI – When the Engineer determines the asphalt base is adequately stabilized, install traffic signal loops and place the final Class 3 Asphalt Surface 0.38B PG76-22 over the entire area to be resurfaced, including shoulders, on KY 90 and the US 31W approach. Place Permanent Striping And reopen the road to traffic. Perform this phase in one continuous operation between the hours of 7:00 PM through 6:00 AM. Maintain a minimum of one lane of traffic in each direction during this phase.

Phase VII – Within 24 hours of completion of Phase VI, place Thermoplastic Pavement Markings. Perform this phase in one continuous operation between the hours of 7:00 PM through 6:00 AM.

BARREN COUNTY FD04SPP 005 0090 000-001 Contract ID: 142348 Page 19 of 82

Traffic Control Plan Page 3 of 11

#### **SIGNS**

Contrary to section 112.04.02, only long term signs (signs intended to be continuously in place for more than 3 days) will be measured for payment; short term signs (signs intended to be left in place for 3 days or less) will not be measured for payment but will be incidental to Maintain and Control Traffic.

#### **CHANGEABLE MESSAGE SIGNS**

Provide changeable message signs in advance of and within the project at locations determined by the Engineer. If work is in progress concurrently in both directions or if more than one lane closure is in place in the same direction of travel, provide additional changeable message signs as directed by the Engineer. Place changeable message signs as directed by the Engineer in advance of the anticipated queue at each lane closure. As the actual queue lengthens and/or shortens, relocate or provide additional changeable message signs so that traffic has warning of slowed or stopped traffic at least one mile but not more than two miles before reaching the end of the actual queue. The Engineer may vary the designated locations as the work progresses. The Engineer will determine the messages to be displayed. In the event of damage or mechanical/electrical failure, repair or replace the Changeable Message Sign within 24 hours. The Department will measure for payment the maximum number of Changeable Message Signs in concurrent use at the same time on a single day on all sections of the contract. The Department will measure individual Changeable Message Signs only once for payment, regardless of how many times they are set, reset, removed, and relocated during the duration of the project. The Department will not measure replacements for damaged Changeable Message Signs or for signs the Engineer directs be replaced due to poor condition or readability. Retain possession of the Changeable Message Signs upon completion of the work.

#### **TEMPORARY ENTRANCES**

The Engineer will not require the Contractor to provide continuous access to farms, single family, duplex, or triplex residential properties during working hours; however, provide reasonable egress and ingress to each such property when actual operations are not in progress at that location. Limit the time during which a farm or residential entrance is blocked to the minimum length of time required for actual operations, not extended for the Contractor's convenience, and in no case exceeding six (6) hours. Notify all residents twenty-four hours in advance of any driveway or entrance closings and make any accommodations necessary to meet the access needs of disabled residents.

Maintain direct access to all side streets and roads, schools, churches, commercial properties and apartments or apartment complexes of four or more units at all times.

The Department will measure asphalt materials required to construct and maintain any temporary

Traffic Control Plan Page 4 of 11

entrances which may be necessary to provide temporary access; however, the Department will not measure aggregates, excavation, and/or embankment, but shall be incidental to Maintain and Control Traffic. The Engineer will determine the type of surfacing material, asphalt or aggregate, to be used at each entrance.

#### TRAFFIC SIGNAL LOOPS

Install traffic signal loops according to the Special Notes for Traffic Signal Loop Replacement, except place loops subsequent to Phase V rather than prior to milling. Coordinate the placement of the loops with the Engineer.

#### THERMOPLASTIC INTERSECTION MARKINGS

Consider the locations listed on the summary as approximate only. Prior to milling and/or resurfacing, locate and document the locations of the existing markings. After resurfacing, replace the markings at their approximate existing locations or as directed by Engineer. Place markings not existing prior to resurfacing as directed by the Engineer.

#### **BARRICADES**

The Department will not measure barricades used in lieu of barrels and cones for channelization or delineation, but shall be incidental to Maintain and Control Traffic according to Section 112.04.01.

The Department will measure barricades used to protect pavement removal areas in individual units Each. The Department will measure for payment the maximum number of barricades in concurrent use at the same time on a single day on all sections of the contract. The Department will measure individual barricades only once for payment, regardless of how many times they are set, reset, removed, and relocated during the duration of the project. The Department will not measure replacements for damaged barricades the Engineer directs to be replaced due to poor condition or reflectivity. Retain possession of the Barricades upon completion of the work.

#### PAVEMENT MARKINGS

There will be a deviation from the existing striping plan. The Engineer will furnish the Contractor a striping plan prior to placement of the final surface course. Install Temporary Striping according to Section 112 with the following exceptions:

- 1. Include edge lines in Temporary Striping; and
- 2. Place Temporary or Permanent Striping before opening a lane to traffic; and
- 3. If the Contractor's operations or phasing requires temporary markings that must

Traffic Control Plan Page 5 of 11

subsequently be removed from the final surface course, use an approved removable lane tape; however, the Department will not measure removable lane tape for separate payment, but will measure and pay for removable lane tape as temporary striping.

#### PAVEMENT EDGE DROP-OFFS

Do not allow a pavement edge between opposing directions of traffic or lanes that traffic is expected to cross in a lane change situation with an elevation difference greater than 1½". Place Warning signs (MUTCD W8-11 or W8-9A) in advance of and at 1500' intervals throughout the drop-off area. Dual post the signs on both sides of the traveled way. Wedge all transverse transitions between resurfaced and unresurfaced areas which traffic may cross with asphalt mixture for leveling and wedging. Remove the wedges prior to placement of the final surface course.

Protect pavement edges that traffic is not expected to cross, except accidentally, as follows:

Less than 2" - No protection required.

2" to 4" - Place plastic drums, vertical panels, or barricades every 50 feet. During daylight working hours only, the Engineer will allow the Contractor to use cones in lieu of plastic drums, panels, and barricades. Wedge the drop-off with DGA or asphalt mixture for leveling and wedging with a 1:1 or flatter slope in daylight hours, or 3:1 or flatter slope during nighttime hours, when work is not active in the drop-off area.

Greater than 4' - Protect drop-offs greater than 4 inches within 10 feet of traffic by placing drums, vertical panels, or barricades every 25 feet. The Engineer will not allow the use of cones in lieu of drums, vertical panels, or barricades for drop-offs greater than 4". Place Type III Barricades directly in front of the drop-off facing on coming traffic in both directions of travel. Provide warning signs as shown on the Standard Drawings or as directed by the Engineer

Pedestrians & Bicycles - Protect pedestrian and bicycle traffic as directed by the engineer.

Traffic Control Plan Page 6 of 11

#### USE AND PLACEMENT OF CHANGEABLE MESSAGE SIGNS

The following policy is based upon current Changeable Message Signs (CMS) standards and practice from many sources, including the Federal Highway Administration (FHWA), other State Departments of Transportation, and Traffic Safety Associations. It is understood that each CMS installation or use requires individual consideration due to the specific location or purpose. However, there will be elements that are constant in nearly all applications. Accordingly these recommended guidelines bring a level of uniformity, while still being open to regional experience and engineering judgment.

#### **Application**

The primary purpose of CMS is to advise the driver of unexpected traffic and routing situations. Examples of applications where CMS can be effective include:

- Closures (road, lane, bridge, ramp, shoulder, interstate)
- Changes in alignment or surface conditions
- Significant delays, congestion
- Construction/maintenance activities (delays, future activities)
- Detours/alternative routes
- Special events with traffic and safety implications
- Crash/incidents
- Vehicle restrictions (width, height, weight, flammable)
- Advance notice of new traffic control devices
- Real-time traffic conditions (must be kept up to date)
- Weather /driving conditions, environmental conditions, Roadway Weather Information Systems
- Emergency Situations
- Referral to Highway Advisory Radio (if available)
- Messages as approved by the County Engineer's Office

#### CMS should not be used for:

- Replacement of static signs (e.g. road work ahead), regulatory signage (e.g. speed limits), pavement markings, standard traffic control devices, conventional warning or guide signs.
- Replacement of lighted arrow board
- Advertising (Don't advertise the event unless clarifying "action" to be taken by driver e.g. Speedway traffic next exit)
- Generic messages
- Test messages (portable signs only)
- Describe recurrent congestion (e.g. rush hour)
- Public service announcements (not traffic related

# Traffic Control Plan Page 7 of 11

#### Messages

Basic principles that are important to providing proper messages and insuring the proper operation of a CMS are:

- Visible for at least ½ mile under ideal daytime and nighttime conditions
- Legible from all lanes a minimum of 650 feet
- Entire message readable twice while traveling at the posted speed
- Nor more than two message panels should be used (three panels may be used on roadways where vehicles are traveling less than 45 mph). A panel is the message that fits on the face of the sign without flipping or scrolling.
- Each panel should convey a single thought; short and concise
- Do not use two unrelated panels on a sign
- Do not use the sign for two unrelated messages
- Should not scroll text horizontally or vertically
- Should not contain both the words left and right
- Use standardized abbreviations and messages
- Should be accurate and timely
- Avoid filler/unnecessary words and periods (hazardous, a, an, the)
- Avoid use of speed limits
- Use words (not numbers) for dates

#### **Placement**

Placement of the CMS is important to insure that the signs is visible to the driver and provides ample time to take any necessary action. Some of the following principles may only be applicable to controlled access roadways. The basic principles of placement for a CMS are:

- When 2 signs are needed, place on same side of roadway and at least 1,000 feet apart
- Place behind semi-rigid/rigid protection (guardrail, barrier) or outside of the clear zone
- Place 1,000 feet in advance of work zone; at least one mile ahead of decision point
- Normally place on right side of roadway; but should be placed closest to the affected lane so that either side is acceptable
- Signs should not be dual mounted (one on each side of roadway facing same direction)
- Point trailer hitch downstream
- Secure to immovable object to prevent thief (if necessary)
- Do not place in sags or just beyond crest
- Check for reflection of sun to prevent the blinding of motorist
- Should be turned ~3 degrees outward from perpendicular to the edge of pavement
- Bottom of sign should be 7 feet above the elevation of edge of roadway
- Should be removed when not in use

•

#### SPECIAL NOTE FOR TRAFFIC SIGNAL LOOP DETECTORS

#### I. DESCRIPTION.

Be advised there are existing traffic signal loop detectors within the construction limits of this project. Except as specified herein, perform traffic signal loop replacement in accordance with the Department's Standard and Supplemental Specifications and Standard and Sepia Drawings, current editions. Article references are to the Standard Specifications. Furnish all materials, labor, equipment, and incidentals for replacement of traffic signal loop installation(s) and all other work specified as part of this contract.

#### II. MATERIALS.

Except as specified herein, furnish materials in accordance with Section 723. Provide for materials to be sampled and tested in accordance with the Department's Sampling Manual. Make materials available for sampling a sufficient time in advance of the use of the materials to allow for the necessary time for testing, unless otherwise specified in these Notes.

