### 2014-12 Expedited Bridge Replacement

#### QUESTION:

There seems to be conflicting information for the bridge location of Item No. 3-1086. The bridge ID number, RFP map, photos in the Replacement Study, and Bridge Inspection Report seem to indicate the bridge just east of the KY664/KY1885 intersection. But the bridge location described in the RFP, mile point and map in the Replacement Study seem to indicate a location west of the KY664/KY1885 intersection. Could we get some clarification as to which bridge is to be replaced, the one to the east or the one to the west of the intersection?

#### RESPONSE:

The correct bridge is **107B00019N** at **mile point 4.55** that is **east** of the intersection.

- The RFP map (p. 14) is correct.
- The RFP project description (p.1) should read “east” instead of “west”
- The mile point in the Bridge Replacement Study is incorrect.
- The map in the Bridge Replacement Study p. 8 is correct.
- The map in the Bridge Replacement Study p. 11 is incorrect.
- Photos are correct.
