RE: Cultural Historic Overview Survey for
the KY 52 Planning Study in
Boyle and Garrard Counties, Kentucky
(Item No. 7-104.00)
CRA Project No.: K20Q008
Contract Publication Series: 20-425

Dear Ms. Thompson,

In October 2020, Cultural Resource Analysts, Inc. (CRA), personnel completed a cultural historic overview survey for the KY 52 planning study in Boyle and Garrard Counties, Kentucky. The study was conducted at the request of Rebecca Thompson of Qk4, Inc., on behalf of the Kentucky Transportation Cabinet (KYTC). The study area was provided by Qk4, Inc., and consists of areas adjacent to an existing section of KY 52 extending northwest from Lancaster, Kentucky, near the intersection with Old Danville Road (Figures 1 and 2). The study area widens considerably as it continues to the west-northwest approaching the Dix River and the Boyle County/Garrard County line. After crossing the Dix River and the Boyle County/Garrard County line, the study area extends to the southwest then west as it narrows to follow the existing route of KY 52. The western terminus of the study area is located at the intersection of KY 52 and KY 150, which is situated southeast of downtown Danville, Kentucky. The objective of the overview study is to identify properties within the study area that are potentially significant, listed, or eligible for listing in the National Register of Historic Places (NRHP) that should be taken into consideration as the project plans develop. This letter report was prepared by Lauren Poole, MHP, of CRA. An archaeological study was also conducted by CRA, and the results were provided in the report *An Archaeological Overview Survey for Item No. 7-401.00 along KY 52 in Boyle, Garrard, and Lincoln Counties, Kentucky* by Brian Mabelitini, RPA 989695 (2020).

CRA personnel completed a records review at the Kentucky Heritage Council (KHC) on September 25, 2020. Geographic Information System (GIS) data provided by the KHC (FY21-4092) identified 69 previously surveyed resources within and adjacent to the study area (BO 47, BO 49–51, BO 311, BO 367–371, BO 373–375, BO 380–388, BO 408, BO 411, BO 414, GD 16, GD 27, GD 65–67, GD 404–406, GD 408–414, GD 416–418, GD 420–424, GD 531–536, GD 538–549, GDL 17, GDL 74, and GDL 75). Upon closer examination of property boundaries in the vicinity of the study area, it was determined that only 42 of the 69 resources identified by the KHC GIS data are located in or adjacent to the study area, or have property boundaries extending into the study area (BO 47, BO 49, BO 51, BO 311, BO 367–371, BO 374, BO 380–385, GD 16, GD 27, GD 65–67, GD 411, GD 416–418, GD 420–424, and GD 538–549).

www.crai-ky.com

The residence associated with BO 311 is individually listed in the NRHP under Criterion C as an excellent example of Federal architecture. The residence associated with BO 367 is listed in the NRHP under the Early Stone Buildings of Central Kentucky thematic nomination; however, since the resource was listed its condition has significantly deteriorated. The residences associated with BO 368 and 382 are listed in the NRHP under the Historic and Architectural Resources of Boyle County, Kentucky Multiple Property Listing. BO 368 is significant under Criterion A for agriculture and Criterion C as an excellent example of Federal architecture. BO 382 is significant under Criterion C for its Gothic Revival architecture. The residences associated with GD 27 and GD 66 are listed in the NRHP under the Multiple Resources of Garrard County, Kentucky Multiple Resource Area (MRA). GD 27 is significant under Criterion C as an example of early settlement log architecture and GD 66 is significant under Criterion C as an example of Italianate architecture. According to KHC's database, the residences associated with BO 383, GD 16, and GD 67 have been determined eligible for listing in the NRHP; the resource associated with GD 67 is pending NRHP listing. The resources associated with BO 311, BO 367, BO 383, GD 16, and GD 66 are situated on large parcels that extend into the study area; however, the NRHP-listed and NRHP-eligible boundaries for the resources include only the house and domestic yard. As such, the NRHP boundaries for BO 311, BO 367, BO 383, GD 16, and GD 66 are located outside the study area. The NRHP boundaries for BO 368, BO 382, GD 27, and GD 67 are located within or extend into the study area. KHC's database notes that the resource associated with GD 65 is no longer extant. A review of recent aeriels indicates the house associated with BO 369 is no longer extant. The remaining resources (BO 47, BO 49, BO 51, BO 370, BO 371, BO 374, BO 380, BO 381, BO 384, BO 385, GD 411, GD 416–418, GD 420–424, and GD 538–549) have an “undetermined” NRHP status according to KHC's database.