- **A. Maintain and Control Traffic.** See Traffic Control Plan.
- **B. Sand.** Furnish natural sand meeting the requirements of 804.04.01.
- **C. Seeding.** Use Seed Mix Type I.
- **D. Loop Saw Slot and Fill.** Furnish loop sealant, backer rod, and non-shrink grout according to the Saw Slot Detail.

#### III. CONSTRUCTION METHODS.

Except as specified herein, install and test Traffic Signal Loop Detectors in accordance with Section 723 and the drawings.

- **A. Coordination.** Notify the Engineer in writing, two (2) weeks prior to beginning any work. The Engineer will contact and maintain liaison with the District Traffic Engineer and the Central Office Division of Traffic Operations to coordinate the Department's operations with the Contractor's work.
- B. Maintain and Control Traffic. See Traffic Control Plan.
- **C. Milling.** On projects involving milling and texturing of the existing pavement, install loops in the existing pavement before performing the milling and texturing. If, after milling, the remnant contents of the existing saw slot (grout, loop wires, backer rod, and/or loop sealant) are not intact and flush with or below the top of the milled portion of the asphalt and with the saw slot completely filled with fines from the milling operation,

# Traffic Signal Loop Detectors Page 2 of 7

clear the saw slot of loose remnant contents and refill the saw slot with natural sand. Obtain the Engineer's approval of the stabilized saw slot prior to resurfacing.

- **D.** Loop Saw Slot and Fill. The following is a typical step by step procedure for the installation of a loop.
  - Carefully mark the slot to be cut, perpendicular to the flow of traffic and centered in the lane.
  - Make each saw-cut 3/8-inch wide and at a depth such that the top of the backer rod is a minimum of 4 inches below the surface of asphalt pavement.
  - Drill a 1½ inch core hole at each corner and use a chisel to smooth corners to prevent sharp bends in the wire.
  - Clean ALL foreign and loose matter out of the slots and drilled cores and within 1 foot on all sides of the slots using a high pressure washer.
  - Completely dry the slots and drilled cores and within 1 foot on all sides of the slots.
  - Measure 9-12 inches from the edge of the paved surface (shoulder break or face of curb) and drill a 1½ inch hole on a 45° angle to the conduit adjacent to the roadway.
  - Closely inspect all cuts, cores, and slots for jagged edges or protrusions prior to the placement of the wire. All jagged edges and protrusions shall be ground or re-cut and cleaned again.
  - Place the loop wire splice-free from the termination point (cabinet or junction box) to the loop, continue around the loop for two turns (6'x30' loop) or three turns (6'x6' loop), and return to the termination point.
  - Push the wire into the saw slot with a blunt object such as a wooden stick. Make sure that the loop wire is pushed fully to the bottom of the saw slot. Screwdrivers shall not be used.
  - Install duct sealant to a minimum of 1" deep into the cored 1½ inch hole.
  - Apply loop sealant from the bottom up and fully encapsulate the loop wires in the saw slot. The wire should not be able to move when the sealant has set.
  - Cover the encapsulated loop wire with a continuous layer of backer rod along the entire loop and home run saw slots such that no voids are present between the loop sealant and backer rod.
  - Finish filling the saw cut with non-shrinkable grout per manufacturer's instructions. Alleviate all air pockets and refill low spaces. There shall be no concave portion to the grout in the saw slot. Any excess grout shall be cleaned from the roadway to alleviate tracking.
  - Clean up the site and dispose of all waste off the project.
  - Ensure that the grout has completely cured prior to subjecting the loop to traffic. Curing time varies with temperature and humidity.

Traffic Signal Loop Detectors Page 3 of 7

- **E. Final Dressing, Clean Up, and Seeding.** After all work is completed, clean work sites and all disturbed areas. Dispose of all waste and debris off the right of way at sites obtained by the Contractor at no additional cost to the Department. Sow all disturbed earthen areas with Seed Mix Type I.
- **F. Property Damage.** Be responsible for all damage to public and/or private property resulting from the work. Upon completion of the work, restore all disturbed highway features and private property in like kind design and materials at no additional cost to the Department.
- **G. On-Site Inspection.** Make a thorough inspection of the site prior to submitting bid and become thoroughly familiar with existing conditions so that the work can be expeditiously performed after a contract is awarded. The Department will consider submission of a bid as evidence of this inspection having been made. The Department will not honor any claims resulting from site conditions.
- **H. Right-of-Way Limits.** The Department has not established exact limits of Right-of-Way. Limit work activities to obvious Right-of-Way and work areas secured by the Department through Consent and Release of the adjacent property owners. Be responsible for all encroachments onto private lands.
- **I. Utility Clearance.** Work around and do not disturb existing utilities. The Department does not anticipate that existing utilities will require relocation; however, if utility relocation is required, the utility companies will work concurrently with the Contractor while relocating their facilities.
- **J. Caution.** Consider the information in this proposal and shown on the plans and the type of work listed herein to be approximate. Do not take the information to be an accurate evaluation of the materials and conditions to be encountered during construction. The bidder must draw his own conclusions as to the conditions encountered. The Department does not give any guarantee as to the accuracy of the data and will not consider any claims for additional compensation if the conditions encountered are not in accordance with the information shown.
- **K. Control.** Perform all work under under the absolute control of the Department of Highways. Obtain the Engineer's approval of all designs required to be furnished by the Contractor prior to incorporation into the work. The Department reserves the right to have other work performed by other contractors and its own forces and to permit public utility companies and others to do work during the construction within the limits of, or adjacent to, the project. Conduct operations and cooperate with such other parties so that interference with each other's work will be reduced to a minimum. By submitting bid, the Contractor agrees to make no claims against the Department for additional compensation due to delays or other conditions created by the operations of such other parties. Should a difference of opinion arise as to the rights of the Contractor and others working within the limits of, or adjacent to, the project, the Engineer will decide as to the respective rights of the various parties involved in order to assure the completion of the work in general harmony and in a satisfactory manner, and his decision shall be final and binding upon the Contractor.

Traffic Signal Loop Detectors Page 4 of 7

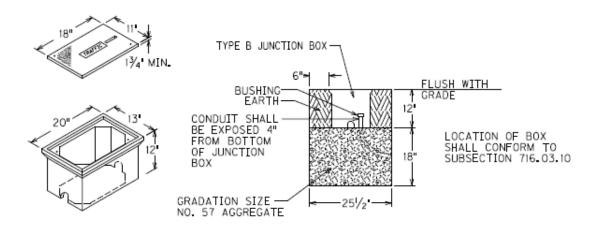

#### IV. MEASUREMENT.

The Department will measure for payment only the bid items listed. All other items required to complete the construction shall be incidental to the bid items listed.

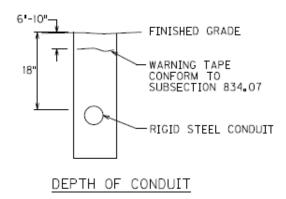

- A. Maintain and Control Traffic. See Traffic Control Plan.
- **B. Traffic Signal Loop detectors.** See Section 723.04.
- **C. Sand.** The department will not measure natural sand used to fill existing loop slots after milling, but shall be incidental to Milling and Texturing
- **V. PAYMENT**. The Department will make payment for the completed and accepted quantities of listed items according to Section 723.05. The Department will consider payment as full compensation for all work required under these notes and the Standard Specifications.

#### **CROSSWALK DETAIL**

GENERAL NOTE: ALL CROSSWALKS SHALL BE "LADDER" STYLE CROSSWALKS.

The Department will measure the sum of the lengths of the rails in linear feet for payment as Pavement Marking – Thermo X-Walk – 6 Inch.

The Department will measure the sum of the lengths of the rungs in linear feet for payment as Pavement Marking – Thermo X-Walk – 12 Inch.

#### **PART II**

#### SPECIFICATIONS AND STANDARD DRAWINGS

#### **SPECIFICATIONS REFERENCE**

Any reference in the plans or proposal to previous editions of the *Standard Specifications* for Road and Bridge Construction and Standard Drawings are superseded by Standard Specifications for Road and Bridge Construction, Edition of 2012 and Standard Drawings, Edition of 2012 with the 2012 Revision.

| <b>Subsection:</b> | 102.15 Process Agent.  |
|--------------------|--|
| <b>Revision:</b>   | Replace the 1st paragraph with the following:  |
|                    | Every corporation doing business with the Department shall submit evidence of compliance with      |
|                    | KRS Sections 14A.4-010, 271B.11-010, 271B.11-070, 271B.11-080, 271B.5-010 and 271B.16-             |
|                    | 220, and file with the Department the name and address of the process agent upon whom process      |
|                    | may be served.   |
| <b>Subsection:</b> | 105.13 Claims Resolution Process.  |
| <b>Revision:</b>   | Delete all references to TC 63-34 and TC 63-44 from the subsection as these forms are no longer    |
|                    | available through the forms library and are forms generated within the AASHTO SiteManager          |
|                    | software.  |
|                    | 108.03 Preconstruction Conference.   |
| <b>Revision:</b>   | Replace 8) Staking with the following:   |
|                    | 8) Staking (designated by a Professional Engineer or Land Surveyor licensed in the                 |
|                    | Commonwealth of Kentucky.  |
|                    | 109.07.02 Fuel.  |
| <b>Revision:</b>   | Revise item Crushed Aggregate Used for Embankment Stabilization to the following:                  |
|                    | Crushed Aggregate  |
|                    | Used for Stabilization of Unsuitable Materials   |
|                    | Used for Embankment Stabilization  |
|                    | Delete the following item from the table.  |
|                    | Crushed Sandstone Base (Cement Treated)  |
|                    | 110.02 Demobilization.   |
| Revision:          | Replace the first part of the first sentence of the second paragraph with the following:           |
|                    | Perform all work and operations necessary to accomplish final clean-up as specified in the first   |
|                    | paragraph of Subsection 105.12;  |
| <b>Subsection:</b> | 112.03.12 Project Traffic Coordinator (PTC).   |
| <b>Revision:</b>   | Replace the last paragraph of this subsection with the following:                                  |
|                    | Ensure the designated PTC has sufficient skill and experience to properly perform the task         |
|                    | assigned and has successfully completed the qualification courses.                                 |
|                    | 112.04.18 Diversions (By-Pass Detours).  |
| <b>Revision:</b>   | Insert the following sentence after the 2nd sentence of this subsection.                           |
|                    | The Department will not measure temporary drainage structures for payment when the contract        |
|                    | documents provide the required drainage opening that must be maintained with the diversion.        |
|                    | The temporary drainage structures shall be incidental to the construction of the diversion. If the |
|                    | contract documents fail to provide the required drainage opening needed for the diversion, the     |
|                    | cost of the temporary drainage structure will be handled as extra work in accordance with section  |
|                    | 109.04.  |
|                    | 201.03.01 Contractor Staking.  |
| <b>Revision:</b>   | Replace the first paragraph with the following: Perform all necessary surveying under the          |
|                    | general supervision of a Professional Engineer or Land Surveyor licensed in the Commonwealth       |
|                    | of Kentucky.   |

