1 BACKGROUND

This is an environmental scoping document prepared for the Kentucky Transportation Cabinet (KYTC) in order to obtain and summarize known environmental resources and potential environmental issues within the study area along KY 1865 between I-264 (Watterson Expressway) and KY 841 (Gene Snyder Freeway). This is not prepared to National Environmental Policy Act (NEPA) standards and requirements nor is not intended to replace formal NEPA documentation. The summaries and conclusions contained herein are made with the best available information obtained at the time of the submittal of this report or the explicitly stated date of review within the sections below. Information and regulations may change between the submittal of this report and the preparation of the NEPA document and/or construction of a preferred alternative.

1.1 Project Location

Address:	KY 1865 (New Cut Road/Taylor Boulevard)
County:	Jefferson
City:	Louisville
USGS Quadrangle:	Louisville West, KY & Valley Station, KY
Latitude/Longitude:	38.152290, -85.778305 (approximate project center)

The study area extends approximately 4.76 mi. along KY 1865 from just south of KY 841 on the south end to just north of I-264 on the north end. The total project study area is approximately 466-acres in total size and it is all contained within the city limits of Louisville, Kentucky. According to the U.S. Census Bureau, the City of Louisville/Jefferson County metro government has a land area of 341.44 square miles and a population of 633,045 in the 2020 census (U.S. Census Bureau QuickFacts, 2023).

KY 1865, also referred to as Taylor Blvd. north of Southside Drive and New Cut Road south of Southside Drive, is an urban principal arterial consisting of five lanes for the majority of the study area. From north of Palatka Road to I-264 it consists of four lanes with occasional turn lanes and south of the KY 841 ramps it consists of three lanes. Average Annual Daily Traffic (AADT) ranges from 23,353 (2020) between Southern Parkway and I-264 on the north end of the study area to 10,050 (2019) between Brown Austin Road and KY 841 on the south end of the study area.

Figure 1.1 Project Location

1.2 Purpose and Need

The purpose of this project is to improve safety and mobility for the highly developed KY 1865 corridor.

Needs:

To Improve Safety:

KY 1865 (Taylor Boulevard/New Cut Rd) is ranked fifth on Louisville's High Injury Network, with 1685 crashes identified in the 2017-2021 study period within the study area (MP 0.5 to 5.766). Ten fatal crashes and 32 suspected serious injury crashes occurred in the project limits within the study period. Angle or Opposing Left-Turn collisions make up 50% of the fatal and suspected serious injury crashes. Angle crashes account for 29.79% of total crashes and 38.07% of all injury crashes. Rear-end crashes make up 37.80% of total crashes and 26.75% of all injury crashes. Overall, 32 crashes involving vulnerable road users and 30 crashes involving motorcycles were identified.

To Improve Mobility:

Multimodal users have limited safe mobility along this corridor. KY 1865 has existing 4- to 5-foot sidewalks throughout most of the corridor, but the corridor lacks cohesive connectivity and the feeling of safety. There are no bicycle facilities along the corridor. Pedestrian crosswalks are located at signalized intersections along the corridor, but users find these crossings to be uncomfortable and feel unsafe, including the feeling that pedestrian crossing times are too short. Transit stops exist along the corridor, but do not necessarily connect with existing sidewalks. Iroquois Park is within the study area and Wyandotte Park is near the study area, and while sidewalks exist along the corridor, they do not easily connect to the facilities within each park. Several schools also exist on and near the corridor which do not have safe and clear connectivity to the sidewalk.

Vehicles also experience limited mobility in some areas of the corridor. Intersection misalignments make some movements difficult, and lack of left turn lanes can make left turns between intersections difficult and unsafe.

2 AFFECTED ENVIRONMENT AND CONSEQUENCES

This section describes the natural and human environment of the study area potentially affected by the alternatives, evaluates potential impacts, and recommends measures to avoid or reduce those impacts. The description of the study area represents current conditions and serves as a baseline from which to identify and evaluate environmental changes that may occur because of the Proposed Action.

2.1 Preliminary Screening of Assessment Categories

Based on a preliminary screening of resources and the project's geographic location, the following resources do not require a detailed assessment.

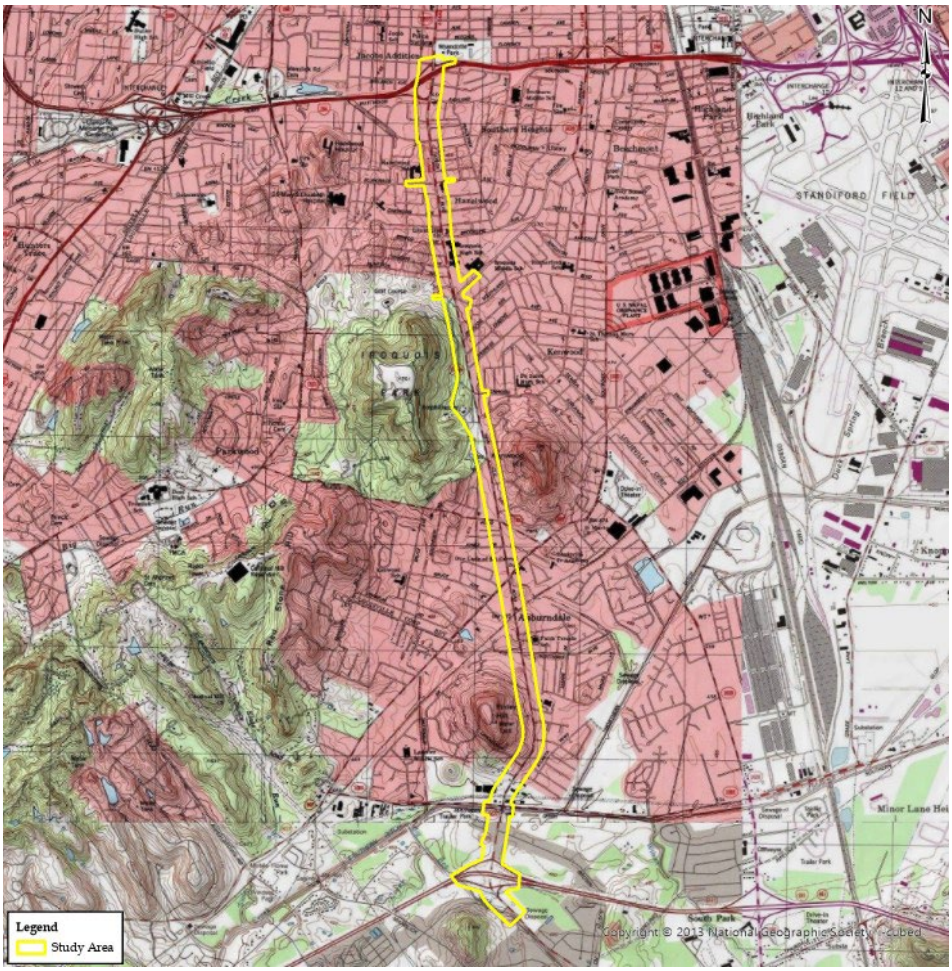
- *Coastal Barrier Resources System (CBRS).* The Coastal Barrier Resources Act, 16 U.S.C. §§ 3501-3510, is not applicable because the project is not within or near a CBRS unit (Coastal Barrier Resources Act, 2019).
- *Coastal Zone Management.* The Coastal Zone Management Act (CZMA), 16 U.S.C. §§ 1451-1464, ch. 33, enacted in 1972, is not applicable because the project is not in a state with a Coastal Zone Management Program. (Coastal Zone Management Programs, 2023).
- *Essential Fish Habitat (EFH).* The Magnuson-Stevens Fishery Conservation and Management Act, 16 U.S.C. §§ 1801 *et seq.,* does not apply because there are no Habitat Areas of Particular Concern and no EFH Areas identified at the project site according to the National Oceanic and Atmospheric Administration (NOAA) Essential Fish Habitat (EFH) Mapper (Essential Fish Habitat Mapper, 2021).
- *Seismic Risks.* EO 13717, Establishing a Federal Earthquake Risk Management Standard, does not apply because there is low seismic risk in the study area based on seismic hazard maps developed by the U.S. Geological Survey (USGS). This includes less than 1 percent chance of potentially minor-damage (equivalent to Modified Mercalli Intensity VI) ground shaking in the 2018 Short-Term Seismicity Model (Short-term Induced Seismicity Models, 2019), and the third lowest hazard in the 2018 Long-Term National Seismic Hazard Map (2018 Long-term National Seismic Hazard Map, 2018).
- *Sole Source Aquifers.* The nearest sole-source aquifer (Greater Miami Buried Aquifer and OKI Extension (Southern Portion) Sole Source Aquifer) regulated by the Safe Drinking Water Act of 1974, 42 U.S.C. §§ 300f et seq., is located approximately 83 miles northeast of the study area (United States Environmental Protection Agency (Map of Sole Source Aquifer Locations, 2022), This component of the Safe Drinking Water Act is not applicable.
- *Wild and Scenic Rivers.* The Wild and Scenic Rivers Act, 16 U.S.C. §§ 1271 et seq., is not applicable because no federally designated wild and scenic rivers exist near or in the study area based on a review of the National Wild and Scenic Rivers System website maintained by the National Park Service (Kentucky, 2023). The closest federally designated wild and scenic river is the Red River, approximately 116 miles southeast of the study area.

2.2 Physical Environment

2.2.1 Geology, Soils, and Topography

The geology was characterized using the Kentucky Geological Survey Interactive Map (Kentucky Geologic Map Service, 2023). The geology in the study area north to south consists of glacial outwash, loess, New Albany shale, Borden formation, terrace deposits, and lacustrine deposits created during the Holocene and late Pleistocene. More information about each geological feature is available on the interactive map website.

