Washington, D.C. 20590

Dear Mr. Secretary:

I am writing to you in support of the Kentucky Transportation Cabinet's Bridge Investment Program (BIP) grant application for the Interstate 65 Bridge Bundling Project. This "bridge bundling" project will significantly improve I-65, a critical north/south interstate corridor between Canada and the Gulf of Mexico.

Originally conceived as part of the Eisenhower Interstate System, I-65 is also a key corridor within Louisville, Kentucky, that provides access to major points of interest including the central business district, the University of Louisville, and its UofL Hospital, the Kentucky Fair and Exposition Center, and Louisville Muhammad Ali International Airport. Several of the city's largest employers, like UPS WorldPort, Ford Motor Company, and Humana, rely on the corridor for daily access to their major operations.

The I-65 Bridge Bundling Project will replace or rehabilitate multiple bridges to improve the safety and reliability of this vital corridor. The proposed bridge bundling, along with the use of innovative design and construction techniques like accelerated bridge construction, will be more cost effective, minimize impact on local businesses and travelers, and reduce the construction period. This project will maintain and bolster the freight-carrying capacity of the affected bridges along this section of I-65 while ensuring continued safe access to local destinations.

I hope you will consider funding this project that will constitute a significant investment in our national highway system. Preserving these critically important bridges through the I-65 Bridge Bundling Project will ensure the economic success and allow for continued growth in the region.

Sincerely,

A handwritten signature in black ink, appearing to read "Adrienne Southworth", with a long horizontal flourish extending to the right.

Dear Mr. Secretary:

Please accept this letter in support of the Kentucky Transportation Cabinet's Bridge Investment Program (BIP) grant application for the I-65 Bridge Bundling Project. This "bridge bundling" project will significantly improve Interstate 65 through Louisville, Kentucky's central corridor.

I-65 is an important national corridor, connecting Canada to the Gulf of Mexico, but it is also a key corridor within the city of Louisville that provides access to major points of interest, including Louisville's central business district, the downtown medical center, the University of Louisville, the Kentucky Fair & Exposition Center, and Louisville Muhammad Ali International Airport. Several of the city's largest employers, like UPS WorldPort, Ford Motor Company and Humana, rely on the corridor for daily access to their major operations.

The I-65 Bridge Bundling Project uses innovative design and construction techniques to minimize impact on local businesses, reduce construction times, and replace or rehabilitate multiple interstate bridges simultaneously to improve the safety and reliability of this vital corridor. This proposal maintains and bolsters the freight-carrying capacity of the affected bridges along this section of I-65, while ensuring continued safe access to local destinations.

Thank you for your thoughtful consideration of this project that will constitute a significant investment in our national highway system and ensure the economic success and continued growth in the region.

Sincerely,

A handwritten signature in black ink that reads "Nima Kulkarni".

Washington, D.C. 20590

Dear Mr. Secretary:

I am writing in support of the Kentucky Transportation Cabinet's Bridge Investment Program (BIP) grant application for the I-65 Bridge Bundling Project. This "bridge bundling" project will significantly improve Interstate 65 through Louisville, Kentucky's central corridor.

I-65 is an important national corridor, connecting Canada to the Gulf of Mexico, but it is also a key corridor within the city of Louisville that provides access to major points of interest, including Louisville's central business district, the downtown medical center, the University of Louisville, the Kentucky Fair & Exposition Center, and Louisville Muhammad Ali International Airport. Several of the city's largest employers, like UPS WorldPort, Ford Motor Company and Humana, rely on the corridor for daily access to their major operations.

The I-65 Bridge Bundling Project uses innovative design and construction techniques to minimize impact on local businesses, reduce construction times, and replace or rehabilitate multiple interstate bridges simultaneously to improve the safety and reliability of this vital corridor. This proposal maintains and bolsters the freight-carrying capacity of the affected bridges along this section of I-65, while ensuring continued safe access to local destinations.

I hope you will consider funding this project that will constitute a significant investment in our national highway system and ensure the economic success and continued growth in the region.

