

4 LANE DEPRESSED MEDIAN

5 LANE FLUSH MEDIAN

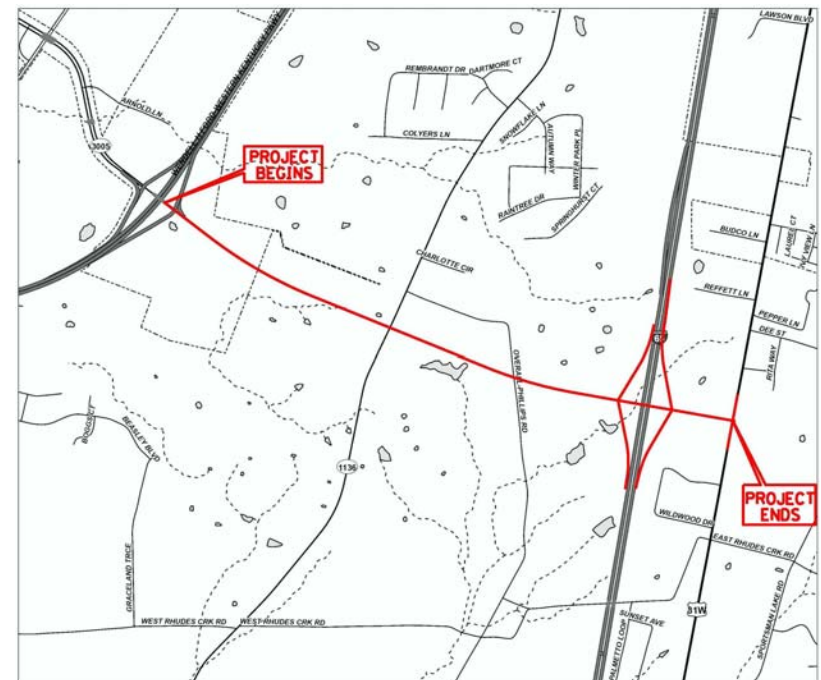

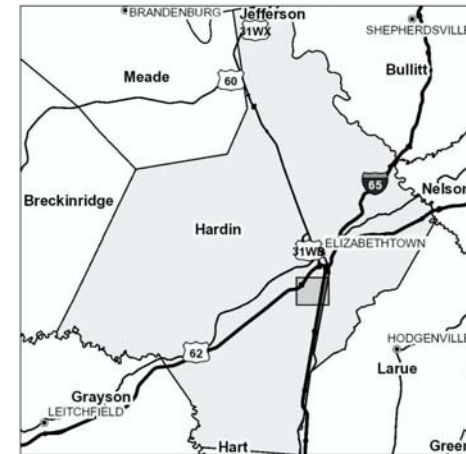

RIGHT OF WAY INFORMATION MEETING

KY 3005 (Ring Road) Extension
from Western Kentucky Parkway to I-65 and US 31W,
including a new interchange with I-65

Item No. 4-198.00

Monday, December 14, 2015

**KY 3005 (RING ROAD) EXTENSION
SIX-YEAR HIGHWAY PLAN PROJECT 4-198.00
RIGHT OF WAY INFORMATION MEETING**

This meeting was scheduled to provide property owners along the KY 3005 (Ring Road) Project with information about the right of way process that will soon be underway. An informal format will be used — meaning no formal presentation will be provided; however information and personnel are available to answer questions you may have about the project and how your property may be affected.

Project Limits — This project is located between the Western Kentucky Parkway and US 31W in Hardin County, within the community of Elizabethtown. The project begins at KY 3005 (Ring Road) at the Western Kentucky Parkway intersection and will end at an intersection at US 31 W.

Right of way plans have been prepared and are included in the information available this evening. Engineering and right of way personnel will be available to answer any of your questions about the design of the roadway and the right of way process. If you need any assistance in locating your property on the displays provided any of our personnel will assist you.

Roadway Section — Construction will include a 4 lane divided typical section with 12 ft. lanes, 10 ft. paved exterior shoulders and 4 ft. paved interior shoulders. At the new I-65 interchange exit, the typical section will change to a 5 lane flush median with 12 ft. lanes, 10 ft. paved shoulders, and a 14 ft. center turn lane. Drawings of the typical sections are included on the back of this handout.

Right of Way Process — There are a number of steps involved in the procurement of the right of way and easements and clearing those areas in advance of construction. Three important steps in that process are:

1. Appraisal — is an opinion of fair market value of each property before the acquisition and of the remaining property after the acquisition. The difference between these two values is the amount of compensation to be offered for the property being acquired.
2. Acquisition — is the process of acquiring real property (real estate) or some interest therein. An offer is made for the purchase of property in person, or by mail, and the offer is discussed with the owner.
3. Relocation Assistance — ensures that persons displaced as a result of highway projects are treated fairly, consistently, and equitably.

Right of Way funds have been authorized for this project and work is expected to take around 12 months. There are 47 parcels are involved on this project.

Right of way personnel are available this evening to provide information on these steps and answer questions you may have on the acquisition that involves your property. The Kentucky Transportation Caninet's Right of Way staff will be responsible for procuring the right of way and easements for this project.

Should you have additional questions or concerns about the right of way process and our proposed schedule, you may contact the Elizabethtown District Highway Office @ (800) 459-3566 and communicate with:

**Patty Dunaway
Brad Bottoms
Mike Price**

**Chief District Engineer, District 4
Project Development Manager
Right of Way Agent Supervisor**
