

RECOMMENDED
HIGHWAY
PLAN
2024-2030

Andy Beshear, Governor of the Commonwealth of Kentucky

JANUARY 2024

Andy Beshear
GOVERNOR

TRANSPORTATION CABINET

200 Mero Street
Frankfort, Kentucky 40601

Jim Gray
SECRETARY

TO: Recipients of the 2024 Governor's Recommended Highway Plan

On behalf of Governor Andy Beshear, the Kentucky Transportation Cabinet (KYTC) is pleased to present the 2024 Governor's Recommended Highway Plan. As Required by the Kentucky Revised Statutes, Chapter 176, the Governor's 2024 Recommended Highway Plan is the means by which major highway improvement projects for the next six years are recommended for consideration by the Kentucky General Assembly during the 2024 Legislative Session. The Governor's 2024 Recommended Highway Plan outlines scheduled highway project activities for FY 2024 through FY 2030.

The Kentucky Transportation Cabinet's mission is to provide a safe, efficient, environmentally sound, and fiscally responsible transportation system that delivers economic opportunity and enhances the quality of life in Kentucky. In developing Kentucky's 2024 Recommended Highway Plan, KYTC is using highway system performance data to address bridge and pavement needs determined through "asset management" scenario planning. Alongside the use of KYTC's SHIFT (Strategic Highway Investment Formula for Tomorrow) mechanism for ranking proposed highway mobility projects across the state, the 2024 Recommended Highway Plan is largely a data-driven document, seeking to balance priority existing system investments with needed safety, regional access, and economic development projects located across the Commonwealth.

The plan provides almost \$600 million/year in state and federal funding to help address the backlog of needed pavement repairs and deficient bridges. Through the SHIFT Process, KYTC worked with legislators, Area Development Districts (ADDs), and Metropolitan Planning Organizations (MPOs) to weigh the relative need of individual projects. The SHIFT prioritization tool used technical data analyses to produce relative scores for projects being considered for the Highway Plan and was augmented by those local discussions. The SHIFT input factored prominently in the determination of mobility projects to be considered for inclusion in this edition of the Highway Plan, but engineering judgement and KYTC's long-range vision and goals also contributed significantly to the ultimate prioritization of Highway Plan investments.

The 2024 Governor's Recommended Highway Plan is based on \$950 million in anticipated state revenues and \$7.7 billion in federal-aid highway program funding and required state matching funds from 2025 through 2030. Those federal dollars are based on the

Bipartisan Infrastructure Law (BIL) enacted by Congress in November 2021. The new federal law reauthorized existing federal transportation programs and provided numerous opportunities for competitive discretionary highway grant funding. It is KYTC's goal to continue to compete favorably for those grants to help fund some of our larger projects while also working closely with local governments to aggressively pursue grant funds for locally important projects.

It should also be noted that Calendar Years 2021 through 2023 have seen rapid increases in project costs across the transportation spectrum due to pandemic-related inflation and supply chain woes. Combined with the federal requirements for dedicated state matching funds for most federal projects, KYTC has also been experiencing fewer 100% state-funded project opportunities in recent years. The Highway Program is becoming increasingly federalized and those federal projects must ultimately be part of a fiscally balanced Statewide Transportation Improvement Program (STIP) for Kentucky.

Even with the fiscal and economic uncertainties associated with the production of this document, the 2024 Governor's Recommended Highway Plan provides a core group of projects designed to responsibly address infrastructure priorities across Kentucky for the next six years. The Kentucky Transportation Cabinet is proud to present this fiscally appropriate, regionally diverse, prioritized highway program.

Sincerely,

Jim Gray
Secretary

SYP
NARRATIVE

I. Introduction

Factors Affecting the 2024 Recommended Highway Plan

The development of the Biennial Highway Plan and the recommended projects for the four years beyond the upcoming biennium constitute Kentucky’s six-year highway plan. Highway system asset management and performance measures are used to prioritize projects involving pavement, bridge, and guardrail needs, while safety improvements, economic growth, traffic congestion, and new connectivity projects across the Commonwealth are prioritized through other methods. The costs of these investments are weighed against the anticipated annual state and federal funding and every effort is made to fiscally balance both the recommended Biennial Highway Plan and the out-four-years of the Highway Plan. In accordance with KRS 48.110 (6) (f) and 176.430, the Governor typically submits the Recommended Highway Plan to the Kentucky General Assembly in January of each even-numbered year, and as the chart below illustrates, the General Assembly deliberates over, and ultimately enacts, a highway plan on or before April 15 with the final published version of the enacted highway plan made available by KYTC in June of each even-numbered year.

