

7-22-10

2011-01 – Trimble – US 421 – 5-125.80

**QUESTION:** You have just posted the subject project in the July 2010 bulletin, which is described as a bike/ped study and a scenic walkway study in Milton, Kentucky. This posting lists prequalification in Bikeway Planning Services as a requirement. You have also just posted a memo describing a new prequalification category that covers Pedestrian & Bicycle Facilities Planning & Design. We assume that this new category is not a requirement for the subject project in this month's bulletin, but we want to make sure. Does the previous Bikeway Planning category apply to the Trimble County project, or do we need to seek prequalification in this new category in conjunction with our submittal?

**RESPONSE:** The prequalification requirement in the advertisement for services for the Milton Madison Bridge Bicycle/Pedestrian study is, and remains, Bikeway Planning. As companies apply for updates or new prequalification, we will use the new category and criteria. There is no need or requirement to have any different prequalification in order to respond to the Trimble/US421 5-135.80 advertisement.

**The above Q & A section is dealing with the 2011-01 Project Listing  
(Former name Bulletins)**