Sincerest Regards,

A handwritten signature in black ink that reads "Keturah J. Herron".

Washington, D.C. 20590

RE: Kentucky Transportation Cabinet's Bridge Investment Program application

Dear Secretary Buttigieg,

I am writing to you in support of the Kentucky Transportation Cabinet's Bridge Investment Program (BIP) grant application for the I-65 Bridge Bundling Project. This project will significantly improve Interstate 65 through Louisville, Kentucky's central corridor. As you are aware, I-65 is one of the nation's most critical north/south interstate roadways between Canada and the Gulf of Mexico.

Interstate 65 is a key corridor both nationally and within Metro Louisville, where it provides access to our Central Business District and other major points of interest, such as the University of Louisville, Louisville Muhammad Ali International Airport, the Kentucky Fair & Exposition Center, and the Downtown Medical Center. UPS WorldPort, Ford Motor Company, Humana, and other major employers rely on the corridor for daily access to their major operations. The I-65 corridor is tied to national and local commerce, as more than 15,000 trucks travel across these bridges each day.

I support this project because the replacement and rehabilitation of multiple bridges along I-65 will improve traffic flow and safety for the residents, merchants, truck drivers, and others who travel through this corridor. The proposed bridge bundling and accelerated bridge construction will be more cost effective, minimize impacts on local businesses and travelers by reducing the construction period, and result in over \$200 million in safety benefits over the next 30 years. The project is also aligned with my administration's goals to create a greener, more equitable Louisville, as it will reduce impacts like emissions to local surface streets and neighborhoods, including disadvantaged communities within the corridor.

I ask you to consider funding the I-65 Bridge Bundling Project, which will constitute a significant investment in our national highway system and create a reliable I-65 corridor for Metro Louisville.

Sincerely,

Craig Greenberg
Mayor

1200 New Jersey Ave., SE
Washington, D.C. 20590

Dear Secretary Buttigieg,

I am writing to you in support of the Kentucky Transportation Cabinet's Bridge Investment Program (BIP) grant application for the I-65 Bridge Bundling Project. This "bridge bundling" project will significantly improve one of the nation's most critical north/south interstate roadways between Canada and the Gulf of Mexico: Interstate 65 through Louisville, Kentucky's central corridor.

Originally conceived as part of the Eisenhower Interstate System, I-65 is an important national corridor, but it is also a key corridor within the City of Louisville that provides access to major points of interest, including Louisville's Central Business District, the Downtown Medical Center, the University of Louisville, the Kentucky Fair & Exposition Center and Louisville Muhammad Ali International Airport. Several of the city's largest employers, like UPS WorldPort, Ford Motor Company and Humana, rely on the corridor for daily access to their major operations.

This project section of I-65 runs through under-resourced neighborhoods who already experience disproportionate litter, traffic, and noise, light, and air pollution from intensive uses in the corridor. The strategic nature of this bridge bundling project will support equitable health and safety, and a better quality of life while I-65 undergoes improvements. Our neighbors deserve thoughtful, resourced, and efficient project implementation to minimize the construction additional disturbances.

The I-65 Bridge Bundling Project will replace or rehabilitate multiple interstate bridges to improve the safety and reliability of this vital corridor. The proposed bridge bundling along with the use of innovative design and construction techniques, like accelerated bridge construction, will be more cost effective and will minimize impacts on local businesses and travelers by reducing the construction period. This project will maintain and bolster the freight-carrying capacity of the affected bridges along this section of I-65, an essential interstate system that connects Canada to the Gulf of Mexico, while ensuring continued safe access to local destinations.

I hope you will consider funding this project that will constitute a significant investment in our national highway system. Preserving these critically important bridges through the I-65 Bridge Bundling Project will ensure the economic success of the area and allow for continued growth in the region.

Sincerely,

Nicole George, Deputy Mayor of Public Health & Assets

Dear Secretary Buttigieg,

I am writing to you in support of the Kentucky Transportation Cabinet's Bridge Investment Program (BIP) grant application for the I-65 Bridge Bundling Project. This "bridge bundling" project will significantly improve one of the nation's most critical north/south interstate roadways between Canada and the Gulf of Mexico: Interstate 65 through Louisville, Kentucky's central corridor.

