

Q: What is the High Five Rural Traffic Safety Project?

A: A data-driven, multi-agency effort to increase seat belt use and reduce serious injury and fatal crashes on rural roads in Kentucky through the use of education, engineering and enforcement.

Q: Where in Kentucky will the program be focused?

A: In rural counties that KYTC crash data show have high fatal and severe injury rates.

Q: Don't most crashes occur on major roadways?

A: In 2024, 45% of fatalities in Kentucky occurred on rural roads and 80% of Kentucky roads are rural.

Q: What are the main causes of rural traffic crashes?

A: Most rural road crashes involve only one vehicle. Contributing factors include loss of control, lane departure, excessive speed, failure to yield, and impaired driving.

Q: What will be done to reduce crashes & save lives?

A: Through enforcement, media and community outreach efforts, participating local agencies in selected counties will educate drivers on the benefits of complying with traffic laws, especially Kentucky's primary seat belt law.

Q: Why is increasing seat belt usage so important?

A: Proper and regular seat belt use is the single most effective way to reduce deaths and injuries. Eighty-two percent of vehicle occupants ejected during a crash are killed.

Q: Can more be done to make rural roads safer?

A: Yes. The High Five project includes local and state engineers and traffic safety professionals working together to identify road hazards and make upgrades wherever possible.

Kentucky Transportation Cabinet
National Highway Traffic Safety Administration

The High Five Program is sponsored by:

Team Kentucky, Kentucky Transportation Cabinet,
Kentucky Office of Highway Safety, Pikeville Police,
and the County Sheriff.

The High 5 Rural Traffic Safety Project recognizes:

- The chances of surviving a traffic crash are 45% higher when properly restrained in a seat belt.
- In the US, based on known restraint use in fatal crashes, 51% of rural passenger vehicle occupants killed in 2021 were unrestrained.
- Airbags are designed to work with seat belts. To protect yourself in a crash, always buckle up.
- While Kentucky's statewide seat belt usage is 88.5%, over 100,000 drivers plus 20,000 passengers are still unbelted on Kentucky roadways everyday.

Kentucky has higher fatality rate than the national average.

Rural Kentucky roadways have fatal crashes at a higher than average rate.
