In 2020, ERIDA received funds to construct a sheet pile shoring wall to aid in the correction of the eroding banks. The proposed project will extend the sheet pile shoring wall approximately 500' to the northeast. These improvements to the facilities will continue the reinforcement of the bank and restoration of the bank material to support operations and improve safety and increase the efficiency for the workers performing tasks at the Riverport. It will also allow for clients/lessors to have flush and close access to loading and unloading of equipment and barges.

### **Sheet Pile Shoring Wall Extension Project**

## **Statement of Work**

The Sheet Pile Shoring Wall Extension Project at the Eddyville Riverport & Industrial Development Authority (ERIDA) will enable the port to continue stabilization and restoration of the banks along the north side of the port. These improvements to the facility are critical to support current and future operations while providing a safe and efficient environment for the port employees and lessors.

## **Sheet Pile Shoring Wall Extension Project**

### **Scope of Work**

The project will encompass the driving of sheet piling along the bank (approximately 500') as shown on the attached Schematic Design. Once the sheet piling is installed, embankment material will be placed behind the piling for backfill and to re-establish the bank that was present in 2014. Finally, the area will be capped with rock to help confined the embankment from erosion due to rainfall.

**Subject:** [Non-DoD Source] ERIDA Upcoming Projects

Kayl,

I hope you are doing well! I wanted to let you know that ERIDA is intending to pursue grant funding through the state of Kentucky for the following projects:

1. Installation of mooring cells to support barge traffic in coordination with the USDOT MARAD Inlet Project.
2. Continuation of sheet pile wall shoring towards the entrance of the port for erosion support.

Please let me know if USACE has any thoughts or considerations. At this time ERIDA is pursuing funding, and projects will be fully designed and coordinated with USACE upon award. As a part of the application, they ask that communication with USACE has occurred.

Thank you,