The 2024 Governor’s Recommended Highway Plan is a practical action guide to support the Commonwealth’s goal of building a better Kentucky through transportation. The journey is the safest when the roadmap is the clearest and this plan proposes effective ways to invest state and federal dollars to maintain and build our transportation system. With all users in mind, Kentucky’s vision, mission, and goals for its highway system are as follows:

KENTUCKY’S TRANSPORTATION STRATEGY

Kentucky’s transportation vision and mission statements serve to guide the strategies employed to most effectively utilize state and federal revenue streams to deliver needed highway system improvements.

Kentucky’s Transportation Vision

Striving to be national leaders in transportation who provide transportation infrastructure and services for the 21st century that deliver new economic opportunities for all Kentuckians.

Kentucky’s Transportation Mission

To provide a safe, efficient, environmentally sound and fiscally responsible transportation system that delivers economic opportunity and enhances the quality of life in Kentucky.

Goal 1

Promote Safety in All Decision Making

Goal 2

Strengthen Stakeholder and Customer Relationships

Goal 3

Deliver Economic Opportunities and Enhance Quality of Life

Goal 4

Optimize Performance through People and Innovation

Goal 5

Nurture a Culture of Diversity and Inclusion

As KYTC recommends highway projects and programs that align with Kentucky’s vision and mission, it is critical that KYTC makes every effort to address its existing backlog of pavement and bridge needs while pursuing highway improvement projects that provide enhanced roadway safety, improved regional access, and increased economic opportunity for each geographic region of Kentucky.

The 2024 Governor’s Recommended Highway Plan is divided into three distinct focus areas to stress the commitment toward **Asset Management** (taking care of the existing roads and bridges), **Capacity Improvements** (providing new and wider roads to handle future traffic), and a “**ZVARIOUS**” category of funding necessary to honor past funding commitments and support various ongoing program activities. The following sections outline each of these focus areas.

Accordingly, the Governor’s Recommended 2024 Highway Plan is divided into three distinct focus areas to enable the Kentucky General Assembly to appreciate our commitment to the following sections outlined in each of these focus areas.

Asset Management and Performance:

KYTC’s Investment in Bridges and Pavements

(taking care of Kentucky’s existing roads and bridges)

Capacity Improvements:

KYTC’s Investment in Priority System Upgrades

(providing new and wider roads to handle Kentucky’s future traffic)

“ZVARIOUS” Funding:

KYTC’s Investment in Ongoing Program Activities

(A category of funding necessary to honor past funding commitments and support various ongoing program activities.)

ASSET MANAGEMENT AND PERFORMANCE:

KYTC's Investment in Bridges and Pavements

Asset Management Principles:

Kentucky's transportation network provides a critical connection between people and businesses within the Commonwealth.

To maintain its assets responsibly, KYTC has made a strong commitment to ongoing investments to preserve asset conditions and system performance as cost-effectively as possible. This approach reflects the Cabinet's strong commitment to its Transportation Asset Management (TAM) framework, which:

- Links planned investments to performance expectations.
- Extends the service life of the transportation system economically using low-cost treatments early in an asset's service life.
- Reduces agency risk and exposure from unplanned events such as flooding.
- Enhances system resilience.

KYTC's Performance-Based Approach

KYTC's Performance-Based Approach to managing its pavements and bridges relies on performance measures to monitor system performance, identify needs, and develop investment priorities. As part of this process, KYTC establishes goals that represent the desired state of good repair for its entire state-managed transportation system. These performance measures are also used to establish budget requirements and life cycle plans for pavement and bridge preservation. Since pavements and bridges represent the Commonwealth's largest capital investment and one of the largest components of Kentucky's public wealth, preserving these assets effectively is a top priority.