Figure 2.1 Topographic Map



Louisville is located within a wide floodplain valley of the Ohio River located between plateaus in southern Indiana and central Kentucky. The topography of the study area is relatively flat with elevations decreasing toward the north and ranging from 450 to 520 ft. above mean sea level (AMSL). There are adjacent hillsides at Iroquois Park, Kenwood Hill, and Finley Hill.

The study area consists of twenty-seven (27) different mapped soil units. Approximately 94.9% of the total study area contains urban land soil units. The soils within the study area have deep water tables as well as deep bedrock layers (>6 ft.) (Web Soil Survey, 2019).

The Farmland Protection Policy Act's (FPPA) of 1981, 7 U.S.C. §§ 4201 *et seq.* primary purpose is to minimize the extent that federal programs contribute to the unnecessary and irreversible

conversion of prime or unique farmland to non-agricultural uses. The conversion of prime or unique farmland must be considered whenever Federal funding or time is used in the direct or indirect conversion of prime farmland unless an exemption exists. Eight (8) of the 27 mapped soils are listed as prime farmland. However, the entirety of the study area is located within an urbanized area; therefore, the FPPA does not apply.

2.2.2 Water Resources and Water Quality

Water resources include surface water, groundwater, stormwater, and drinking water (wetlands are evaluated in **Section 2.3.2**). The Clean Water Act (CWA) of 1972, 33 U.S.C. § 1251 *et seq.*, is the primary federal law in the United States that regulates the discharge of pollutants into water, with various sections falling under the authority of United States Army Corps of Engineers (USACE) and the United States Environmental Protection Agency (USEPA) or as delegated to the states. Section 404 of the CWA establishes USACE permit requirements for discharge of dredged or fill materials into waters of the United States. Furthermore, USACE regulation of activities within navigable waters are authorized under the 1899 Rivers and Harbors Act, Section 10 (33 U.S.C. § 403 *et seq*). Section 401 of the CWA is administered by Kentucky Energy and Environmental Cabinet (EEC) and provides regulations for the protection of water quality on projects that involve dredge or fill in waters of the United States (Kentucky Administrative Regulations (KAR), § 401 KAR). The CWA made it unlawful to discharge any pollutant from a point source into navigable waters unless permitted. Under the National Pollution Discharge Elimination System (NPDES) (Section 402 of the CWA), USEPA's regulation of both point and nonpoint pollutant sources, including stormwater and stormwater runoff, has been delegated to the state and is administered by the Kentucky EEC. Therefore, the City must submit a Notice of Intent (NOI) and obtain coverage under the Kentucky EEC General Permit Authorization for Stormwater Discharges from Small and Large Construction Activities under the National Pollutant Discharge Elimination System (Kentucky EEC Permit No. KYR10), Effective Date December 1, 2019, Expiration Date November 30, 2024. This general permit regulates stormwater discharges to waters of the state in compliance with the federal Water Pollution Control Act (33 U.S.C § 1251 et seq) Kentucky Water Quality (§ 401 KAR 5).

The study area is within three 12-digit hydrologic unit codes (HUCs). It is within 0514 0101 0903 (Mill Creek Cutoff-Ohio River), 0514 0102 1201 (Northern Ditch), and 0514 0102 1203 (Lower Southern Ditch-Pond Creek). The study area crosses over Southern Ditch (various resources also list this stream as Pond Creek) just to the south of KY 1065. Bee Lick Creek runs just to the west of KY 1865 south of KY 841 (Gene Snyder Freeway). At this location, Southern Ditch has a drainage area of approximately 55.9 $mi.^2$ and Bee Lick Creek has a drainage area of approximately 4.2 $mi.^2$. Neither Southern Ditch nor Bee Lick Creek are listed as CWA Section 303(d) impaired (Division of Water 303(d) Public Notice Site, 2022).

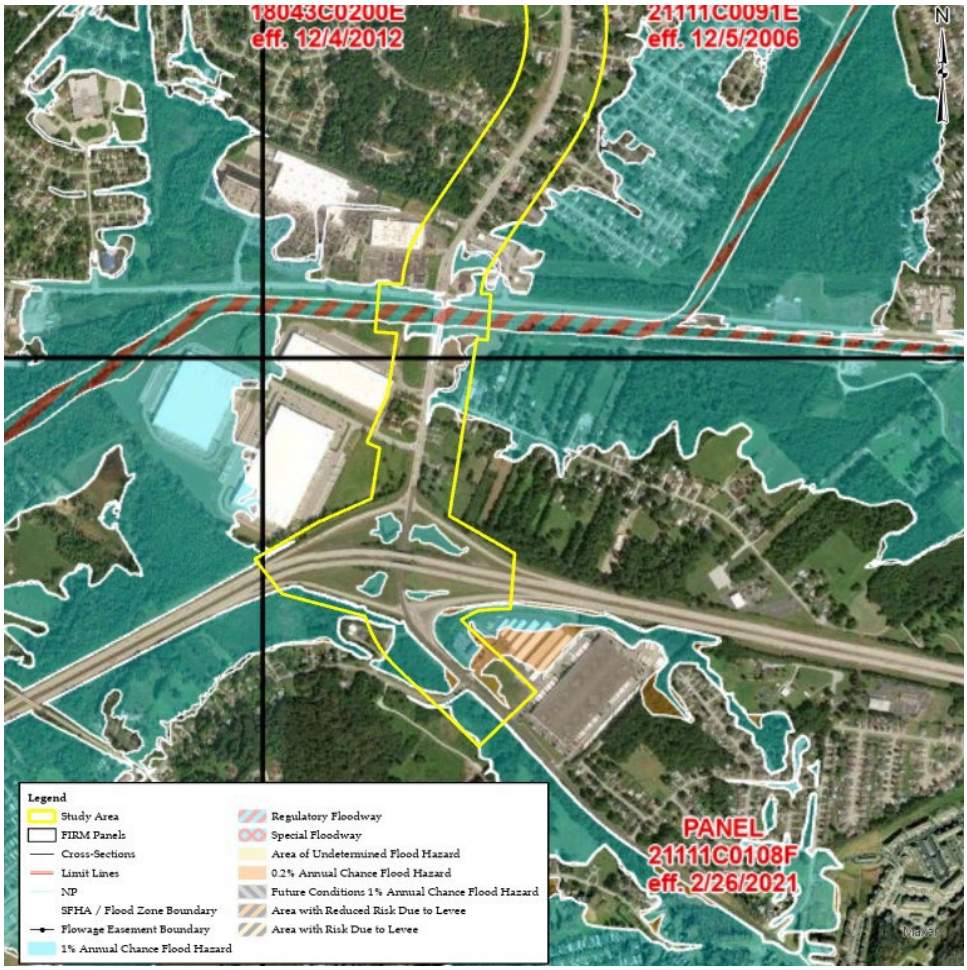
2.2.3 Floodplain Management (Executive Order (EO) 11988 and EO 13690)

EO 11988, Floodplain Management, requires federal agencies to minimize occupancy and modification of the floodplain. Specifically, EO 11988 prohibits federal agencies from funding construction in the 100-year floodplain unless there are no practicable alternatives. FEMA's regulations for complying with EO 11988 are promulgated in 44 CFR Part 9. Based on those regulations, analysis through a Floodplain Management checklist is not required. EO 13690 on Climate Related Financial Risk established a *Federal Flood Risk Management Standard and a Process for further soliciting and considering stakeholder input*, which was aimed at ensuring that

federal investments located in or near floodplains will be resilient in the face of climate change (Guidelines for Implementing Executive Order 11988, Floodplain Management, and Executive Order 13690, Establishing a Federal Flood Risk Management Standard and a Process for Further Soliciting and Considering Stakeholder Input, 2015).

The study area is within several FEMA Flood Insurance Rate Map (FIRM) panels. The majority of the study area is within Zone X, indicating that it is an Area of Minimal Flood Hazard. Portions of the southern part of the study area adjacent to Southern Ditch and Bee Lick Creek are within FEMA Zones A and AE, indicating that they are within an Area of 1% Annual Chance Flood Hazard. A small area south of KY 841 is within Zone X, indicating that it is an Area of 0.2% Annual Chance Flood Hazard. The area surrounding Southern Ditch is within Zone AE, indicating that it is within the Regulatory Floodway. (FEMA's National Flood Hazard Layer (NFHL) Viewer, 2023). The FEMA Flood Hazard Map is shown in **Figure 2.2**.

Figure 2.2 FEMA Flood Hazard Map



2.2.4 Air Quality

The Clean Air Act (CAA), 42 U.S.C. §§ 7401 et seq., requires the USEPA to set National Ambient Air Quality Standards (NAAQS) for pollutants considered harmful to public health and the environment. The CAA established two types of national air quality standards. Primary standards set limits to protect public health, including the health of sensitive populations such as

asthmatics, children, and the elderly. Secondary standards set limits to protect public welfare, including protection against decreased visibility and damage to animals, crops, vegetation, and buildings. Current criteria pollutants are carbon monoxide (CO), nitrogen dioxide (NO_2), ground-level ozone (O_3), lead (Pb), particulate matter (PM), and sulfur dioxide (SO_2).

Federally funded or permitted actions in nonattainment and maintenance areas are subject to USEPA conformity regulations, 40 C.F.R. §§ 51 and 93. The air conformity analysis process ensures that emissions of air pollutants from planned federally funded and permitted activities would not affect the state's ability to achieve the CAA goal of meeting the NAAQS. Section 176(c) of the CAA requires that federally funded or permitted projects must not cause any violations of the NAAQS, increase the frequency or severity of NAAQS violations, or delay timely attainment of the NAAQS or any interim milestone. Activities that would cause emissions to exceed the NAAQS or cause an area to fall out of attainment status would be considered a significant impact. The emissions from construction activities are subject to air conformity review.