A review of surveys and reports on file at the KHC revealed one survey overlapping the current study area in addition to the aforementioned multiple property National Register nominations. The survey report, including an addendum report, as well as the aforementioned MRAs have been summarized in Table 1 and were completed between 1983 and 2006 (Bradley and Amos 1996; McCarley and Spurlock 2003; Murray-Wooley 1983; Powell 1984; Spurlock 2006). The previous reports did not identify any additional resources that were not already included in KHC's GIS database. However, the one resource, GD 417, was recommended eligible for listing in the NRHP under Criterion A for its association with the toll road system of the third quarter of the nineteenth century. Its recommended NRHP boundary includes the parcel, which is located in the study area (Spurlock 2006).

The study area for the KY 52 planning study was subject to a windshield survey. Sarah Reynolds and Lauren Poole of CRA completed the windshield survey on October 20, 2020. Previously surveyed resources and those determined to exhibit potential significance and sufficient integrity for listing in the NRHP were recorded during the windshield survey, including 43 previously surveyed resources (BO 47, BO 49, BO 51, BO 311, BO 367–371, BO 374, BO 380–385, BO 539–543, GD 16, GD 27, GD 65–67, GD 411–412, GD 416–418, GD 420–424, GD 538, and GD 544–549) and 7 previously undocumented properties (CRA 1–7). All surveyed resources are mapped on topographic quadrangles and aerial photographs (see Figures 1 and 2). Individual resources and potential historic districts, including rural historic districts, were assessed during the survey. Of the 50 resources identified during the windshield survey within the study area, seven (BO 311, BO 367, BO 368, BO 382, GD 65, GD 27, and GD 66) are listed in the NRHP (Table 2). Two of the NRHP-listed resources, BO 368 and GD 66, were not visible from the right-of-way (ROW), and as such, their current condition and integrity could not be assessed in the field. Four resources (BO 383, GD 16, GD 67, and GD 417) located within the study area for the KY 52 planning study were previously determined eligible for listing in the NRHP (see Table 2). GD 16 is currently located on the same parcel as GD 66, which is listed in the NRHP. GD 16 was not visible from the ROW, and as such, its current condition and integrity could not be assessed in the field. One previously surveyed resource (BO 374) and five new historic resources (CRA 2–4, CRA 6, and CRA 7) were identified in the field as potentially significant properties (Table 3). These sites require additional research to formally evaluate their eligibility for listing in the NRHP, but

they appear to be potentially significant under Criterion C. CRA 4 does not appear on a 1960 aerial photograph (USGS 1960). Further investigations are necessary to determine if the resource dates to an earlier period and was moved to its current location at a later date. Archival research and a closer examination of significance and integrity are necessary to make comprehensive recommendations of eligibility. CRA 7 consists of several segments of drystone fences (Sections A–L) adjacent to the existing path of KY 52. Other sections of stone fence were observed along the roadway in Boyle County, but were excluded from potential eligibility due to their deteriorated condition. An undetermined status is recommended for BO 380, BO 381, CRA 1, CRA 5, and GD 549 as they were not visible from the ROW (Table 4). BO 380, BO 381, and GD 549 currently have an undetermined status in the KHC database. The remaining resources recorded during the windshield survey primarily consist of residences from the mid-nineteenth to the mid-twentieth centuries that represent common types, including T-plans, Foursquares, Bungalows, and Ranch houses, or vernacular forms (Table 5). These resources have undergone material changes, including replacement siding, replacement windows, and non-historic additions, that diminish their integrity and as such, are unlikely to be eligible for listing in the NRHP. Two previously surveyed resources (BO 49 and GD 65) located in the KY 52 study area were determined to be non-extant in the field (see Table 5).