Best Combination of Treatments

The Six Year Plan Presents the Best Combination of Treatments for assets to manage the transportation network. KYTC allocates available funding to programs to maintain and improve pavement and bridge conditions based on an analysis of current condition and the estimated life cycle needs. Using life cycle planning, KYTC evaluated the best combination of treatments over an analysis period to extend asset service life as cost-effectively as possible. Life cycle planning recognizes that the balanced selection of treatments slows deterioration and minimizes risk to the traveling public.

Effective Pavement & Bridge Programs Balance Treatment Needs

63,000+
LANE MILES OF PAVEMENT

14,000+
BRIDGES

STATE-OWNED

\$53 Billion
Infrastructure
investment

7th LARGEST SYSTEM
IN THE NATION

*Maintaining
transportation assets
in a state of good
repair is pivotal for
the health, safety,
and economic vitality
of the state.*

INVESTMENT STRATEGY

While KYTC’s planned investment strategies make the best use of available funding, the level of funding is not adequate to achieve its desired state of good repair. Approximately 5% of the bridge inventory across the Commonwealth is currently in Poor condition. As time goes by, deterioration will continue, and that percentage will rise. KYTC has decided to be proactive on state-owned bridges by spending enough on replacements and rehabilitation to slow the rate of deterioration and to reduce the percentage of bridges in Poor condition. Improving/maintaining integrity of structures will reduce risk of weight restrictions that limit the movement of emergency response, snow-plows, freight, and other heavy vehicles. Pavement conditions are also expected to improve by implementing the life cycle strategies recommended in the TAM.

The Performance Investment Projects allow KYTC to Actively Manage Transportation Assets as conditions, economics, and events change the needs and benefits. These projects are aimed at investing available funding effectively to address short-, medium-, and long-term agency priorities to ensure that planned expenditures are aligned with the Cabinet’s strategic objectives.

B

CAPACITY IMPROVEMENTS:

KYTC's Investment in Priority System Upgrades

Complete Streets Project - Kentucky Street in Bowling Green

To assist in the prioritization of highway capacity and improvement needs, KYTC developed a prioritization tool entitled the Strategic Highway Investment Formula for Tomorrow (SHIFT). The SHIFT process is a data-driven, objective, and collaborative approach to developing a geographically sensitive, data-informed highway plan. SHIFT was developed by KYTC through concerted interaction with the Cabinet's planning partners. During each highway plan cycle, KYTC continually seeks to improve SHIFT and its associated processes, always working to ensure that it employs the most current and effective technical methodologies.

An effective highway program must support all areas of system performance in a strategic way. Effective performance management requires an understanding of the interconnection between performance areas. Maximizing asset conditions at the expense of needed investments in the other performance areas would not lead to the best overall system performance. The SHIFT program is designed to address the connection between multiple performance areas. This system is a needs-based approach used to rank potential highway improvement projects by KYTC highway district for inclusion in the Highway Plan. The SHIFT formula is an objective process that uses data on safety, congestion, asset management, economic growth, and benefit-cost ratios to rank potential projects relative to others.

KYTC starts with a list of projects previously identified by state and local transportation leaders (ADDs, MPOs, and KYTC Districts). To move forward, projects must either be sponsored by local transportation leaders or be committed projects (those listed in the previous Highway Plan). KYTC districts coordinate with MPOs, ADDs, and state and local officials to ensure their priorities are considered.

KYTC Highway Plan projects are scored by SHIFT based on seven key attributes:

The SHIFT process evaluates potential project types including large scale safety improvements, road widening, reconstruction, construction of new routes, and interchange improvements. Projects outside the SHIFT process include pavement and bridge asset management projects, rural and secondary road projects, maintenance projects, and a variety of projects scheduled to use federally dedicated funds.

SHIFT key attributes are scored based on the following: Safety scores are calculated using the project location crash history and current roadway characteristics. Congestion scores are based on vehicle hours of delay. The economic growth score considers increased accessibility to jobs by decreasing travel times as a result of the project. The benefit-cost ratio represents the calculated benefits derived from anticipated travel-time and crash reduction savings divided by the project cost. The asset management component considers bridge and pavement needs within the project limits addressed by the proposed project. The resilience measure prioritizes critical roadways to ensure the continued flow of people and goods. The non-motorized mobility component considers proposed project improvements that include dedicated facilities for pedestrians, bicyclists and other non-motorized modes of travel.

