MEMORANDUM

Construction Memorandum 01-11

TO: Chief District Engineers
District TEBMs for Project Delivery & Preservation
District Section Engineers

FROM: Steven Criswell, P.E. *Steven Criswell*
Director, Division of Construction

DATE: January 19, 2011

SUBJECT: Kentucky Roadway Prevention and Sediment Control – Roadway Inspectors Course (KEPSC-RI)

The Kentucky Transportation Cabinet (KYTC) has recently adopted the Kentucky Erosion Prevention & Sediment Control – Roadway Inspectors (KEPSC-RI) training course for individuals inspecting highway construction projects to ensure compliance with the Kentucky Pollutant Discharge Elimination System (KPDES) General Storm Water Permit, KYR10, or individual construction storm water permits.

All KYTC employees and contractors performing erosion prevention and sediment control inspections under the KYR10 permit or an individual construction storm water permit must successfully complete the KEPSC-RI training course. However, individuals having an active KEPSC basic qualification may continue to use the qualification until it expires. After the KEPSC basic qualification expires, all KYTC employees and contractors performing erosion prevention and sediment control inspections will be required to obtain the KEPSC-RI training course.

The KEPSC-RI training course is being administered through the University of Kentucky Transportation Center. For more information on this class, including cost and training locations, please go to the following website: <http://www.kyt2.com/training/program/ky-erosion-prevention-sediment-control-kepsc>. You can also access this website through the Division of Materials website under “Kentucky Qualified Technicians and Laboratories (KQTL).”

Please contact Stephen Bowling in this Division with questions concerning this matter.
