

PREVENT™

A HIGH PERFORMANCE SILICONE ANTIFOAM/DEFOAMER

INGREDIENTS DIMETHYLPOLYSILOXANE AND FORMULATING AIDS	TOTAL 100.00%
--	---------------

All ingredients are exempt from tolerance requirements established in 40 CFR 180.1001 (c). Read all precautions before using this product.

CAUTION

May cause eye and skin irritation.

Do not take internally.

KEEP OUT OF REACH OF CHILDREN

See other caution statements.

GENERAL INFORMATION

PREVENT™ is a high performance, concentrated silicone antifoam/defoamer. It is designed to provide efficient, economical foam control. When used according to directions **PREVENT™** can be used to “prevent” foam formation, or eliminate existing foam.

DIRECTIONS FOR USE

The most efficient way to use **PREVENT™** is to add it to the spray tank before foam forms. For this purpose follow these guidelines:

- 1) Determine how much **PREVENT™** to add to the tank. Consider these factors:
 - a) Volume of the pesticide /100 gl. of solution. (The higher the concentration of pesticide in the spray solution, the higher the concentration of **PREVENT™** you will need).
 - b) Pesticides contain varying types and concentrations of foam forming compounds. Experience will be the best at determining which pesticides will cause the most problems in any particular year. So, what causes a problem in one year may not be a problem the next.
 - c) Water quality also plays a small factor. That is, the harder the water the less problems you will have.
 - d) Usually ½ oz./100gl will provide effective control. (May need 1-2 oz.)

AFTER FOAM FORMATION:

1. **PREVENT™** is also a powerful “defoamer” Once foam already exists, “misting” the material over foam will collapse the foam. A spray bottle filled with 75% **PREVENT™**, 25% H2O will serve this purpose well. If you do not have one available and are short on time a small stream applied over the foam will be effective.
2. After eliminating the foam, a small amount of **PREVENT™** added to the tank will “prevent” foam from forming.

FIRST AID

Skin & Eyes - Flush with plenty of water. Consult a physician if irritation develops or persists.

Ingestion - Give plenty of water if conscious and induce vomiting. Consult a physician.

Wear appropriate protection to avoid eye and skin contact.

CONTAINER DISPOSAL

Store in the original container, always keep cap on tight. Do not allow water into the container, and then not use the product for an extended period of time. Always triple rinse the container and dispose of following appropriate government regulations.

ALWAYS SHAKE WELL BEFORE EACH USE