As an elected official and regular commuter along the corridor, I can attest to the poor condition of the roadway, especially where the road meets a bridge. Those junctions need to be repaired every spring, and the underside of the bridges also shows significant decay in the concrete pillars. There has been much discussion in recent years about our decaying infrastructure. This interstate corridor is a textbook example. Nothing serious has happened yet, but the frequent maintenance indicates a need for rebuilding or replacement.

The I-65 Bridge Bundling Project will replace or rehabilitate multiple interstate bridges to improve the safety and reliability of this vital corridor. The proposed bridge bundling along with the use of innovative design and construction techniques, like accelerated bridge construction, will be more cost effective and will minimize impacts on local businesses and travelers by reducing the construction period. This project will maintain and bolster the freight-carrying capacity of the affected bridges along this section of I-65, an essential interstate system that connects Canada to the Gulf of Mexico, while ensuring continued safe access to local destinations.

Dear Secretary Buttigieg,

I am writing to you in support of the Kentucky Transportation Cabinet's Bridge Investment Program (BIP) grant application for the I-65 Bridge Bundling Project. This "bridge bundling" project will significantly improve one of the nation's most critical north/south interstate roadways between Canada and the Gulf of Mexico: Interstate 65 through Louisville, Kentucky's central corridor.

Originally conceived as part of the Eisenhower Interstate System, I-65 is an important national corridor, but it is also a key corridor within the City of Louisville that provides access to major points of interest, including Louisville's Central Business District, the Downtown Medical Center, the University of Louisville, Churchill Downs, the Kentucky Fair & Exposition Center and Louisville Muhammad Ali International Airport. Several of the city's largest employers, like UPS WorldPort, Ford Motor Company and Humana, rely on the corridor for daily access to their major operations.

This portion of I-65 was recognized by KIPDA as being critical to our region. In many ways, this stretch of I-65 is the "front door" to our region for visitors arriving at the Louisville Muhammad Ali International Airport and can be considered the "front door" to Kentucky for travelers coming south on I-65. KIPDA worked with the Kentucky Transportation Cabinet to initiate a large planning study that was completed in Late 2021 that looked at a wide range of improvements to I-65 that could be high impact yet not add additional lanes due to much of the corridor being built on bridges. Several projects from that recent study that improve the safety of the corridor by adding length to acceleration lanes and through interchange ramp reconfigurations were recently amended into KIPDA's Metropolitan Transportation Plan and Transportation Improvement Program just last month.

The I-65 Bridge Bundling Project will replace or rehabilitate multiple interstate bridges to improve the safety and reliability of this vital corridor. The proposed bridge bundling along with the use of innovative

The Honorable Pete Buttigieg, Secretary
U.S. Department of Transportation
1200 New Jersey Ave., SE
Washington, D.C. 20590

Dear Secretary Buttigieg,

I am writing to you in support of the Kentucky Transportation Cabinet's Bridge Investment Program (BIP) grant application for the I-65 Bridge Bundling Project. This "bridge bundling" project will significantly improve one of the nation's most critical north/south interstate roadways between Canada and the Gulf of Mexico: Interstate 65 through Louisville, Kentucky's central corridor.

Originally conceived as part of the Eisenhower Interstate System, I-65 is an important national corridor, but it is also a key corridor within the City of Louisville that provides access to major points of interest, including Louisville's Central Business District, the Downtown Medical Center, the University of Louisville, the Kentucky Fair & Exposition Center and Louisville Muhammad Ali International Airport. Several of the city's largest employers, like UPS WorldPort, Ford Motor Company and Humana, rely on the corridor for daily access to their major operations.

