**APPENDIX B - ENVIRONMENTAL OVERVIEW** 

City of Glasgow Barren County, Kentucky

Prepared for: Kentucky Transportation Cabinet Central Office Highway District 3

Prepared by: Stantec Consulting Services Inc.

### **Executive Summary**

This Environmental Overview has been prepared for the Small Urban Area (SUA) Study for the City of Glasgow in Barren County, Kentucky. The purpose of the SUA Study is to identify and examine transportation issues related to safety and congestion in the City and its surrounding area. The purpose of this environmental overview is to identify environmental resources of significance, potential jurisdictional features, and other environmental areas of concern that need to be considered in the development and advancement of short-term recommendations and long-term concerns for future transportation improvement projects as developed by the SUA Study. Natural and human environment resources within the study area were identified from secondary source information including available electronic databases, data files and published data that may be publicly available or restricted to subject matter experts. Based on this information, key environmental features within the study area include:

<u>Surface Streams</u>: Beaver Creek, South Fork Beaver Creek and Huggins Branch are the main drainage features in the study area, along with 73 unnamed streams. Portions of Beaver Creek and South Fork Beaver Creek are listed as impaired (305(b) listing) waters. 100-year floodplain associated with Beaver Creek and South Fork Beaver Creek extends throughout the study area.

<u>Wetlands</u>: 309 NWI wetlands are mapped in the study area with the majority of this number listed as ponds while the majority of areal coverage is comprised of forested wetlands.

Threatened and Endangered Species: Seven (7) federal-listed endangered and one threatened species have the potential to occur in the study area, with two federal-endangered species recorded within 5-miles of the study area. Potential summer roost and foraging habitat for the federal endangered Indiana bat (*Myotis sodalis*), Gray myotis (*Myotis grisescens*) and the federal threatened northern long-eared bat (*Myotis septentrionalis*) occur in the riparian corridors along the major streams. Beaver Creek and South Fork Beaver Creek may provide suitable habitat for Kentucky Creekshell, snuffbox and rabbitsfoot mussels, three small to medium creek species. Suitable habitat for gray bat (*Myotis grisescens*) and Kentucky cave shrimp (*Palaemonias ganteri;* AKA Mammoth Cave Shrimp) is known to be present within 5-miles, and nine cave entrances are documented within the study area.

<u>Groundwater</u>: 277 water wells occur within the study area, of which 9 are listed as being used for domestic supply. The northwest corner of the study area contains sub-surface drainage associated with the Turnhole Spring karst basin, with underground flow to the northwest. This basin is listed as a KDOW Outstanding State Resource Water (OSRW) and Cold Water Habitat (CAH) designated use, and is known to harbor the federal-endangered Kentucky cave shrimp outside of the study area.

<u>Karst</u>: 52 sinkholes are mapped underlying the study area, accounting for approximately 5% of the area, being most prominent north of Beaver Creek and west of the city center. Nine cave entrances are known within the study area.

<u>Farmland</u>: Over 78% of the soils in the study area are identified as Prime Farmland and Farmland of Statewide Importance. Active farmland is limited to the outer reaches of the study area.

<u>Hazardous Materials Concerns</u>: Approximately 616 potential hazardous materials sites were identified within the study area, including 1 CERCLIS record, 3 CERCLIS-NFRAP records, 23 RCRA generator records, 42 RCRA NonGenerator records, 24 state hazardous waste (SHWS) records, and 10 solid waste landfill (SWF/LF) records. An additional 119 UST sites are identified in the study area.

Oil and Gas Wells: Approximately 189 active oil and/or gas wells are mapped within the study area, concentrated northeast and west of the city limits.

<u>Section 4(f)/6(f) Resources</u>: Six public parks and approximately 50 acres of the Barren River Lake Wildlife Management Area are located within the study area. Public parks and managed areas are subject to Section 4(f) regulations (as part of a US Department of Transportation funded project), including impact avoidance, minimization and mitigation requirements. In addition, four parks (American Legion Park, Barren County Little League Football Field, Beaver Creek Park and Gorin Park) have received Land and Water Conservation Fund (LWCF) funding and are subject to Section 6(f) regulations regarding conversion to other uses.

<u>Environmental Justice (EJ):</u> The seven census tracts within the study area have a minority resident percentage equivalent to the county but exceeding the state levels. Also, the census tracts in the study area have a percentage of low income population higher than both the county and state levels.

<u>Cultural and Historic Resources</u>: Ten (10) individual National Register of Historic Places (NRHP)-listed sites and four (4) historic districts (Glasgow Business District [with one boundary expansion], Ralph Bunche District, North Race Street District [with one boundary expansion], and Southwest [SW] Glasgow District [with two boundary expansions) are located within the study area, all in or immediately south of the downtown area. The four historic districts host 291 contributing resources. In addition, 64 previously surveyed historic properties having an undetermined NRHP status are present in the study area. The Fort Williams Site is the only NRHP-listed archaeological site in the study area. Previous surveys have recorded 70 additional archaeological sites within the study area. Very little of the study area has been surveyed for archeological resources, but based on a review of historical maps and existing data, the area has a clear potential for additional undocumented cultural historic and archaeological sites to be present.

<u>Community Resources</u>: Community resources and sensitive noise receptors in the study area include numerous single family residential neighborhoods, 30 houses of worship, 15 school facilities, 23 cemeteries and 6 parks. Thirteen (13) public service facilities, including multiple Barren County and Glasgow municipal offices, are located in and near the city center. Significant utility infrastructure present includes the Glasgow water treatment and sewage treatment plants located at opposing ends of Beaver Creek in the study area.

### **Environmental Overview**

Stantec Consulting Services, Inc. has prepared this Environmental Overview as part of the Small Urban Area (SUA) Study for the Kentucky Transportation Cabinet (KYTC). This overview identifies known natural and human features which occur within the study area that should be considered during the development and advancement of conceptual alternatives and avoidance/minimization of impacts. The study area under review includes a circle that encompasses the entire Glasgow city limits in Barren County, Kentucky (see Figure 1). As such, the study area includes adjoining parts of unincorporated Barren County, providing a total area of 37 square miles centered near the intersection of US 68 and Shane Drive, north of US 31E (see Figure 2).

**Table 1** below provides a summary of the features that were identified within the study area. Natural environment features within the study area are identified on **Figures 3.1** and **3.2** and human environment features are identified on **Figures 4.1** and **4.2**. The information listed in Table 1 and shown on the attached mapping was obtained from secondary source materials review. This information provides an overview of resources of significance within the study area as well as other environmental issues of potential concern. More detailed environmental studies may be required as the project is further developed in accordance with the National Environmental Policy Act (NEPA).

Table 1: Environmental Resources/Features in Glasgow SUA Study Area Barren County, KY		
Environmental Category	Resource/Feature	Source/Information
USGS Streams	Three USGS named streams (Beaver Creek, South Fork Beaver Creek and Huggins Branch) and 73 unnamed streams are mapped within the study area.  None of the three named streams are classified as Special Use Waters within the study area as defined by the KDOW. Beaver Creek is designated as fully supporting Aquatic Life and Domestic Water Supply from Glasgow Airport upstream, and not supporting Primary Contact Recreation downstream of the airport. South Fork Beaver Creek is designated as partially supporting Aquatic Life from its confluence with Beaver Creek upstream to the Louis B Nunn Parkway crossing.  Watersheds in the study area include Park City (HUC-12: 051100020702), Little Beaver Creek-Beaver Creek (HUC-12: 051100020306), South Fork Beaver Creek (HUC-12: 051100020307), and Boyd's Creek-Skaggs Creek (HUC-12: 051100020403), from north to south, respectively.  The study area contains one Zone III Source Water Assessment and Protection Program (SWAPP; KDOW, 2013) area, associated with the Glasgow Water Company (Little Beaver Creek-Beaver Creek watershed).	Source: USGS 24K NHD dataset (2004a), USGS 12-Digit HUC (2004b), ESRI USGS map service layer, KDOW 305b and 303(d) tables (2012a), KDOW (2016a and 2016b), KDOW SWAPP (2013)

Table 1: Environmental Resources/Features in Glasgow SUA Study Area Barren County, KY		
Resource/Feature	Source/Information	
Additional surface streams are likely present in the study area and would most likely consist of small, headwater streams and roadside drainage features.	Source: USGS maps, ESRI topo maps service layer	
309 National Wetlands Inventory (NWI) wetlands are mapped in the study area, with the highest number being ponds (88% by number), while the greatest area is contributed by forested wetlands (PFO, 65% by area). NWI-mapped wetlands are generally dispersed evenly outside the city center.  Hydric soils occur in approximately 5% of the study area, concentrated along the major stream valleys.	Source: KEPPC 24K NWI map dataset (2002), USDA SSURGO KY646 (2014)	
273 ponds are mapped (NWI) within the study area. Several appear to be intermittent, occurring in sinkhole depressions and do not appear to hold water permanently.	Source: KEPPC 24K NWI map dataset (2002), ESRI Aerial map service layer, aerial photo review (USGS, 2014), KGS (2003)	
Indiana bat (endangered), gray bat (endangered), and northern long-eared bat (threatened) are known to occur in Barren County. Three endangered mussels (fanshell, sheepnose, and snuffbox) and one threatened mussel (rabbitsfoot) may or could potentially occur in the study area. Kentucky cave shrimp (endangered) is known to occur in Barren County.  The northwestern half of the study area (basically north and west of US 31E) lies within a Known Summer 1 + Swarming 1 habitat designated area for Indiana bat. No similarly designated area for Northern long-eared bat occurs in the study area. This designated habitat type refers to mitigation measures required for impacts to potential habitat. The nearest sensitive area for either species is located approximately 6.5 miles northwest of the study area. Potential summer roost and foraging habitat for Indiana bat and northern long-eared bat (woodlots and riparian woodlands) is present in scattered woodlots primarily along major stream corridors.  Of the four federally-listed mussel species included in the IPaC report for the study area, only snuffbox and rabbitsfoot have the potential to occur as Beaver Creek and South Fork Beaver Creek may provide suitable habitat for these species that prefer small to medium sized creeks.  Habitat for gray bat and Kentucky cave shrimp may be present as	Source: USWS IPaC Trust Resource Report (2016), USFWS Kentucky Ecological Services Field Office, Indiana bat and northern long-eared bat habitat areas map (2015), KYTC Environmental Overview web map (2016), KYTC Programmatic Biological Assessment (2012), ESRI Aerial map service layer, NatureServe (2016), KSS (2016)	
	Additional surface streams are likely present in the study area and would most likely consist of small, headwater streams and roadside drainage features.  309 National Wetlands Inventory (NWI) wetlands are mapped in the study area, with the highest number being ponds (88% by number), while the greatest area is contributed by forested wetlands (PFO, 65% by area). NWI-mapped wetlands are generally dispersed evenly outside the city center.  Hydric soils occur in approximately 5% of the study area, concentrated along the major stream valleys.  273 ponds are mapped (NWI) within the study area. Several appear to be intermittent, occurring in sinkhole depressions and do not appear to hold water permanently.  Indiana bat (endangered), gray bat (endangered), and northern long-eared bat (threatened) are known to occur in Barren County. Three endangered mussels (fanshell, sheepnose, and snuffbox) and one threatened mussel (rabbitsfoot) may or could potentially occur in the study area. Kentucky cave shrimp (endangered) is known to occur in Barren County.  The northwestern half of the study area (basically north and west of US 31E) lies within a Known Summer 1 + Swarming 1 habitat designated area for Indiana bat. No similarly designated area for Northern long-eared bat occurs in the study area. This designated habitat type refers to mitigation measures required for impacts to potential habitat. The nearest sensitive area for either species is located approximately 6.5 miles northwest of the study area. Potential summer roost and foraging habitat for Indiana bat and northern long-eared bat (woodlots and riparian woodlands) is present in scattered woodlots primarily along major stream corridors.  Of the four federally-listed mussel species included in the IPaC report for the study area, only snuffbox and rabbitsfoot have the potential to occur as Beaver Creek and South Fork Beaver Creek may provide suitable habitat for these species that prefer small to medium sized creeks.	

