Differences Between State KPDES KYR10 General permit and this Local Program

Briefly, our EPSC Ordinance requires an EPSC Plan and a local Grading and Clearing Permit for site disturbances one acre or greater, and only a local Grading and Clearing Permit for site disturbances of 2000 sq. ft. or more. Rather than list BMP which may change over time, we reference the latest version of the Kentucky Best Management Practice for Construction Erosion, Sediment, and Pollutant Runoff from Construction Sites: Planning and Technical Specifications Manual.