Under the general conformity regulations, a determination for federal actions is required for each criteria pollutant or precursor in nonattainment or maintenance areas where the action's direct and indirect emissions have the potential to emit one or more of the six criteria pollutants at rates equal to or exceeding the prescribed de minimis rates for that pollutant. The prescribed annual rates are 50 tons of volatile organic compounds (VOCs) and 100 tons of nitrogen oxides (NO_x) (O_3 precursors), and 100 tons of $PM_{2.5}$, SO_2, or NO_x ($PM_{2.5}$ and precursors).

An area is classified as nonattainment when it does not meet NAAQS standards. According to EPA's NAAQS county attainment record, Jefferson County is in nonattainment for 8-hour ozone (2015). It is in attainment for all other criteria pollutants (Current Nonattainment Counties for All Criteria Pollutants, 2023).

2.3 Biological Environment

2.3.1 Terrestrial and Aquatic Environment

The study area is urban with a mix of residential and commercial properties. As the majority of the area is urbanized, terrestrial habitat is limited to the residential yards and open land near the roadside. Sparse tree cover is found throughout the study area and is a mixture of hardwood, primarily deciduous species such as maples and oaks but contain a multitude of planted and introduced species. There are many open, maintained lawns both within the residential areas and the business zones. These are dominated by invasive species and native highly tolerant taxa.

Aquatic habitat is present as discussed in **Section 2.2.2** at Southern Ditch in the southern portion of the study area, just south of KY 1065 and Bee Lick Creek located west of KY 1865 and running below KY 841. These streams appear to be perennial and likely have low-quality aquatic habitat due to the minimal riparian zone, proximity to point source and non-point source pollution, and nearly non-existent in stream cover in the case of Southern Ditch. The stream likely does support some hardy fish, frog, and macroinvertebrate species.

2.3.2 Wetlands (EO 11990)

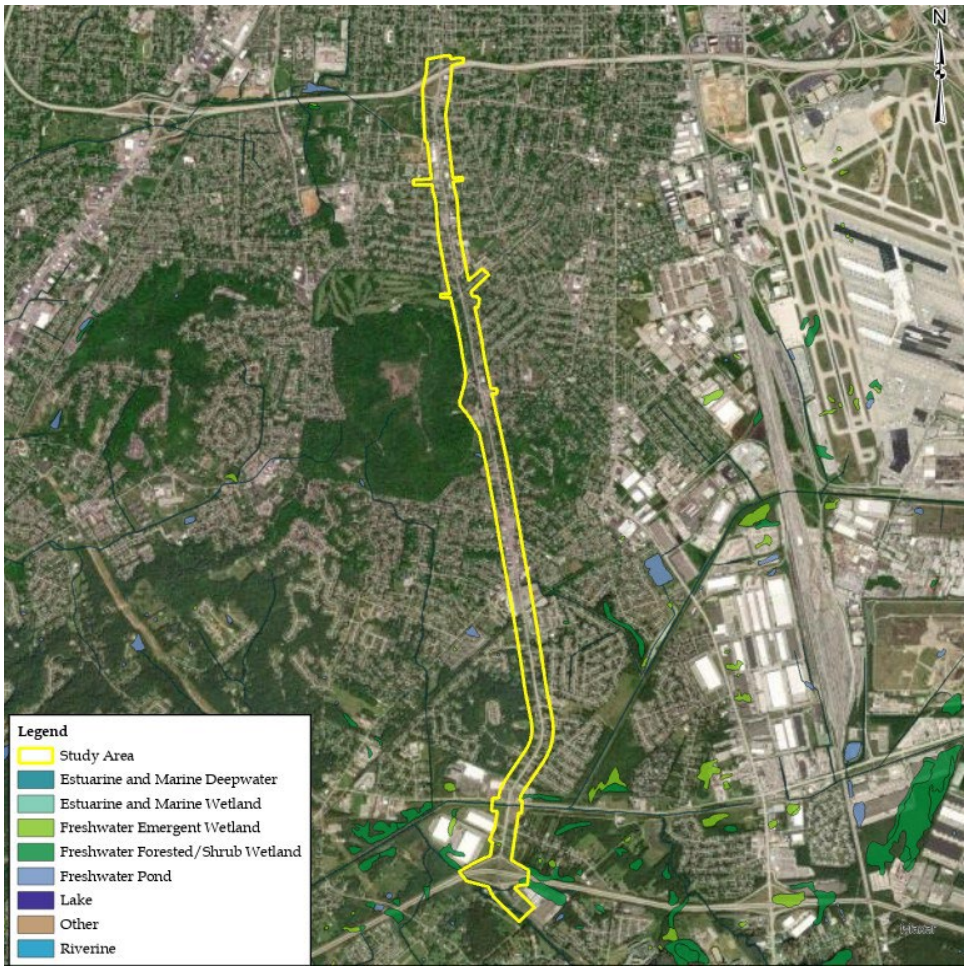
EO 11990, Protection of Wetlands, requires federal agencies to take action to minimize the loss of wetlands. EO 11990 prohibits federal funding of activities in a wetland unless no practicable

alternatives are available. The NEPA compliance process requires federal agencies to consider direct and indirect impacts on wetlands which may result from federally funded actions.

USACE and USEPA define wetlands as “areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions” (40 C.F.R. § 122.2). In 2008, USEPA and the USACE, through joint rulemaking, expanded the CWA Section 404(b)(1) Guidelines to include more comprehensive standards for compensatory mitigation. The rule addresses the sequence for mitigating unavoidable impacts to aquatic resources that result from work authorized by permits under the Corps’ (USACE) Regulatory Program. Activities that disturb jurisdictional wetlands require a permit from USACE under Section 404 of the CWA of 1977 (33 U.S.C. § 1344). Permit applicants are required to describe how they will avoid, minimize, and compensate for impacts to waters of the United States. Compensatory mitigation for unavoidable impacts is required to replace the loss of wetland, stream, and/or other aquatic resource functions.

The U.S. Fish & Wildlife Service’s (USFWS) National Wetlands Inventory (NWI) was reviewed to identify potential wetlands in the study area (National Wetlands Inventory, 2023). Eight (8) NWI features are present within the study area. B&N also utilized Google Earth and Google Street View to assess the area for potential wetlands. Based upon this, the southern portion of Iroquois Park, the fringe of Southern Ditch, and the infields of KY 1865 and KY 841 interchange are higher probability areas that may also contain wetlands. **Figure 2.3**, below depicts the NWI map of the study area.

Figure 2.3 NWI-Wetland Map



2.3.3 Threatened and Endangered Species

The Endangered Species Act (ESA) of 1973, 16 U.S.C. §§ 1531 - 1544, provides a framework for the conservation and protection of threatened and endangered species listed under the act in addition to their habitats. Federal agencies are required to ensure that actions they fund, authorize, permit, or carry out are not likely to jeopardize the continued existence of any listed species (including plant species) or result in the destruction or adverse modification of designated critical habitats for such species. In accordance with Section 7 of the ESA, the proposed study area was evaluated for potential impacts to listed threatened and endangered species.

In September 2023, the Information for Planning and Consultation (IPaC) tool was utilized to obtain a list of species within range of the study area. The search found that there is no critical habitat within the study area. The study area is within range of the federally endangered Indiana bat (*Myotis sodalis*), northern long-eared bat (*Myotis septentrionalis*), gray bat (*Myotis grisescens*), whooping crane (*Grus americana*), clubshell (*Pleurobema clava*), fanshell (*Cyprogenia stegaria*), northern riffleshell (*Epioblasma rangiana*), orangefoot pimpleback (*Plethobasus cooperianus*), pink mucket (*Lampsilis abrupta*), ring pink (*Obovaria retusa*), and rough pigtoe (*Pleurobema plenum*). It is within range of the federally threatened rabbitsfoot (*Quadrula cylindrica cylindrica*) and the proposed endangered salamander mussel (*Simpsonaias*

ambigua). It is also within range of the candidate species monarch butterfly (*Danaus plexippus*) (Information for Planning and Consultation, 2023).

There is no potential habitat for whooping crane within the study area. There is suitable wooded habitat for the bat species in various areas throughout the study area and also potential bat roosting habitat on the KY 1865 bridge over Southern Ditch. Southern Ditch may also contain potential habitat for the mussel species.

The Kentucky Department of Fish & Wildlife Resources lists ninety-three (93) state threatened, endangered, or special concern species within Jefferson County (Species Information for Jefferson County, 2023).

See **Appendix A** for IPaC results (Information for Planning and Consultation, 2023).

2.3.4 Migratory Birds

A migratory bird is any species or family of birds that live, reproduce, or migrate within or across international borders at some point during their annual life cycle. The Migratory Bird Treaty Act (MBTA) of 1918, as amended, 16 U.S.C. §§ 703–712, prohibits unpermitted killing, capturing, selling, trading, and transport of migratory birds and their nests, eggs, and body parts. Almost all native birds, including common species such as American robin (*Turdus migratorius*) and American crow (*Corvus brachyrhynchos*) are protected by the MBTA. The proposed study area would support protected migratory birds.

The Bald and Golden Eagle Protection Act (BGEPA) of 1940, 16 U.S.C. §§ 668 *et seq.*, prohibits the unpermitted take (defined as pursue, shoot, shoot at, poison, wound, kill, capture, trap, collect, molest, or disturb), possession, sale, purchase, barter, offer to sell, transport, export, or import any golden (*Aquila chrysaetos*) or bald eagle (*Haliaeetus leucocephalus*), alive or dead, including any part, nest, or egg (16 U.S.C. § 668(a)).

