

FREQUENTLY ASKED QUESTIONS

When will this work take place?

The proposed rockfall/slope improvement projects along the KY 1274 highway corridor are funded through the Federal Highway Administration's Federal Lands Access Program (FLAP). The program is intended to improve transportation facilities that provide access to, are adjacent to, or located within federal lands. Completion of the design phase will take approximately four months from this meeting. The other phases, including Right-of-way acquisition & Utility Relocation, will start after the design phase and construction is anticipated for Fall/Winter of 2019.

Will existing traffic be affected during construction?

Temporary road closures and detour may be utilized to minimize the duration of construction. Access to all properties will be maintained throughout the construction of these projects.

What are the next steps?

After the Public Meeting, the Project Team will review and consider all comments received. All comments will be evaluated as to their impacts upon the alternates presented. Once all comments have been received and reviewed, a decision will be made by the project team as to how these projects move forward into the final design phase.

Who do I contact with concerns and questions?

Please return the comment forms from tonight's meeting by August 31, 2018 for consideration by the project team in selecting alternates. If you have any additional questions or comments please use the contact information provided on this handout.

Where can I find this information after this meeting is over?

- Displays @ KYTC District 10 Office in Jackson and County Judge Executive's Office
- Webpage:
<http://transportation.ky.gov/DistrictTen> and look for the "KY 1274 Rockfall Projects" link.

Public Information Meeting
August 16th, 2018

WELCOME

The Kentucky Transportation Cabinet (KYTC) welcomes you to the Public Information Meeting for the proposed Rockfall/Slope Improvement Projects on KY 1274 in Menifee County. The reason for this meeting is to present the Purpose and Need for the projects and present the alternates that have been developed to address the needs and goals of the projects. In order to assist in the development of these projects, we request the public provide comments on the project alternates and the potential improvements to your community.

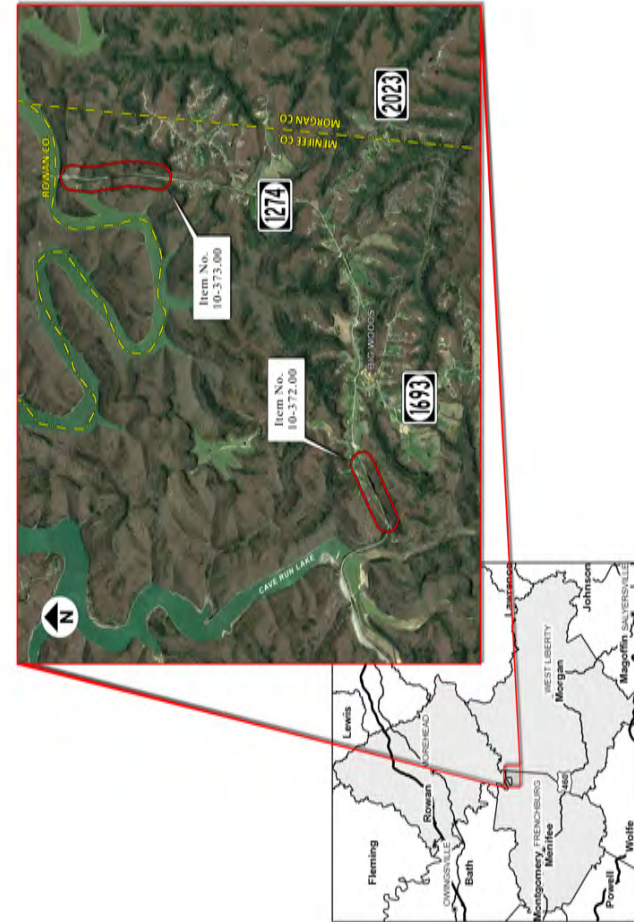

KYTC appreciates your involvement in these projects and we encourage you to visit the informational displays and speak with the project team members regarding any questions you may have concerning the projects. Please complete the questionnaire and place it in the box near the sign-in table or take the form home with you and submit by mail. Pre-addressed envelopes have been provided for your convenience. Comments will be accepted for 15 days following the public meeting. Your comments and local knowledge are always valuable to our efforts. All comments received will be considered by the Project Team. The information shown at the meeting will be available on our website: <http://transportation.ky.gov/DistrictTen/>

PURPOSE & NEED

When KY 1274 was constructed it had little to no slope stability benches created to stabilize the rock cuts. These projects will consist of correcting rock fall issues associated with vertical rock cuts along KY 1274 in Menifee County. The existing slopes will be excavated to construct benches and push the rock face further from the edge of pavement. These improvements will address the dangerous rockslides that have been happening through this corridor and expose more roadway surface to the sun during the winter.