#### Contract ID: 142348 Page 48 of 82

| <b>Subsection:</b> | 201.04.01 Contractor Staking.   |
|--------------------|---|
| <b>Revision:</b>   | Replace the last sentence of the paragraph with the following: Complete the general layout of     |
|                    | the project under the supervision of a Professional Engineer or Land Surveyor licensed in the     |
|                    | Commonwealth of Kentucky.   |
| <b>Subsection:</b> | 206.04.01 Embankment-in-Place.  |
| <b>Revision:</b>   | Replace the fourth paragraph with the following: The Department will not measure suitable         |
|                    | excavation included in the original plans that is disposed of for payment and will consider it    |
|                    | incidental to Embankment-in-Place.  |
| <b>Subsection:</b> | 208.02.01 Cement.   |
| <b>Revision:</b>   | Replace paragraph with the following:   |
|                    | Select Type I or Type II cement conforming to Section 801. Use the same type cement               |
|                    | throughout the work.  |
|                    | 208.03.06 Curing and Protection.  |
| <b>Revision:</b>   | Replace the fourth paragraph with the following:  |
|                    | Do not allow traffic or equipment on the finished surface until the stabilized subgrade has cured |
|                    | for a total of 7-days with an ambient air temperature above 40 degrees Fahrenheit. A curing day   |
|                    | consists of a continuous 24-hour period in which the ambient air temperature does not fall below  |
|                    | 40 degrees Fahrenheit. Curing days will not be calculated consecutively, but must total seven (7) |
|                    | , 24-hour days with the ambient air temperature remaining at or above 40 degrees Fahrenheit       |
|                    | before traffic or equipment will be allowed to traverse the stabilized subgrade. The Department   |
|                    | may allow a shortened curing period when the Contractor requests. The Contractor shall give the   |
|                    | Department at least 3 day notice of the request for a shortened curing period. The Department     |
|                    | will require a minimum of 3 curing days after final compaction. The Contractor shall furnish      |
|                    | cores to the treated depth of the roadbed at 500 feet intervals for each lane when a shortened    |
|                    | curing time is requested. The Department will test cores using an unconfined compression test.    |
|                    | Roadbed cores must achieve a minimum strength requirement of 80 psi.                              |
|                    | 208.03.06 Curing and Protection.  |
| Revision:          | Replace paragraph eight with the following:   |
| a                  | At no expense to the Department, repair any damage to the subgrade caused by freezing.            |
|                    | 212.03.03 Permanent Seeding and Protection.   |
| Part:              | A) Seed Mixtures for Permanent Seeding.   |
| Revision:          | Revise <b>Seed Mix Type I</b> to the mixture shown below:   |
|                    | 50% Kentucky 31 Tall Fescue (Festuca arundinacea)   |
|                    | 35% Hard Fescue (Festuca (Festuca longifolia)   |
|                    | 10% Ryegrass, Perennial (Lolium perenne)  |
|                    | 5% White Dutch Clover (Trifolium repens)  |
|                    | 212.03.03 Permanent Seeding and Protection.   |
| Part:              | A) Seed Mixtures for Permanent Seeding.   |
| Number:            | 2)  Deadle of the management with the full arriver.   |
|                    | Replace the paragraph with the following:   |
|                    | Permanent Seeding on Slopes Greater than 3:1 in Highway Districts 4, 5, 6, and 7. Apply seed      |
|                    | mix Type II at a minimum application rate of 100 pounds per acre. If adjacent to a golf course    |
|                    | replace the crown vetch with Kentucky 31 Tall Fescue.   |

#### Contract ID: 142348 Page 49 of 82

| <b>Subsection:</b> | 212.03.03 Permanent Seeding and Protection.   |
|--------------------|---|
| Part:              | A) Seed Mixtures for Permanent Seeding.   |
| Number:            | 3)  |
| <b>Revision:</b>   | Replace the paragraph with the following:   |
|                    | Permanent Seeding on Slopes Greater than 3:1 in Highway Districts 1, 2, 3, 8, 9, 10, 11, and 12.        |
|                    | Apply seed mix Type III at a minimum application rate of 100 pounds per acre. If adjacent to            |
|                    | crop land or golf course, replace the Sericea Lespedeza with Kentucky 31 Fescue.                        |
| <b>Subsection:</b> | 212.03.03 Permanent Seeding and Protection.   |
| Part:              | B) Procedures for Permanent Seeding.  |
| <b>Revision:</b>   | Delete the first sentence of the section.   |
| <b>Subsection:</b> | 212.03.03 Permanent Seeding and Protection.   |
| Part:              | B) Procedures for Permanent Seeding.  |
| <b>Revision:</b>   | Replace the second and third sentence of the section with the following:                                |
|                    | Prepare a seedbed and apply an initial fertilizer that contains a minimum of 100 pounds of              |
|                    | nitrogen, 100 pounds of phosphate, and 100 pounds of potash per acre. Apply agricultural                |
|                    | limestone to the seedbed when the Engineer determines it is needed. When required, place                |
|                    | agricultural limestone at a rate of 3 tons per acre.  |
| <b>Subsection:</b> | 212.03.03 Permanent Seeding and Protection.   |
| Part:              | D) Top Dressing.  |
| Revision:          | Change the title of part to D) Fertilizer.  |
| <b>Subsection:</b> | 212.03.03 Permanent Seeding and Protection.   |
| Part:              | D) Fertilizer.  |
| Revision:          | Replace the first paragraph with the following:   |
|                    | Apply fertilizer at the beginning of the seeding operation and after vegetation is established. Use     |
|                    | fertilizer delivered to the project in bags or bulk. Apply initial fertilizer to all areas prior to the |
|                    | seeding or sodding operation at the application rate specified in 212.03.03 B). Apply 20-10-10          |
|                    | fertilizer to the areas after vegetation has been established at a rate of 11.5 pounds per 1,000        |
|                    | square feet. Obtain approval from the Engineer prior to the 2nd fertilizer application. Reapply         |
|                    | fertilizer to any area that has a streaked appearance. The reapplication shall be at no additional      |
|                    | cost to the Department. Re-establish any vegetation severely damaged or destroyed because of            |
|                    | an excessive application of fertilizer at no cost to the Department.                                    |
|                    | 212.03.03 Permanent Seeding and Protection.   |
| Part:              | D) Fertilizer.  |
| Revision:          | Delete the second paragraph.  |
|                    | 212.04.04 Agricultural Limestone.   |
| Revision:          | Replace the entire section with the following:  |
| G 1 4              | The Department will measure the quantity of agricultural limestone in tons.                             |
|                    | 212.04.05 Fertilizer.   |
| Revision:          | Replace the entire section with the following:  |
|                    | The Department will measure fertilizer used in the seeding or sodding operations for payment.           |
|                    | The Department will measure the quantity by tons.   |

| Table: Required Geogrid Properties   |  |  |  |  |  |
| <b>Revision:</b> Replace all references to Test Method "GRI-GG2-87" with ASTM D 7737.  |  |  |  |  |  |
| Subsection:  402.03.02 Contractor Quality Control and Department Acceptance.   |  |  |  |  |  |
| Part: B) Sampling.   |  |  |  |  |  |
| Revision: Replace the second sentence with the following:  |  |  |  |  |  |
| The Department will determine when to obtain the quality control samples using the rand  |  |  |  |  |  |
| number feature of the mix design submittal and approval spreadsheet. The Department v  |  |  |  |  |  |
| randomly determine when to obtain the verification samples required in Subsections 402   | .03.03   |  |  |  |  |
| and 402.03.04 using the Asphalt Mixture Sample Random Tonnage Generator.  Subsection: 402.03.02 Contractor Quality Control and Department Acceptance.  |  |  |  |  |  |
| Part: D) Testing Responsibilities.   |  |  |  |  |  |
|  | 3) VMA.  |  |  |  |  |
|  | Add the following paragraph below Number 3) VMA: |  |  |  |  |
| Retain the AV/VMA specimens and one additional corresponding $G_{mm}$ sample for 5 wor   | king   |  |  |  |  |
| days for mixture verification testing by the Department. For Specialty Mixtures, retain a  |  |  |  |  |  |
| sample for 5 working days for mixture verification testing by the Department. When the   |  |  |  |  |  |
| Department's test results do not verify that the Contractor's quality control test results are   |  |  |  |  |  |
| the acceptable tolerances according to Subsection 402.03.03, retain the samples and spec   |  |  |  |  |  |
| from the affected sublot(s) for the duration of the project.   |  |  |  |  |  |
| Subsection: 402.03.02 Contractor Quality Control and Department Acceptance.  |  |  |  |  |  |
| Part: D) Testing Responsibilities.   |  |  |  |  |  |
| Number: 4) Density.  |  |  |  |  |  |
| <b>Revision:</b> Replace the second sentence of the Option A paragraph with the following:   |  |  |  |  |  |
| Perform coring by the end of the following work day.   |  |  |  |  |  |

Contract ID: 142348 Page 51 of 82

### Supplemental Specifications to the Standard Specifications for Road and Bridge Construction, 2012 Edition Effective with the August 22, 2014 Letting

**Subsection:** 402.03.02 Contractor Quality Control and Department Acceptance.

Part: D) Testing Responsibilities.

**Number:** 5) Gradation.

**Revision:** Delete the second paragraph.

**Subsection:** 402.03.02 Contractor Quality Control and Department Acceptance.

Part: H) Unsatisfactory Work.
Number: 1) Based on Lab Data.

**Revision:** Replace the second paragraph with the following:

When the Engineer determines that safety concerns or other considerations prohibit an immediate shutdown, continue work and the Department will make an evaluation of acceptability according to Subsection 402.03.05.

**Subsection:** 402.03.03 Verification.

**Revision:** Replace the first paragraph with the following:

**402.03.03 Mixture Verification.** For volumetric properties, the Department will perform a minimum of one verification test for AC, AV, and VMA according to the corresponding procedures as given in Subsection 402.03.02. The Department will randomly determine when to obtain the verification sample using the Asphalt Mixture Sample Random Tonnage Generator. For specialty mixtures, the Department will perform one AC and one gradation determination per lot according to the corresponding procedures as given in Subsection 402.03.02. However, Department personnel will not perform AC determinations according to KM 64-405. The Contractor will obtain a quality control sample at the same time the Department obtains the mixture verification sample and perform testing according to the procedures given in Subsection 402.03.02. If the Contractor's quality control sample is verified by the Department's test results within the tolerances provided below, the Contractor's sample will serve as the quality control sample for the affected sublot. The Department may perform the mixture verification test on the Contractor's equipment or on the Department's equipment.