The SHIFT prioritization process acknowledges current highway funding shortfalls, and offers a reliable, balanced approach to project prioritization, selection, and scheduling to use when applying state and federal highway funding across Kentucky's highway system. It is important to acknowledge as KYTC continues to transition to institutionalized data-driven processes, other information is necessary to consider alongside SHIFT scoring to develop a recommended highway plan. These considerations include investments-to-date and associated impacts to communities, fulfillment of previous Highway Plan commitments, the recognition of new transportation priorities designated by Congress through the Bipartisan Infrastructure Law, and completion of significant highway and transportation corridors across Kentucky.

“ZVARIOUS” FUNDING:

KYTC’s Investment in Ongoing Program Activities

The “ZVARIOUS” section of the Highway Plan is a long-standing element of KYTC’s biennial presentation of highway needs to the Kentucky General Assembly. In the early days of the Highway Plan, technology was limited and the way that these various program commitments were listed at the end of the alphabetical county-by-county listing of projects was to add a “Z” to the “Various County” identification for these programs. Over time, the “ZVARIOUS” heading has become accepted Highway Plan nomenclature.

Found under its own tab in this booklet, the **ZVARIOUS section of this Highway Plan** addresses programmatic needs and commitments, all designed to provide essential flexibility in implementing the upcoming biennial highway program.

Each of these activities is a critical part of KYTC’s annual highway construction program. The funds represented give KYTC the flexibility to react immediately to unanticipated bridge and pavement needs, as well as be in position to utilize federal and state funding as it becomes available for the indicated actions.

- » Emergency bridge repair and replacement funding
- » Anticipated federal funding for Intelligent Transportation Systems (ITS) activities
- » Anticipated annual Transportation Alternatives Program (TAP) funding
- » Anticipated annual Congestion Mitigation and Air Quality (CM) funding
- » Emergency pavement repair and rehabilitation funding
- » Statewide federal bridge inspection funding
- » Statewide federal Railroad Protective Devices (RRP) funding
- » Statewide highway project design funding to support the state and federal highway programs
- » Statewide replacement of bridge navigational lighting for safety purposes
- » Border State commitments to major river bridge repairs
- » Statewide rockfall and landslide mitigation and repair projects
- » Statewide rest area maintenance
- » Statewide initiatives to enhance truck parking at rest areas, welcome centers, and weigh stations
- » Statewide federal Highway Safety Improvement Program (HSIP) funding
- » Statewide federal and state funding for HSIP projects for highway safety near schools
- » Statewide funding for bridge scour mitigation activities
- » Statewide funding for the Kentucky-specific Americans with Disabilities Act (ADA) transportation plan implementation activities
- » Statewide funding for federal Carbon Reduction Program
- » Statewide funding for federal Protect Formula Program
- » Statewide funding for Electric Vehicles Charging Infrastructure Program
- » Annual federal payback commitments for GARVEE Bonds used to support previously authorized and upcoming Highway Plan projects

II. Environmental Update

Kentucky's Anti-degradation Policy Implementation Methodology contained in 401 KAR 10:030 requires that all project development activities address the protection of water resources. The regulation recognizes the Kentucky General Assembly's authority for approval of projects in the highway plan. Projects are included in the highway plan only after a measured decision that the project enhances the quality of life, vitality of the Commonwealth and promotes the public good. The provisions of the amended regulation specify that inclusion of a project in the highway plan satisfies the requirements for conducting an anti-degradation socioeconomic benefit demonstration. Inclusion of a project is an indication of the General Assembly's conclusion that the reduction in water quality that may occur as a result of the project is acceptable given the socioeconomic benefits to be derived. Citizens who may be concerned about the potential of a project to affect water quality should provide information to their legislator for consideration when evaluating projects for inclusion in the highway plan.