The following birds were listed by the USFWS as migratory birds within range of the study area: bald eagle (*Haliaeetus leucocephalus*), black-billed cuckoo (*Coccyzus erythropthalmus*), bobolink (*Dolichonyx oryzivorus*), cerulean warbler (*Dendroica cerulea*), chimney swift (*Chaetura pelagic*), eastern whip-poor-will (*Antrostomus vociferus*), field sparrow (*Spizella pusilla*), Kentucky warbler (*Oporornis formosus*), lesser yellowlegs (*Tringa flavipes*), prairie warbler (*Dendroica discolor*), prothonotary warbler (*Protonotaria citrea*), red-headed woodpecker (*Melanerpes erythrocephalus*), rusty blackbird (*Euphagus carolinus*), and wood thrush (*Hylocichla mustelina*). IPaC identified these fourteen species as birds of particular concern because they occur on the USFWS Birds of Conservation Concern or warrant special attention in the project location. The probability of presence of each species ranges throughout the year. The bird most likely to be present, based on the probability, throughout the year is the field sparrow with the chimney swift, Kentucky warbler, and wood thrush commonly present in the summer months.

2.3.5 Invasive Species

EO 13112, Invasive Species, requires federal agencies to prevent the introduction of invasive species and provide for their control to minimize the economic, ecological, and human health impacts caused by invasive species. An inventory was not completed; however, given the location and characteristics of the study area, Amur honeysuckle (*Lonicera maackii*), Japanese honeysuckle (*Lonicera japonica*) multiflora rose (*Rosa multiflora*), autumn olive (*Elaeagnus umbellata*), tree-of-heaven (Ailanthus altissima), crown vetch (*Coronilla varia*), Kentucky 31

fescue (*Festuca arundinacea*), privet (*Ligustrum sinesnse*), and chickweed (*Stellaria media*) may be present within the study area. These species are identified by the Kentucky Department of Fish & Wildlife Resources as invasive species that pose a "severe threat" in Kentucky (Nuisance Species Plans, 2023).

2.4 Hazardous Materials

Hazardous materials are any items or agents (biological, chemical, radiological, or physical) that have the potential to cause harm to humans, animals, or the environment either by themselves or through interaction with other factors. Sites within or adjacent to the study area, regulated by federal hazardous materials laws such as the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), 42 U.S.C. §§ 9601 - 9675, and the Resource Conservation and Recovery Act (RCRA), 42 U.S.C. §§ 6901 *et seq*., were identified using Lightbox EDR Environmental Risk Screening. The screening report identified the following sites within and directly adjacent to the study area:

RCRA Generators: 2

Emergency Response Notification System (ERNS) Sites: 5

State Hazardous Waste Facilities: 4

Leaking Storage Tanks: 5

Registered Underground Storage Tanks: 27

Hazardous Waste/Contaminated Sites:

- Clandestine Drug Lab Locations: 2
- National Clandestine Laboratory Register: 2

Records of Emergency Release: 44

RCRA – Non-Generators/No Longer Regulated: 21

Integrated Compliance Information System: 1

Facility Index System/Facility Registry System: 42

Enforcement & Compliance History Information: 31

Facilities in Industries that May Be Handling PFAS: 2

Financial Assurance: 9

Environmental Lead Program Report Tracking Database: 11

National Pollutant Discharge Elimination System: 8

Historical Auto Stations: 38

Historical Cleaners: 19

Recovered Government Archive State Hazardous Waste Facilities: 5

In addition, there are several monitoring wells located throughout the study area along KY 1865. These can be identified using the Kentucky Geological Survey's interactive mapping service (Kentucky Geologic Map Service, 2023).

A Phase I and Phase II Environmental Site Assessment (ESA) will likely be required for this project. A Phase III ESA is also possible.

The locations and additional information regarding these sites is provided in the EDR Report in **Appendix B**.

2.5 Socioeconomics

2.5.1 Section 4(f)

Section 4(f) of the U.S. Department of Transportation Act of 1966 prohibits the use of certain public and historic lands for federally funded transportation facilities unless there is no feasible and prudent alternative. The law applies to significant publicly owned parks, recreation areas, wildlife/waterfowl refuges, and NRHP eligible or listed historic properties regardless of ownership. Lands subject to this law are considered Section 4(f) resources.

Iroquois Park, Wyandotte Park, South Louisville Reformed Church, and Southern Parkway are all 4(f) resources. A Historical Phase I Survey will need to be conducted to determine if any of the listed historic properties in **Appendix E** or new unknown properties are NRHP eligible and therefore, 4(f) resources. Iroquois High School, Frederick Law Olmsted Academy South, Auburndale Elementary School, and Hazelwood Elementary School may be 4(f) resources if their recreational facilities are open to the public. Coordination will be required with the school districts to make this determination.

There are several proposed trails along and perpendicular to KY 1865 in the Louisville Parks and Recreation Southwest Greenways Master Plan.

2.5.2 Section 6(f)

The U.S. Land and Water Conservation Fund Act of 1965 established the Land and Water Conservation Fund (LWCF), which was created to preserve, develop, and assure accessibility to outdoor recreation resources. Section 6(f) of this Act prohibits conversion of lands purchased with LWCF monies to a non-recreation use.

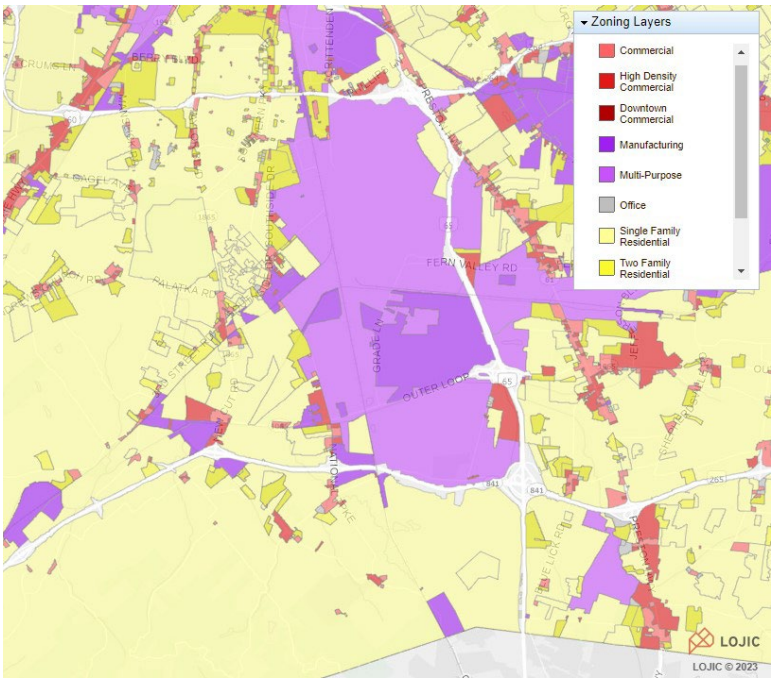
Iroquois Park has received a total of $100,412 in LWCF funding in 1972, 1978, 1984, and 1993. Wyandotte Park has received a total of $71,053 in LWCF funding in 1972 and 1978. This qualifies both of these parks as 6(f) resources (The Land & Water Conservation Fund Coalition, 2023).

Information regarding the 6(f) resources from the LWCF website is provided as **Appendix C**.

2.5.3 Zoning and Land Use

The study area is in the incorporated area of the City of Louisville, Jefferson County, Kentucky and is subject to the Louisville Metro Land Development Code (**Figure 2.4**) (Louisville Zoning Districts, 2023). The study area is primarily zoned as residential with areas of commercial and industrial interspersed.

Figure 2.4 City of Louisville Zoning Map (Louisville Zoning Districts, 2023)



2.5.4 Noise

The Noise Control Act of 1972 (42 U.S.C. §§ 4901, *et seq.*) defines "noise" as an undesirable sound which is regulated at the federal level through that Act. Noise standards developed by USEPA (USEPA 1974) provide a basis for state and local government decision-making in setting local noise standards. Park, municipal, and residential areas are defined as noise-sensitive land uses for purposes of Federal Highway Administration (FHWA) noise abatement criteria (23 C.F.R. § 772.5).

The KYTC recognizes the potential for adverse effects that traffic noise may have on the citizens of the Commonwealth and will consider and evaluate reasonable measures to minimize these effects. Noise considerations are a part of the planning, design, and construction of a highway project. The identification of noise sensitive sites or areas shall be done early in the planning phase of the project. During project development, detailed analyses will be undertaken to assess specific traffic noise impacts and abatement measures at locations that may experience increased traffic noise levels as a result of the project. Concern for noise impacts continues into the construction phase with emphasis on minimizing disruption from construction noise.

As the majority of the study area is lined by noise-sensitive areas (NSA) such as residences, parks, schools, and churches, a traffic noise study may be required if a preferred alternative that may increase noise is chosen. Alternatives that may increase noise include a road on a new alignment, horizontally moving a roadway 50% closer to a NSA, increasing the number of through lanes, adding auxiliary lanes, restriping pavement to add through or auxiliary lanes, or creating a project that would cause a major change in vehicle mix. It is likely that this project will be a Type I project.

In addition, Louisville-Jefferson County Metro Government Ordinances Chapter 99: Noise: construction equipment may only operate "between the hours of 7:00 a.m. and 9:00 p.m."

2.5.5 Public Services and Utilities

The study area is served by the Louisville Metro Police Department and the Louisville Division of Fire, the Louisville Water Company, the Louisville Metropolitan Sewer District, Louisville Gas and Electric Company. The study area is within the Jefferson County Public School District. Iroquois High School, Frederick Law Olmsted Academy South, Hazelwood Elementary School, and Auburndale Elementary Schools are located adjacent to the study area. The closest in-patient hospital, University of Louisville – Mary & Elizabeth Hospital, is located at 1850 Bluegrass Avenue, Louisville, KY and is approximately 0.49 mi. west of KY 1865.

2.5.6 Traffic and Circulation

KY 1865, also referred to as Taylor Blvd. north of Southside Drive and New Cut Road south of Southside Drive, is an urban principal arterial consisting of five lanes for the majority of the study area. North of Palatka Road to I-264 it consists of four lanes with occasional turn lanes and south of the KY 841 ramps it consists of three lanes. AADT ranges from 23,353 (2020) between Southern Parkway and I-264 on the north end of the study area to 10,050 (2019) between Brown Austin Road and KY 841 on the south end of the study area.