Table 1: Environmental Resources/Features in Glasgow SUA Study Area Barren County, KY		
Environmental Category	Resource/Feature	Source/Information
KDFWR Species List	<ul> <li>KDFWR lists 50 additional State Threatened, Endangered, and Special Concern Species (beyond the 9 species listed by USFWS, above) as occurring (either recently or historically) in Barren County. These include:         <ul> <li>9 state endangered species (1 fish, 1 amphibian, 6 birds, 1 reptile)</li> <li>20 state threatened species (10 birds, 1 mussel, 6 invertebrates, 1 gastropod, 1 reptile, 1 mammal)</li> <li>19 state special concern species (5 fish, 1 reptile, 6 birds, 3 crustaceans, 1 gastropod, 1 mussel, 2 mammals)</li> <li>2 historical records of state listed Upland Sandpiper and American Bittern</li> </ul> </li> </ul>	Source: KDFWR - Species List for Barren County (2016)
KSNPC Species Database	KSNPC provided 5 records for 3 federal or state endangered, threatened, or special concern listed species and communities within 1-mile of the study area. These include:  • 1 mussel (federal-species of management concern); • 1 fish (federal-species of management concern); • 1 crustacean (1 federal-endangered); and • 1 natural community (acidic mesophytic forest)  Occurrence records for the fish and crustacean species relate to cave-dwelling species. Additional federal listed species known within 5-miles include Gray Myotis (gray bat) listed as federal-endangered.  The KSNPC data response specifically highlights a portion of the project lies within the Green River Biosphere Reserve, associated with the Green River and the Mammoth Cave Systems, with emphasis upon prevention of erosion and sedimentation. The cave-obligate Mammoth Cave shrimp along with two state-listed species (bottlebrush crayfish and Kentucky Creekshell mussel) are known within 5-miles of the project. Due to the occurrence of numerous records of seven bat species in the study area vicinity (capture and hibernacula), KSNPC mentions any project should include a thorough bat survey to avoid impacts to bats.	Source: KSNPC Natural Heritage Database response (February 18, 2016)

Table 1: Environmental Resources/Features in Glasgow SUA Study Area Barren County, KY		
Environmental Category	Resource/Feature	Source/Information
Groundwater	277 water wells occur within the study area, of which 256 are listed as monitoring wells, 9 are domestic use and 12 have an unknown use. 19 springs are mapped within the study area, none of which are indicated as being used for consumption. No wellhead protection areas occur in the study area.  The northwestern corner of the study area, north of the Glasgow Municipal Airport, contains extensive sub-surface drainage associated with the Turnhole Spring karst basin, with underground flow to the northwest. This basin is listed as a KDOW Outstanding State Resource Water (OSRW) and Cold Water Habitat (CAH) designated use, known to harbor the federal-endangered Kentucky cave shrimp outside of the study area.	Source: KGS Water Wells GIS map, data repository and dataset layer (2015a), KDOW Exceptional Use Waterbodies (2008), KDOW Wellhead Protection Areas data download (2012b)
Karst	The project area is underlain by bedrock with moderate to high potential for karst. 52 sinkholes are mapped underlying the study area, accounting for approximately 5% of the area. Sinkholes are most prominent north of Beaver Creek and west of the city center.  Nine cave entrances are known in the study area, all located near Beaver Creek in the north. Due to the sensitive nature of this resource, location information is not included in this report.  KYTC has a karst policy for use of specific drainage design (grass swales and detention basins) in roadway improvement projects.	Source: Karst Occurrence in Kentucky map (Paylor and Currens 2002), KGS (2003), KSS Data Request response (January 27, 2016), KYTC-DEA (2016).
Floodplain	FEMA 100-Year floodplain occurs along Beaver Creek and South Fork Beaver Creek throughout the extent of the study area, the lower half of Huggins Branch, and within several sinkhole areas just north of the center of town.	Source: FEMA National Flood Hazard Layers for Barren County, Kentucky (2013)
Floodway	No FEMA designated floodway occurs in the study area or vicinity.	Source: FEMA National Flood Hazard Layers for Barren County, Kentucky (2013)
Farmlands	Over 78% of the soils in the study area and vicinity are identified as Prime Farmland (27%), Farmland of Statewide Importance (39%) and Prime farmland if drained or protected from flooding (12%). Active farmlands are limited to the outer reaches of the study area, primarily north and west of US 68.	Source: USDA SSURGO KY646 (2014), aerial photo review (USGS 2014)

Table 1: Environmental Resources/Features in Glasgow SUA Study Area Barren County, KY		
Environmental Category	Resource/Feature	Source/Information
Hazardous Materials	Database records review summary: Approximately 616 sites of potential concern occur within the study area containing of 770 database records. These include: 1 CERCLIS record, 3 CERCLIS-NFRAP records, 23 RCRA generator records, 42 RCRA NonGenerator records, 24 state hazardous waste (SHWS) records, and 10 solid waste landfill (SWF/LF) records.  The statewide UST database indicates 384 UST records in the study area associated with 119 sites. Potential hazardous materials concern sites are located throughout the study area, concentrated around the city center, along US 68 west of the city and US 31 E south of the city.  Three landfills are located in the study area, including the Dana Corp Residual Landfill, the Glasgow Regional Landfill and the KY-63 & Parkway Trenchfill Site.	Source: Environmental Data Resources (EDR 2016), USEPA Envirofacts (2016), KDWM (2012, 2016)
Oil and Gas Wells	466 oil/gas wells are mapped within the study area, of which 189 are indicated as active and producing. Active wells are concentrated northeast and west of the city limits.	Source: KGS (2015b)
Section 4(f)	Six (6) public parks are located in the study area including four city owned (Beaver Trail, Gorin, Twyman and Weldon) and two county owned parks (American Legion and Barren County Little League Football field). Four are located in the city center area and one each north and west of the city center.  Approximately 50 acres of the Barren River Lake Wildlife Management Area, owned by U.S. Army Corps of Engineers and administered (leased) by KDFWR, is located along Beaver Creek, west of the city center.	Source: ESRI USA Parks dataset (2015), KGN LocalParks dataset (2007), USACE (2016)
Section 6(f)	Based on current Land and Water Conservation Fund (LWCF) records, multiple LWCF properties are present in the study area including American Legion Park, Barren County Little League Football Field, Beaver Creek (Trail) Park, and Gorin Park.	Source: NPS LWCF list (2015), ESRI USA Parks dataset (2015)
Air Quality	The study area is not located in a Non-attainment Area for 8-hour ozone (2008 standard) or a Maintenance area for PM 2.5 (1997 standard) for the transportation-related criteria pollutants for which the EPA has established National Ambient Air Quality Standards (NAAQS). 31 USEPA air emissions facilities are located within the study area, located primarily around the city center and along US 31E.	Source: KYTC Air Quality maps (2013), USEPA Green Book (2015), USEPA Envirofacts (2016)

Table 1: Environmental Resources/Features in Glasgow SUA Study Area Barren County, KY		
Environmental Category	Resource/Feature	Source/Information
Noise	Noise sensitive land use areas are located throughout the study area (Activity Categories "B", "C", "D" and "E"), including residential neighborhoods, parks, cemeteries, places of worship, schools, and hotels and restaurants with exterior uses.  Approximately 30% of the study area is urbanized, about half of which is comprised of moderate density residential housing (single-family home developments).	Source: KYTC Noise Policy (2011), KDGI (2007 and 2012)
Environmental Justice	The project area includes portions of Census Tracts 9501-9507 in Barren County. Based on the most recent U.S. Census American Community Survey (ACS) data available, the percentage of minority population in the project area is 9.7%, which is slightly higher than the percentage of minority population in Barren County (9.2%) but less than the percentage of minority population in the Commonwealth of Kentucky. In addition, the percentage of low income population in the project area is 21.7%, which is higher than the percentages of low income population for both Barren County (19.5%) and Kentucky (19.1%). As both minority and low income populations occur in the project area, environmental justice is a potential in the evaluation of transportation alternatives in the study area.	Source: US Census Bureau, ACS 5-year data 2010-2014 (2015)
Cultural - Archaeology	Based on a review of National Register of Historic Places (NRHP) and Office of State Archaeology (OSA) records, one archaeological site listed on the NRHP is located in the study area, the Fort Williams Site located on the west site of downtown Glasgow. Ten (10) historic places and four (4) historic districts are located within the study area (see additional details, below). In addition, 29 previous surveys have recorded 70 archaeological sites within the study area.  Historical map review indicated a clear potential for historic archaeological resources in the study area in relation to the number of structures present on early mapping, especially with regards to specialized structures such as distilleries, mills, churches, and schools.  Approximately 5.5% of the study area has been previously surveyed for archaeological resources. Given the rate of the number of sites recorded by those surveys, the ready availability of prehistoric lithic resources and the high density of historic settlement, it is estimated that more than 1,320 sites could be present in the study area. Areas of particular concern for archaeological resources include alluvial soils and adjacent areas. Table 1: Environmental Resources/Features in Glasgow SUA Study Area Barren County, KY		
Environmental Category	Resource/Feature	Source/Information
Cultural - Historic	Based on a review of Kentucky Heritage Council (KHC) records, the following resources were identified:  10 NRHP Listed Properties: 9 buildings and 1 site (Fort Williams)  4 Historic Districts:  Glasgow Central Business Historic District (1 boundary expansion),  North Race Street Residential Historic District (1 boundary expansion),  Ralph Bunche Historic District, and  Southwest Glasgow Historic District (2 boundary expansions)  291 contributing resources to the 4 historic districts  4 historic properties previously surveyed and having an undetermined NRHP status.	Source: A Cultural Historic Resource Records Review for the Small Urban Area Study for the City of Glasgow in Barren County, Kentucky, prepared by CRA (2016b)
Houses of Worship	30 houses of worship (church, mosque, synagogue, etc.) were identified in the study area from current and historical mapping resources, with a significant concentration in the city center area.	Source: ESRI USA topo map service layer, Google Maps, KDOW Watershed Viewer (2016b)
Schools	15 school facilities were identified in the study area from current and historical mapping resources, including two high schools (Barren County and Glasgow) and two post-secondary institutions (Southcentral Kentucky C&TC/Glasgow Health Campus and Western Kentucky University Glasgow). A significant number of school facilities are present along Louis B Nunn Parkway at KY 249.	Source: ESRI USA topo map service layer, ESRI Aerial map service layer, Google Maps, KDOW Watershed Viewer (2016b)
Cemeteries	23 cemeteries were identified in the study area from current and historical mapping resources, 19 of which may represent small, family cemetery plots scattered around the outskirts of the city limits.	Source: ESRI USA topo map service layer, ESRI Aerial map service layer, Google Maps, KDOW Watershed Viewer (2016b)

Table 1: Environmental Resources/Features in Glasgow SUA Study Area Barren County, KY		
Environmental Category	Resource/Feature	Source/Information
Public Services	There are multiple public service facilities concentrated in the city center, including:  Barren County services:  Board of Education  Courthouse Fairgrounds Government Center Health Department Jail Sheriff's Office Boys & Girls Club, Bunche Center Glasgow Fire Department Mary Wood Weldon Memorial Library Southcentral Kentucky Cultural Center US Post Office  Utilities:  4 pipeline crossings, roughly bounding the city limits 2 electrical transmission line corridors, one each south and east of the city center 1 railroad line extending northwest from the city center Glasgow water treatment plant Glasgow sewage treatment plant	Source: ESRI USA topo map service layer, ESRI Aerial map service layer, Google Maps, KDOW Watershed Viewer (2016b)
Residences and Businesses	Residential land use comprises approximately 20% of the study area, predominantly as single-family residential neighborhoods. Multi-family residential developments are relatively limited in extent.  Commercial and industrial land use comprises approximately 10% of the study area and includes the city center business district with industrial development primarily north and west of the city center. ## U.S. Fish & Wildlife Contact Information

Trust resources in this location are managed by:

### **Kentucky Ecological Services Field Office**

J C Watts Federal Building, Room 265 330 West Broadway Frankfort, KY 40601-8670 (502) 695-0468

## **Endangered Species**

Proposed, candidate, threatened, and endangered species are managed by the <u>Endangered Species Program</u> of the U.S. Fish & Wildlife Service.