Ecologists conducted a bat survey under a KYTC bridge that was repaired in 2021. The bridge was designed to create animal habitat for the gray bat, an endangered species. (Photo by Kaitlin Keane)

III. Revenue Estimates and Assumptions

The 2024 Governor’s Recommended Highway Plan is based on the most recent federal and state revenue estimates. State and Federal revenue estimates have been assumed to be “flat-lined” from FY 2026 through FY 2030. Federal highway programs received a much needed boost through the Congressional passage of a new federal transportation authorization act, the Infrastructure Investment and Jobs Act (IIJA) of 2021, now called the Bipartisan Infrastructure Law (BIL). As the chart below shows, the BIL reauthorized federal formula highway funding at amounts that exceeded the previous authorization act by approximately \$683 million over the five-year life of the new act. These additional funds are spread throughout the formula federal-aid highway programs with dollars escalating each year. The average five-year formula funding to Kentucky under the BIL is \$916.2 million compared to the previous five-year “FAST Act” average formula funding level of \$721.8 million annually. While the BIL did increase federal formula program size by \$194.4 million, or about 27%, much of this increase was offset by post-COVID transportation sector cost increases and inflation. The BIL also provided a significant infusion of Federal General Fund dollars targeted toward fixing America’s deficient bridges, including about \$88 million annually expected to be allocated to Kentucky.

Kentucky’s Formula Federal-Aid and Funding

In January 2023, President Joe Biden came to Covington, KY to present the Brent Spence Bridge Corridor Project with federal funding grants worth more than \$1.635 billion. Joining him were Kentucky Gov. Andy Beshear, Ohio Gov. Mike DeWine, Kentucky U.S. Senator Mitch McConnell, former Ohio Senator Rob Portman, and Ohio Senator Sherrod Brown.

While the increase in formula federal-aid highway funding is certainly welcome, it should be noted that three new formula programs were also added by Congress. The first is a carbon reduction program (“CARB”) to provide funding to states for activities that reduce carbon dioxide emissions from on-road highway sources. The second is a Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (“PROTECT”) program to help states improve the resiliency of transportation infrastructure. The third is a formula allocation to assist each state in developing an Electric Vehicle (EV) charging network.

The BIL also provided discretionary transportation grant programs to be administered by the United States Department of Transportation (USDOT). These grant programs require the states to formally apply for the funds with USDOT determining the grant winners. The following are some of the key grant programs through which KYTC has applied/will be applying for project assistance:

- » The Multimodal Project Discretionary Grant Program (MPDG) which includes the National Infrastructure Project Assistance grants program (Mega*), the Nationally Significant Multimodal Freight and Highways Projects grants program (INFRA*) and the Rural Surface Transportation Grant program (Rural)
- » The Rebuilding American Infrastructure with Sustainability and Equity (RAISE*)
- » The Bridge Investment Grant Program (BIP*)
- » The Electric Vehicle Charging and Fueling Infrastructure Grant Program
- » The PROTECT Grant Program (supplements the formula PROTECT Program)
- » The Safe Streets and Roads for All Grant Program*
- » The Wildlife Crossings Pilot Grant Program*
- » The Reconnecting Communities and Neighborhoods Grant Program*

**Denotes grant program from which Kentucky has received funding.*

While KYTC cannot predict with certainty that it will receive USDOT federal discretionary grant funding, it will actively seek federal grant funding at every opportunity. Some of the larger projects for which grant funding will play a major role are the I-71/75 Brent Spence Bridge Corridor Project in Northern Kentucky, the I-69 Ohio River Crossing at Henderson-Evansville, and the completion of the 4-lane Mountain Parkway corridor along a new alignment from Sayersville to Prestonsburg. Kentucky and Ohio received \$1.6 billion in BIP and Mega Grant funding for the Brent Spence Bridge project in 2022, and MPDG applications have been submitted this year for the I-69 Ohio River Crossing and the Mountain Parkway Extension projects. Most recently, Kentucky and Indiana also submitted a BIP Grant request for the I-69 Ohio River Crossing project.

The 2024 Governor's Recommended Highway Plan is based on using the BIL authorized formula federal-aid funding projections for Kentucky as provided by the Federal Highway Administration (FHWA). These authorized funding levels were used to develop the funding chart in Figure 1 and are subject to the annual federal appropriations process. Congressional appropriators could change these numbers slightly but, at the time of this writing, FHWA's formula funding calculations represent the best estimate of annual federal funding through Federal FY-2026. For the purposes of this highway plan, the Federal FY-2026 funding levels have been extended through Federal FY-2030 at the Federal FY-2026 level.

