Closing General Session

LIFESAVERS ANNUAL CONFERENCE

April 17 - 20, 2023

The purpose of the conference is to prevent deaths and injuries on Kentucky's roadways by bringing together a combination of education, emergency services, enforcement, engineering, and transportation safety warriors to share best practices, research, and innovations that are proven to work. The conference will provide information on both successful programs and emerging issues to individuals and also provide opportunities for networking, discussion, and information sharing.
