

April 2026 Kentucky Short Line Infrastructure Preservation (KSLIP) Program

Recipient	Project Name	Description	KSLIP Award
Louisville & Indiana Railroad (LIRC)	Wayside Detector Enhancement Project	Installation of a new hot wheel and hot bearing detector in Louisville that can reliably inspect passing trains at a range of speeds.	\$ 82,179.50
Paducah & Louisville Railway (PAL)	Hot-Box Detector Modernization Project	Upgrading the eight current hot-box detectors across the railway network, along with technology improvements that will support proactive monitoring, data collection, and analysis to predict and prevent failures. Additional enhanced capabilities will allow for wheel condition monitoring at two sites.	\$ 903,641.06
RJ Corman Railroad Group (RJC)	Water Street & Versailles Curves Project	Track rehabilitation in Woodford County and Jefferson County that includes the replacement of 6,500 ties, 90 switch ties, and seven switch installations.	\$ 751,130.00
Total Investment:			\$ 1,736,950.56