This USFWS trust resource report is for informational purposes only and should not be used for planning or analyzing project level impacts.

For project evaluations that require FWS concurrence/review, please return to the IPaC website and request an official species list from the Regulatory Documents section.

<u>Section 7</u> of the Endangered Species Act **requires** Federal agencies to "request of the Secretary information whether any species which is listed or proposed to be listed may be present in the area of such proposed action" for any project that is conducted, permitted, funded, or licensed by any Federal agency.

A letter from the local office and a species list which fulfills this requirement can only be obtained by requesting an official species list from the Regulatory Documents section in IPaC.

The list of species below are those that may occur or could potentially be affected by activities in this location:

### Clams

Fanshell Cyprogenia stegaria

Endangered

**CRITICAL HABITAT** 

No critical habitat has been designated for this species.

https://ecos.fws.gov/tess\_public/profile/speciesProfile.action?spcode=F02H

Rabbitsfoot Quadrula cylindrica cylindrica

Threatened

**CRITICAL HABITAT** 

There is **final** critical habitat designated for this species.

https://ecos.fws.gov/tess\_public/profile/speciesProfile.action?spcode=F03X

Sheepnose Mussel Plethobasus cyphyus

Endangered

CRITICAL HABITAT

No critical habitat has been designated for this species.

https://ecos.fws.gov/tess\_public/profile/speciesProfile.action?spcode=F046

Snuffbox Mussel Epioblasma triquetra

Endangered

CRITICAL HABITAT

No critical habitat has been designated for this species.

https://ecos.fws.gov/tess\_public/profile/speciesProfile.action?spcode=F03J

## Crustaceans

### Kentucky Cave Shrimp Palaemonias ganteri

Endangered

CRITICAL HABITAT

No critical habitat has been designated for this species.

https://ecos.fws.gov/tess\_public/profile/speciesProfile.action?spcode=K01X

### **Mammals**

Gray Bat Myotis grisescens

Endangered

CRITICAL HABITAT

No critical habitat has been designated for this species.

https://ecos.fws.gov/tess\_public/profile/speciesProfile.action?spcode=A04J

Indiana Bat Myotis sodalis

Endangered

**CRITICAL HABITAT** 

No critical habitat has been designated for this species.

https://ecos.fws.gov/tess\_public/profile/speciesProfile.action?spcode=A000

Northern Long-eared Bat Myotis septentrionalis

Threatened

CRITICAL HABITAT

No critical habitat has been designated for this species.

https://ecos.fws.gov/tess\_public/profile/speciesProfile.action?spcode=A0JE

## **Critical Habitats**

There are no critical habitats in this location

## Migratory Birds

Birds are protected by the <u>Migratory Bird Treaty Act</u> and the <u>Bald and Golden Eagle</u> Protection Act.

Any activity which results in the take of migratory birds or eagles is prohibited unless authorized by the U.S. Fish and Wildlife Service (1). There are no provisions for allowing the take of migratory birds that are unintentionally killed or injured.

Any person or organization who plans or conducts activities that may result in the take of migratory birds is responsible for complying with the appropriate regulations and implementing appropriate conservation measures.

Additional information can be found using the following links:

- Birds of Conservation Concern
   http://www.fws.gov/birds/management/managed-species/birds-of-conservation-concern.php

Wood Thrush Hylocichla mustelina

Season: Breeding

Worm Eating Warbler Helmitheros vermivorum

Season: Breeding

Bird of conservation concern

## Refuges

Any activity proposed on <u>National Wildlife Refuge</u> lands must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

Refuge data is unavailable at this time.

## Wetlands in the National Wetlands Inventory

Impacts to <u>NWI wetlands</u> and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal Statutes.

For more information please contact the Regulatory Program of the local <u>U.S. Army</u> <u>Corps of Engineers District</u>.

### DATA LIMITATIONS

The Service's objective of mapping wetlands and deepwater habitats is to produce reconnaissance level information on the location, type and size of these resources. The maps are prepared from the analysis of high altitude imagery. Wetlands are identified based on vegetation, visible hydrology and geography. A margin of error is inherent in the use of imagery; thus, detailed on-the-ground inspection of any particular site may result in revision of the wetland boundaries or classification established through image analysis.

The accuracy of image interpretation depends on the quality of the imagery, the experience of the image analysts, the amount and quality of the collateral data and the amount of ground truth verification work conducted. Metadata should be consulted to determine the date of the source imagery used and any mapping problems.

Wetlands or other mapped features may have changed since the date of the imagery or field work. There may be occasional differences in polygon boundaries or classifications between the information depicted on the map and the actual conditions on site.

### DATA EXCLUSIONS

Certain wetland habitats are excluded from the National mapping program because of the limitations of aerial imagery as the primary data source used to detect wetlands. These habitats include seagrasses or submerged aquatic vegetation that are found in the intertidal and subtidal zones of estuaries and nearshore coastal waters. Some deepwater reef communities (coral or tuberficid worm reefs) have also been excluded from the inventory. These habitats, because of their depth, go undetected by aerial imagery.

### DATA PRECAUTIONS

Federal, state, and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, state, or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate federal, state, or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

This location overlaps all or part of the following wetlands:

## Freshwater Emergent Wetland

PEM1Fh	5.94 acres
PEM1Fx	4.1 acres
PEM1A	2.04 acres
PEM1F	1.24 acres

Director

February 18, 2016

Michael David de Villiers Stantec Consulting Services, Inc. 11687 Lebanon Road Cincinnati OH 45241

Data Request 16-067

Dear Mr. de Villiers,

This letter is in response to your data request of January 11, 2016 for the Glasgow Small Urban Area Study Project in Barren County, Kentucky. We have reviewed our Natural Heritage Program Database to determine if any of the endangered, threatened, or special concern plants and animals or exemplary natural communities monitored by the Kentucky State Nature Preserves Commission occur within the area on the Glasgow North, Glasgow South, Hiseville and Temple Hill USGS quadrangles indicated in the shapefile provided to us. Please see the attached reports for more information.

1-mile for all records – 5 records 5-mile for aquatic records – 12 records 5-mile for federally listed species – 5 records 10-mile for mammals and birds – 39 records

Approximately 10% of the northern section of the study area lies within the boundaries of the Green River Bioreserve, a system of surface and subterranean aquatic habitats comprising the recharge area of the Green River and associated Mammoth Cave Systems. This is the fourth most important site nationally for the conservation of rare aquatic organisms and biodiversity. It includes the largest number of imperiled aquatic organisms in Kentucky. Federal, state, private entities, and the public are working together to protect this important area. Because of the importance of the Green River Biosphere Reserve, we recommend strict monitoring of all practices with potential for impacts to streams, wetlands, and sinkholes to prevent erosion and sedimentation.

Data Request 16-067 February 18, 2016 Page 2

Palaemonias ganteri (Mammoth Cave shrimp, federally listed endangered, KSNPC endangered) occurs within five miles of the project. This species is endemic to the Mammoth Cave/Flint Ridge Cave system in Kentucky. Designated Critical habitat for Mammoth Cave Shrimp occurs approximately 4.5 mi to the northwest of the study area. Barbicambarus cornutus (Bottlebrush Crayfish, KSNPC Special Concern) and Villosa ortmanni (Kentucky creekshell, KSNPC threatened, federal species of management concern) also occur within five miles of the area.

Myotis grisescens (Gray myotis, federally listed endangered, KSNPC threatened) maternity sites occur approximately three miles of the project area. Between five and ten miles, Myotis sodalis (Indiana myotis, federally listed endangered, KSNPC endangered) is known from several hibernacula records, and Myotis septentrionalis (Northern long-eared bat, federally listed threatened, KSNPC endangered) is known from one hibernacula record.

In addition to these federally listed species, *Myotis leibii* (Eastern small-footed myotis, federal species of management concern, KSNPC threatened), *Myotis austroriparius* (Southeastern myotis, federal species of management concern, KSNPC endangered), *Nycticeius humeralis* (Evening Bat, KSNPC special concern), and *Corynorhinus rafinesquii* (Rafinesque's big-eared bat, federal species of management concern, KSNPC special concern) all occur within five miles of the study area.

In order to avoid impacts to bats, a thorough survey should be conducted by a qualified biologist. The survey should include a search for potential roost and winter sites, and a mistnetting census at numerous points within the proposed corridor, particularly in preferred summer habitat. Summer foraging habitats include upland forests, bottomland forests and riparian corridors. Suitable roost and winter sites include sandstone and limestone caves, rockhouses, clifflines, auger holes, and abandoned mines. In order to avoid impacts to bats, bottomland forests and riparian corridors, particularly near caves, should not be disturbed.

I would like to take this opportunity to remind you of the terms of the data request license, which you agreed upon in order to submit your request. The license agreement states "Data and data products received from the Kentucky State Nature Preserves Commission, including any portion thereof, may not be reproduced in any form or by any means without the express written authorization of the Kentucky State Nature Preserves Commission." The exact location of plants, animals, and natural communities, if released by the Kentucky State Nature Preserves Commission, may not be released in any document or correspondence. These products are provided on a temporary basis for the express project (described above) of the requester, and may not be redistributed, resold or copied without the written permission of the Kentucky State Nature Preserves Commission's Data Manager (801 Schenkel Lane, Frankfort, KY, 40601. Phone: (502) 573-2886).

Please note that the quantity and quality of data collected by the Kentucky Natural Heritage Program are dependent on the research and observations of many individuals and organizations. In most cases, this information is not the result of comprehensive or site-specific field surveys; many natural areas in Kentucky have never been thoroughly surveyed, and new plants and animals are still

Data Request 16-067 February 18, 2016 Page 3

being discovered. For these reasons, the Kentucky Natural Heritage Program cannot provide a definitive statement on the presence, absence, or condition of biological elements in any part of Kentucky. Heritage reports summarize the existing information known to the Kentucky Natural Heritage Program at the time of the request regarding the biological elements or locations in question. They should never be regarded as final statements on the elements or areas being considered, nor should they be substituted for on-site surveys required for environmental assessments. We would greatly appreciate receiving any pertinent information obtained as a result of on-site surveys.

If you have any questions or if I can be of further assistance, please do not hesitate to contact me.

Sincerely,

Sara Hines Data Manager

RIH/SGH

#### DISCLAIMER:

The coordinate locations of caves provided by the KSS are not warranted but are thought generally correct. The locations provided may not exhaustively locate every cave entrance in the requested search area, but are only those recorded in the Kentucky Speleological Survey files. A minimum search fee of \$50.00, and an additional fee of \$10.00 for each location provided, partly defrays the cost of providing this service.

The KSS is a private non-profit and is not under the management of the University of Kentucky or the Kentucky Geological Survey. Location data provided by KSS should not become public domain, that is copies of the cave locations should not be widely distributed.

#### **EXECUTIVE SUMMARY**

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

#### TARGET PROPERTY INFORMATION

#### **ADDRESS**

GLASGOW SUA GLASGOW, KY 42141

#### **COORDINATES**

Latitude (North): 37.0052000 - 37° 0′ 18.72" Longitude (West): 85.9249000 - 85° 55′ 29.64"

### **EDR Exclusive Records**

EDR MGP..... EDR Proprietary Manufactured Gas Plants

#### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 CERCLIS site within approximately 3.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
MALLORY CAPACITOR, I	U.S. 31E	SSW 1 - 2 (1.465 mi.)	CK500	661

#### Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERCLIS-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there are 3 CERCLIS-NFRAP sites within approximately 3.5 miles of the target property.

#### Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/09/2015 has revealed that there are 3 RCRA-LQG sites within approximately 3.5 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/09/2015 has revealed that there are 4 RCRA-SQG sites within approximately 3.5 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/09/2015 has revealed that there are 16 RCRA-CESQG sites within approximately 3.5 miles of the target property.

#### Federal ERNS list

ERNS: The Emergency Response Notification System records and stores information on reported releases of oil and hazardous substances. The source of this database is the U.S. EPA.