2.5.7 Environmental Justice (Executive Order 12898)

EO 12898, Federal Actions to Address Environmental Justice (EJ) in Minority and Low-income Populations, requires federal agencies to identify, address, and avoid disproportionately high and adverse human health or environmental effects on minority and low-income populations caused by their actions. Minorities are defined as anyone who identifies as black or African American, American Indian (Native American), or Alaska Native, Asian American, Native Hawaiian or Pacific Islander, Hispanic, or multiracial. Low-income populations are those with incomes at or below the annual statistical federal poverty thresholds determined by the U.S. Census Bureau.

To characterize the demographics of the area, the U.S. Census Bureau American Community Survey (ACS) 2017-2021 data was collected for the affected area using the USEPA's Environmental Justice Screening and Mapping tool (EJScreen: Environmental Justice Screening and Mapping Tool, 2023). The affected area was determined to be an approximately 12.38 mi.^{2} area surrounding the study area that may be directly, indirectly, or cumulatively affected by the Proposed Action.

EJ populations are determined to be present if the state percentile of low income (**Table 2.1**) or minority (**Table 2.2**) populations is 50th or greater or if the state percentile of any of the thirteen EJ indexes is 80th or greater. The thirteen EJ indexes are summarized in **Table 2.3**.

The review of the 2017-2021 ACS concluded that low-income populations are present as the state percentile of the affected area is 63rd, exceeding the 50th percentile threshold. It was also concluded that minority populations are present as the state percentile of the affected area is 89th, exceeding the 50th percentile threshold.

The 80th percentile threshold for EJ indices was also exceeded by National Scale Air Toxics Assessment (NATA) particulate matter 2.5, NATA ozone, NATA toxic releases to air, traffic proximity and volume, lead paint indicator, proximity to national priorities list sites (superfund), proximity to risk management plan sites, hazardous waste proximity, underground storage tanks, and wastewater discharge indicator.

Table 2.1 Low-Income Population, 2017-2021 ACS

	Affected Area Percentage	Percentile in State
Low Income	44%	63rd

Table 2.2 People of Color Population, 2017-2021 ACS

Environmental Justice information obtained from EJScreen is provided as **Appendix D**.

2.6 Historic and Cultural Resources

Section 106 of the National Historic Preservation Act of 1966 (NHPA), as amended, 54 U.S.C. §§ 300101 - 307108, requires federal agencies to consider the potential effects on cultural resources of actions it proposes. Cultural resources are defined as prehistoric or historic archaeology sites, historic standing buildings and structures, historic districts, objects, artifacts, and cultural properties of historic or traditional significance—referred to as Traditional Cultural Properties—that may have religious or cultural significance to federally-recognized Native American Tribes (Tribes). Any other physical evidence of human activity considered important to

a culture, subculture, or community for scientific, traditional, religious, or other reasons is also considered a cultural resource.

Historic properties are districts, sites, buildings, structures, and objects that are included in the National Register of Historic Places (NRHP) or that meet the criteria for listing on the NRHP; they also include records and human remains that are related to and/or located within such properties. Consideration of effects on historic properties is mandated both by NEPA and by Section 106 of the NHPA of 1966, as amended (16 U.S.C. § 470f). Section 106 requires Federal agencies to consider the effects of their undertakings on historic properties and to afford the SHPO and the Advisory Council on Historic Preservation an opportunity to comment on such undertakings.

Cultural resources listed, eligible for listing, or potentially eligible for listing on the NRHP are subject to protection from adverse effects resulting from a federally funded undertaking. To be considered eligible for listing, a cultural resource must meet one or more of the criteria regarding the resource's significance, as well as demonstrate the integrity of physical features or other characteristics that are related to that significance. Eligibility criteria for listing a property in the NRHP are detailed in 36 C.F.R. § 60. Under the implementing regulations for conducting Section 106 consultation under the NHPA at 36 C.F.R. § 800, federal agencies are required to determine whether resources are eligible for listing and obtain concurrence on that finding from the SHPO, which maintains records of known historic properties in the Commonwealth of Kentucky.

Under 36 C.F.R. § 800.4(a)(1), the Area of Potential Effects (APE) is defined as the geographic area(s) within which the undertaking may directly or indirectly affect cultural resources. Within the APE, impacts on cultural resources are evaluated for both historic structures (above-ground cultural resources) and archaeology (below-ground cultural resources).

In addition to the NHPA, federal agencies must also comply with the following federal laws that relate to historic and cultural resources:

- American Indian Religious Freedom Act of 1978 (AIRFA), 42 U.S.C. § 1996, which provides for the protection and preservation of Native American sites, possessions, and ceremonial and traditional rites.
- Native American Graves Protection and Repatriation Act of 1990, 25 U.S.C. §§ 3001–3013, in cases where Native American cultural Items are found on federal and tribal lands.
- Archaeological Resources Protection Act of 1979, 16 U.S.C. §§ 470aa–470 mm, which provides for the protection of archaeological resources on public lands and Native American lands.
- The Archaeological and Historic Preservation Act of 1974, 16 U.S.C. §§ 469 - 469c-2, provides for the survey, recovery, and preservation of significant scientific, prehistoric, archeological, or paleontological data when such data may be destroyed or irreparably lost due to a federal, federally licensed, federally funded (in part or whole) project.

2.6.1 Historic Structures

The screening conducted on Kentucky Heritage Council (KHC) Site Check Web Service by B&N on September 12, 2023 listed the following resources within 0.1 mi. of the study area:

- Forty-seven (47) Historic Resources
- One (1) Easement
- Three (3) National Register Sites

A Phase I Historical Survey will be required for this project. It's possible during coordination with KHC that the project may need to be altered to avoid adverse effects to historical sites and/or mitigation of adverse effects may be required.

Information regarding these resources is provided in the KHC Summary provided as **Appendix E**.

2.6.2 Archaeological Resources

Due to the lack of undisturbed soils within the study area, the presence of any undocumented archaeological resources is unlikely.

3 PUBLIC PARTICIPATION

An initial public meeting was held at Lynnhurst United Church of Christ on September 20, 2023 from 5 to 7 p.m. The public was informed of the meeting via email, flyers mailed to stakeholders, SW Dream Team website and Facebook page, council newsletter, Reddit, and Vision Zero Louisville Task Force meeting. The public was presented with an overview of the study area including maps, traffic, safety, and environmental information and asked to comment on anything they would like to fix about KY 1865 and any additional comments. From that meeting, KYTC received 34 comments. These included, but were not limited to, pedestrian safety issues, connectivity to parks and schools, speed concerns, lane width, signal timing, lighting, intersection alignment, turn lane and signal requests, access management, and medians as well as some comments unrelated to KY 1865 and this study.

3.1 Subrecipient Outreach

KYTC has compiled a stakeholders list to participate in public meetings and discussion regarding the project. This list includes private businesses, parks districts, schools, churches, medical facilities, neighborhood groups, local associations, and elected officials. The list of stakeholders is included in **Appendix F**.

4 PERMITS

The below table is an estimate of permits that may be required by the proposed project. When the preferred alternative is chosen, it is the responsibility of the project sponsor to confirm what permits are required.

Table 4.1 Permit Summary

Issuing Agency	Permit Title	Applicable Regulation/Law	Required
Kentucky EEC – Division of Water	Floodplain Permit	KRS 151 401 KAR 4:060	Likely
Louisville MSD	Local Regulatory Floodplain Permit/ Local Regulatory Conveyance Zone Permit	Louisville/Jefferson County Metro Government Ordinances Chapter 157	Likely
Louisville MSD	MS4	KPDES KRS 224 Permit No. KYS000001	Likely
Kentucky EEC – Division of Water	KYR10 – Stormwater Construction	33 U.S.C § 1251 et seq) Kentucky Water Quality (§ 401 KAR 5)	Likely
Kentucky Airport Zoning Commission	Airspace Obstruction	KRS 183.861 CFR Title 14 Part 77.9	Possible
USACE	Section 404 Nationwide Permit	CWA Section 404/401	Possible
Kentucky Transportation Cabinet	Encroachment Permit	KRS 177.106(2)	Possible
Kentucky EEC – Division of Water	Section 401 WQC	CWA Section 401	Unlikely

5 NEPA SCOPING

The below table was adapted from KYTC's Categorical Exclusion Matrix and modified for simplicity and project-specificity. As the preferred alternative has not yet been defined, B&N has **bolded** the likely required level of effort for each environmental resource based upon the information compiled within this document as well as what would likely be required to meet the purpose and need of the project.

Table 5.1 NEPA Scoping Matrix

Environmental Resource	CEMP	CE 1	CE 2	CE 3
ROW Acquisition	Minor	**≤ 10 acres**	≤ 25 acres	>25 acres
Relocations	**None**	≤ 5	≤ 10	>10
404 Permit	**Nationwide**	Individual	Individual	Individual
Wetland Impacts	**< 0.5 acre**	< 0.5 acre	≥ 0.5 acre	≥ 0.5 acre
Section 106	No Historic Resource other than Bridges Adversely Affected	No Historic Resource other than Bridges Adversely Affected	No Historic Resource other than Bridges Adversely Affected	**Historic Resource Adversely Affected but Mitigated**
4(f)	De minimis	Programmatic	Programmatic	**Individual 4(f)**
Threatened & Endangered Species	**NE or NLAA**	NE or NLAA	NE or NLAA	Likely to Adversely Affect
6(f) Conversion	No	No	No	**Yes**
Environmental Justice	**No Significant Impacts**	No Significant Impacts	No Significant Impacts	Disproportionately High and Adverse
Public Controversy	**No Unresolved Issues**	No Unresolved Issues	No Unresolved Issues	No Unresolved Issues
Hazardous Materials	**Minor**	Minor	Minor	Minor
Air Quality Impacts	**Meets NAAQ Standards**	Meets NAAQ Standards	Meets NAAQ Standards	Does Not Meet NAAQ Standards

B&N anticipates that this project will require a CE Level 3 based upon adverse effects to historic resources, 4(f) impacts, and conversion of a 6(f) property. Once the preferred alternative has been determined, the project should be coordinated with FHWA. They will make the determination of whether this project can be categorically excluded or if a higher-level document such as an Environmental Assessment (EA) or Environmental Impact Statement (EIS) will be required.

