

KYTC UTILITY COORDINATION TRAINING AND CERTIFICATION

COURSE INFORMATION

Registration is at 8:00am with class from 8:30am-5:00pm both days. On Day 2, the test will be given after the training.

Trainings will be held at the KYTC Conference Center located at 200 Mero Street in Frankfort, KY.

\$500 for KYTC
\$550 for Industry
\$250 Day 1 (informational purposes only)

In order to receive Utility Coordination Certification, registrant must attend both days and pass exam on Day 2.

CERTIFICATION RENEWAL

KYTC's training provides education on utilities and how they are coordinated with KYTC projects. If a registrant is seeking to re-qualify, they must attend the full day and successfully complete the certification exam within six months of their qualification's expiration date. This is a one-day renewal course.

This training provides education on utilities and how they are coordinated with KYTC projects. The first day provides a high level understanding of conducting utility coordination through a project's development process. The second day is intended for utility coordinators and is also a certification requirement for firms performing utility coordination and inspection duties. There is an emphasis on utility impact avoidance, minimization, and the coordination of remaining impacts through utility relocations for the accommodations of roadway construction.