A review of the ERNS list, as provided by EDR, and dated 06/22/2015 has revealed that there are 11

ERNS sites within approximately 3.5 miles of the target property.

### State- and tribal - equivalent CERCLIS

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Protection's Uncontrolled Site Branch List.

A review of the SHWS list, as provided by EDR, and dated 09/18/2015 has revealed that there are 24 SHWS sites within approximately 3.5 miles of the target property.

#### State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Protection's List of All Active Contained & Residential Landfills/List of All Transfer Stations.

A review of the SWF/LF list, as provided by EDR, and dated 08/24/2015 has revealed that there are 10 SWF/LF sites within approximately 3.5 miles of the target property.

#### State and tribal leaking storage tank lists

PSTEAF: The Underground Storage Tank Branch (USTB) has ranked all PSTEAF reimbursable facilities requiring corrective action, in accordance with 401 KAR 42:290. Directive letters will be issued on the basis of facility ranking and available PSTEAF funding in sequential order as ranked. For example, Rank 2 facilities will be issued directives before Rank 3 facilities.

A review of the PSTEAF list, as provided by EDR, and dated 09/01/2015 has revealed that there are 7 PSTEAF sites within approximately 3.5 miles of the target property.

#### State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Protection's Owner/Facility Report of All Tanks Regardless of Status list.

A review of the UST list, as provided by EDR, and dated 08/06/2015 has revealed that there are 120 UST sites within approximately 3.5 miles of the target property.

#### Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law

enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

A review of the US HIST CDL list, as provided by EDR, and dated 08/12/2015 has revealed that there is 1 US HIST CDL site within approximately 3.5 miles of the target property.

# Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/09/2015 has revealed that there are 42 RCRA NonGen / NLR sites within approximately 3.5 miles of the target property.

EPA WATCH LIST: EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

A review of the EPA WATCH LIST list, as provided by EDR, and dated 08/30/2013 has revealed that there is 1 EPA WATCH LIST site within approximately 3.5 miles of the target property.

RMP: When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

A review of the RMP list, as provided by EDR, and dated 08/01/2015 has revealed that there are 6 RMP sites within approximately 3.5 miles of the target property.

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, and dated 10/19/2006 has revealed that there are 12 HIST FTTS sites within approximately 3.5 miles of the target property.

US AIRS: The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

A review of the US AIRS list, as provided by EDR, and dated 10/20/2015 has revealed that there are 8 US AIRS sites within approximately 3.5 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 07/20/2015 has revealed that there are 229 FINDS sites within approximately 3.5 miles of the target property.

#### **EDR HIGH RISK HISTORICAL RECORDS**

#### **EDR Exclusive Records**

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 63 EDR Hist Auto sites within approximately 3.5 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 11 EDR Hist Cleaner sites within approximately 3.5 miles of the target property.

- EJ Analysis
- 2010 Census Census Tract Reference Map for Study Area and Vicinity

# EJ Write-Up for Glasgow Small Urban Area Study

The project area includes portions of Census Tracts 9501-9507 in Barren County (see map attached). Based on the most recent U.S. Census American Community Survey (ACS) data available (2010-2014, see analysis and Table 4), the percentage of minority population in the project area is 9.7%, which is slightly higher than the percentage of minority population in Barren County (9.2%) but less than the percentage of minority population in the Commonwealth of Kentucky. The percentage of low income population in the project area is 21.7%, which is higher than the percentages of low income population for both Barren County (19.5%) and Kentucky (19.1%).

# **Environmental Justice Analysis Small Urban Area Study for City of Glasgow**

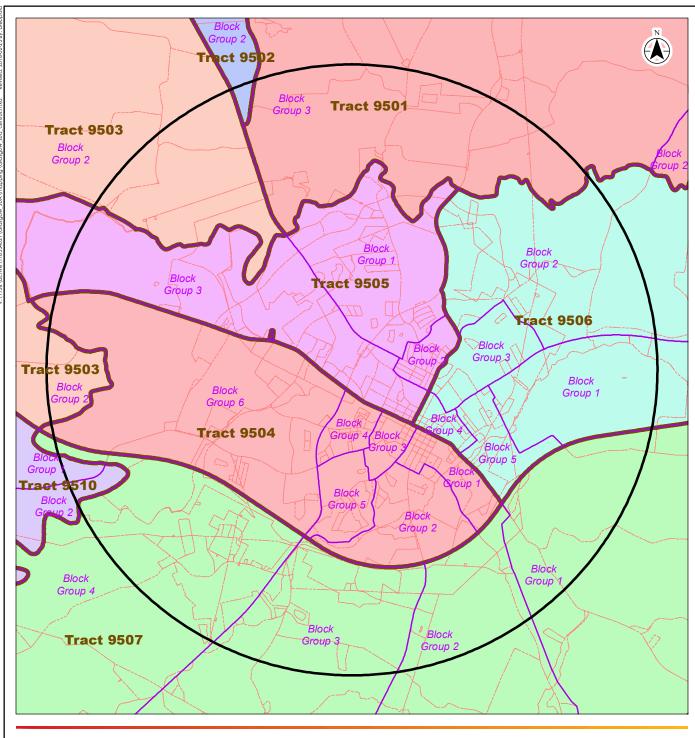

The following Environmental Justice Analysis was completed utilizing the socioeconomic data from the most recent U.S. Census American Community Survey (ACS). The most current data set available is the 2010-2014 ACS.

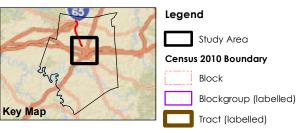

**Table 4. EJ Populations** 

EJ Population	Kentucky	Barren County	Barren County Census Tracts
			Census Tracts 9501, 9502, 9503, 9504, 9505, 9506, 9507
Minority	14.6%	9.2%	9.7%
Low Income	19.1%	19.5%	21.7%

#### **Project Description**

In January 2016, Cultural Resource Analysts, Inc. (CRA), personnel completed an archaeological records review of a Small Urban Area Study (SUA) for the City of Glasgow in Barren County, Kentucky (Figure 1; see electronic file). The study was conducted at the request of Bill Leopold of Stantec Consulting Services, Inc. (Stantec), on behalf of the Kentucky Transportation Cabinet (KYTC). The objective of the records review was to identify National Register of Historic Places (NRHP) listed, eligible, or potentially significant archaeological sites within the SUA that should be taken into consideration as future transportation plans are developed. This data will be incorporated into the environmental footprint mapping and overview document being produced by Stantec for the KYTC. The SUA encompasses the city of Glasgow in Barren County, Kentucky, and measures 11.1 km (6.9 mi) in diameter; the SUA is roughly bounded by the intersections of Poynter Road with Slash Road on the north, Colonial Heights Road with Old Edmonton Loop 1 Road on the east, Beech Tree Lane (Willie Groce Road) with Roseville Road (KY 249) on the south, and Beaver Creek with the Cumberland Parkway (KY 9008) on the west.

A cultural historic baseline study is being conducted by CRA in conjunction with the archaeological overview; it will be submitted under a separate cover (Spurlock and Reynolds 2016). The cultural historic field assessment will document all of the aboveground resources 50 years of age and older. The documentation will include mapping, photography, and written descriptions. No field survey was conducted for the archaeological records review.

The total SUA encompassed approximately 96.1 sq km (37.1 sq mi) of land. The study area is drained by tributaries (Beaver Creek on the north and Skaggs Creek on the south) of the Barren River, which flows into the Green River approximately 60 km (37 mi) west-northwest of the SUA. The study area is located in gently rolling terrain that ranges between relatively flat floodplains to moderately sloped ridges. Some areas exhibit karstic features such as caves and sinkholes. As noted above, the SUA is roughly centered on the city of Glasgow. Elevations range between 172 and 256 m (564 and 840 ft) above mean sea level (AMSL). The primary source of ground disturbance in the study area is agriculture, with road construction, light industry, residential and commercial development contributing near the city of Glasgow itself.

#### Archaeological Records Review

Α search of records maintained by the **NRHP** (available online at: http://nrhp.focus.nps.gov/natreghome.do?searchtype=natreghome) and geographic information system (GIS) data maintained by the Office of State Archaeology (OSA) was conducted to: 1) determine if the study area had been previously surveyed for archaeological resources; 2) identify any previously recorded archaeological sites that were situated within the study area; 3) provide information concerning what archaeological resources could be expected within the study area; and 4) provide a context for any archaeological resources recovered within the project area. Only one of the previously recorded archaeological sites, Fort Williams, (15Bn48) is listed on the NRHP (NPS# 75000732). Nine other historic places and four historic districts listed on the NRHP lie within the SUA (see Table 1).

OSA GIS data requested by CRA on January 21, 2016, was returned on January 25, 2016. The results were researched by Heather Barras of CRA at the OSA on January 26, 2016. The work at the OSA consisted of a review of professional survey reports and records of archaeological sites for the proposed project footprint. A map of the GIS data from the OSA depicting the locations of the previously documented archaeological sites and previous investigations was also reviewed (see Figure 1). In addition, the review of professional survey reports and archaeological site data provided basic information on the types of unrecorded archaeological resources that may occur within the proposed project footprint. The SUA included areas within the Glasgow North, Glasgow South, Hiseville, and Temple Hill (United States Geological Survey [USGS] 1979a, 1979b, 1973, and 1981) quadrangles.

				Twyman Court and S. Lewis St.

#### **Previous Sites and Investigations**

OSA records revealed that 29 previous professional archaeological surveys and 5 archaeological site evaluations have been conducted within the SUA (Table 2). Seventy archaeological sites have been recorded in this area also (Table 3). An additional survey completed within the SUA has not yet been entered in the OSA GIS (Webb and Funkhouser 1932). During this survey, one site was recorded within the study area.

#### Historic Map Review

Ten historic maps of the project area were reviewed to identify possible historic archaeology sites that might be present. The earliest map consulted was the 1879 Land Ownership Map of Barren County, Kentucky (Beers and Lanagan 1879). This nineteenth-century map shows that the study area was already well settled by 1879. There are at least 254 structures depicted within, or directly adjacent to, the project area on the 1879 map (Figure 2; see electronic file). Structures within the city limits of Glasgow itself are not depicted on this map. Most of the structures that are depicted outside the limits of Glasgow are probably farmsteads, but some appear to have been specialized non-residential structures. These included distilleries, school houses (SH), mills, oil wells, blacksmith shops (BS Sh), doctors' offices, and churches (Ch). Some stores and business locations are also depicted.

The next map available for review was the 1929 Oil and Gas Map of Barren County (Kentucky Geologic Survey [KGS] 1929). Unfortunately, this map was nearly useless for any purpose but determining the location of oil and gas reserves within the county. The symbol chosen to represent these deposits was a widely spaced stippling of dots that are nearly indistinguishable from the symbols representing structures. Because there were better maps of nearly the same date, no attempt was made to determine the number of structures on this map.

Table 2. Previous Archaeological Surveys and Reports within the SUA.