In addition to evaluating individual resources, CRA also considered the potential for historic districts, including rural historic districts, within the study area. Based on the windshield survey, the portion of the study area located in Boyle County holds potential significance as a rural historic district. The properties in this portion of the study area primarily consist of large farmsteads with agricultural outbuildings and residences set back from the roadway. Although recent residential development has been constructed along KY 52 between Goggins Lane and Pope Road, as well as along Pope Road, the majority of the historic farmsteads in this area have not been subdivided for residential use. Clearly defined pastures and agricultural fields separated by fences and/or tree lines are visible on recent aerial photographs and were observed in the field, suggesting that agriculture remains the predominant land use in this section of the study area. Based on the records review results and limited views from the ROW, this portion of the study area also retains a high concentration of historic residences and agricultural structures, although further investigations are necessary to determine the current condition and integrity of these resources. Stone fences, both adjacent to the roadway and associated with individual properties, were also observed demarcating property boundaries and individual fields and pastures. Based on the results of the windshield survey, the Boyle County section of the study area appears to retain notable landscape features and has potential to be a rural historic district. However, a complete assessment of the integrity of individual structures and farmsteads, as well as the area as a whole, was outside the scope of the overview survey. Therefore, further research and field investigations are necessary to determine if the area retains sufficient integrity and rises to a level of significance as to be eligible for listing the NRHP as a rural historic district.

The locations of the resources recorded during the windshield survey are included in the attached aerial photographs and topographic maps, and initial recommendations for potential NRHP eligibility for the surveyed resources in the study area are included in the tables below. If you have any questions, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Trent Spurlock". The signature is fluid and cursive, with the first name "Trent" and last name "Spurlock" clearly distinguishable.

Table 5. Recommended Ineligible and Demolished Resources.

Site/Survey #	Resource Name/Function	Address/Location	NRHP Status	Condition	Figures
BO 47	Residence and outbuildings	Lancaster Road (KY 52)	Recommended ineligible based on field observations; undetermined status in KHC database	Common residential form with integrity compromised by replacement materials	66–68
BO 49	School	Lancaster Road (KY 52)	Demolished	Demolished; all associated structures non-extant	69
BO 51	Residence and outbuildings	3705 Lancaster Road (KY 52)	Recommended ineligible based on field observations; undetermined status in KHC database	Common residential form with integrity compromised by replacement materials	70
BO 369	Agricultural outbuildings	Lancaster Road (KY 52)	Recommended ineligible based on field observations; undetermined status in KHC database	Integrity compromised by loss of associated residence	71
BO 370	Gibson House	Lancaster Road (KY 52)	Recommended ineligible based on field observations; undetermined status in KHC database	Integrity compromised by replacement materials and association with non-historic residence	72–73
BO 371	Residence and outbuildings	Lancaster Road (KY 52)	Recommended ineligible based on field observations; undetermined status in KHC database	Common example of a Ranch house with replacement materials	74–75
BO 384	Residence	Lancaster Road (KY 52)	Recommended ineligible based on field observations; undetermined status in KHC database	Common residential form with integrity compromised by replacement materials	76
BO 385	Residence and outbuildings	Lancaster Road (KY 52)	Recommended ineligible based on field observations; undetermined status in KHC database	Common example of a T-plan with integrity compromised by replacement materials and boarded windows	77
GD 411	Residence and outbuilding	576 Lancaster Road (KY 52)	Previously recommended ineligible (McCarley and Spurlock 2003); KHC concurred. Recommended ineligible based on field observations.	Common residential form with integrity compromised by replacement materials	78
GD 416	Residence and outbuildings	1015 Lancaster Road (KY 52)	Previously recommended ineligible (McCarley and Spurlock 2003); KHC concurred. Recommended ineligible based on field observations.	Common residential form with integrity compromised by replacement materials and non-historic addition	79–80
GD 418	Residence and outbuilding	Ledford Drive	Previously recommended ineligible (McCarley and Spurlock 2003); KHC concurred. Recommended ineligible based on field observations.	Common residential form with integrity compromised by replacement materials and non-historic additions	81
GD 420	Residence and outbuildings	42 Ledford Drive	Previously recommended ineligible (McCarley and Spurlock 2003); KHC concurred. Recommended ineligible based on field observations.	Common residential form with integrity compromised by replacement materials and enclosed porch	82
GD 421	Residence and outbuilding	118 Ledford Drive	Previously recommended ineligible (McCarley and Spurlock 2003); KHC concurred. Recommended ineligible based on field observations.	Common residential form with integrity compromised by replacement materials	83
GD 422	Residence and outbuilding	Ledford Drive	Previously recommended ineligible (McCarley and Spurlock 2003); KHC concurred. Recommended ineligible based on field observations.	Common residential form with integrity compromised by replacement materials	84
GD 423	Residence and outbuildings	144 Ledford Drive	Previously recommended ineligible (McCarley and Spurlock 2003); KHC concurred. Recommended ineligible based on field observations.	Common residential form with integrity compromised by replacement materials and non-historic additions	85
GD 424	Residence and outbuildings	1942 Lancaster Road (KY 52)	Previously recommended ineligible (McCarley and Spurlock 2003); KHC concurred. Recommended ineligible based on field observations.	Common residential form with integrity compromised by replacement materials	86–89
GD 538	Residence and outbuildings	Lancaster Road (KY 52)	Previously recommended ineligible (McCarley and Spurlock 2003); KHC concurred. Recommended ineligible based on field observations.	Common residential form with integrity compromised by multiple additions	90–91
GD 539	Residence and outbuildings	3068 Lancaster Road (KY 52)	Previously recommended ineligible (McCarley and Spurlock 2003); KHC concurred. Recommended ineligible based on field observations.	Common residential form with integrity compromised by replacement materials	92–93