**Subsection:** 402.03.03 Verification.

**Part:** A) Evaluation of Sublot(s) Verified by Department.

**Revision:** Replace the third sentence of the second paragraph with the following:

When the paired t-test indicates that the Contractor's data and Department's data are possibly not from the same population, the Department will investigate the cause for the difference according to Subsection 402.03.05 and implement corrective measures as the Engineer deems appropriate.

**Subsection:** 402.03.03 Verification.

**Part:** B) Evaluation of Sublots Not Verified by Department.

**Revision:** Replace the third sentence of the first paragraph with the following:

When differences between test results are not within the tolerances listed below, the Department will resolve the discrepancy according to Subsection 402.03.05.

Contract ID: 142348 Page 52 of 82

| Subsection:        | 402.03.03 Verification.   |
|--------------------|---|
| Part:              | B) Evaluation of Sublots Not Verified by Department.  |
| <b>Revision:</b>   | Replace the third sentence of the second paragraph with the following:                                  |
|                    | When the $F$ -test or $t$ -test indicates that the Contractor's data and Department's data are possibly |
|                    | not from the same population, the Department will investigate the cause for the difference              |
|                    | according to Subsection 402.03.05 and implement corrective measures as the Engineer deems               |
|                    | appropriate.  |
| <b>Subsection:</b> | 402.03.03 Verification.   |
| Part:              | C) Test Data Patterns.  |
| Revision:          | Replace the second sentence with the following:   |
|                    | When patterns indicate substantial differences between the verified and non-verified sublots, the       |
|                    | Department will perform further comparative testing according to subsection 402.03.05.                  |
| <b>Subsection:</b> | 402.03 CONSTRUCTION.  |
| <b>Revision:</b>   | Add the following subsection: 402.03.04 Testing Equipment and Technician Verification.                  |
|                    | For mixtures with a minimum quantity of 20,000 tons and for every 20,000 tons thereafter, the           |
|                    | Department will obtain an additional verification sample at random using the Asphalt Mixture            |
|                    | Sample Random Tonnage Generator in order to verify the integrity of the Contractor's and                |
|                    | Department's laboratory testing equipment and technicians. The Department will obtain a                 |
|                    | mixture sample of at least 150 lb at the asphalt mixing plant according to KM 64-425 and split it       |
|                    | according to AASHTO R 47. The Department will retain one split portion of the sample and                |
|                    | provide the other portion to the Contractor. At a later time convenient to both parties, the            |
|                    | Department and Contractor will simultaneously reheat the sample to the specified compaction             |
|                    | temperature and test the mixture for AV and VMA using separate laboratory equipment                     |
|                    | according to the corresponding procedures given in Subsection 402.03.02. The Department will            |
|                    | evaluate the differences in test results between the two laboratories. When the difference              |
|                    | between the results for AV or VMA is not within $\pm 2.0$ percent, the Department will investigate      |
|                    | and resolve the discrepancy according to Subsection 402.03.05.  |
| <b>Subsection:</b> | 402.03.04 Dispute Resolution.   |
| <b>Revision:</b>   | Change the subsection number to 402.03.05.  |
| <b>Subsection:</b> | 402.05 PAYMENT.   |
| Part:              | Lot Pay Adjustment Schedule Compaction Option A Base and Binder Mixtures                                |
| Table:             | AC  |
| Revision:          | Replace the Deviation from JMF(%) that corresponds to a Pay Value of 0.95 to ±0.6.                      |
|                    | 403.02.10 Material Transfer Vehicle (MTV).  |
| Revision:          | Replace the first sentence with the following:  |
|                    | In addition to the equipment specified above, provide a MTV with the following minimum                  |
|                    | characteristics:  |
| <b>Subsection:</b> | 412.02.09 Material Transfer Vehicle (MTV).  |
| Revision:          | Replace the paragraph with the following:   |
|                    | Provide and utilize a MTV with the minimum characteristics outlined in section 403.02.10.               |

Contract ID: 142348 Page 53 of 82

| Subsections        | 412.03.07 Placement and Compaction.  |
|--------------------|--|
| Revision:          | _  |
| Revision:          | Replace the first paragraph with the following:  |
|                    | Use a MTV when placing SMA mixture in the driving lanes. The MTV is not required on ramps          |
|                    | and/or shoulders unless specified in the contract. When the Engineer determines the use of the     |
|                    | MTV is not practical for a portion of the project, the Engineer may waive its requirement for that |
|                    | portion of pavement by a letter documenting the waiver.  |
|                    | 412.04 MEASUREMENT.  |
| Revision:          | Add the following subsection:  |
|                    | 412.04.03. Material Transfer Vehicle (MTV). The Department will not measure the MTV for            |
|                    | payment and will consider its use incidental to the asphalt mixture.                               |
|                    | 501.03.19 Surface Tolerances and Testing Surface.  |
| Part:              | B) Ride Quality.   |
| Revision:          | Add the following to the end of the first paragraph:   |
|                    | The Department will specify if the ride quality requirements are Category A or Category B when     |
|                    | ride quality is specified in the Contract. Category B ride quality requirements shall apply when   |
|                    | the Department fails to classify which ride quality requirement will apply to the Contract.        |
|                    |  |
| <b>Subsection:</b> | 603.03.06 Cofferdams.  |
| Revision:          | Replace the seventh sentence of paragraph one with the following:                                  |
|                    | Submit drawings that are stamped by a Professional Engineer licensed in the Commonwealth of        |
|                    | Kentucky.  |
| <b>Subsection:</b> | 605.03.04 Tack Welding.  |
| Revision:          | Insert the subsection and the following:   |
|                    | 605.03.04 Tack Welding. The Department does not allow tack welding.                                |
| <b>Subsection:</b> | 606.03.17 Special Requirements for Latex Concrete Overlays.  |
| Part:              | A) Existing Bridges and New Structures.  |
| Number:            | 1) Prewetting and Grout-Bond Coat.   |
| <b>Revision:</b>   | Add the following sentence to the last paragraph: Do not apply a grout-bond coat on bridge         |
|                    | decks prepared by hydrodemolition.   |
| <b>Subsection:</b> | 609.03 Construction.   |
| <b>Revision:</b>   | Replace Subsection 609.03.01 with the following:   |
|                    | 609.03.01 A) Swinging the Spans. Before placing concrete slabs on steel spans or precast           |
|                    | concrete release the temporary erection supports under the bridge and swing the span free on its   |
|                    | supports.  |
|                    | 609.03.01 B) Lift Loops. Cut all lift loops flush with the top of the precast beam once the beam   |
|                    | is placed in the final location and prior to placing steel reinforcement. At locations where lift  |
|                    | loops are cut, paint the top of the beam with galvanized or epoxy paint.                           |
| <b>Subsection:</b> | 611.03.02 Precast Unit Construction.   |
| Revision:          | Replace the first sentence of the subsection with the following:                                   |
|                    | Construct units according to ASTM C1577, replacing Table 1 (Design Requirements for                |
|                    | Precast Concrete Box Sections Under Earth, Dead and HL-93 Live Load Conditions) with               |
|                    | KY Table 1 (Precast Culvert KYHL-93 Design Table), and Section 605 with the following              |
|                    | exceptions and additions:  |
| <u> </u>           | Interpretation and additions.  |

| Subsection:        | 613.03.01 Design.  |
|--------------------|--|
| Number:            | 2)   |
|                    | Replace "AASHTO Standard Specifications for Highway Bridges" with "AASHTO LRFD   |
| Kevision.          | Bridge Design Specifications"  |
| <b>Subsection:</b> | 615.06.02  |
| Revision:          |  |
| Revision:          | Add the following sentence to the end of the subsection.   |
|                    | The ends of units shall be normal to walls and centerline except exposed edges shall be beveled  |
| Cubaaatian         | 34 inch. 615.06.03 Placement of Reinforcement in Precast 3-Sided Units.  |
|                    |  |
|                    | Replace the reference of 6.6 in the section to 615.06.06.  |
|                    | 615.06.04 Placement of Reinforcement for Precast Endwalls.   |
| Revision:          | Replace the reference of 6.7 in the section to 615.06.07.  |
|                    | 615.06.06 Laps, Welds, and Spacing for Precast 3-Sided Units.  |
| <b>Revision:</b>   | Replace the subsection with the following:   |
|                    | Tension splices in the circumferential reinforcement shall be made by lapping. Laps may not be   |
|                    | tack welded together for assembly purposes. For smooth welded wire fabric, the overlap shall   |
|                    | meet the requirements of AASHTO 2012 Bridge Design Guide Section 5.11.2.5.2 and AASHTO   |
|                    | 2012 Bridge Design Guide Section 5.11.6.3. For deformed welded wire fabric, the overlap shall  |
|                    | meet the requirements of AASHTO 2012 Bridge Design Guide Section 5.11.2.5.1 and AASHTO   |
|                    | 2012 Bridge Design Guide Section 5.11.6.2. The overlap of welded wire fabric shall be measured   |
|                    | between the outer most longitudinal wires of each fabric sheet. For deformed billet-steel bars,  |
|                    | the overlap shall meet the requirements of AASHTO 2012 Bridge Design Guide Section   |
|                    | 5.11.2.1. For splices other than tension splices, the overlap shall be a minimum of 12" for welded   |
|                    | wire fabric or deformed billet-steel bars. The spacing center to center of the circumferential wires   |
|                    | in a wire fabric sheet shall be no less than 2 inches and no more than 4 inches. The spacing   |
|                    | center to center of the longitudinal wires shall not be more than 8 inches. The spacing center to  |
|                    | center of the longitudinal distribution steel for either line of reinforcing in the top slab shall be  |
|                    | not more than 16 inches.   |
| <b>Subsection:</b> | 615.06.07 Laps, Welds, and Spacing for Precast Endwalls.   |
| <b>Revision:</b>   | Replace the subsection with the following:   |
|                    | Splices in the reinforcement shall be made by lapping. Laps may not be tack welded together for  |
|                    | assembly purposes. For smooth welded wire fabric, the overlap shall meet the requirements of   |
|                    | AASHTO 2012 Bridge Design Guide Section 5.11.2.5.2 and AASHTO 2012 Bridge Design   |
|                    | Guide Section 5.11.6.3. For deformed welded wire fabric, the overlap shall meet the  |
|                    | requirements of AASHTO 2012 Bridge Design Guide Section 5.11.2.5.1 and AASHTO 2012   |
|                    | Bridge Design Guide Section 5.11.6.2. For deformed billet-steel bars, the overlap shall meet the   |
|                    | requirements of AASHTO 2012 Bridge Design Guide Section 5.11.2.1. The spacing center-to-   |
|                    | center of the wire fabric sheet shall not be less than 2 inches or more than 8 inches.   |
|                    | The state of the s |