Our members are the backbone of the transportation industry, ensuring that goods are delivered safely and efficiently to the places that need them most. Therefore, the enhancement and expansion of transportation infrastructure, as proposed in this project, are of paramount importance to our industry. The expected benefits of the I-65 Bridge Bundling Project, such as reduced congestion, improved safety, enhanced economic opportunities, and a strengthened transportation network, are vital not only for the trucking industry but for the overall well-being of our community. We firmly believe that investing in this project will lead to greater efficiency, lower transportation costs, and a safer environment for all road users.

The I-65 Bridge Bundling Project will replace or rehabilitate multiple interstate bridges to improve the safety and reliability of this vital corridor. The proposed bridge bundling along with the use of innovative design and construction techniques, like accelerated bridge construction, will be more cost effective and will minimize impacts on local businesses and travelers by reducing the construction period. This project will maintain and bolster the freight-carrying capacity of the affected bridges along this section of I-65, an essential interstate system that connects Canada to the Gulf of Mexico, while ensuring continued safe access to local destinations.

I hope you will consider funding this project that will constitute a significant investment in our national highway system. Preserving these critically important bridges through the I-65 Bridge Bundling Project will ensure the economic success of the area and allow for continued growth in the region.

Sincerely,

1200 New Jersey Ave., SE
Washington, D.C. 20590

Dear Secretary Buttigieg,

I am writing to you in support of the Kentucky Transportation Cabinet's Bridge Investment Program (BIP) grant application for the I-65 Bridge Bundling Project. This "bridge bundling" project will significantly improve one of the nation's most critical north/south interstate roadways between Canada and the Gulf of Mexico: Interstate 65 through Louisville, Kentucky's central corridor.

Originally conceived as part of the Eisenhower Interstate System, I-65 is an important national corridor, but it is also a key corridor within the City of Louisville that provides access to major points of interest, including Louisville's Central Business District, the Downtown Medical Center, the University of Louisville, the Kentucky Fair & Exposition Center and Louisville Muhammad Ali International Airport. Several of the city's largest employers, like UPS WorldPort, Ford Motor Company and Humana, rely on the corridor for daily access to their major operations.

The I-65 Bridge Bundling Project will replace or rehabilitate multiple interstate bridges to improve the safety and reliability of this vital corridor. The proposed bridge bundling along with the use of innovative design and construction techniques, like accelerated bridge construction, will be more cost effective and will minimize impacts on local businesses and travelers by reducing the construction period. This project will maintain and bolster the freight-carrying capacity of the affected bridges along this section of I-65, an essential interstate system that connects Canada to the Gulf of Mexico, while ensuring continued safe access to local destinations.

I hope you will consider funding this project that will constitute a significant investment in our national highway system. Preserving these critically important bridges through the I-65 Bridge Bundling Project will ensure the economic success of the area and allow for continued growth in the region.

Sincerely,

Carrie Butler

Washington, D.C. 20590

Dear Secretary Buttigieg,

I am writing to you to express my support of the Kentucky Transportation Cabinet's Bridge Investment Program (BIP) grant application for the I-65 Bridge Bundling Project. This "bridge bundling" project will significantly improve one of the nation's most critical north/south interstate roadways between Canada and the Gulf of Mexico: Interstate 65 through Louisville, Kentucky's central corridor.

Originally conceived as part of the Eisenhower Interstate System, I-65 is an important national corridor, but it is also a key corridor within the city of Louisville that provides access to major points of interest, including Louisville's Central Business District, the Downtown Medical Center, the University of Louisville, the Kentucky Fair & Exposition Center and Louisville Muhammad Ali International Airport. Several of the city's largest employers, like UPS WorldPort, Ford Motor Company and Humana, rely on the corridor for daily access to their major operations.

Louisville's robust tourism sector relies on this infrastructure as well, with guests utilizing I-65 to experience the city's iconic attractions, world-class restaurants, authentic Bourbon distilleries and myriad of hotel accommodations. We know visitors from around the world seek out Louisville's historic Churchill Downs, the famous Louisville Slugger Museum and Factory and the Muhammad Ali Center – all of which depend on this major thoroughfare.