Reference	Lead Agency	Survey Requested By	Requested On Behalf Of	Purpose of Survey	Size of Surveyed Area	Date of Survey	Methods	Results	Recommendations	NRHP Eligibility	Notes
Applegate 2001	not specified	John Watrous and Michael Graham of Terracon Consultants, Inc., Louisville, Kentucky	-	proposed telecommunication tower near Glasgow, Barren County, Kentucky	125 m by 5 m (410 ft by 16 ft) proposed access corridor and a 35 m by 50 m (115 ft by 164 ft) proposed tower area	In 2001	pedestrian survey, shovel testing	no sites found	no further work	n/a	-
Applegate 2014	U.S. Department of Agriculture	the City of Glasgow	-	proposed city fire station in North Glasgow, Barren County, Kentucky	.8 ha (2.0 acres)	On December 11, 2014	pedestrian survey, screened shovel testing	no sites found	no further work	n/a	-
Barrett 2009	FCC (Federal Communications Commission)	Liz Barrow of Patriot Engineering and Environmental	-	proposed Glasgow Three cell tower and access road in Barren County, Kentucky	approximately .052 ha (.13 acre)	On April 14, 2009	pedestrian survey, screened shovel testing	no sites found	no further work	n/a	-
Barrett and Karpynec 2008	Tennessee Valley Authority	Richard Yarnell, Tennessee Valley Authority in Knoxville, Tennessee	-	proposed 161 kV transmission line between the existing Summer Shade-East Bowling Green 161 kV transmission line and the Glasgow Electric Plant Board planned substation north of Louie B. Nunn Parkway in Barren County, Kentucky	24.48 ha (60.48 acres)	From September 2-4, 2008	pedestrian survey, screened shovel testing	1 site (15Bn149)	phase II testing of 15Bn149	not assessed (potentially eligible)	-
Curran 2014	Rural Utility Services	Josh Young of East Kentucky Power Cooperative	-	the proposed Glasgow Landfill Gas to Electric Facility located near the community of Glasgow in Barren County, Kentucky	approximately .4 ha (.9 acres)	On January 2, 2014	systematic screened shovel testing	no sites found	no further work	n/a	-
Evans 1992	not specified	Texas Gas Transmission Corporation	-	proposed relocation of an existing pipeline to allow for construction of the Monsanto Chemical Company's New Manufacturing Facility in Barren County, Kentucky	approximately 1.1 ha (2.8 acres)	On October 20, 1992	pedestrian survey, screened shovel testing	no sites found	no further work	n/a	-
Fiegel 2004	US Army Corps of Engineers	Kentucky Transportation Cabinet, Kentucky Department of Highways, Division of Environmental Analysis (Frankfort, KY)	-	proposed reconstruction of the John Muir Highway/Glasgow- Burkesville Road (KY 90) in Barren County, Kentucky	23.4 ha (57.8 acres)	Between June 2–5 and September 12, 2003	pedestrian survey, screened shovel testing	13 new sites (15Bn130–15Bn141 and 15Bn144) and one previously recorded site (15Bn601)	no further work	not eligible	-
French et al. 2002	KTC (Kentucky Transportation Cabinet) FHWA (Federal Highways Administration)	Palmer Engineering	the Kentucky Transportation Cabinet (Item Number 3- 192.20)	proposed Glasgow Outer Loop in Barren County, Kentucky	approximately 10.3 ha (25.5 acres)	between October 1 and 15, 2001	pedestrian survey, screened shovel testing, backhoe trenching phase II: site plowed and disked, systematic surface collection, hand excavation of test units, mechanical removal of plowzone	4 sites (15Bn11715Bn120), evaluation of 15Bn82 and 15Bn84	15Bn117: avoid or phase II investigations 15Bn82, 15Bn84, 15Bn118-15Bn120: no further work within proposed ROW	15Bn117: not assessed 15Bn82, 15Bn84, 15Bn118 15Bn120: not eligible	
Herndon 2013	Rural Utility Services	Josh Young	the East Kentucky Power Cooperative	the proposed Fox Hollow— Parkway transmission line project in Barren County, Kentucky	approximately 14 ha (35 acres)	From May 27 through May 29, 2013	pedestrian survey, screened shovel testing	no sites found, 2 prehistoric isolated finds	no further work	n/a	-
Holland and Rogers 1998	Rural Electrification Administration	East Kentucky Power Cooperative, Inc. in Winchester, Kentucky	-	proposed construction of an electrical power substation in north-central Barren County, Kentucky	approximately .4 ha (1.0 acre)	On January 27, 1998	pedestrian survey, shovel testing	no sites found	no further work	n/a	-
King 2003	Federal Highways Administration	Doug Lambert of Palmer Engineering in Winchester, Kentucky	the Kentucky Transportation Cabinet (Item Number 3- 7000.00)	the proposed construction of the Glasgow Outer Loop in Barren County, Kentucky	approximately 543 ha (1343 acres)	Between October 16 and 21, 2002	pedestrian survey, screened shovel testing	4 sites (15Bn124–15Bn127) and 6 isolated finds	no further work	not eligible	-

Reference	Lead Agency	Survey Requested By	Requested On Behalf Of	Purpose of Survey	Size of Surveyed Area	Date of Survey	Methods	Results	Recommendations	NRHP Eligibility	Notes
Martin 2003	FHWA (Federal Highways Administration)	Larry Glass of Larry Glass Construction, Inc.	-	three proposed borrow areas northwest of the town of Glasgow in Barren County, Kentucky	approximately 7.74 ha (19.1 acres)	From July 29 through August 1, 2003	pedestrian survey, systematic screened shovel testing	l previously recorded site (15Bn78), no new sites	no further work	not eligible	-
10hr and Schatz 2007	KTC (Kentucky Transportation Cabinet) FHWA (Federal Highways Administration)	the Kentucky Transportation Cabinet (Item Number 3-192.20)	-	right-of-way segments of the proposed Glasgow Bypass in Barren County, Kentucky	approximately 31.16 ha (77.00 acres)	Between June 25 and 28, 2007	re-investigation of 2 previously documented sites (15Bn93 and 15Bn94), relocated 2 previously documented sites (15Bn89 and 15Bn91), and 4 new sites (15Bn145 15Bn148)	4 previously documented sites relocated (15Bn89, 15Bn91, 15Bn93, 15Bn94) and 4 new sites (15Bn14515Bn148)	15Bn89, 15Bn91, 15Bn93, 15Bn94, 15Bn145 15Bn148: no further work	none eligible	-
uick 2012	Kentucky Division of Waste Management	Jim Wade of Nesbitt Engineering	the City of Glasgow	a proposed soil borrow area at the landfill operated by the City of Glasgow in Barren County, Kentucky	approximately 24.1 ha (59.6 acres)	Between August 24 and September 6, 2012	strip plowed and subjected to intensive pedestrian survey, screened shovel testing	8 sites (15Bn166–15Bn173)	no further work	none eligible	-
Quick 2013	Kentucky Division of Waste Management	Jim Wade of Nesbitt Engineering	Mayor Rhonda Trautman of the City of Glasgow	a proposed soil borrow area at the landfill operated by the City of Glasgow in Barren County, Kentucky	magnetic surveys, controlled surface collection, shovel testing, auger probes, hand excavation of test units, mechanical removal of portions of the Ap horizon	From May 13 to May 24, 2013	intensive pedestrian survey, magnetic survey, controlled surface collection, screened shovel testing, auger probing, hand excavation of test units, mechanical removal of portions of the Ap horizon	2 sites evaluated (15Bn168, 15Bn170) and 2 new sites identified (15Bn174 and 15Bn175)	no further work	none eligible	-
ossen and Tune 1991	Department of Natural Resources	City of Glasgow, Glasgow, Kentucky	-	proposed landfill extension between Beaver Creek, the South Fork of Beaver Creek, and the Cumberland Parkway in Barren County, Kentucky	30 ha (75 acres)	September 11 and 27, 1991	pedestrian survey of disked strips, shovel testing	2 sites (15Bn62 and 15Bn63)	no further work	not eligible	-
chlarb and Winter 2007	not specified	Commonwealth of Kentucky, Department of Military Affairs, Boone National Guard Center, Frankfort, Kentucky	-	survey of National Guard Armories	area of unspecified size	2007	pedestrian survey, screened shovel tests	5 new sites (15Ne93, 15Ml453, 15Jf712, 15Bl116, 15Lo228) and 5 isolated finds	no further work	none eligible	-
chock 1978a	not specified	the City of Glasgow	-	to allow a more accurate reconstruction of certain aspects of the fort	area of unspecified size	Between July 14, 1977 and April 19, 1978	test unit excavation	identification of magazine location	not specified	not specified	-
chock 1978b	not specified	Committee for Restoration of Fort Williams	-	to obtain a vertical profile in the magazine and to identify or clarify the probable entranceway into the magazine at Fort Williams	area of unspecified size	On July 8 and 19, 1978	test unit excavation, trench excavation	entrance to magazine and magazine drainage ditch profiled	not specified	not specified	-
chock 1979	not specified	Dick George of Will Linder & Associates in Calvert City, Kentucky	the city of Glasgow, Kentucky	proposed lift station site and force main easement in the city of Glasgow, Barren County, Kentucky	area of unspecified size	On August 15, 1979	pedestrian survey	no sites found	no further work	n/a	-
chock 1985a	Farmers Home Administration	Arvil Dobson of Landmark Enterprises in Louisville, Kentucky	-	the proposed Dellwood Apartments in Glasgow, Barren County, Kentucky	approximately 1.4 ha (3.4 acres)	In September, 1985	pedestrian survey, test unit excavation	no sites found	no further work	n/a	-
chock 1985b	not specified	Freddie Travis of Ideal Hardware Company in Glasgow, Kentucky	-	a proposed industrial park in Barren County, Kentucky	approximately 36 ha (88 acres)	During August and September of 1985	pedestrian survey, shovel testing, backhoe trenching	1 site (15Bn57)	no further work	not eligible	-
chock 1996	Kentucky Housing Corporation	Melanie Nueber of Barren River Area Development District in Bowling Green, Kentucky	-	proposed Glasgow Homebuyer Project at Glasgow, Barren County, Kentucky	approximately 59 ha (147 acres)	On November 27 and 28, 1996	pedestrian survey, shovel testing	no sites found	no further work	n/a	-

Reference	Lead Agency	Survey Requested By	Requested On Behalf Of	Purpose of Survey	Size of Surveyed Area	Date of Survey	Methods	Results	Recommendations	NRHP Eligibility	Notes
Schock 1997	none	Dennis Smith of DDS Engineering in Bowling Green, Kentucky	-	proposed Horse Cave State Bank at Glasgow in Barren County, Kentucky	1.1 ha (2.7 acres)	On March 11, 1997	pedestrian survey, shovel testing	no sites found	no further work	n/a	-
Schock 1999	none	Ernie Myers of the Glasgow/Barren County Industrial Development Authority	-	a proposed industrial park in Barren County, Kentucky	approximately 81 ha (200 acres)	On September 2, October 8, and December 20, 1998 and February 2-3, and 27, 1999	pedestrian survey of plowed project area	4 sites (15Bn11015Bn113) and one historic cemetery (no site number given)	no further work	none eligible	-
Schock 2001a	Kentucky Land and Water Conservation	Freddie L. Travis, Barren County Judge/Executive in Glasgow, Kentucky	-	a proposed County Park in Barren County, Kentucky	10 ha (25 acres)	On August 7, 2001	pedestrian survey of plowed strips, screened shovel testing	no sites found	no further work	n/a	Fuding from Land and Water Conservation funds through Barren River Area Development District. The Kentucky Clearinghouse number is KY 010302-0336.
Schock 2001b	Kentucky Housing Corporation	Richard Pierce of PDC Companies in Little Rock, Arkansas	-	proposed Highlands at Glasgow Apartments in Glasgow, Barren County, Kentucky	1.4 ha (3.5 acres)	On December 9, 2001	pedestrian survey, screened shovel testing	no sites found	no further work	n/a	-
Schock 2002	Barren County Fiscal Court	Freddie Travis, Judge/Executive of Barren County, Kentucky.	-	a proposed soccer complex in Barren County, Kentucky	10 ha (25 acres)	On January 31st, March 4 and 5, and April 23, 2002	pedestrian survey of plowed strips, screened shovel testing	1 site (15Bn121)	no further work	not eligible	-
Stallings and Ross-Stallings 1996a	FAA (Federal Aviation Administration)	American Engineers	-	proposed runway extension at the Glasgow Municipal Airport and usage of the floodplain for borrow material in Barren County, Kentucky	40 ha (100 acres) surveyed and Phase II testing of 15Bn102 and 15Bn103	Survey was conducted between April 27 and May 22, 1996; Phase II testing conducted between July 2 and July 24, 1996	pedestrian survey of one meter wide plow strips, shovel testing Phase II testing: hand excavated test units, mechanical removal of the plowzone	10 new sites (15Bn9815Bn107)	15Bn101, 15Bn104 15Bn107: no further work 15Bn9815Bn100: avoid or Phase II testing 15Bn102 and 15Bn103: after Phase II testing, no further work	15Bn101 15Bn107: not eligible 15Bn98 15Bn100: not assessed	-
Stallings and Ross-Stallings 1996b	KTC (Kentucky Transportation Cabinet)	American Engineers		proposed construction of a bypass around the town of Glasgow in Barren County, Kentucky	the entire length of Alternate A was surveyed - 9.9 km (6.15 mi) with a 90 m (300 ft) wide corridor, only high probability areas along Alternate B were surveyed (unspecified size)	Between June 8 and 26, 1995	pedestrian survey, screened shovel testing	21 sites (15Bn7715Bn97)	deep testing of the Beaver Creek floodplain 15Bn82, 15Bn84, 15Bn93, 15Bn94: phase II testing 15Bn97: if Alternate B becomes the preferred alternate, further phase I investigations needed 15Bn7715Bn81, 15Bn83, 15Bn8515Bn92, 15Bn95, 15Bn96: no further work	15Bn82, 15Bn84, 15Bn93, 15Bn94: not assessed 15Bn77 15Bn81, 15Bn83, 15Bn85 15Bn92, 15Bn95, 15Bn96: not eligible	
Stallings and Ross-Stallings 1998	Rural Electrification Administration	Jeff Hohman of East Kentucky Power Cooperative in Winchester, Kentucky	-	proposed Becton Substation in Barren County, Kentucky	1.3 ha (3.2 acres)	On June 3, 1998	pedestrian survey, shovel testing	1 site (15Bn108)	no further work	not eligible	-

Two Kentucky Highway Maps were available for Barren County (Kentucky Department of Highways [KDOH] 1937 and 1955). These maps, however, are difficult to read due to the scale of the drawings and the crowding of symbols. On the 1937 map especially, oil and gas deposits are mapped using a similar stippling as described above, further crowding the maps. Due to the availability of more accurate maps covering the same period, counts of structures on these maps were not attempted.