In preparing the 2024 Governor's Recommended Highway Plan, both federal and state revenue sources have been considered and the projected state and federal-aid highway funds made available to KYTC for major highway projects are displayed in Figure 1. Consistent with past trends and current forecasts, this edition of the Governor's Recommended Highway Plan is being developed on the basis of the most recent federal transportation authorization, the BIL Act, and state revenue estimates consistent with projections made by Kentucky's Consensus Forecast Group (CFG). The CFG is a committee of specially designated experts whose revenue forecasts are used by the Executive Branch and the General Assembly to craft the biennial state budget.

For this edition of the Governor's Recommended Highway Plan, FY-2025 through FY-2030 funding estimates total nearly \$8.8 billion, including \$6.4 billion in federal funds, \$1.4 billion in required state matching funds, \$114 million in local matching funds, and \$950 million in state construction funding expected to be available for state priority "SPP" projects. It is important to note that the ability of KYTC to provide the federally-required state matching funds and to undertake major state-funded projects is a function of available State Road Fund cash and requires the careful management of State Road Fund expenses. The Cabinet is committed to maintaining cash to a "floor" of \$100 million. The cash management process (as described in "Section II, Part B") currently yields daily cash balances for internal use and provides information for monthly meetings where estimated future cash outlays, including state matching funds for the federal-aid program, can be updated and project funding decisions can be refreshed. As KYTC has gained experience with this process, confidence has grown in both the methodology and the resulting cash flow decisions.

FIGURE 1

**FEDERAL AND STATE HIGHWAY FUNDING LEVELS AVAILABLE FOR OBLIGATION
FROM 2025 THROUGH 2030**

(\$8.8 Billion estimated by Kentucky Transportation Cabinet)

A. Federal Revenue Projections

The FY 2025 - 2030 federal revenue forecasts are based on expected formula federal-aid allocations from the BIL Act through FY 2026 and straight-line projections for FY 2027 - FY 2030. The use of straight-line projections for FY 2027 through FY 2030 is a FHWA approved methodology for estimating revenue in years beyond the period covered by the current federal authorization act. Expected state-by-state levels of federal-aid highway funding under the BIL Act were calculated by FHWA and the resulting category-by-category formula funding amounts were provided through “apportionment tables” for each federal fiscal year.

Figure 2 shows the anticipated federal funding category target amounts used to fiscally balance the 2024 Governor’s Recommended Highway Plan. The anticipated total formula federal-aid dollars and matching funds available to fund projects scheduled for FY 2025 through FY 2030 is expected to be about \$7.8 billion.

While the Governor’s recommended 2024-2026 budget and out-year assumptions include sufficient state highway funding to match formula federal-aid dollars through FY-2030, the opportunity to apply for BIL competitive grant programs with matching requirements will be limited by state funding availability. The Brent Spence Bridge Corridor project federal competitive grant award benefitted from the devotion of \$200 million in additional state monies through the General Fund in the 2022-2024 budget. The Governor’s 2024-2026 budget recommendation includes another \$300 million from the state General Fund to supplement the federal grant applications for the I-69 Ohio River Crossing at Henderson-Evansville, and the completion of the 4-lane Mountain Parkway corridor projects.

Another concern on the federal program side is the FHWA’s expectation of “fiscal constraint” for the federal-aid highway element of the highway plan. The federal portion of the Highway Plan is required by federal law to be fiscally balanced. Immediately upon completion of the state legislative process, KYTC begins preparing the new Statewide Transportation Improvement Program (STIP). The new STIP will incorporate the federal projects from the 2024 Enacted Highway Plan and will be submitted to the Federal Highway Administration (FHWA) for approval. Fiscal constraint for federal-aid highway funding is an important consideration for federal agencies, and the STIP is the document through which fiscal constraint is measured. Any state legislative efforts that result in over-programming of the federal element of the highway plan cannot be accommodated by the federal rules governing the STIP process. Failure to gain FHWA approval of the STIP would result in the suspension of the annual federal-aid program and its approximate \$1.06 billion annual funding for Kentucky.

