FACILITIES AFFECTED BY THE PROPOSED PROJECT

☒ Owned by Riverport Authority ☐ Leased to:

Briefly describe how the project will improve public riverport facilities and infrastructure, to capture the economic and trade potential offered by water transportation.: (Text limited for accurate printing. Attach additional pages as needed.)

The ORA resurfacing and exit road extension project is a necessary project to maintain existing asphalt and provide a more efficient exiting of trucks from the Warehouse 4 and guard check in. The portion of the project specific to Warehouse 4 truck trailer staging area is in needed repair originally paved in 2003. (see attached pictures) The warehouse 4 staging area handles up to 80 trucks in/out daily 6-7 days per week and is critical to our local manufacturing companies who we service. The extension portion of the project is currently dense grade aggregate that requires routine maintenance to ensure pot holes are filled and leveled for efficient movement of all ORA trucks entering/exiting ORA. The final portion of this project is to replace existing plastic truck barriers with sleeved bollards. The existing water filled barriers are not a permanent truck/car barrier and can be broken and shift over time. The sleeved pipe bollards will allow for a permanent barrier and can be removed as needed for times of oversized loads entering the port.

Select ONE: ☐ Applicant plans to use their own manpower, equipment, or materials on the project (Force Account).
☐ Applicant plans to competitively bid out all work related to the project.

RE: Resurfacing and Exit Road Extension

Dear Sir or Madam:

As our business continues to grow, we are experiencing an increased demand for operational efficiency. To meet this demand Owensboro Riverport is seeking financial support for resurfacing and exit road extension.

The ORA resurfacing and exit road extension project is a necessary project to maintain existing asphalt and provide a more efficient existing of trucks from the Warehouse 4 and guard check in. The portion of the project specific to Warehouse 4 truck staging area is in needed repair originally paved in 2003. The warehouse 4 staging area handles up to 80 trucks in/out daily 6-7 days per week and is critical to our local manufacturing companies who we service. The extension portion of the project is currently dense grade aggregate that requires routine maintenance to ensure pot holes are filled and leveled for efficient movement of all ORA trucks entering ORA.

Your consideration of this project is critical to improving the port to meet current and future transportation needs.

Sincerely,

Brian Wright
