PART IV	INSURANCE
PART V	BID ITEMS

### **SPECIAL NOTE FOR FUEL PRICE ADJUSTMENT**

Due to the fluctuating costs of petroleum products, the Department will adjust the Contractor's compensation when the average price of diesel fuel increases or decreases more than 5 percent.

The Department will determine the price adjustment using the following formulas:

When PC is greater than PL

$$\text{Fuel Price Adjustment} = Q \times 2.0 \times PL \times [(PC-PL)/PL - 0.05]$$

When PC is less than PL

$$\text{Fuel Price Adjustment} = Q \times 2.0 \times PL \times [(PC-PL)/PL + 0.05]$$

Where:

Q = Quantity of right-of-way mowing performed that month.

PL = Average reseller price of diesel fuel, excluding taxes, discounts, and superfund line items, in the Kentucky region for the month that the Contract is let.

PC = Average reseller price of diesel fuel, excluding taxes, discounts, and superfund line items, in the Kentucky region for the month that the Contractor uses the fuel on the project.

When the 5 percent threshold is met, the Department will adjust the Contractor's compensation, paid or deducted, on the following months pay estimate and on the final pay estimate. If later price decreases indicate that the Department made an overpayment, the Department will withhold the overpayment from succeeding pay estimates on the project. The Department will make the final adjustment of the Contractor's compensation on the final estimate for the project.