- Note:**
1. Mandated GARVEE Bond Debt Service Payments for FFY 2025 through FFY 2030.
 2. Previously set-aside upfront "Toll Credits" are used as state match on GARVEE Bond Debt Service Payments as outlined within agreement with GARVEE Bond Holders and with FHWA.
 3. No remaining "Toll Credits" available for required state match on new federal funding obligations during FFY 2025 through FFY 2030.
 4. The FBP and FBP2 "Federal Bridge Program" funding is funding through National General funds, not through Highway Trust Funds.

B. State Project Funding Projections

A forecast of \$2.35 billion in state road fund cash is expected to be available to support new state-funded highway plan project obligations between FY-2025 and FY-2030. This amount is based on the projected state road fund revenue minus the non-federal state funded fixed budgetary costs and remaining expenditures of currently authorized projects not yet completed. The projected available state road fund cash is based upon a number of assumptions about project cost payouts, revenues accruing to the Road Fund, non-Six-Year Plan costs, state bond debt service payments, unexpected cost increases, and project change orders. Actual decisions about when to obligate state project dollars and how much state project work can be afforded at any point will be made by the Secretary of Transportation and based on monthly cash management evaluations received from KYTC’s Authorization Review Team (ART).

The ART consists of the Cabinet’s Secretary, Deputy Secretary, the State Highway Engineer and deputies, and the KYTC Budget Director. These individuals work closely together to monitor the state funding cash balance, meeting monthly to carefully evaluate actual expenditures for the prior month and planned expenditures for upcoming months relative to future fiscal capacity calculated from ongoing project and program cost projections. Every planned, state-funded project funding decision undergoes a rigorous two-part assessment in which the following questions are asked: (1) Is the project ready to move forward from the project development standpoint? (2) Can KYTC afford to move the project forward considering the cash flow implications of doing so? Only a satisfactory response to both questions permits a project to move forward in the funding process.

The ART provides approval for authorization of state and federal funding for preconstruction phases of projects, for awards of construction phases, system preservation activities, and other highway program activities. The ART takes the necessary steps to assess all planned program outlays and manage cash flow.

In summary, KYTC’s current projection of state road fund revenues available for state project obligations for the Highway Plan’s “SPP” projects and state matching funds for the federal-aid highway funding program are as follows:

FISCAL YEAR	State Matching Requirement	SPP Project Dollars
FY-2025	\$234 million	\$170 million
FY-2026	\$234 million	\$170 million
FY-2027	\$234 million	\$140 million
FY-2028	\$234 million	\$140 million
FY-2029	\$234 million	\$140 million
FY-2030	\$234 million	\$190 million
Total	\$1.4 Billion	\$950 Million

As shown in Figure 3, the current federal and state road fund debt service totals approximately \$1.3 billion over the life of the bonds (2024 through 2042).

FIGURE 3

Total Debt Service (principal and interest) is approximately \$1.3 billion over the life of the Bonds.

*Does not include Federal Fund and Road Fund debt service for about \$150 million in authorized but unissued debt for GARVEE bonds but does include Road Fund debt service for \$12.5 million in authorized but unissued debt for the KDLIS driver licensing program.

IV. Kentucky Mega Projects

Brent Spence Bridge Project

KYTC has worked alongside the Ohio Department of Transportation (ODOT) for many years to pursue funding for a project to provide relief from the traffic congestion that has been a major chokepoint for freight movement in the I-71/75 Corridor that crosses the Ohio River. With the recent passage of the BIL Act, the states were elated to see that Congress determined the Brent Spence Bridge freight chokepoint as a major infrastructure problem that the nation must solve. In 2022, KYTC and ODOT were provided \$1.6 billion in federal grant funding under the BIL Act to offset a large portion of the project's cost. The \$3.3 billion project will provide a companion bridge for the Brent Spence Bridge and rework the bridge approaches on both sides of the river to achieve the freight capacity so desperately needed at this location. Kentucky's share of the estimated cost of the Brent Spence Bridge Project is estimated at \$1.5 billion. The federal grant funding will cover \$778 million of KYTC's project costs with \$285 million in regular matched federal NH Funds, \$250 million of state General Fund money, and \$195 million of state matching funds to meet the current costs. There is \$150 million of GARVEE bonds in the 2024 Enacted Highway Plan to cover additional costs necessary to move this project toward construction using design-build techniques that have proven successful on other large Kentucky projects.