Contract ID: 142348 Page 55 of 82

| <b>Subsection:</b>    | 615.08.01 Type of Test Specimen.  |
|-----------------------|---|
| Revision:             | Replace the subsection with the following:  |
|                       | Start-up slump, air content, unit weight, and temperature tests will be performed each day on the                       |
|                       | first batch of concrete. Acceptable start-up results are required for production of the first unit.                     |
|                       | After the first unit has been established, random acceptance testing is performed daily for each                        |
|                       | 50 yd <sup>3</sup> (or fraction thereof). In addition to the slump, air content, unit weight, and temperature           |
|                       | tests, a minimum of one set of cylinders shall be required each time plastic property testing is                        |
|                       | performed.  |
| <b>Subsection:</b>    | 615.08.02 Compression Testing.  |
| Revision:             | Delete the second sentence.   |
| <b>Subsection:</b>    | 615.08.04 Acceptability of Core Tests.  |
| Revision:             | Delete the entire subsection.   |
| <b>Subsection:</b>    | 615.12 Inspection.  |
| Revision:             | Add the following sentences to the end of the subsection: Units will arrive at jobsite with the                         |
|                       | "Kentucky Oval" stamped on the unit which is an indication of acceptable inspection at the                              |
|                       | production facility. Units shall be inspected upon arrival for any evidence of damage resulting                         |
|                       | from transport to the jobsite.  |
| <b>Subsection:</b>    | 716.02.02 Paint.  |
| Revision:             | Replace sentence with the following: Conform to Section 821.  |
| <b>Subsection:</b>    | 716.03 CONSTRUCTION.  |
| Revision:             | Replace bullet 5) with the following: 5) AASHTO Standard Specifications for Structural                                  |
|                       | Supports for Highway Signs, Luminaires, and Traffic Signals, 2013-6th Edition with current                              |
|                       | interims,   |
|                       | 716.03.02 Lighting Standard Installation.   |
| Revision:             | Replace the second sentence with the following:   |
|                       | Regardless of the station and offset noted, locate all poles/bases behind the guardrail a minimum                       |
|                       | of four feet from the front face of the guardrail to the front face of the pole base.                                   |
|                       | 716.03.02 Lighting Standard Installation.   |
| Part:                 | A) Conventional Installation.   |
| Revision:             | Replace the third sentence with the following: Orient the transformer base so the door is                               |
|                       | positioned on the side away from on-coming traffic.   |
|                       | 716.03.02 Lighting Standard Installation.   |

Steel Requirements Vertical Bars Ties or Spiral Spacing or Size Total Size Pitch #4 #10 16

- (1): Shaft length is 22' for cohesive soil only. For cohesionless soil, contact geotechnical branch for design.
- (2): Do not construct high mast drilled shafts on ground slopes steeper than 1.5:1 without the approval of the Division of Traffic.

If rock is encountered during drilling operations and confirmed by the engineer to be of sound quality, the shaft is only required to be further advanced into the rock by the length of rock socket shown in the table. The total length of the shaft need not be longer than that of soil alone. Both longitudinal rebar length and number of ties or spiral length shall be adjusted accordingly.

If a shorter depth is desired for the drilled shaft, the contractor shall provide, for the state's review and approval, a detailed column design with individual site specific soil and rock analysis performed and approved by a Professional Engineer licensed in the Commonwealth of Kentucky.

Spiral reinforcement may be substituted for ties. If spiral reinforcement is used, one and onehalf closed coils shall be provided at the ends of each spiral unit. Subsurface conditions consisting of very soft clay or very loose saturated sand could result in soil parameters weaker than those assumed. Engineer shall consult with the geotechnical branch if such conditions are encountered.

The bottom of the drilled hole shall be firm and thoroughly cleaned so no loose or compressible materials are present at the time of the concrete placement. If the drilled hole contains standing water, the concrete shall be placed using a tremie to displace water. Continuous concrete flow will be required to insure full displacement of any water.

The reinforcement and anchor bolts shall be adequately supported in the proper positions so no movement occurs during concrete placement. Welding of anchor bolts to the reinforcing cage is unacceptable, templates shall be used. Exposed portions of the foundation shall be formed to create a smooth finished surface. All forming shall be removed upon completion of foundation construction.

**Subsection:** 716.03.03 Trenching.

Part:

A) Trenching of Conduit for Highmast Ducted Cables.

**Revision:** 

Add the following after the first sentence: If depths greater than 24 inches are necessary, obtain the Engineer's approval and maintain the required conduit depths coming into the junction boxes. No payment for additional junction boxes for greater depths will be allowed.

| <b>Revision:</b>   | Replace the paragraph with the following: The Department will measure the quantity as a lump        |  |  |  |  |  |  |  |
|                    | sum removal of signal equipment. The Department will not measure the return of control              |  |  |  |  |  |  |  |
|                    | equipment and signal heads to the Department of Highways as directed by the District Traffic        |  |  |  |  |  |  |  |
|                    | Engineer. The Department also will not measure the transportation of materials of the disposal      |  |  |  |  |  |  |  |
|                    | of all other equipment and materials off the project by the contractor and will consider them       |  |  |  |  |  |  |  |
|                    | incidental to this item of work.  |  |  |  |  |  |  |  |
| <b>Subsection:</b> | 723.04.28 Install Pedestrian Detector Audible.  |  |  |  |  |  |  |  |
| <b>Revision:</b>   | Replace the second sentence with the following: The Department will not measure installing sign     |  |  |  |  |  |  |  |
|                    | R10-3e (with arrow) and will consider it incidental to this item of work.                           |  |  |  |  |  |  |  |
| <b>Subsection:</b> | 723.04.29 Audible Pedestrian Detector.  |  |  |  |  |  |  |  |
| <b>Revision:</b>   | Replace the second sentence with the following: The Department will not measure furnishing          |  |  |  |  |  |  |  |
|                    | and installing the sign R10-3e (with arrow) and will consider it incidental to this item of work.   |  |  |  |  |  |  |  |
| <b>Subsection:</b> | 723.04.30 Bore and Jack Conduit.  |  |  |  |  |  |  |  |
| Revision:          | Replace the paragraph with the following: The Department will measure the quantity in linear        |  |  |  |  |  |  |  |
|                    | feet. This item shall include all work necessary for boring and installing conduit under an         |  |  |  |  |  |  |  |
|                    | existing roadway. Construction methods shall be in accordance with Sections 706.03.02,              |  |  |  |  |  |  |  |
|                    | paragraphs 1, 2, and 4.   |  |  |  |  |  |  |  |
| <b>Subsection:</b> | 723.04.31 Install Pedestrian Detector.  |  |  |  |  |  |  |  |
| <b>Revision:</b>   | Replace the paragraph with the following: The Department will measure the quantity as each          |  |  |  |  |  |  |  |
|                    | individual unit installed and connected to pole/pedestal. The Department will not measure           |  |  |  |  |  |  |  |
|                    | installing sign R 10-3e (with arrow) and will consider it incidental to this item of work.          |  |  |  |  |  |  |  |
|                    | 723.04.32 Install Mast Arm Pole.  |  |  |  |  |  |  |  |
| Revision:          | Replace the second sentence with the following: The Department will not measure arms, signal        |  |  |  |  |  |  |  |
|                    | mounting brackets, anchor bolts, or any other necessary hardware and will consider them             |  |  |  |  |  |  |  |
|                    | incidental to this item of work.  |  |  |  |  |  |  |  |
|                    | 723.04.33 Pedestal Post.  |  |  |  |  |  |  |  |
| Revision:          | Replace the second sentence with the following: The Department will not measure excavation,         |  |  |  |  |  |  |  |
|                    | concrete, reinforcing steel, anchor bolts, conduit, fittings, ground rod, ground wire, backfilling, |  |  |  |  |  |  |  |
|                    | restoration, or any other necessary hardware and will consider them incidental to this item of      |  |  |  |  |  |  |  |
|                    | work.   |  |  |  |  |  |  |  |

|                    | interims, with the exception of the following: The Cabinet will waive the requirement stated in   |  |  |  |  |  |  |  |
|                    | the first sentence of Section 5.14.6.2 – Reinforced Holes and Cutouts for high mast poles (only).   |  |  |  |  |  |  |  |
|                    | The minimum diameter at the base of the pole shall be 22 inches for high mast poles (only).   |  |  |  |  |  |  |  |
| Subsection         | 834.14.03 High Mast Poles.  |  |  |  |  |  |  |  |
| Revision:          | Remove the second and fourth sentence from the first paragraph.   |  |  |  |  |  |  |  |
| Subsection         | 834.14.03 High Mast Poles.  |  |  |  |  |  |  |  |
| Revision:          | Replace the third paragraph with the following: Provide calculations and drawings that are  |  |  |  |  |  |  |  |
|                    | stamped by a Professional Engineer licensed in the Commonwealth of Kentucky.  |  |  |  |  |  |  |  |
|                    | 834.14.03 High Mast Poles.  |  |  |  |  |  |  |  |
| Revision:          | Replace paragraph six with the following: Provide a pole section that conforms to ASTM A 595  |  |  |  |  |  |  |  |
|                    | grade A with a minimum yield strength of 55 KSI or ASTM A 572 with a minimum yield  |  |  |  |  |  |  |  |
|                    | strength of 55 KSI. Use tubes that are round or 16 sided with a four inch corner radius, have a   |  |  |  |  |  |  |  |
|                    | constant linear taper of .144 in/ft and contain only one longitudinal seam weld. Circumferential  |  |  |  |  |  |  |  |
|                    | welded tube butt splices and laminated tubes are not permitted. Provide pole sections that are  |  |  |  |  |  |  |  |
|                    | telescopically slip fit assembled in the field to facilitate inspection of interior surface welds and   |  |  |  |  |  |  |  |
|                    | the protective coating. The minimum length of the telescopic slip splices shall be 1.5 times the  |  |  |  |  |  |  |  |
|                    | inside diameter of the exposed end of the female section. Use longitudinal seam welds as commended in Section 5.15 of the AASHTO 2013 Specifications. The thickness of the        |  |  |  |  |  |  |  |
|                    | <del>-</del>  |  |  |  |  |  |  |  |
|                    | transverse base shall not be less than 2 inches. Plates shall be integrally welded to the tubes with a telescopic welded joint or a full penetration groove weld with backup bar. |  |  |  |  |  |  |  |
|                    | The handhole cover shall be removable from the handhole frame. One the frame side oppositions of the frame in the handhole frame.   |  |  |  |  |  |  |  |
|                    | the hinge, provide a mechanism on the handhole cover/frame to place the Department's st   |  |  |  |  |  |  |  |
|                    | padlock as specified in Section 834.25. The handhole frame shall have two stainless studs   |  |  |  |  |  |  |  |
|                    | installed opposite the hinge to secure the handhole cover to the frame which includes providing   |  |  |  |  |  |  |  |
|                    | stainless steel wing nuts and washers. The handhole cover shall be manufactured from 0.25 inch  |  |  |  |  |  |  |  |
|                    | thick galvanized steel (ASTM A 153) and have a neoprene rubber gasket that is permanently   |  |  |  |  |  |  |  |
|                    | secured to the handhole frame to insure weather-tight protection. The hinge shall be  |  |  |  |  |  |  |  |
|                    | manufactured from 7-guage stainless steel to provide adjustability to insure weather-tight fit for  |  |  |  |  |  |  |  |
|                    | the cover. The minimum clear distance between the transverse plate and the bottom opening of  |  |  |  |  |  |  |  |
|                    | the handhole shall not be less than the diameter of the bottom tube of the pole but needs to be at  |  |  |  |  |  |  |  |
|                    | least 15 inches. Provide products that are hot-dip galvanized to the requirements of either ASTM  |  |  |  |  |  |  |  |
|                    | A123 (fabricated products) or ASTM A 153 (hardware items).  |  |  |  |  |  |  |  |
| <b>Subsection:</b> | 834.16 ANCHOR BOLTS.  |  |  |  |  |  |  |  |
| Revision:          | Insert the following sentence at the beginning of the paragraph: The anchor bolt design shall   |  |  |  |  |  |  |  |
|                    | follow the NCHRP Report 494 Section 2.4 and NCHRP 469 Appendix A Specifications.  |  |  |  |  |  |  |  |