8 APPENDICES

Appendix A: Threatened & Endangered Species

This appendix contains USFWS's IPaC official threatened and endangered species list for the study area, dated September 19, 2023. It lists three bat species, one bird species, and eight mussel species within the study area. As well as one proposed endangered mussel species and one candidate insect species. The results of this list are covered in Section 2.3.3.

Appendix B: Hazardous Materials

This appendix contains the EDR Area/Corridor Report, dated August 9, 2023. This report contains information regarding potential hazardous waste sites within the study area as well as within various radii of the study area. The results of this report are covered in Section 2.4.

Appendix C: Section 6(f)

This appendix contains a map and list of Section 6(f) sites obtained from the LWCF website on September 12, 2023. The results of this search are covered in Section 2.5.2.

Appendix D: Environmental Justice

This appendix contains the EJScreen Community Report from the U.S. EPA's website on November 6, 2023. This report details the community information, EJ Indexes, and environmental and socioeconomic indicators for the study area. This results of this report are covered in Section 2.5.7.

Appendix E: Cultural Resources

This appendix contains the KHC Site Check results for a 0.1 mi. buffer around the study area. It lists forty-seven historic resources, one easement, and three national register sites. The results of this search are covered in Section 2.6.1.

Appendix F: Public Involvement

This appendix includes the compiled stakeholder list, the sign in sheet for the September 20, 2023 public meeting, an exhibit that the public provided sticky note comments, public comment cards, and a summary of the comments provided by the public. This information is covered in Section 3.

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the

human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2)(c)). For projects other than major construction activities, the Service suggests that a biological evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

https://www.fws.gov/sites/default/files/documents/endangered-species-consultation-handbook.pdf

Migratory Birds: In addition to responsibilities to protect threatened and endangered species under the Endangered Species Act (ESA), there are additional responsibilities under the Migratory Bird Treaty Act (MBTA) and the Bald and Golden Eagle Protection Act (BGEPA) to protect native birds from project-related impacts. Any activity, intentional or unintentional, resulting in take of migratory birds, including eagles, is prohibited unless otherwise permitted by the U.S. Fish and Wildlife Service (50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)). For more information regarding these Acts, see https://www.fws.gov/program/migratory-bird-permit/what-we-do..

The MBTA has no provision for allowing take of migratory birds that may be unintentionally killed or injured by otherwise lawful activities. It is the responsibility of the project proponent to comply with these Acts by identifying potential impacts to migratory birds and eagles within applicable NEPA documents (when there is a federal nexus) or a Bird/Eagle Conservation Plan (when there is no federal nexus). Proponents should implement conservation measures to avoid or minimize the production of project-related stressors or minimize the exposure of birds and their resources to the project-related stressors. For more information on avian stressors and recommended conservation measures, see https://www.fws.gov/library/collections/threats-birds.

In addition to MBTA and BGEPA, Executive Order 13186: *Responsibilities of Federal Agencies to Protect Migratory Birds*, obligates all Federal agencies that engage in or authorize activities that might affect migratory birds, to minimize those effects and encourage conservation measures that will improve bird populations. Executive Order 13186 provides for the protection of both migratory birds and migratory bird habitat. For information regarding the implementation of Executive Order 13186, please visit https://www.fws.gov/partner/council-conservation-migratory-birds.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Code in the header of

this letter with any request for consultation or correspondence about your project that you submit to our office.

Counties: Jefferson County, Kentucky

ENDANGERED SPECIES ACT SPECIES

There is a total of 14 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species. Note that 9 of these species should be considered only under certain conditions.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries[1], as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting

National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

BP OIL CO. (GULF FOOD MART) (Continued) **1000450866**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Waste Description: Wastewater Treatment Sludges From The Chemical Conversion Coating Of Aluminum, Except From Zirconium Phosphating In Aluminum Can Washing When Such Phosphating Is An Exclusive Conversion Coating Process.

Waste Code: F020
Waste Description: Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Production Or Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Tri- Or Tetrachlorophenol Or Of Intermediates Used To Produce Their Pesticide Derivatives. (This Listing Does Not Include Wastes From The Production Of Hexachlorophene From Highly Purified 2,4,5-Trichlorophenol.)

Waste Code: F021
Waste Description: Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Production Or Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Pentachlorophenol, Or Of Intermediates Used To Produce Derivatives.

Waste Code: F022
Waste Description: Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Tetra-, Penta-, Or Hexachlorobenzenes Under Alkaline Conditions.

Waste Code: F023
Waste Description: Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Production Of Materials On Equipment Previously Used For The Production Or Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Tri- And Tetrachlorophenols. (This Listing Does Not Include Wastes From Equipment Used Only For The Production Or Use Of Hexachlorophene From Highly Purified 2,4,5-Trichlorophenol.)

Waste Code: F024
Waste Description: Process Wastes Including, But Not Limited To, Distillation Residues, Heavy Ends, Tars, And Reactor Clean-Out Wastes From The Production Of Certain Chlorinated Aliphatic Hydrocarbons By Free Radical Catalyzed Processes. These Chlorinated Aliphatic Hydrocarbons Are Those Having Carbon Chain Lengths Ranging From One To, And Including Five, With Varying Amounts And Positions Of Chlorine Substitution. (This Listing Does Not Include Wastewaters, Wastewater Treatment Sludge, Spent Catalysts, And Wastes Listed In Sections 261.31. Or 261.32)

Waste Code: F025
Waste Description: Condensed Light Ends, Spent Filters And Filter Aids, And Spent Desiccant Wastes From The Production Of Certain Chlorinated Aliphatic Hydrocarbons By Free Radical Catalyzed Processes. These Chlorinated Aliphatic Hydrocarbons Are Those Having Carbon Chain Lengths Ranging From One To, And Including Five, With Varying Amounts And Positions Of Chlorine Substitution.

Waste Code: F026
Waste Description: Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Production Of Materials On Equipment Previously Used For The Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Tetra-, Penta-, Or

Hexachlorobenzene Under Alkaline Conditions.

Waste Code: F027
Waste Description: Discarded Unused Formulations Containing Tri-, Tetra-, Or Pentachlorophenol Or Discarded Unused Formulations Containing Compounds Derived From These Chlorophenols. (This Listing Does Not Include Formulations Containing Hexachlorophene Synthesized From Prepurified 2,4,5-Trichlorophenol As The Sole Component.)

Waste Code: F028
Waste Description: Residues Resulting From The Incineration Or Thermal Treatment Of Soil Contaminated With Epa Hazardous Waste Nos. F020, F021, F022, F023, F026, And F027.

Waste Code: F032
Waste Description: Wastewaters, Process Residuals, Preservative Drippage, And Spent Formulations From Wood Preserving Processes Generated At Plants That Currently Use, Or Have Previously Used, Chlorophenolic Formulations [Except Potentially Cross-Contaminated Wastes That Have Had The F032 Waste Code Deleted In Accordance With Section 261.35 (I.E., The Newly Promulgated Equipment Cleaning Or Replacement Standards), And Where The Generator Does Not Resume Or Initiate Use Of Chlorophenolic Formulations]. (This Listing Does Not Include K001 Bottom Sediment Sludge From The Treatment Of Wastewater From Wood Preserving Processes That Use Creosote And/Or Pentachlorophenol.)

Waste Code: F034
Waste Description: Wastewaters, Process Residuals, Preservative Drippage, And Spent Formulations From Wood Preserving Processes Generated At Plants That Use Creosote Formulations. This Listing Does Not Include K001 Bottom Sediment Sludge From The Treatment Of Wastewater From Wood Preserving Processes That Use Creosote And/Or Pentachlorophenol.

Waste Code: F035
Waste Description: Wastewaters, Process Residuals, Preservative Drippage, And Spent Formulations From Wood Preserving Processes Generated At Plants That Use Inorganic Preservatives Containing Arsenic Or Chromium. This Listing Does Not Include K001 Bottom Sediment Sludge From The Treatment Of Wastewater From Wood Preserving Processes That Use Creosote And/Or Pentachlorophenol.

Waste Code: F037
Waste Description: Petroleum Refinery Primary Oil/Water/Solids Separation Sludge - Any Sludge Generated From The Gravitational Separation Of Oil/Water/Solids During The Storage Or Treatment Of Process Wastewaters And Oily Cooling Wastewaters From Petroleum Refineries. Such Sludges Include, But Are Not Limited To, Those Generated In Oil/Water/Solids Separators; Tanks And Impoundments; Ditches And Other Conveyances; Sumps; And Storm Water Units Receiving Dry Weather Flow. Sludges Generated In Storm Water Units That Do Not Receive Dry Weather Flow, Sludges Generated In Aggressive Biological Treatment Units As Defined In Section 261.31(B)(2) (Including Sludges Generated In One Or More Additional Units After Wastewaters Have Been Treated In Aggressive Biological Treatment Units), And K051 Wastes Are Exempted From This Listing.