The first available USGS map that covers a portion of the survey area was the 1938 Horse Cave, Kentucky, 15-minute series topographic quadrangle (USGS 1938), which covers the northern half of the SUA. This map clearly indicates that the area is becoming more densely settled, both within the limits of Glasgow and in the countryside around. There are at least 428 structures depicted on the 1938 map. Keeping in mind that this count excludes the southern half of the SUA, and the structures within Glasgow itself, the number of structures in the overall SUA has probably quadrupled. Additionally, closely spaced rows of structures on the outskirts of Glasgow indicate that the town itself has begun to expand (Figure 3; see electronic file).

Beginning in 1953, a series of USGS 7.5-minute topographic quadrangles covering the SUA became available. These include the Glasgow North, Glasgow South, Hiseville, and Temple Hill, Kentucky, quadrangles (USGS 1954a, 1953a, 1954b, and 1953b). The density of settlement on this series of maps indicates that Glasgow and its surroundings were continuing to rapidly expand during the mid-twentieth century. No attempt was made to count the structures on these maps—the density is simply too high (Figure 4; see electronic file); however, a comparison of these maps with the Horse Cave quadrangle indicates that the number of structures within the SUA at least doubled between 1938 and 1954. This expansion of Glasgow apparently continued over the next 12 years, necessitating a revision to the quadrangle that contains the city itself. By the time the revised Glasgow South 7.5-minute quadrangle (USGS 1965) was released, the USGS recognized that the density of settlement within the city of Glasgow was too high for accurate depiction at this relatively small scale, and began depicting only large, non-residential structures within the city limits. No other maps were available spanning the period between 1965 and 1979, when the photoinspected 7.5-minute quadrangles were first published.

In short, the available mapping appears to indicate a moderately high probability for the presence of historic archaeological sites. The density of settlement and the variety of structure types on the earliest maps coupled with relatively little industrial development of the countryside suggests that numerous historic archaeological sites (and standing cultural historic sites) could be located within the SUA. In addition, the presence of churches on the 1879 mapping suggests the probability of associated cemeteries. These tend not to be depicted until the first highway map (KDOH 1937), when they can be seen next to many of the small churches in the countryside around Glasgow. At the time of the records review, 70 archaeological sites have been recorded within the SUA. At least one of these sites, 15Bn62 which has a 24 ha (60 acre) site area, should have been recorded as multiple (probably more than 10) individual sites using the modern practice of constraining sites to landforms. Only one of the previously recorded archaeological sites (15Bn48) is listed on the NRHP. This site has been at least partially excavated. This archaeological site is also listed as a historic place, Fort Williams (NPS# 75000732). In addition, nine other historic places and four historic districts listed on the NRHP lie within the SUA (see Table 1). Additional historic structures deemed eligible, if any, will be discussed in the cultural historic report (Spurlock and Reynolds 2016).

#### Soil Review

Figure 5 (see electronic file) shows those alluvial soils within the project boundary with the potential to have buried archaeological deposits. Beaver Creek and Skaggs Creek combine and then empty into Barren River Lake approximately 3 km (2 mi) southwest of the SUA. These streams and their tributaries, including South Fork Beaver Creek, Higgins Branch, and Boyds Creek, drain the entire study area. Because most of the project area is in rolling terrain, only 957 ha (2,365 acres) of the soils in the 9,610 ha SUA (roughly 10 percent) are classified as alluvial.

The alluvial soils in the study area include the Hamblen silt loam (Ha), Humphreys cherty silt loam, 2–6 percent slopes (HuB), Melvin silt loam (Me), Morganfield silt loam (Mf), Newark silt loam (Nn), Robinsonville (Sensabaugh) gravelly silt loam (Rg), Roellen silty clay loam (Rs), and Staser silt loam (St) series (Soil Survey Staff 2016) (Figure 5; Table 4). The soil series are classified by the amount of time it has taken them to form and the landscape position they are found on (Birkeland 1984; Soil Survey Staff 1999). This information can provide a relative age of the soils and can express the potential for buried archaeological deposits within them (Stafford 2004). The soil order and group classifications for each soil series are used to assist with determining this potential. Alluvial soils within the SUA are primarily found along the forks of Beaver Creek and their associated tributaries.

The alluvial soils in the study area belong to four taxonomic orders: alfisols, entisols, inceptisols, and mollisols. The Humphreys soils are classified as alfisols. Alfisols developed on late Pleistocene or older surfaces or on erosional surfaces of similar age. They have a thin, dark A horizon, rich in organic matter and nutrients, and a clay-enriched subsoil and are relatively high in fertility due to being only moderately leached (Soil Survey Staff 1999:163–165). Alfisols may contain intact archaeological deposits very near or on the ground surface, depending upon the landform on which they formed (e.g., sideslope vs. ridgetop).

The Morganfield soils are classified as entisols. Entisols are sandy soils that formed very recently in unconsolidated parent material and have not been in place long enough for pedogenic processes to form distinctive horizons except an A horizon. They are located on steep, actively eroding slopes or on floodplains or glacial outwash plains that frequently receive new deposits of alluvium. They do not have a compacted zone, such as a fragipan and do not have accumulated clays or aluminum or iron oxides, but may be sodium enriched (Soil Survey Staff 1999:389–391). Because of their recent age, Entisols rarely have buried and intact prehistoric archaeological deposits.

The Hamblen, Melvin, Newark, and Robinsonville (Sensabaugh) series soils are classified as Inceptisols. Inceptisols developed in silty, acid alluvium during the late Pleistocene or Holocene time periods on nearly level to steep surfaces. Inceptisols may have deeply buried and intact archaeological deposits, depending upon the landform on which they formed (e.g., sideslope vs. alluvial terrace). In this case, these soils are on floodplains and have a high potential for buried archaeological sites, although they only lie along the banks of Beaver Creek and its tributaries, Higgins Branch and South Fork Beaver Creek, and several intermittent tributaries of Boyds Creek, which is a tributary of Skaggs Creek. Inceptisols exhibit a thick, dark colored, surface horizon rich in organic matter and a weakly developed subsurface horizon with evidence of weathering and sometimes of gleving (Soil Survey Staff 1999:489–493).

The Roellen and Staser soils are classified as mollisols. Mollisols are grassland soils and because of the long-term addition of organic material to the soil from plant roots, the surface horizon is thick, dark, and fertile. They can exhibit clay, sodium and/or carbonate enriched, or even leached, subsoil horizons. These soils formed on level to sloping ground in late-Pleistocene to Holocene or even earlier deposits and generally under grassland that could have been previously forested. They have the potential to contain deeply buried and intact archaeological deposits on level floodplain or terrace landforms (Soil Survey Staff 1999:555–557).

Aside from road construction and residential development, the only evidence for large-scale soil disturbance within the project area is that associated with agricultural activities and light industrial and commercial development. Sediment transported downslope may have created alluvial fans that are ideal for burying past human activity. Although only 10 percent of the soils in the SUA are classified as alluvial, 73 percent of the archaeological sites documented within the SUA lie within 100 m (320 ft) of these soils; a clear indication of their importance in preserving archaeological sites within the project area. The potential for deeply buried prehistoric (and possibly early historic) sites within the project area is correspondingly good, particularly in the areas mapped as inceptisols and mollisols (see Figure 5). There is also a possibility for buried sites to be located on colluvial fans along uplands within the SUA.

#### Lithic Materials

In addition to burying archaeological sites, the rivers within the SUA cut through deposits of lithic raw materials prized by prehistoric peoples for the production of stone tools. Ste. Genevieve and St. Louis (Mgl), Salem and Warsaw (Msh), and Fort Payne (Mf) cherts all outcrop in various locations across the SUA (Figure 6). These cherts may also be available within residuum in the study area. Ready access to raw materials was an important factor in both mobile and settled prehistoric land use and, therefore, the potential for site locations.

#### **Summary**

The potential exists for numerous prehistoric and historic archaeological sites to be present within the study area. OSA records indicate that at the time of the records review 533 ha (1,317 acres), or roughly 5.5 percent, of the 9,614 ha (23,757 acres) encompassed by the SUA have previously been subjected to professional archaeological survey. These surveys have resulted in the documentation of 70 archaeological sites within the SUA.

Historic mapping indicates a clear potential for historic archaeological and cultural historic resources. The earliest available map (Beers and Lanagan 1879) shows at least 264 structures. By 1938, the northern half of the SUA has over 428 (USGS 1938). By 1965, the area was so densely settled that the USGS stopped depicting individual residences within the city of Glasgow (USGS 1965). Typically, only those structures on the oldest maps contain significant archaeological remains. Many of the historic archaeological sites in the APE would, therefore, probably have a low research

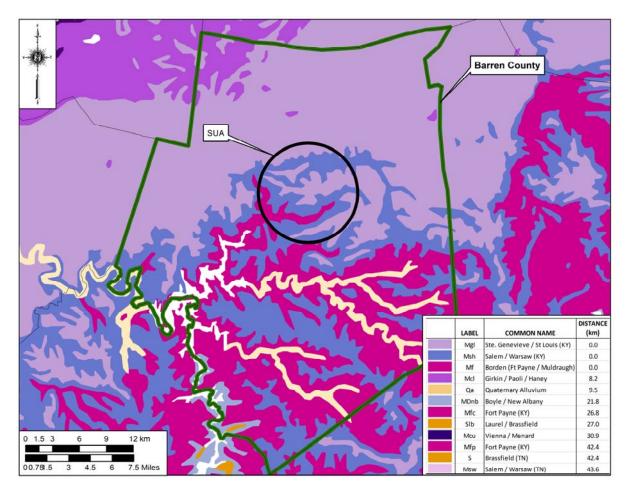

Figure 6. Lithic raw material sources in and around the SUA.

potential and would be unlikely to be significant due to their young age. The presence of so many structures on the earliest mapping, however, increases the potential for significant historic sites to be present. The presence of specialized structures such as distilleries, mills, churches, and schools on the early maps is an indicator that such sites might be present. At least one mill site, Gullian Gerig's Mill (NPS# 87002050), is listed on the NRHP as a historic place. Like Fort Williams (NPS# 75000732), which is listed as both an archaeological site and historic place, excavations might reveal deposits that would make an early industrial property such as Gerig's Mill eligible under Criterion D as well. As noted earlier, historic churches (and former church locations) often have associated cemeteries; especially when they date to early periods. Cemeteries tend not to be depicted on historic mapping until the first highway maps (KDOH 1937), when they can be seen next to many of the churches around Glasgow.

