

Eye on Safety | Work Zone Awareness Week Safety Training Day

On Monday, April 11, during National Work Zone Awareness Week, District Safety Coordinators hosted the first KYTC Work Zone Safety Training Day.

Crews across the Commonwealth took time during the workday for safety demonstrations and discussions to help prevent work zone injuries.

In Breathitt County, foreman Brandon Henson conducted a safety talk on proper flagging procedures.

Even though Work Zone Awareness Week is over, our charge still remains: safe drivers + safe workers= safe work zones. It's gearing up to be an active construction season, and with your help, we can help reduce the number of work zone incidents to save lives.