Waste Code: F038

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

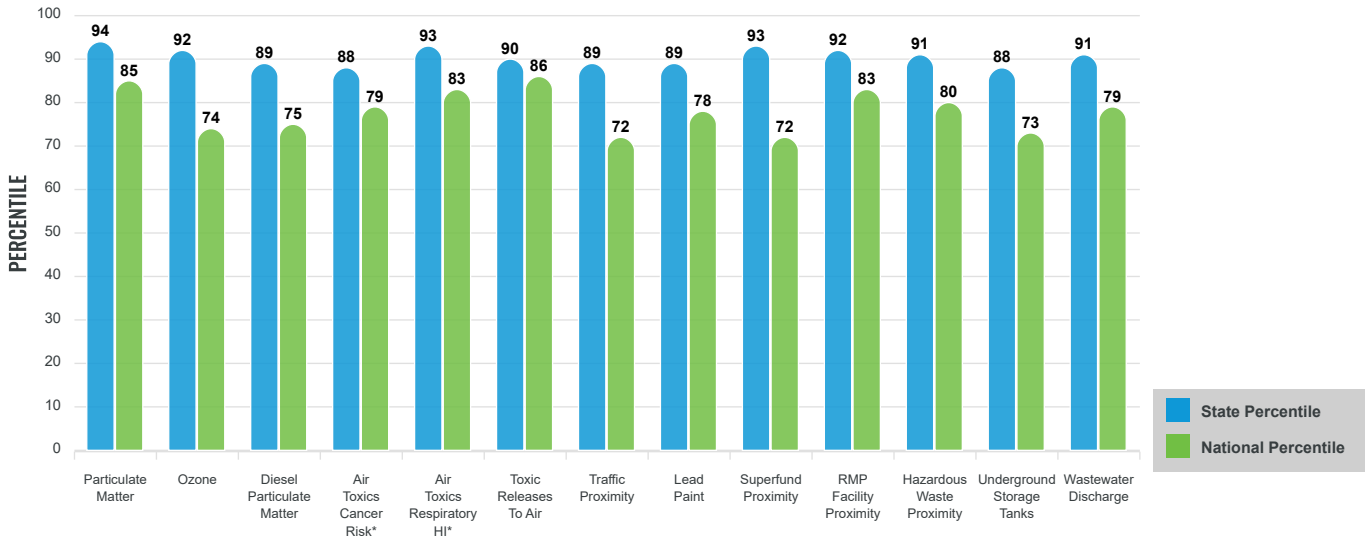
Environmental Justice & Supplemental Indexes

The environmental justice and supplemental indexes are a combination of environmental and socioeconomic information. There are thirteen EJ indexes and supplemental indexes in EJScreen reflecting the 13 environmental indicators. The indexes for a selected area are compared to those for all other locations in the state or nation. For more information and calculation details on the EJ and supplemental indexes, please visit the EJScreen website.

EJ INDEXES

The EJ indexes help users screen for potential EJ concerns. To do this, the EJ index combines data on low income and people of color populations with a single environmental indicator.

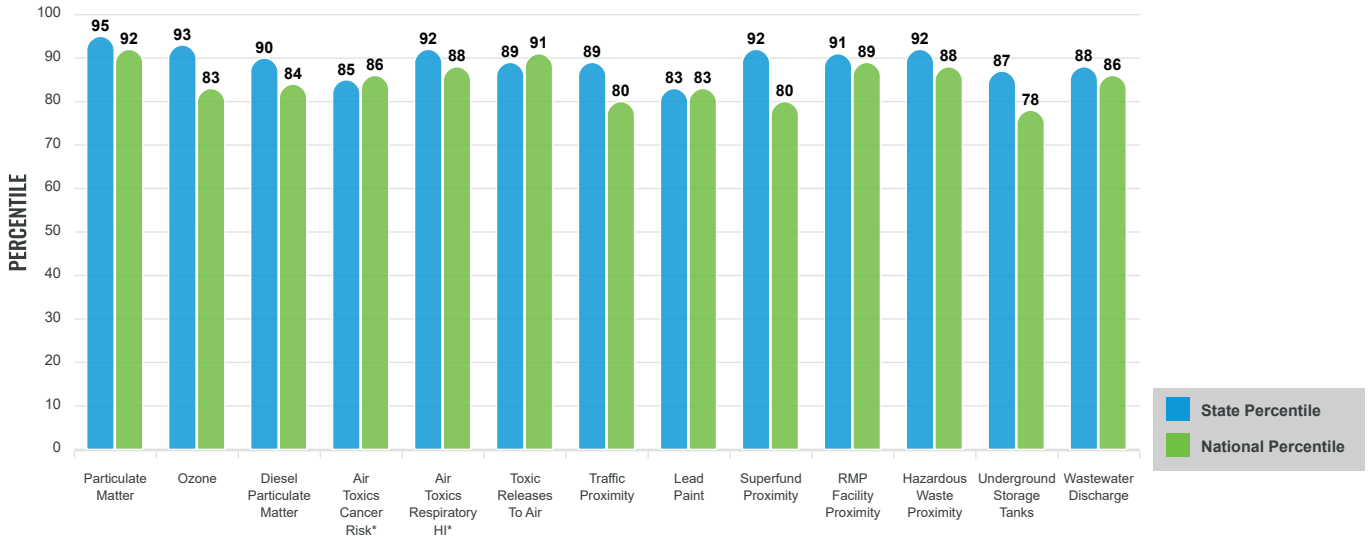
EJ INDEXES FOR THE SELECTED LOCATION



SUPPLEMENTAL INDEXES

The supplemental indexes offer a different perspective on community-level vulnerability. They combine data on percent low-income, percent linguistically isolated, percent less than high school education, percent unemployed, and low life expectancy with a single environmental indicator.

SUPPLEMENTAL INDEXES FOR THE SELECTED LOCATION



These percentiles provide perspective on how the selected block group or buffer area compares to the entire state or nation.

*Diesel particulate matter, air toxics cancer risk, and air toxics respiratory hazard index are from the EPA's Air Toxics Data Update, which is the Agency's ongoing, comprehensive evaluation of air toxics in the United States. This effort aims to prioritize air toxics, emission sources, and locations of interest for further study. It is important to remember that the air toxics data presented here provide broad estimates of health risks over geographic areas of the country, not definitive risks to specific individuals or locations. Cancer risks and hazard indices from the Air Toxics Data Update are reported to one significant figure and any additional significant figures here are due to rounding. More information on the Air Toxics Data Update can be found at: https://www.epa.gov/haps/air-toxics-data-update.

I THINK TAYLOR BLVD NEEDS TO BE WIDENED FROM I-264 TO IROQUOIS PARK. TRUCKS AND BUSSES OFTEN TAKE UP A LANE AND ¼. FORCING CARS TO STAY BEHIND OR MOVE OVER.

Additional Comments NO TURN LIGHTS NEED TO BE INSTALLED AT TAYLOR BLVD @ BLUEGRASS AVE SOUTH, DURRING RUSH HOUR.

Be consistent in street markings. Are the white lines on the far right marking the curb or are they bike lanes It is confusing

Are the gore lanes of raised concrete or yellow stripes the same as each other and what is their purpose? Are they safety islands for pedestrians?

Lack of Pedestrian safety at the intersection of New Cut & Kenwood. I've had many near-misses by cars not yielding to pedestrians (me) when I'm crossing w/ the walk signal. Cars turning northbound ~~[illegible]~~ on New Cut from Kenwood are looking southbound for a chance to turn right on red & aren't looking for pedestrians. Cars exiting Iroquois aren't able to easily seen for pedestrians when they're in the side-lane running around the amphitheater. Maybe a green-light-delay to give Pedestrians time? No turn on red? Anything to feel safe to walk my baby across the road.

Additional Comments The one-way lanes around Iroquois are commonly ignored by vehicles going the wrong way. This is especially true for the one-way lane going to the parking lot by the splash pad – cars will go the wrong way to exit at the New Cut/Kenwood intersection rather than continue the 1-way north to exit by the golf course. I have seen (or nearly been hit by) cars going the wrong way on the Iroquois loop's 1-way part, as well.

This a very unfair question because there are many things that I desire to change, and to limit my comments to one thing is extremely hard to do. Nevertheless, if I had to choose it would be to limit the amount, time & weight of semi-truck usage on Taylor Blvd & New Cut Rd.

If there was one thing you could fix about this road, what would it be?

(1) *Enforcement of speed limit* Drivers simply don't seem to care. They speed not only along this corridor, but also on side streets.

(2) Time the traffic lights to give equitable time to traffic in all directions (vs Newcut & Taylor getting the lion's share of green lights. This seems to make traffic on side roads "rush" thru yellow lights to avoid the red light & have to sit idle on the same spot.

More stoplights to eliminate the long stretches that allow traffic to reach excessively high speeds between lights. I consider speed the #1 danger for this road.

Additional Comments Signage should be placed uniformly + large enough to read.

KY tourism signage increased to include all points. The 3 business districts along the corridor from I-264 to CSX rr – could be identified as follows

① Auburndale – Peletka to CSX rr

② Colonial Gardens – Orchard Hill Rd to Inverness.

③ Taylor – I-264 to Brookline

The Speed of cars. As someone who works @ Iroquois HS and also often visits Iroquois Park, I see cars able to go way too fast - Especially in front of the school during School Hours. Since the side walk is almost right on the road, it makes walking difficult / Scary.

I'd be in favor of anything to help slow cars down

If there was one thing you could fix about this road, what would it be?

only because I live on Kenwood Drive am I prioritizing this intersection. The bump out for Colonial Gardens is too big - buses + trucks constantly roll over the bump out. Also the exit from Iroquois Park needs to be properly marked. One long stop line exists. Divide this for people turning left in one lane + for others going straight + turning right. The timing on the light is too (too) (too) long for Kenwood.

Additional Comments (1) Ot Southern Parkway eliminate the Marvell entrance + Southland Drive. This intersection should only have 4 roads not 6. The intersection is crooked. (2) The light @ Park Road is too long for Park Road (3) make turning Lanes from New Cut to the roads East of the Park between Southern Pkwy + Kenwood Dr. (4) Straighten out the intersection @ Southside Dr/Old 3rd Street Road/New Cut. (5) Especially @ Iroquois High ~~Sch~~ school, add a divider so people are not crossing 4 lanes at once. Divider the length of New Cut/Taylor Blvd would be great (6) Plant trees @ along Taylor Blvd @ Ashland - studies supposedly indicate trees help traffic slow down (7) Monitaa/Carrico needs to be across from one another, not offset. (8) Brookline needs to be squared up. (9) Straighten out the east 264 turn ramp like you did the I-264 west turn ramp (10) Make a bike riding/walking path beside Iroq Park on

west side of NewCut - Why does the sidewalk end at Taylor Blvd on west side of road (11) move the entrance/exit from walmart/peddlers mall further North. Right now the entrance exit is too close to NewCut/ Outer loop intersection

If there was one thing you could fix about this road, what would it be?

