

## Information for Toll Integrator RFP Proposers

This is to announce that a Joint Board comprised of representatives from the Indiana Finance Authority (IFA), the Indiana Department of Transportation (INDOT), the Kentucky Public Transportation Infrastructure Authority (KPTIA) and the Kentucky Transportation Cabinet (KYTC) desires to enter into contracts with up to three vendors that are qualified to provide toll integration services as part of the Louisville/Southern Indiana Ohio River Bridges project. The project includes three new or rehabilitated Ohio River bridges – the new East End Crossing, a new bridge to carry northbound Interstate 65 and a revamped Kennedy Bridge to carry southbound I-65 in downtown Louisville.

All three bridges will be tolled under a single all electronic toll (AET) collection system. KYTC, on behalf of the Joint Board, will be requesting technical and price proposals from proposers interested in providing design, integration, implementation, operation, and maintenance for the tolling components listed below:

**Tolling Component One** - Roadside and Back Office Component

**Tolling Component Two** - Electronic Toll Collection Component

**Tolling Component Three** - Operations Services Component

The Contracts that may be awarded pursuant to this RFP shall be entered into by the successful Proposer and KYTC on behalf of the Joint Board. The RFP will be issued pursuant to KRS 176 on or about April 17, 2013 and shall be administered by KYTC in cooperation with IFA and INDOT.

The Joint Board is issuing this draft RFP to solicit input and comment from industry in order to provide a procurement document that captures the latest in toll technology and processes. To maximize the time for industry input, several appendices were not included in this initial release. These appendices will be made available with the final RFP on or before April 17, 2013 and include the following:

- Traffic and revenue studies and reports
- Administrative/Contract forms (such as DBE certification, etc.)
- Price proposal forms
- Business rules
- Consulting engineer's report
- Terms & Conditions/Agreement to be Executed by the Parties
- Environmental justice report

Comments and suggestions should be sent by April 5, 2013 to the address listed in the draft RFP.
