Special Note for Fill Material in Waters of the United States

As an avoidance of water related impacts the Cabinet has committed to zero disturbance below the ordinary high water mark of jurisdictional waters, therefore no fill shall be placed within "Waters of the United States". "Waters of the United States" are defined as perennial or intermittent streams, ponds or wetlands. Ephemeral streams are also considered jurisdictional waters, and are typically dry except during rainfall, but have a defined drainage channel. Questions concerning any potential impacts to "Waters..." should be brought to the attention of the appropriate District Office for the Corps of Engineers for a determination, prior to disturbance. The Cabinet has identified two "Waters..." within the project limits as noted below. Additionally no temporary crossing shall be allowed across the unnamed tributary to Valley Creek for construction of the three sided culvert at station 124+44.26.

Mainline

Station 124+44.26

Latitude: 37.658374

Longitude: -85.893825

Wendall Ford Parkway

Station 8420+13.46

Latitude: 37.657151

Longitude: -85.887102
