QUESTION: Is the Traffic Forecasting service truly required on this project? This really limits the pool of consultants and would require teaming, although the project is smaller in magnitude than those which are typically appropriate for an effective teaming arrangement. If so, would it be required within the initial contract rather than a service that may be added during a later contract modification?

ANSWER: The *Traffic Engineering* and *Advanced Traffic Engineering Design & Modeling* prequalification services should be sufficient to address the initial requirements of this contract. The *Traffic Forecasting* requirement has been changed to a service area which may be added at a later date by a future contract modification. Please see [XV. Prequalification Requirements](#) of the revised RFP for more details.