Based on the number, locations, and types of sites recorded in the SUA, several red flag areas were identified. The archaeological surveys that have taken place along or near waterways in the SUA have identified numerous sites. The types of soils within the project area suggest moderate to high potential for deeply buried prehistoric or early historic sites to be located within the project area, especially in areas mapped as inceptisols or mollisols. As noted above, however, most of the archaeological sites that have been documented in Barren County are on, or very close to, alluvial soils. The alluvial soils associated with Beaver Creek, Boyds Creek, and their tributaries, have the potential to contain deeply buried prehistoric and early historic sites. These deposits tend to be on flat, farmable ground, and may have been disturbed by agriculture, erosion, and other development. At

present, 70 sites have been recorded within the SUA. Previous archaeological surveys have covered only 5.5 percent of the land within the SUA. This suggests that, at a rate of 1 recorded site per 18 acres surveyed, approximately 1,320 sites could be located within the SUA; probably much higher given the ready availability of prehistoric lithic resources and the high density of historic settlement.

### A Cultural Historic Resource Records Review for the Small Urban Area Study for the City Of Glasgow in Barren County, Kentucky

By: Trent Spurlock, MHP

Prepared by:

Cultural Resource Analysts, Inc. 151 Walton Avenue Lexington, Kentucky 40508 CRA Project No.: K16S002

Prepared for:

Bill Leopold Environmental Specialist Stantec 11687 Lebanon Road Cincinnati, Ohio 45241-2012 Phone: (513)619-6461

Email: Bill.Leoppold@stantec.com

#### **Project Background**

In January and February 2016, Cultural Resource Analysts, Inc. (CRA), conducted a cultural resource records review for the Small Urban Area (SUA) study for the city of Glasgow and the surrounding unincorporated area of Barren County, Kentucky. The review was conducted at the request of Bill Leopold, Environmental Specialist with Stantec. The study area is centered on Glasgow, the county seat of Barren County, and includes incorporated portions of the city and the unincorporated areas in the county surrounding the city. The cultural historic resources in the SUA study area are discussed in this report.

#### Cultural Historic Records Review

A search of records maintained by the National Register of Historic Places (NRHP) (available online at: http://www.nps.gov/nr/research/) and the Kentucky Heritage Council (KHC) (FY16\_2374) was conducted to: 1) determine if the SUA study area had been previously surveyed for cultural historic resources; 2) identify any previously recorded cultural historic sites that were situated within the study area; and 3) provide information concerning what cultural historic resources could be expected within the study area.

KHC geographic information system (GIS) data requested by CRA was returned on January 19, 2016, and researched by Trent Spurlock and Sarah Reynolds. The work at KHC consisted of a review of professional survey reports and records of cultural historic sites located in the SUA study area.

KHC records revealed that there are 4 NRHP-listed historic districts (three of which have boundary expansions), 291 contributing elements of the historic districts, 10 individually listed NRHP properties, and 64 previously surveyed properties that have an undetermined status in the KHC database located within the study area. Additionally, two sites were previously surveyed for a 1995 report but are not included in the KHC database and were not assigned KHC inventory numbers. These two sites were recommended eligible for listing in the NRHP in the 1995 report. It is not known if the SHPO concurred with this recommendation.

#### **Historic Properties and Districts**

One multiple resource area nomination has been completed for Barren County. This is not a nomination, per say, but is a cover document that includes contexts and information to determine the NRHP eligibility of associated properties. Individual properties or groups of properties may be listed in the NRHP under the cover document, thereby creating a multiple property submission. The Barren County Multiple Resource Area (MRA) NRHP nomination was completed in August 1982 by Jayne Henderson, Main Street Project Director for the Carrollton Development Corporation. The nomination focuses on five historic contexts for the county: early Barren County development (1799–1850); Glasgow's early settlement; religion; stabilization and late-nineteenth-century growth; twentieth-century growth in the county. Six sites located in the study area were individually nominated to the NRHP under the Barren County MRA NRHP. Additionally, two NRHP historic districts were listed in the NRHP under the Barren County MRA: the North Race Street Residential Historic District and the Southwest Glasgow Historic District (Henderson 1982).

Including those mentioned above, four NRHP-listed historic districts are located in the study area (Tables 1 and 2). All four of the historic districts are located in or near downtown Glasgow: the North Race Street Residential Historic District; the Southwest Glasgow Residential Historic District; the Glasgow Central Business Historic District; and the Ralph Bunche Historic District. The boundaries of three of these historic districts have been expanded since their original nominations: the North Race Street Residential Historic District (boundary expanded December 4, 2003); the Southwest Glasgow Historic District (boundary expanded December 4, 2003); and the Glasgow Central Business Historic District (boundary expanded February 11, 2004). Within these four historic districts are 291 contributing properties according to the KHC GIS database (KHC n.d.).

Table 1. NRHP Districts located within the Study Area.

District Name	Date Listed	Notes
North Race Street Residential Historic District	July 20, 1983	Listed under the Barren County Multiple
	-	Resource Area NRHP nomination
North Race Street Residential Historic District (Boundary	December 4, 2003	
Expansion)		
Southwest Glasgow Historic District	August 30, 1983	Listed under the Barren County Multiple
		Resource Area NRHP nomination
Southwest Glasgow Historic District (Boundary Expansion)	December 4, 2003	
Glasgow Central Business Historic District	February 11, 1993	
Glasgow Central Business Historic District (Boundary Expansion)	February 11, 2004	
Ralph Bunche Historic District	March 31, 2004

BNG 650	Monument	311 Public Square	Glasgow Central Business Historic District (Boundary Expansion)

The North Race Street Residential Historic District, including its boundary expansion, is located just northeast of downtown Glasgow's business district and extends to either side of North Race Street from near Front Street and extending to the northeast to near the intersection with Happy Valley Road. The North Race Street Residential Historic District was originally listed under the Barren County Multiple Resource Area NRHP nomination. Situated within the North Race Street Residential Historic District and its boundary expansion are 39 contributing resources dating from the early 1800s to 1940 according to the nomination. Only 21 contributing properties are listed in the KHC GIS database (Henderson 1982:7-7; Logsdon 2003b:7-1).

The Southwest Glasgow Residential Historic District, including its boundary expansion, is primarily aligned along South Green Street to the south and southwest of Glasgow's downtown commercial district. The Southwest Glasgow Historic District and its expansion also include portions of West Washington Street, West College Street, West Brown Street, South Liberty Street, and Leslie Avenue. The Southwest Glasgow Historic District was originally listed under the Barren County Multiple Resource Area NRHP nomination. The period of significance of the historic district ranges from the early 1800s to 1952 and the district contains 168 contributing resources, primarily residences, according to the NRHP nomination. The KHC GIS database lists 77 contributing resources in the historic district (Henderson 1982:7-9; Logsdon 2003d).

The Glasgow Central Business Historic District was listed in the NRHP in February 1993 with 16 contributing resources and an additional two resources that had been previously listed. The boundary of the NRHP-listed district was expanded in February 2004 with an additional 51 contributing resources for a total of 69 contributing resources, although two buildings and a portion of another included in the original nomination had been demolished by 2003. The KHC GIS database lists 64 contributing resources to the historic district. This historic district includes commercial, religious, and governmental structures exhibiting various architectural styles and forms dating from 1869 to 1960. The Glasgow Central Business Historic District and its expansion includes all four sides of the public square and portions of Main, Washington, Race, and Green Streets (Logsdon 2003a:7-2; Taylor 1992).

The Ralph Bunche Historic District, listed in the NRHP in March 2004 with a period of significance from 1900 to 1964, is located to the south of Glasgow's downtown business district. This historic district, an intact African-American community within Glasgow, is comprised primarily of dwellings dating from the 1920s to the 1950s. The historic district contains 153 contributing resources according to the nomination, although the KHC GIS database includes only 124 contributing resources. The Ralph Bunche Historic District is roughly bounded by Twyman Court, South Lewis Street, East College Street, and Landrum Street (Logsdon 2003c:8-1, 8-11).

# **Individually Listed NRHP Properties**

Ten individually listed NRHP properties are located in the study area (Table 3). These individually listed properties are scattered throughout the study area, with many situated in or near the incorporated portion of the study area. Six individually NRHP-listed properties are situated in Glasgow's central downtown. Fort Williams is located to the west of downtown Glasgow, and the Kentucky National Guard Organization Maintenance Shop is situated south of town. In the unincorporated portions of the study area are two individually listed properties: the Mayfield/Steffey House (BN 172) and Gullian Gerig's Mill (BN 239). Six individual properties within the study area were individually listed under the Barren County Multiple Resource Area nomination, including the Mayfield/Steffey House (BN 172); First National Bank (BNG 2); the Morris Building (BNG 9); the Third National Bank (BNG 11); the Old Post Office Building (BNG 19); and the First Presbyterian Church (BNG 77) (KHC n.d.).

Three multiple resource area nominations are associated with resources listed in the NRHP in the study area but are related to larger regions of the state than just Barren County. Gullian Gerig's Mill (BN 239) was listed in the NHRP on October 5, 1987, under the *Early Stone Buildings of Kentucky* –

Table 3. Individually Listed NRHP Properties located within the Study Area.

KHC	Resource Name	Date Listed	Associated Multiple Resources Nomination, if applicable
Resource			
Number			
BN 172	Mayfield/Steffey House	May 20, 1983	Barren County Multiple Resource Area NRHP nomination

BNG 160	Confederate Monument	July 17, 1997	Civil War Monuments in Kentucky, 1865-1935
BNG 161	KY National Guard Organizational Maintenance Shop	September 6, 2002	Kentucky's National Guard Facilities: 1931-1951

Outer Bluegrass and Pennyrile NRHP Thematic Resources Nomination completed by Carolyn Murray-Wooley in December 1984 (Murray-Wooley 1984). The second resource is the Confederate Monument (BNG 160) located in the Glasgow public square. The Confederate Monument was listed in the NRHP in 1997 under the Civil War Monuments in Kentucky, 1865–1935 NRHP Multiple Property Documentation Form that was completed by Joseph E. Brent in 1997 (Brent 1997). The third resource is the Kentucky National Guard Organizational Maintenance Shop (BNG 161) that was listed in the NRHP on September 6, 2002. This military facility was listed under the Kentucky's National Guard Facilities: 1931–1951 NRHP Multiple Property Documentation Form that was completed by Kate Carothers in April 1999. This cover nomination extends to national guard armories throughout Kentucky that are eligible for listing in the NHRP under Criteria A and C "for their contributions to state and federal defense, as a distinctive and recognizable type of construction" (Carothers 1999a:E-1; Carothers 1999b: F-2, F-5).

# Properties with Undetermined Status in the KHC Database

Sixty-four previously surveyed properties that have an undetermined status in the KHC database are situated within the study area (Table 4). The majority of these properties are located in the incorporated area of Glasgow within the study area. According to the KHC database, three of the dwellings have been demolished (BNG 16, BNG 91, and BNG 102). Additionally, two sites were previously surveyed for a 1995 report but are not included in the KHC database and were not assigned KHC inventory numbers. These two sites, the Glasgow Water Works and the William J. Bradford House, were recommended eligible for listing in the NRHP in the 1995 report. It is not known if the SHPO concurred with this recommendation (Powell 1995:I-1, V-1).

# Previous Cultural Historic Reports and Publications within the Study Area

Barren County Heritage: A Pictorial History of Barren County, Kentucky was located in the files of the KHC. The book, published in 1980 and including numerous photographs, was compiled by the South Central Kentucky Historical and Genealogical Society, Inc., with Cecil E. Goode and Woodford L. Gardner, Jr. serving as editors. Chapters in the book address the various towns and communities in the county, aspects of rural life, historic residences, social institutions such as schools and churches, economic engines over the county's history, and chapters about professions and military history (Goode and Woodford 1980).