The I-65 Bridge Bundling Project will replace or rehabilitate multiple interstate bridges to improve the safety and reliability of this vital corridor. The proposed bridge bundling along with the use of innovative design and construction techniques, like accelerated bridge construction, will be more cost-effective and will minimize impacts on local businesses and travelers by reducing the construction period. This project will maintain and bolster the freight-carrying capacity of the affected bridges along this section of I-65, an essential interstate system that connects Canada to the Gulf of Mexico, while ensuring continued safe access to local destinations.

I hope you will consider funding this project which will constitute a significant investment in our national highway system. Preserving these critically important bridges through the I-65 Bridge Bundling Project will ensure the economic success of the area and allow for continued growth in the region.

Dear Secretary Buttigieg,

On behalf of Kentucky's largest business organization, I am writing to you in support of the Kentucky Transportation Cabinet's Bridge Investment Program (BIP) grant application for the I-65 Bridge Bundling Project. This "bridge bundling" project will significantly improve one of the nation's most critical north/south interstate roadways between Canada and the Gulf of Mexico: Interstate 65 through Louisville, Kentucky's central corridor.

Originally conceived as part of the Eisenhower Interstate System, I-65 is an important national corridor, but it is also a key corridor within the City of Louisville that provides access to major points of interest, including Louisville's Central Business District, the Downtown Medical Center, the University of Louisville, the Kentucky Fair & Exposition Center, and Louisville Muhammad Ali International Airport. Several of the city's largest employers, like UPS WorldPort, Ford Motor Company, and Humana, rely on the corridor for daily access to their major operations.

In order to continue growing our state, providing better-paying jobs for our citizens, and making Kentucky more attractive for new investments, we must ensure our infrastructure is top-notch, especially in our biggest city. The Kentucky Chamber of Commerce is committed to advancing Kentucky by uniting our business community and advocating for them in Frankfort and in Washington. There have been some exciting investments announced in our Commonwealth over the past few years. In order to continue promoting Kentucky as a hub for both logistics providers and manufacturers, we must continue investing in our transportation infrastructure, in this case via the I-65 Bridge Bundling Project.

The I-65 Bridge Bundling Project will replace or rehabilitate multiple interstate bridges to improve the safety and reliability of this vital corridor. The proposed bridge bundling along with the use of innovative design and construction techniques, like accelerated bridge construction, will be more cost effective and will minimize impacts on local businesses and travelers by reducing the construction period. This project will maintain and bolster the freight-carrying capacity of the affected bridges along this section of I-65, an essential interstate system that connects Canada to the Gulf of Mexico, while ensuring continued safe access to local destinations.

I hope you will consider funding this project that will constitute a significant investment in our national highway system. Preserving these critically important bridges through the I-65 Bridge Bundling Project will ensure the economic success of the area and allow for continued growth in the region.

Sincerely,

Ashli Watts

Washington, D.C. 20590

Dear Secretary Buttigieg,

I am writing to you in support of the Kentucky Transportation Cabinet's Bridge Investment Program (BIP) grant application for the I-65 Bridge Bundling Project. This "bridge bundling" project will significantly improve one of the nation's most critical north/south interstate roadways between Canada and the Gulf of Mexico: Interstate 65 through Louisville, Kentucky's central corridor.

Originally conceived as part of the Eisenhower Interstate System, I-65 is an important national corridor, but it is also a key corridor within the city of Louisville that provides access to major points of interest, including Louisville's Central Business District, LOUMED (the Downtown Medical Center), the University of Louisville, the Kentucky Fair & Exposition Center and Louisville Muhammad Ali International Airport. Several of the city's largest employers, like UPS WorldPort, Ford Motor Company and Humana, rely on the corridor for daily access to their major operations.

Louisville Downtown Partnership supports this project because of the increased safety, attractiveness, and traffic flow that this coordinated improved infrastructure would bring to Downtown.

The I-65 Bridge Bundling Project will replace or rehabilitate multiple interstate bridges to improve the safety and reliability of this vital corridor. The proposed bridge bundling along with the use of innovative design and construction techniques will be more cost effective and will minimize impacts on local businesses and travelers by reducing the construction period.