#### Contract ID: 142348 Page 64 of 82

| Subsection:        | 834.17.01 Conventional.  |  |  |  |  |  |
|--------------------|--|--|--|--|--|--|
| Revision:          | Add the following sentence after the second sentence: Provide a waterproof sticker mounted on  |  |  |  |  |  |
| TTC VISIOIIV       | the bottom of the housing that is legible from the ground and indicates the wattage of the fixture   |  |  |  |  |  |
|                    | by providing the first two numbers of the wattage.   |  |  |  |  |  |
| Subsection:        | 834.21.01 Waterproof Enclosures.   |  |  |  |  |  |
| Revision:          | Replace the last five sentences in the second paragraph with the following sentences:  |  |  |  |  |  |
| TTC VISIOIIV       | Provide a cabinet door with a louvered air vent, filter-retaining brackets and an easy to clean  |  |  |  |  |  |
|                    | metal filter. Provide a cabinet door that is keyed with a factory installed standard no. 2 corbin  |  |  |  |  |  |
|                    | traffic control key. Provide a light fixture with switch and bulb. Use a 120-volt fixture and  |  |  |  |  |  |
|                    | utilize a L.E.D. bulb (equivalent to 60 watts minimum). Fixture shall be situated at or near the   |  |  |  |  |  |
|                    | top of the cabinet and illuminate the contents of the cabinet. Provide a 120 VAC GFI duplex  |  |  |  |  |  |
|                    | receptacle in the enclosure with a separate 20 amp breaker.  |  |  |  |  |  |
|                    |  |  |  |  |  |  |
| <b>Subsection:</b> | 835.07 Traffic Poles.  |  |  |  |  |  |
| <b>Revision:</b>   | Replace the first sentence of the first paragraph with the following: Pole diameter and wall   |  |  |  |  |  |
|                    | thickness shall be calculated in accordance with the AASHTO Standard Specifications for  |  |  |  |  |  |
|                    | Structural Supports for Highway Signs, Luminaires, and Traffic Signals, 2013-6th Edition with  |  |  |  |  |  |
|                    | current interims.  |  |  |  |  |  |
| <b>Subsection:</b> | 835.07 Traffic Poles.  |  |  |  |  |  |
| <b>Revision:</b>   | *Replace the first sentence of the fourth paragraph with the following: Ensure transverse plates   |  |  |  |  |  |
|                    | have a thickness $\geq 2$ inches.  |  |  |  |  |  |
|                    | *Add the following sentence to the end of the fourth paragraph: The bottom pole diameter shall   |  |  |  |  |  |
|                    | not be less than 16.25 inches.   |  |  |  |  |  |
|                    | 835.07 Traffic Poles.  |  |  |  |  |  |
| Revision:          | Replace the third sentence of the fifth paragraph with the following: For anchor bolt design, pole   |  |  |  |  |  |
|                    | forces shall be positioned in such a manner to maximize the force on any individual anchor bolt  |  |  |  |  |  |
|                    | regardless of the actual anchor bolt orientation with the pole.  |  |  |  |  |  |
|                    | 835.07 Traffic Poles.  |  |  |  |  |  |
| Revision:          | Replace the first and second sentence of the sixth paragraph with the following:   |  |  |  |  |  |
|                    | The pole handhole shall be 25 inches by 6.5 inches. The handhole cover shall be removable  |  |  |  |  |  |
|                    | from the handhole frame. On the frame side opposite the hinge, provide a mechanism on the  |  |  |  |  |  |
|                    | handhole cover/frame to place the Department's standard padlock as specified in Section 834.25.  |  |  |  |  |  |
|                    | The handhole frame shall have two stainless studs installed opposite the hinge to secure the   |  |  |  |  |  |
|                    | handhole cover to the frame which includes providing stainless steel wing nuts and washers. The  |  |  |  |  |  |
|                    | handhole cover shall be manufactured from 0.25 inch thick galvanized steel (ASTM 153) and  |  |  |  |  |  |
|                    | have a neoprene rubber gasket that is permanently secured to the handhole frame to insure  |  |  |  |  |  |
|                    | weather-tight protection. The hinge shall be manufactured from 7 gauge stainless steel to  |  |  |  |  |  |
|                    | provide adjustability to insure a weather-tight fit for the cover. The minimum clear distance  |  |  |  |  |  |
|                    | between the transverse plate and the bottom opening of the handhole shall not be less than the diameter of the bottom tube but needs to be at least 12 inches. |  |  |  |  |  |
|                    | diameter of the bottom tube but needs to be at least 12 menes.   |  |  |  |  |  |

|                    | 835.07 Traffic Poles.   |        |  |  |  |  |  |
|--------------------|---|--------|--|--|--|--|--|
| Revision:          | *Replace the first sentence of the last paragraph with the following: Provide calculations and  |        |  |  |  |  |  |
|                    | drawings that are stamped by a Professional Engineer licensed in the Commonwealth of            |        |  |  |  |  |  |
|                    | Kentucky.   |        |  |  |  |  |  |
|                    | *Replace the third sentence of the last paragraph with the following: All tables referenced in  |        |  |  |  |  |  |
|                    | 835.07 are found in the AASHTO Standard Specifications for Structural Supports for Highw        | vay    |  |  |  |  |  |
|                    | Signs, Luminaires, and Traffic Signals, 2013-6th Edition with current interims.                 |        |  |  |  |  |  |
| <b>Subsection:</b> | 835.07.01 Steel Strain Poles.   |        |  |  |  |  |  |
| Revision:          | Replace the second sentence of the second paragraph with the following:                         |        |  |  |  |  |  |
|                    | The detailed analysis shall be certified by a Professional Engineer licensed in the Commonw     | vealth |  |  |  |  |  |
|                    | of Kentucky.  |        |  |  |  |  |  |
| <b>Subsection:</b> | 835.07.01 Steel Strain Poles.   |        |  |  |  |  |  |
| Revision:          | Replace number 7. after the second paragraph with the following: 7. Fatigue calculations sh     |        |  |  |  |  |  |
|                    | be shown for all fatigue related connections. Provide the corresponding detail, stress categor  | ry     |  |  |  |  |  |
|                    | and example from table 11.9.3.1-1.  |        |  |  |  |  |  |
| <b>Subsection:</b> | 835.07.02 Mast Arm Poles.   |        |  |  |  |  |  |
| Revision:          | Replace the second sentence of the fourth paragraph with the following: The detailed analyst    | sis    |  |  |  |  |  |
|                    | shall be certified by a Professional Engineer licensed in the Commonwealth of Kentucky.         |        |  |  |  |  |  |
| <b>Subsection:</b> | 835.07.02 Mast Arm Poles.   |        |  |  |  |  |  |
| Revision:          | Replace number 7) after the fourth paragraph with the following: 7) Fatigue calculations should |        |  |  |  |  |  |
|                    | be shown for all fatigue related connections. Provide the corresponding detail, stress category |        |  |  |  |  |  |
|                    | and example from table 11.9.3.1-1.  |        |  |  |  |  |  |
| <b>Subsection:</b> | 835.07.03 Anchor Bolts.   |        |  |  |  |  |  |
| Revision:          | Add the following to the end of the paragraph: There shall be two steel templates (one can be   |        |  |  |  |  |  |
|                    | used for the headed part of the anchor bolt when designed in this manner) provided per pole.    |        |  |  |  |  |  |
|                    | Templates shall be contained within a 26.5 inch diameter. All templates shall be fully galva    | nized  |  |  |  |  |  |
|                    | (ASTM A 153).   |        |  |  |  |  |  |
|                    | 835.16.05 Optical Units.  |        |  |  |  |  |  |
| Revision:          | Replace the 3rd paragraph with the following:   |        |  |  |  |  |  |
| G 1 4              | The list of certified products can be found on the following website: http://www.intertek.co.   | m.     |  |  |  |  |  |
|                    | 835.19.01 Pedestrian Detector Body.   |        |  |  |  |  |  |
| Revision:          | Replace the first sentence with the following: Provide a four holed pole mounted aluminum       |        |  |  |  |  |  |
| Cl4:               | rectangular housing that is compatible with the pedestrian detector.                            |        |  |  |  |  |  |
|                    |   |        |  |  |  |  |  |
| Table:             | TYPE I FABRIC GEOTEXTILES FOR SLOPE PROTECTION AND CHANNEL LINING                               |        |  |  |  |  |  |
| Revision:          | Add the following to the chart:   |        |  |  |  |  |  |
|                    | Property Minimum Value <sup>(1)</sup> Test Method   | _      |  |  |  |  |  |

1**I** 

#### SPECIAL NOTE FOR PORTABLE CHANGEABLE MESSAGE SIGNS

This Special Note will apply when indicated on the plans or in the proposal.

**1.0 DESCRIPTION.** Furnish, install, operate, and maintain variable message signs at the locations shown on the plans or designated by the Engineer. Remove and retain possession of variable message signs when they are no longer needed on the project.

#### 2.0 MATERIALS.

**2.1 General.** Use LED Variable Message Signs Class I, II, or III, as appropriate, from the Department's List of Approved Materials.

Unclassified signs may be submitted for approval by the Engineer. The Engineer may require a daytime and nighttime demonstration. The Engineer will make a final decision within 30 days after all required information is received.

