III. PURPOSE AND NEED

KY-15 is a primary arterial route in southeast Kentucky that connects the area to the Mountain Parkway, Hal Rogers Parkway, and US-119. The road is characterized by deficient roadway geometrics, inadequate clear zone, the presence of slower moving heavy trucks, restricted passing opportunities, and no access control. Over 9.5 miles of KY-15 has been reconstructed or is currently under construction in Breathitt and Perry Counties.

This section of KY-15 is bordered by a vertical rock cut on one side and the North Fork of Kentucky River on the other. The vertical rock face has deteriorated since construction, producing a rock fall hazard area. This hazard has become more serious in recent years, causing damage to the road, maintenance equipment, and travelers of this route.

The purpose of this project is to develop a plan to mitigate the rock fall hazard area that may conform with future KY-15 corridor projects.
