

KYTC Field Day

Thursday, September 5, 2024
8:00 a.m. - 4:00 p.m. Eastern Time

On Site Demonstration at the Nicholasville Bypass Project

See how Construction is utilizing Design modeling data on-site using digital tools and equipment

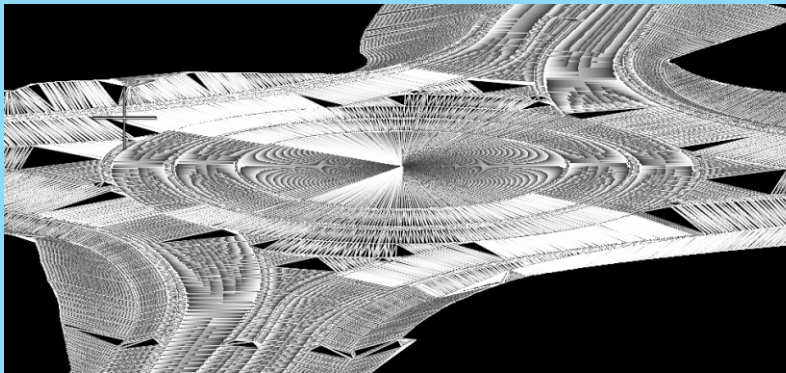

KYTC, in partnership with Trimble & Seiler Geospatial, plans to put on a field day **demonstration of surveying technology** on September 5. To showcase this, we will use the section of the Nicholasville Bypass that is currently under construction. This demonstration will allow participants to see how design files can be used to verify work in the field and how field measurements can be recorded for future use using the same type of equipment that is available to KYTC section offices.

The **demonstration is open to both project development and project delivery personnel**. Anyone planning to attend is encouraged to bring their own **PPE (hi-vis safety vests)**, although some extras will be available for use. Parking will be available at the location shown below. **Parking space is limited**, so carpooling to the site is encouraged.

This is a **“drop in anytime”** event. Attendees can expect a **30-60 minute** demo and hands on presentation.