#### 2.2 Sign and Controls. All signs must:

- Provide 3-line messages with each line being 8 characters long and at least 18 inches tall. Each character comprises 35 pixels.
- Provide at least 40 preprogrammed messages available for use at any time.
   Provide for quick and easy change of the displayed message; editing of the message; and additions of new messages.
- 3) Provide a controller consisting of:
  - a) Keyboard or keypad.
  - b) Readout that mimics the actual sign display. (When LCD or LCD type readout is used, include backlighting and heating or otherwise arrange for viewing in cold temperatures.)
  - c) Non-volatile memory or suitable memory with battery backup for storing pre-programmed messages.
  - d) Logic circuitry to control the sequence of messages and flash rate.
- 4) Provide a serial interface that is capable of supporting complete remote control ability through land line and cellular telephone operation. Include communication software capable of immediately updating the message, providing complete sign status, and allowing message library queries and updates.
- 5) Allow a single person easily to raise the sign to a satisfactory height above the pavement during use, and lower the sign during travel.
- 6) Be Highway Orange on all exterior surfaces of the trailer, supports, and controller cabinet.
- 7) Provide operation in ambient temperatures from -30 to + 120 degrees Fahrenheit during snow, rain and other inclement weather.
- 8) Provide the driver board as part of a module. All modules are interchangeable, and have plug and socket arrangements for disconnection and reconnection. Printed circuit boards associated with driver boards have a conformable coating to protect against moisture.
- 9) Provide a sign case sealed against rain, snow, dust, insects, etc. The lens is UV stabilized clear plastic (polycarbonate, acrylic, or other approved material) angled to prevent glare.
- 10) Provide a flat black UV protected coating on the sign hardware, character PCB, and appropriate lens areas.
- 11) Provide a photocell control to provide automatic dimming.

1I

- 12) Allow an on-off flashing sequence at an adjustable rate.
- 13) Provide a sight to aim the message.
- 14) Provide a LED display color of approximately 590 nm amber.
- 15) Provide a controller that is password protected.
- 16) Provide a security device that prevents unauthorized individuals from accessing the controller.
- 17) Provide the following 3-line messages preprogrammed and available for use when the sign unit begins operation:

 $/KEEP/RIGHT/\Rightarrow\Rightarrow\Rightarrow/$ /MIN/SPEED/\*\*MPH/ /ICY/BRIDGE/AHEAD/ /ONE /KEEP/LEFT/< LANE/BRIDGE/AHEAD/ /LOOSE/GRAVEL/AHEAD/ /ROUGH/ROAD/AHEAD/ /RD WORK/NEXT/\*\*MILES/ /MERGING/TRAFFIC/AHEAD/ /TWO WAY/TRAFFIC/AHEAD/ /NEXT/\*\*\*/MILES/ /PAINT/CREW/AHEAD/ /HEAVY/TRAFFIC/AHEAD/ /REDUCE/SPEED/\*\*MPH/ /SPEED/LIMIT/\*\*MPH/ /BRIDGE/WORK/\*\*\*0 FT/ /BUMP/AHEAD/ /MAX/SPEED/\*\*MPH/ /TWO/WAY/TRAFFIC/ /SURVEY/PARTY/AHEAD/

> \*Insert numerals as directed by the Engineer. Add other messages during the project when required by the Engineer.

#### 2.3 Power.

- Design solar panels to yield 10 percent or greater additional charge than sign consumption. Provide direct wiring for operation of the sign or arrow board from an external power source to provide energy backup for 21 days without sunlight and an on-board system charger with the ability to recharge completely discharged batteries in 24 hours.
- **3.0 CONSTRUCTION.** Furnish and operate the variable message signs as designated on the plans or by the Engineer. Ensure the bottom of the message panel is a minimum of 7 feet above the roadway in urban areas and 5 feet above in rural areas when operating. Use Class I, II, or III signs on roads with a speed limit less than 55 mph. Use Class I or II signs on roads with speed limits 55 mph or greater.

Maintain the sign in proper working order, including repair of any damage done by others, until completion of the project. When the sign becomes inoperative, immediately repair or replace the sign. Repetitive problems with the same unit will be cause for rejection and replacement.

Use only project related messages and messages directed by the Engineer, unnecessary messages lessen the impact of the sign. Ensure the message is displayed in either one or 2 phases with each phase having no more than 3 lines of text. When no message is needed, but it is necessary to know if the sign is operable, flash only a pixel.

When the sign is not needed, move it outside the clear zone or where the Engineer directs. Variable Message Signs are the property of the Contractor and shall be removed from the project when no longer needed. The Department will not assume ownership of these signs.

**4.0 MEASUREMENT.** The final quantity of Variable Message Sign will be

1I

the actual number of individual signs acceptably furnished and operated during the project. The Department will not measure signs replaced due to damage or rejection.

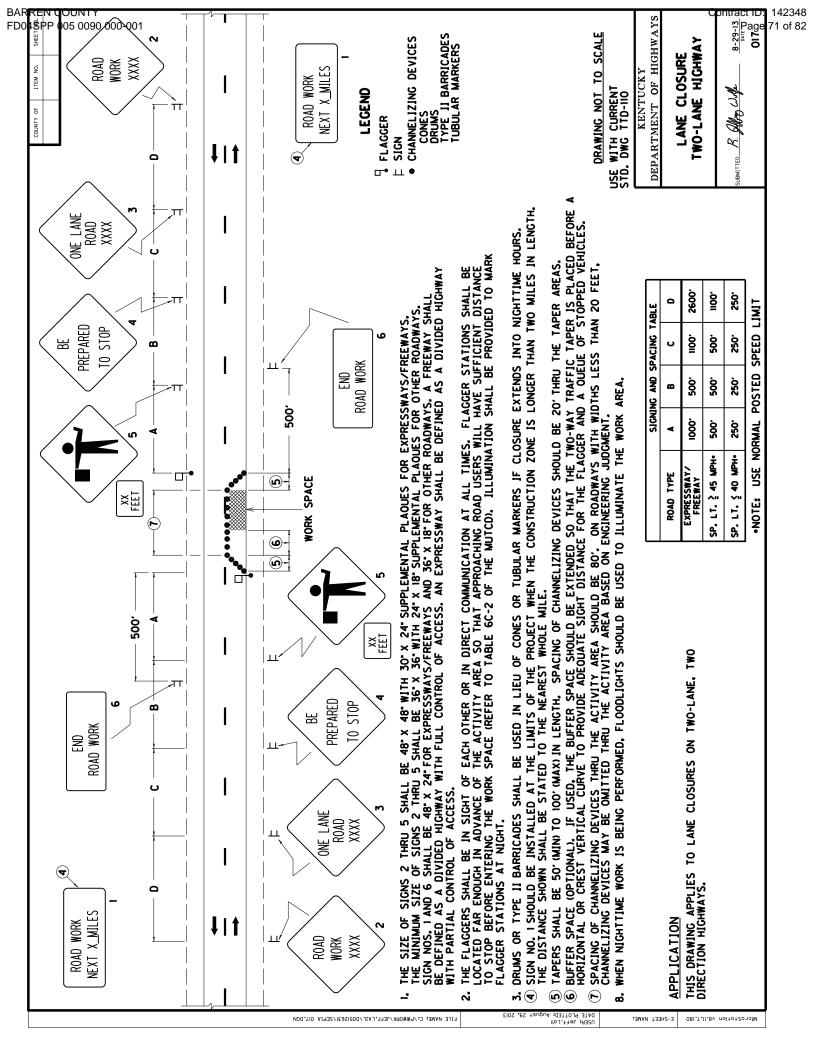

**5.0 PAYMENT.** The Department will pay for the Variable Message Signs at the unit price each. The Department will not pay for signs replaced due to damage or rejection. Payment is full compensation for furnishing all materials, labor, equipment, and service necessary to, operate, move, repair, and maintain or replace the variable message signs. The Department will make payment for the completed and accepted quantities under the following:

#### EMPLOYMENT, WAGE AND RECORD REQUIREMENTS

BARREN COUNTY FD04SPP 005 0090 000-001

#### Contract ID: 142348 Page 73 of 82

#### TRANSPORTATION CABINET DEPARTMENT OF HIGHWAYS

#### LABOR AND WAGE REQUIREMENTS APPLICABLE TO OTHER THAN FEDERAL-AID SYSTEM PROJECTS

I. Application

II. Nondiscrimination of Employees (KRS 344)

III. Payment of Predetermined Minimum Wages

IV. Statements and Payrolls

#### I. APPLICATION

- 1. These contract provisions shall apply to all work performed on the contract by the contractor with his own organization and with the assistance of workmen under his immediate superintendence and to all work performed on the contract by piecework, station work or by subcontract. The contractor's organization shall be construed to include only workmen employed and paid directly by the contractor and equipment owned or rented by him, with or without operators.
- 2. The contractor shall insert in each of his subcontracts all of the stipulations contained in these Required Provisions and such other stipulations as may be required.
- 3. A breach of any of the stipulations contained in these Required Provisions may be grounds for termination of the contract.

#### II. NONDISCRIMINATION OF EMPLOYEES

AN ACT OF THE KENTUCKY GENERAL ASSEMBLY TO PREVENT DISCRIMINATION IN EMPLOYMENT KRS CHAPTER 344 EFFECTIVE JUNE 16, 1972

The contract on this project, in accordance with KRS Chapter 344, provides that during the performance of this contract, the contractor agrees as follows:

- 1. The contractor shall not fail or refuse to hire, or shall not discharge any individual, or otherwise discriminate against an individual with respect to his compensation, terms, conditions, or privileges of employment, because of such individual's race, color, religion, national origin, sex, disability or age (between forty and seventy); or limit, segregate, or classify his employees in any way which would deprive or tend to deprive an individual of employment opportunities or otherwise adversely affect his status as an employee, because of such individual's race, color, religion, national origin, sex, disability or age (between forty and seventy). The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.
- 2. The contractor shall not print or publish or cause to be printed or published a notice or advertisement relating to employment by such an employer or membership in or any classification or referral for employment by the employment agency, indicating any preference, limitation, specification, or discrimination, based on race, color, religion, national origin, sex, disability or age (between forty and seventy), except that such notice or advertisement may indicate a preference, limitation, or specification based on religion, or national origin when religion, or national origin is a bona fide occupational qualification for employment.
- 3. If the contractor is in control of apprenticeship or other training or retraining, including on-the-job training programs, he shall not discriminate against an individual

because of his race, color, religion, national origin, sex, disability or age (between forty and seventy), in admission to, or employment in any program established to provide apprenticeship or other training.

4. The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representative of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment. The contractor will take such action with respect to any subcontract or purchase order as the administrating agency may direct as a means of enforcing such provisions, including sanctions for non-compliance.

#### III. PAYMENT OF PREDETERMINED MINIMUM WAGES

- 1. These special provisions are supplemented elsewhere in the contract by special provisions which set forth certain predetermined minimum wage rates. The contractor shall pay not less than those rates.
- 2. The minimum wage determination schedule shall be posted by the contractor, in a manner prescribed by the Department of Highways, at the site of the work in prominent places where it can be easily seen by the workers.