Not sure of a good fix with lane reductions (see below).

Additional Comments If lane reductions - from four to two - are implemented to provide a turn lane in the middle, the turn lane should not be completely flat and open for long stretches. This very mistake was made on Seventh Street Rd between Algonquin Pkwy and Hill Street. Because the turn lane is broad and open all the way, too many drivers are tempted to use the turn lane as a passing lane. I have even seen drivers who are northbound pass the bottleneck in the only available lane and then gun their engine to bolt in front of the car waiting at the red light at Hill Street. I have also seen cars U-turn on Seventh Street - a dangerous move - because the bottlenecked lane extends too far south for patience. (over)

Bottlenecking traffic has the potential to backfire because people grow too impatient, and engage in risky driving to obviate the delay. Any mid-turn lane needs to feature obstacles which would be able to dissuade impatient drivers from making risky (and illegal) moves while still allowing drivers who wish to legally use the turn lane to safely make their turns.

ID	Full name	Email2	If there was one thing that you could fix about this road, what would it be?	Any additional comments?
1	[redacted]		the road needs to be wider. electrical underground. telephone/electrical poles moved back away from the road or removed if underground. Cat Walk from Iroquois Park to Colonial Gardens for safe crossing.	na
2			Better pedestrian and cycle safety. The corridor connects thousands of people to the city's largest park but is unsafe for walking and cycling.	Taylor is too narrow for bike lanes but has a wide easement that could accomodate a multi use path in place of the existing degraded sidewalk. The intersections at New
3	[redacted]		Visible traffic enforcement by police and ultimately traffics cameras	- Do not widen New Cut. To do this you would either have to take more of home owners' property which was already done when road went from 2 to 4 lanes or portions of the park. It's not necessary or safe for bicyclists. They can take one of the car lanes if need be. - I don't think the intersection of Taylor, New Cut, Southland Boulevard, and Merrit is an issue. Granted it would be helpful if Merrit was rerouted. The discussion of a round about it a horrible idea. Traffic would grind to a stop and people would literally move from the area. A roundabout would create accidents. The one at U of L is terrifying. Also it's a horrible idea to dead end Southland Boulevard as it's an emergency route for EMS, LMPD, and fire. It also would put too much traffic on narrow residential streets and change the fabric of a quiet neighborhood. - Sidewalks on Palatka are not within the scope of this project. There's not room on the park side and it would be horrible to cut into an Olmsted Park and honestly not feasible due to the steep slopes. - There's too many wrecks at the Bluegrass / Taylor intersection and the Ashland /Taylor intersection. I don't know what the solution is. - The 264 W exit ramp backs up on the Watterson with people needing to turn left to go south. The ramp is always dirty and has a lot of trash.
4	[redacted]		Enforcement of running red lights. Install cameras possibly or more police visual enforcement. Speeding on the streets is out of control. Traffic enforcement needs to happen.	Do not close Southland Blvd at Newcut Southern pkwy intersection. Southland Blvd is an emergency snow route and this is important to me. Plus utilizing this light is important during rush hour. Also EMS, POLICE and Fire use Southland Blvd often to route to 3rd street and nearby streets. Closing Southland Blvd would create decrease response times for emergencies and transportation to local hospitals. This is vital to the community. Keep southern pkwy four lanes where it is two lanes is not effective for traffic. Traffic comes to a standstill in and backs up in rush hour with two lanes on southern pkwy.
5	[redacted]		Decrease number of cars while increasing public transit options i.e. Light Rail, Local only access, Shared vehicles/High Occupancy vehicles only	We need some type of strategy to provide better access to Jefferson Memorial Forest from large parking area by Wal Mart. Access for hikers and recreational bikers/walkers. Additionally , it would be nice to have a public transit/bicycle/local access(gated access) along Taylor Blvd from Churchill Downs to Wyandotte Park or even all the way out to Iroqouis Park. Park and Ride lots could be utilized to decrease cars traveling along Taylor Blvd. People could still access the Park and Ride with Public Transit options that the carry individuals along the interstate. I have seen gated access, limiting access for locals and public transit vehicles, used very effectively in several communities and overseas in Europe. Hikers /walkers would have full access to all amenities and businesses along the area that is gated. Park and Rides are also very effective in decreasing traffic incidents.
6			It's a dangerous barrier for non-car use, especially for access to the park and area businesses.	Speeding, difficulty crossing for pedestrian and bike traffic, lack of and poorly maintained sidewalks, cross walks spread too far apart
7			Better option for cars to get on 1-264 E. The lane gets very backed up down Taylor from West Ashland Ave to Bicknell Ave every afternoon. Also, changing the light at W Ashland Ave/Taylor so that there is a dedicated left turn arrow signal in rotation so that cars can more safely turn left onto Taylor instead of having to go between cars coming off of I-264. Not all cars use their signal and many accidents have happened.	
8			Make speeders slow down	Get the homeless and drug addicts out of Iroquois park by the amphitheater under the pavilion on the hill
9	[redacted]		Wider streets and speed bumps on side roads behind these main roads. People cut through and drive wildly trying to cut in and out of traffic	
10			Slow traffic down	
11			Leave it alone as far as cars go. The road diets on other roads in the area have not been an improvement. Cars passing in the center lanes, slower cars slowing down traffic	
12	[redacted]			
13	[redacted]		The intersection of Bluegrass Ave and Taylor Blvd is super dangerous. I live very close to it and I drive out of my way to avoid it. I'm not sure if anything can be done about it. Most of the wrecks seem to involve cars turning left.	The speeding on bluegrass Ave is ridiculous. Cars go 45+ mph and end up crashing at the intersection of Taylor. Cars on bluegrass Ave are side swiped all the time.
14			I think this is one of the safest roads in the metro. No one speeds, courteous drivers, well lit and appropriate traffic signals.	They recently repaved, even though it wasn't torn up. IMO other more needy streets should have had priority.
15			The lanes. The road seems too narrow for four lanes.	The road needs to be changed to slow people's speed down and make it safer for pedestrians.
16			Light at Southside Dr and New Cut	
17	[redacted]		Not much that can be done .... I mean a few more turn signals at side streets would be nice especially at bluegrass and Taylor and all side streets from old 3rd to Bluegrass	Whatever you do don't go with the guy who redesigned Dixie highway that's is a complete mess that firm should have been fired and made pay back tax payer money cause they created a bigger problem on Dixie
18			This road is terrifying to cross on foot or on a bike.	
19	[redacted]		i want bluegrass ave and southern pkwy have a traffic light and pedestrian crosswalk. alot of cars come through and there is a long line they try to turn..	
20			The traffic backups from the corner of New Cut/Taylor Blvd intersection until you get past the Old Third Street intersection. I cannot figure out why I sit along this approx 1 1/2 mile section for 15 to 20 minutes it seems when coming home in the evening Cross walks in front of the park by Colonial Gardens seem dangerous and I do not use them. The cross walks at the intersection of New Cut Road and Old Third Street Road are very dangerous. Cars do not watch for people crossing New Cut Road when turning.	
21	[redacted]		Speed	
22			More trees. Consider turn lanes in the middle	
23	[redacted]		More street light on the church side and remove bushes at the Walgreens/rite aid/ dollar store site. Put in a turn light at each side.	The Thorton's was a good addition but it's dirty and trashy now and the car repair place is the best part of that whole area because it is always super clean but they are always having to clean up accidents because there is one there almost every week.
24			Make it easier to turn left if possible. Also maintain sidewalks and street crossings so people are less likely to just run across the road.	
25			Safer crosswalks for cyclists and pedestrians - especially to access Iroquois Park	
26	[redacted]		Speed limit. People fly down street and run lights. I was doing my normal 2 mile walk crossing at cross walk. I got signal to walk almost hit because someone ran light.	Add speed bumps on park road and hickory hill road. People speed through neighborhood to cut to Palatka
27	[redacted]		Wider lanes on Taylor Blvd from Southern Pkwy north on the entire corridor. When buses & semi trucks travel, they take up more than 1 lane which is quite hazardous!	Need sidewalk or a walk path along Palatka Rd odd New Cut Rd
28	[redacted]		the intersections at Southern Parkway, Kenwood Drive, and Southside Drive.	Put in medians the length of the roadway for pedestrians as a safe place while crossing the road.
29	[redacted]		The drug house at 4020 Taylor Blvd. there are about 25 people living at the resident. There is 2 RVs and 2 homemade shelters in the back yard. Is a drug city all in this one backyard. It's dangerous for the children at the daycare 2 doors down and the people who walk bye.	This drug house at 4020 Taylor blvd is extremely dangerous. I have watched the drug users at this address physically attack people who walk by and throw things at cars. This one yard is filled with people m, trash, needles, and garbage such as a trailer full of scrap metal in the front yard that has been there for a month. It's a danger to the
30			Somehow slow down traffic. It's posted 35 but people generally do 55.	
31			From the Watterson to Newcut should have a road diet where turning lane in the middle and widening of the single driving lanes. Should have been down when it was replaced recently n	
32	[redacted]		Beggars/Panhandlers and tents removed. Iroquois stables addressed - do something or tear down.	What is the "vision" for the South end? Vision>Preparation>Implementation>Promotion>Protection
33			Slightly wider driving lanes; smooth, even pavements, better spaced traffic lights	
34			The light at Bluegrass Ave needs a left turning lane. There are often accidents at this intersection.