Please consider funding this project that will constitute a significant investment in our national highway system. Preserving these critical bridges through the I-65 Bridge Bundling Project will ensure the economic success of the area and allow for continued growth in the region.

Sincerely,

Rebecca Fleischaker
Executive Director

This "bridge bundling" project will significantly improve one of the nation's most critical north/south interstate roadways between Canada and the Gulf of Mexico: Interstate 65 through Louisville, Kentucky's central corridor.

Originally conceived as part of the Eisenhower Interstate System, I-65 is an important national corridor, but it is also a key corridor within the City of Louisville that provides access to major points of interest, including Louisville's Central Business District, the Downtown Medical Center, the University of Louisville, the Kentucky Fair & Exposition Center and Louisville Muhammad Ali International Airport. Several of the city's largest employers, like UPS WorldPort, Ford Motor Company and Humana, rely on the corridor for daily access to their major operations.

The project will likewise improve transportation access for students and families attending Jefferson County Public Schools (JCPS) along the corridor and elsewhere in the county. Any JCPS commitment to participate in the project is contingent upon approval by the JCPS Institutional Review Board and the Jefferson County Board of Education.

The I-65 Bridge Bundling Project will replace or rehabilitate multiple interstate bridges to improve the safety and reliability of this vital corridor. The proposed bridge bundling along with the use of innovative design and construction techniques, like accelerated bridge construction, will be more cost effective and will minimize impacts on local businesses and travelers by reducing the construction period. This project will maintain and bolster the freight-carrying capacity of affected bridges along this section of I-65, an essential interstate system connecting Canada to the Gulf of Mexico, while ensuring continued safe access to local destinations.

I hope you will consider funding this project that will constitute a significant investment in our national highway system. Preserving these critically important bridges through the I-65 Bridge Bundling Project will ensure the economic success of the area and allow for continued growth in the region.

Dear Secretary Buttigieg,

I am writing to you in support of the Kentucky Transportation Cabinet's Bridge Investment Program (BIP) grant application for the I-65 Bridge Bundling Project. This "bridge bundling" project will significantly improve one of the nation's most critical north/south interstate roadways between Canada and the Gulf of Mexico: Interstate 65 through Louisville, Kentucky's central corridor.

Originally conceived as part of the Eisenhower Interstate System, I-65 is an important national corridor, but it is also a key corridor within the City of Louisville that provides access to major points of interest, including Louisville's Central Business District, the Downtown Medical Center, the University of Louisville, the Kentucky Fair & Exposition Center and Louisville Muhammad Ali International Airport. Several of the city's largest employers, like UPS WorldPort, Ford Motor Company and Humana, rely on the corridor for daily access to their major operations.

If funded, this project would be extremely beneficial to our students who commute to our campuses. Our largest campus, located adjacent to Interstate 65 in the heart of downtown Louisville and two of our campus buildings are within a few feet of the Interstate. We enroll over 5000 students at this downtown location, and we employ several hundred faculty and staff. Additionally, we use our downtown campus facilities to provide customized training for local business and industry partners. This means that hundreds of incumbent workers also use our campus on an ongoing basis. With so many users of our facilities, we have a vested interest in the condition and reliability of our transportation system. The improvements to the transportation corridor, as proposed in this project, are essential for the future growth of our institution and the students and employers we serve.

The I-65 Bridge Bundling Project will replace or rehabilitate multiple interstate bridges to improve the safety and reliability of this vital corridor. The proposed bridge bundling along with the use of innovative design and construction techniques, like accelerated bridge construction, will be more cost effective and will minimize impacts on local businesses and travelers by reducing the construction period. This project will maintain and bolster the freight-carrying capacity of the affected bridges along this section of I-65, an essential interstate system that connects Canada to the Gulf of Mexico, while ensuring continued safe access to local destinations.

I hope you will consider funding this project that will constitute a significant investment in our national highway system. Preserving these critically important bridges through the I-65 Bridge

Bundling Project will ensure the economic success of the area and allow for continued growth in the region.

Sincerely,

Ty L. Handy
President