#### IV. STATEMENTS AND PAYROLLS

- 1. All contractors and subcontractors affected by the terms of KRS 337.505 to 337.550 shall keep full and accurate payroll records covering all disbursements of wages to their employees to whom they are required to pay not less than the prevailing rate of wages. Payrolls and basic records relating thereto will be maintained during the course of the work and preserved for a period of one (1) year from the date of completion of this contract.
- 2. The payroll records shall contain the name, address and social security number of each employee, his correct classification, rate of pay, daily and weekly number of hours worked, itemized deductions made and actual wages paid.
- 3. The contractor shall make his daily records available at the project site for inspection by the State Department of Highways contracting office or his authorized representative.

Periodic investigations shall be conducted as required to assure compliance with the labor provisions of the contract. Interrogation of employees and officials of the contractor shall be permitted during working hours.

Aggrieved workers, Highway Managers, Assistant District Engineers, Resident Engineers and Project Engineers shall report all complaints and violations to the Division of Contract Procurement.

The contractor shall be notified in writing of apparent violations. The contractor may correct the reported violations and notify the Department of Highways of the action taken or may request an informal hearing. The request for hearing shall be in writing within ten (10) days after receipt of the notice of the reported violation. The contractor may submit

records and information which will aid in determining the true facts relating to the reported violations.

Any person or organization aggrieved by the action taken or the findings established as a result of an informal hearing by the Division of Contract Procurement may request a formal hearing.

- 4. The wages of labor shall be paid in legal tender of the United States, except that this condition will be considered satisfied if payment is made by a negotiable check, on a solvent bank, which may be cashed readily by the employee in the local community for the full amount, without discount or collection charges of any kind. Where checks are used for payments, the contractor shall make all necessary arrangements for them to be cashed and shall give information regarding such arrangements.
- 5. No fee of any kind shall be asked or accepted by the contractor or any of his agents from any person as a condition of employment on the project.
- 6. No laborers shall be charged for any tools used in performing their respective duties except for reasonably avoidable loss or damage thereto.
- 7. Every employee on the work covered by this contract shall be permitted to lodge, board, and trade where and with whom he elects and neither the contractor nor his agents, nor his employees shall directly or indirectly require as a condition of employment that an employee shall lodge, board or trade at a particular place or with a particular person.
- 8. Every employee on the project covered by this contract shall be an employee of either the prime contractor or an approved subcontractor.
- 9. No charge shall be made for any transportation furnished by the contractor or his agents to any person employed on the work.
- 10. No individual shall be employed as a laborer or mechanic on this contract except on a wage basis, but this shall not be construed to prohibit the rental of teams, trucks or other equipment from individuals.

No Covered employee may be employed on the work except in accordance with the classification set forth in the schedule mentioned above; provided, however, that in the event additional classifications are required, application shall be made by the contractor to the Department of Highways and (1) the Department shall request appropriate classifications and rates from the proper agency, or (2) if there is urgent need for additional classification to avoid undue delay in the work, the contractor may employ such workmen at rates deemed comparable to rates established for similar classifications provided he has made written application through the Department of Highways, addressed to the proper agency, for the supplemental rates. The contractor shall retroactively adjust, upon receipt of the supplemental rates schedule, the wages of any employee paid less than the established rate and may adjust the wages of any employee overpaid.

- 11. No contractor or subcontractor contracting for any part of the contract work which may require or involve the employment of laborers or mechanics shall require or permit any laborer or mechanic in any work-week in which he is employed on such work, to work in excess of eight hours in any calendar day or in excess of forty hours in such workweek unless such laborer or mechanic receives compensation at a rate not less than one and one half times his basic rate of pay for all hours worked in excess of eight hours in any calendar day or in excess of forty hours in such work-week. A laborer, workman or mechanic and an employer may enter into a written agreement or a collective bargaining agreement to work more than eight (8) hours a calendar day but not more than ten (10) hours a calendar day for the straight time hourly rate. This agreement shall be in writing and shall be executed prior to the employee working in excess of eight (8) hours, but not more than ten (10) hours, in any one (1) calendar day.
- 12. Payments to the contractor may be suspended or withheld due to failure of the contractor to pay any laborer or

mechanic employed or working on the site of the work, all or part of the wages required under the terms of the contract. The Department may suspend or withhold payments only after the contractor has been given written notice of the alleged violation and the contractor has failed to comply with the wage determination of the Department of Highways.

13. Contractors and subcontractors shall comply with the sections of Kentucky Revised Statutes, Chapter 337 relating to contracts for Public Works.

Revised 2-16-95

#### Contract ID: 142348 Page 75 of 82

#### **EXECUTIVE BRANCH CODE OF ETHICS**

In the 1992 regular legislative session, the General Assembly passed and Governor Brereton Jones signed Senate Bill 63 (codified as KRS 11A), the Executive Branch Code of Ethics, which states, in part:

#### KRS 11A.040 (6) provides:

No present or former public servant shall, within six (6) months of following termination of his office or employment, accept employment, compensation or other economic benefit from any person or business that contracts or does business with the state in matters in which he was directly involved during his tenure. This provision shall not prohibit an individual from returning to the same business, firm, occupation, or profession in which he was involved prior to taking office or beginning his term of employment, provided that, for a period of six (6) months, he personally refrains from working on any matter in which he was directly involved in state government. This subsection shall not prohibit the performance of ministerial functions, including, but not limited to, filing tax returns, filing applications for permits or licenses, or filing incorporation papers.

#### KRS 11A.040 (8) states:

A former public servant shall not represent a person in a matter before a state agency in which the former public servant was directly involved, for a period of one (1) year after the latter of:

- a) The date of leaving office or termination of employment; or
- b) The date the term of office expires to which the public servant was elected.

This law is intended to promote public confidence in the integrity of state government and to declare as public policy the idea that state employees should view their work as a public trust and not as a way to obtain private benefits.

If you have worked for the executive branch of state government within the past six months, you may be subject to the law's prohibitions. The law's applicability may be different if you hold elected office or are contemplating representation of another before a state agency.

Also, if you are affiliated with a firm which does business with the state and which employs former state executive-branch employees, you should be aware that the law may apply to them.

In case of doubt, the law permits you to request an advisory opinion from the Executive Branch Ethics Commission, Room 136, Capitol Building, 700 Capitol Avenue, Frankfort, Kentucky 40601; telephone (502) 564-7954.

#### **Kentucky Equal Employment Opportunity Act of 1978**

The requirements of the Kentucky Equal Employment Opportunity Act of 1978 (KRS 45.560-45.640) shall not apply to this Contract.

| WORKERS  | MINIMUM HOURLY |
|----------|----------------|
| RATE\$7. | 25             |

Note: Parts III and IV of "Labor and Wage Requirements Applicable to Other Than Federal-Aid System Projects" do not apply to this project.

Federal-State Sheet 1 of 1

# EMPLOYEE RIGHTS UNDER THE FAIR LABOR STANDARDS ACT

THE UNITED STATES DEPARTMENT OF LABOR WAGE AND HOUR DIVISION

### FEDERAL MINIMUM WAGE

\$7.25

**PER HOUR** 

**BEGINNING JULY 24, 2009** 

#### **OVERTIME PAY**

At least  $1\frac{1}{2}$  times your regular rate of pay for all hours worked over 40 in a workweek.

#### **CHILD LABOR**

BARREN COUNTY FD04SPP 005 0090 000-001 An employee must be at least **16** years old to work in most non-farm jobs and at least **18** to work in non-farm jobs declared hazardous by the Secretary of Labor.

Youths **14** and **15** years old may work outside school hours in various non-manufacturing, non-mining, non-hazardous jobs under the following conditions:

Contract ID: 142348 Page 78 of 82

#### ing,

#### No more than

- 3 hours on a school day or 18 hours in a school week;
- 8 hours on a non-school day or 40 hours in a non-school week.

Also, work may not begin before **7 a.m.** or end after **7 p.m.**, except from June 1 through Labor Day, when evening hours are extended to **9 p.m.** Different rules apply in agricultural employment.

#### **TIP CREDIT**

Employers of "tipped employees" must pay a cash wage of at least \$2.13 per hour if they claim a tip credit against their minimum wage obligation. If an employee's tips combined with the employer's cash wage of at least \$2.13 per hour do not equal the minimum hourly wage, the employer must make up the difference. Certain other conditions must also be met.

#### **ENFORCEMENT**

The Department of Labor may recover back wages either administratively or through court action, for the employees that have been underpaid in violation of the law. Violations may result in civil or criminal action.

Employers may be assessed civil money penalties of up to \$1,100 for each willful or repeated violation of the minimum wage or overtime pay provisions of the law and up to \$11,000 for each employee who is the subject of a violation of the Act's child labor provisions. In addition, a civil money penalty of up to \$50,000 may be assessed for each child labor violation that causes the death or serious injury of any minor employee, and such assessments may be doubled, up to \$100,000, when the violations are determined to be willful or repeated. The law also prohibits discriminating against or discharging workers who file a complaint or participate in any proceeding under the Act.

### ADDITIONAL INFORMATION

- Certain occupations and establishments are exempt from the minimum wage and/or overtime pay provisions.
- Special provisions apply to workers in American Samoa and the Commonwealth of the Northern Mariana Islands.
- Some state laws provide greater employee protections; employers must comply with both.
- The law requires employers to display this poster where employees can readily see it.
- Employees under 20 years of age may be paid \$4.25 per hour during their first 90 consecutive calendar days of employment with an employer.
- Certain full-time students, student learners, apprentices, and workers with disabilities may be paid less than the minimum wage under special certificates issued by the Department of Labor.

#### **PART IV**

#### **INSURANCE**

#### **INSURANCE**

The Contractor shall procure and maintain the following insurance in addition to the insurance required by law:

- 1) Commercial General Liability-Occurrence form not less than \$2,000,000 General aggregate, \$2,000,000 Products & Completed Aggregate, \$1,000,000 Personal & Advertising, \$1,000,000 each occurrence.
- 2) Automobile Liability- \$1,000,000 per accident
- 3) Employers Liability:
  - a) \$100,000 Each Accident Bodily Injury
  - b) \$500,000 Policy limit Bodily Injury by Disease
  - c) \$100,000 Each Employee Bodily Injury by Disease
- 4) The insurance required above must be evidenced by a Certificate of Insurance and this Certificate of Insurance must contain one of the following statements:
  - a) "policy contains no deductible clauses."
  - b) "policy contains \_\_\_\_\_ (amount) deductible property damage clause but company will pay claim and collect the deductible from the insured."
- 5) KENTUCKY WORKMEN'S COMPENSATION INSURANCE. The contractor shall furnish evidence of coverage of all his employees or give evidence of self-insurance by submitting a copy of a certificate issued by the Workmen's Compensation Board.

The cost of insurance is incidental to all contract items. All subcontractors must meet the same minimum insurance requirements.