Site/Survey #	Resource Name/Function	Address/Location	NRHP Status	Condition	Figures
GD 540	Residence	3084 Lancaster Road (KY 52)	Previously recommended ineligible (Spurlock and McCarley 2003); KHC concurred. Recommended ineligible based on field observations.	Common residential form with integrity compromised by replacement materials	94
GD 541	Residence	3102 Lancaster Road (KY 52)	Previously recommended ineligible (Spurlock and McCarley 2003); KHC concurred. Recommended ineligible based on field observations.	Common residential form with integrity compromised by replacement materials	95
GD 542	Residence and outbuilding	Lancaster Road (KY 52)	Previously recommended ineligible (Spurlock and McCarley 2003); KHC concurred. Recommended ineligible based on field observations.	Common residential form with integrity compromised by replacement materials	96
GD 543	Residence and outbuilding	3346 Lancaster Road (KY 52)	Previously recommended ineligible (Spurlock and McCarley 2003); KHC concurred. Recommended ineligible based on field observations.	Common residential form with integrity compromised by replacement materials	97-98
GD 544	Residence and outbuildings	3544 Lancastre Road (KY 52)	Previously recommended ineligible (Spurlock and McCarley 2003); KHC concurred. Recommended ineligible based on field observations.	Common residential form with integrity compromised by replacement materials and non-historic addition	99
GD 545	Residence and outbuildings	Lancaster Road (KY 52)	Previously recommended ineligible (Spurlock and McCarley 2003); KHC concurred. Recommended ineligible based on field observations.	Common residential form with integrity compromised by replacement materials	100-101
GD 546	Agricultural outbuildings	Lancaster Road (KY 52)	Recommended ineligible based on field observations; undetermined status in KHC database	Integrity compromised by loss of associated residence	102
GD 547	Residence and outbuildings	3237 Lancaster Road (KY 52)	Previously recommended ineligible (Spurlock and McCarley 2003); KHC concurred. Recommended ineligible based on field observations.	Common residential form with integrity compromised by replacement materials	103-104
GD 548	Residence and outbuildings	Lancaster Road (KY 52)	Previously recommended ineligible (Spurlock and McCarley 2003); KHC concurred. Recommended ineligible based on field observations.	Common residential form with integrity compromised by replacement materials	105-106