In 1992 the Barren County Bicentennial Commission published *Then and Now: Barren County's Celebration* pamphlet in observance of Kentucky's Bicentennial celebration. Brief chapters in the publication address the history of the county, businesses, communities, residences, county and city government, agriculture, and various other industries and entertainment (Barren County Bicentennial Commission 1992).

			recommended eligible in 1995 report

Helen C. Powell of H. Powell and Company, Inc., completed the *Cultural Resource Survey of the Proposed Construction (of the) Glasgow Outer Loop From KY 80 to the Cumberland Parkway in Glasgow, Barren County, Kentucky* in 1995. The report was prepared for American Engineers of Glasgow, Kentucky. The purpose of the report was to survey for a proposed 6.15 mi half loop road that would extend from the east to west side of Glasgow along a northern route. The proposed project began at U.S. 68 west of Glasgow and curved to the north of the county seat ending at Salem Road southeast of the Cumberland Parkway. Twenty-six properties were surveyed for the 1995 report. No NRHP-listed properties were located along the proposed roadway corridor and three properties along the corridor were recommended as eligible for listing in the NRHP: the Reuben Harrison House (BN 208), the William J. Bradford House, and the Glasgow Water Works. The Reuben Harrison House (BN 208) currently has a NRHP status of undetermined in the KHC GIS database. The report also recommended the proposed project would have no effect on the three resources recommended eligible for listing in the NRHP. KHC site numbers and KHC historic resources survey forms were not completed for the surveyed properties for the 1995 report. The previous project area is located in the current study area (Powell 1995:I-1, V-1).

A May 1996 report entitled *Description of the Jackman Bank Barn* was completed by David and Donna G. Logsdon of Logsdon and Logsdon Architects for the Glasgow Airport Board. The barn, situated near the Glasgow Municipal Airport possibly near Martin Road within the current study area, was described as a timber-framed structure utilizing mortise and tenon and false plate roof construction. The lower level was partially below grade with dry-laid stone walls and served as livestock pens. The middle floor was for threshing grain and the upper story served as a loft. The two upper floors were clad in wood siding. In June 1996 David and Donna G. Logsdon of Logsdon and Logsdon Architects prepared the report entitled *Specifications for the Dismantling and Re-Erection of the Jackman Bank Barn for the Glasgow Airport Board*. The barn was to be re-erected at 238 Caveland Road south of Cave City to the west of KY 90 and outside the study area. The June 1996 report includes details and specifications for the dismantling and reconstruction of the barn such as site work, concrete, stonework and masonry, qualified contractors, procedures for dismantling and re-erection, carpentry work, and roofing specifications (Logsdon and Logsdon 1996a:1–4; Logsdon and Logsdon 1996b:1–9).

In 2000 Donna G. Logsdon of Logsdon and Logsdon Architects prepared the *Barren County Historic Sites Survey Proposal for the South Central Kentucky Historical and Genealogical Society and the KHC*. The proposal included a windshield survey, updating previously surveyed sites, and the documentation of approximately 500 sites that had not been previously identified, including photography and completion of KHC inventory forms (Logsdon 2000:3).

The Cultural Historic Survey for the Proposed Glasgow Outer Loop From US 68 to the Cumberland Parkway West of Glasgow in Barren County, Kentucky (3-7000.00) report was completed in February 2003 by Rebecca Lawin McCarley of CRA. The report was completed for T.H.E. Engineers, Inc. Seven sites were surveyed for the 2003 report, three of which were previously surveyed. One site (the Mayfield/Steffey House [BN 172]) was listed in the NRHP and two (BN 171 and BN 173) were recommended eligible for listing in the NRHP. The KHC GIS database has the NRHP status of BN 171 and BN 173 as undetermined. All three sites (BN 171, BN 172, and BN 173) are located in the current study area. The 2003 report's APE overlaps the west-southwest portion of the current study area to the north and south of the Cumberland Parkway (also currently known as KY 9008 or the Louie B. Nunn Parkway) (McCarley 2003:i).

The 2003 report entitled A Cultural Historical Resource Overview for Bowling Green Outer Beltline/I-66 in Warren, Barren, and Edmonson Counties, Kentucky (Item No. 3-66.00) was completed by Helen C. Powell of H. Powell and Co., Inc. The report was prepared for Bernadin and Lochmueller of Evansville, Indiana. One site (Old Zion Methodist Church [BN 185]) in or near the 2003 project corridor in Barren County was previously listed in the NRHP. The eastern terminus of the 2003 report's APE is near the intersection of Cumberland Parkway and Bishop Road, approximately .7 mi west of the current study area. Although the APE for the 2003 report and the current study area do not overlap, the 2003 report was included because of its proximity to the study area (Powell 2003).

Jayne H. Fiegel of Palmer Engineering, with assistance from Brian Orthel and Tamara Farnsworth, completed *A Cultural Historic Resources Report for the Reconstruction of KY 90 From the Cumberland Parkway to Metcalfe County in Barren County, Kentucky (Item No. 3-108.00)*. The report, prepared for the Kentucky Transportation Cabinet, Division of Environmental Analysis (KYTC DEA), was completed in August 2003 and revised in November 2003. The project involved the widening and reconstruction of approximately 10.9 mi of KY 90 from the Cumberland Parkway (aka Louie B. Nunn Parkway) to the Barren and Metcalfe County line. Fifty-seven previously unidentified resources were documented for the report along with six previously identified resources. The State Historic Preservation Officer (SHPO) concurred that sites BN 15, BN 337, BN 346, BN 352, BN 366, BN 367, BN 370, and BN 383 were eligible for, or were listed in, the NRHP. Site BN 337 is located in the study area and according to the KHC GIS database, BN 337 has an undetermined NRHP status. The APE for the 2003 project and the current study area overlap in the southeast portion of the study area from the Cumberland Parkway along KY 90 as it extends to the southeast (Fiegel 2003a; D. Morgan to D. M. Waldner, letter 16 January 2004, report files of the KHC, Frankfort, Kentucky; D. Morgan to D. M. Waldner, letter 11 May 2004, report files of the KHC, Frankfort, Kentucky).

In May 2003 Jayne H. Fiegel of Palmer Engineering prepared A Cultural Historic Resources Report for the Replacement of the Race Street Underpass in Glasgow, Barren County, Kentucky (Item No. 3-1059.00) for the KYTC DEA. The Race Street Underpass (BNG 68) in downtown Glasgow was built circa 1914 of stone arches and carries Water Street under Race Street. Adjacent to the underpass is the Kentucky Pants Company building (BNG 133), a contributing resource to the NRHP-listed Glasgow Central Business District. Also within the 2003 proposed project's APE is the Mitchell Building (BNG 131). The 2003 report recommends both the underpass and the Mitchell Building (BNG 68 and BNG 131) were contributing to an expanded Glasgow Central Business District. All three resources are currently contributing to the Glasgow Central Business Historic District according to the KHC GIS database (Fiegel 2003b).

In 2009 Ted Karpynec of TRC completed a draft report entitled *A Phase I Architectural Survey of the Proposed TVA East Glasgow 161-KV Transmission Line, Barren County, Kentucky* for the Tennessee Valley Authority (TVA). The proposed project included construction of a 5 mi 161 kV transmission line with steel poles from the existing Summer Shade-East Bowling Green electric line to the proposed Glasgow Electric Plant Board substation in Barren County. Situated in the proposed project's APE was the NRHP-listed Ralph Bunche Historic District and three previously surveyed resources (BN 50, BN 51, and BN 52). The SHPO concurred that sites BN 51 and BN 52 were eligible for listing in the NRHP. Site BN 50 was no longer extant. The 2009 proposed project's APE overlaps with the southeast and southern portions of the current study area, both north and south of the Cumberland Parkway. Site BN 52 is indicated as located in the current study area according to the KHC GIS database and has a NRHP status of undetermined. Other resources that were surveyed for the 2009 project and within the current study area include BN 509, BN 510, and BN 511, all with an undetermined NRHP status according to the KHC GIS database. The SHPO concurred that sites BN 509, BN 510, and BN 511 were not eligible for listing in the NRHP (Karpynec 2009; M. Dennen to T. Maher, letter 16 February 2009, report files of the KHC, Frankfort, Kentucky).

In 2009 the Form 620 Submission Packet, Glasgow III Telecommunications Tower, Glasgow, Barren County, Kentucky was competed by Patriot Engineering and Environmental, Inc., for Cumberland Cellular Partnership dba Bluegrass Cellular. The cultural historic portion of the report was prepared by Fred J. Rogers and R. Glen Payne, with contributions from Ginger M. Shank, of Preservation Services and Technology Group, LLC. One previously identified site (BN 208) could not be located during the survey and was assumed no longer extant. Two previously unidentified resources (BN 512 and BN 513) were located during the field survey and recommended not eligible for listing in the NRHP. The SHPO agreed with these recommendations. Resources BN 208, BN 512, and BN 513 have an undetermined NRHP status according to the KHC GIS database. The APE for the 2009 report overlaps with the northwest portion of the current study area in the vicinity of the Glasgow Municipal Airport (Rogers and Payne 2009; M. Dennen to L. R. Barrow, letter 15 June 2009, report files of the KHC, Frankfort, Kentucky).

In December 2010 Matthew D. McMahan of CRA completed the FCC Form 620 Submission Packet for the Proposed 162 Ft Glasgow FM Broadcast Transmitter Tower in Barren County, Kentucky for Broadcast and Communications Systems of Bowling Green, Kentucky. Within the .5 mi APE for the 2010 project, one previously identified site, BN 20, was surveyed. The SHPO agreed BN 20 was not eligible for listing in the NRHP. The APE for the proposed 2010 project does not overlap with the current study area but is located approximately .67 mi southeast of the southeast portion of the study area southeast of KY 90. Although the APE for the 2010 report and the current study area do not overlap, the 2010 report was included because of its proximity to the study area (McMahan 2010; M. Dennen to K. Hudson, letter 5 January 2011, report files of the KHC, Frankfort, Kentucky).

Kathy Martinolich of CRA completed the *Cultural Historic Resource Survey for the Proposed City of Glasgow Landfill Permit Modification in Barren County, Kentucky* in 2012 for Nesbitt Engineering, Inc., of Lexington, Kentucky. One previously identified site (BN 172), which is listed in the NRHP, was located in the proposed project's APE. Three additional cultural historic sites were recorded during the field survey (BN 589–BN 591) and were recommended not eligible for listing in the NRHP. The 2012 report recommended the John Mayfield House (BN 172) retained integrity and continued to be eligible for listing in the NRHP. The SHPO concurred with the recommendations for BN 172 (the John Mayfield House), BN 590, and BN 591 but requested additional information concerning BN 589, a residence that had been recently demolished. The APE for the 2012 proposed project overlaps the west-southwest portion of the study area just south of the Cumberland Parkway. The John Mayfield/Steffey House (BN 172) was listed in the NRHP in 1983 under the Barren County Multiple Resource Area NRHP nomination and according to the KHC GIS database remains listed in the NRHP. Resources BN 589–BN 591 have an undetermined NRHP status according to the KHC GIS database (L. Casebier to J. Wade, letter 21 November 2012, report files of the KHC, Frankfort, Kentucky).

# **Cultural Historic Records Review Results**

As indicated on the ARC GIS mapping, historic resources have been surveyed throughout the study area with many concentrated in the city limits of Glasgow. The majority of historic properties within the study area that are individually listed or contributing to NRHP-listed historic districts are located in Glasgow. The NRHP-listed historic districts are all located in the Glasgow city limits.

Numerous historic resources have been recorded in the rural areas of the study area. It would be expected that many more historic resources are located outside the Glasgow city limits, especially properties with outbuildings associated with agricultural operations. These rural agricultural properties may retain landscapes with intact integrity that could support large boundaries, if the sites are eligible for listing in the NRHP. Mid-twentieth-century residences are expected to be located in the rural portions of the study area as residents began building dwellings outside the central portion of Glasgow.

CRA recommends that any projects developed as a result of this SUA study should avoid impacts to the area's many known historic properties identified in this report. Additional cultural historic investigations also may be required to identify previously undocumented cultural historic resources in the vicinity of any such projects.