BRENT SPENCE BRIDGE CORRIDOR

I-69 Ohio River Crossing Project

KYTC is working closely with Indiana to fund the remainder of the new I-69 bridge and approaches at the Ohio River between Henderson and Evansville. Each state is currently engaged in building approach work on its respective side of the Ohio River with KYTC having “Section 1” under construction from the Henderson Bypass to US 60, and the Indiana Department of Transportation (INDOT) having just recently let to construction “Section 3” of the project which ties into existing I-69 at Evansville. It is anticipated that the Ohio River crossing (“Section 2”) will be ready to move to construction around the Year 2027, or sooner if federal grant funding is received. To that end, KYTC and INDOT have jointly applied for \$632 million in federal Multimodal Program Discretionary Grant (MPDG) and federal Bridge Investment Program (BIP) grant funding to help offset project cost requirements. The result of the federal MPDG grant selection process will not be known until until early 2024, with the BIP announcements not anticipated until spring 2024.

Kentucky’s share of the funding necessary to develop the river crossing, “Section 2”, component of the project is \$486 million. KYTC currently has pledged \$142 million of matched federal NH Funds and is looking to use a combination of significant federal grant funding, state General Fund monies, and GARVEE Bonds alongside Indiana’s cost share to complete the I-69 Ohio River crossing. Inflation, financing, and interest could increase these costs, but the states are committed to seeing the project through to completion. When the Ohio River crossing is complete, Kentucky and Indiana will have completed the construction of I-69 from the Tennessee Border all the way to Indianapolis.

Mountain Parkway Expansion

KYTC initiated work to 4-lane the Mountain Parkway from Campton through Salyersville (orange and green sections on the map below) in 2014. The final segments of that section of the parkway are currently under construction. Consideration has now shifted to extending the Mountain Parkway as a modern 4-lane facility eastward to Prestonsburg. The extension from Salyersville to Prestonsburg (see the blue line above) would complete the vision of a 4-lane highway connection all the way from I-64 at Winchester to the US 23 Corridor at Prestonsburg. The 2022 Enacted Highway Plan provided funding to initiate the Mountain Parkway Extension project, and a design-build team has been selected to develop the project. The project is to be located on new alignment north of the existing route at an estimated cost of \$403 million. KYTC has allocated \$117 million of matched federal NH Funds and expects to use a combination of a significant federal grant, state General Fund monies, and GARVEE Bonds to round out the costs for the project. KYTC has submitted an application requesting \$216 million of federal MPDG funding which would go a long way toward meeting the project’s cost requirement. The result of the federal MPDG grant selection process will not be known until early 2024.

Part of the Mt. Parkway Expansion

V. Historic Construction Awards

Over the past 30 years, KYTC’s ability to deliver needed construction projects for the citizens of Kentucky has ebbed and flowed in accordance with available state and federal funding dedicated to that purpose. As the chart below indicates, recent years have seen the calendar-year construction awards vary from year-to-year with the highest years representative of funding for major projects, most notably the Louisville and Southern Indiana Ohio River Bridges project in 2012. KYTC works to deliver a consistent annual program of lettings, thereby ensuring its appropriate contribution to Kentucky’s economy.

Figure 4

VI. Program Continuity

The 2024 Governor’s Recommended Highway Plan represents a major step toward achieving Kentucky’s transportation vision, mission, and goals. As we look ahead to both Congressional and state legislative expectations for our highway program, KYTC must protect past investments in the existing highway system by at least maintaining the total funding made available for roadway pavements and bridges. Using performance and data-driven pavement and bridge prioritization processes, \$3.2 billion of state and federal-aid funding is allocated in this plan for FYs 2025 through 2030 toward preserving Kentucky’s existing road and bridge infrastructure. This amount represents about 40% of the total funding expected to be available through the Year 2030, an amount consistent with the 2022 Enacted Highway Plan.

The remainder of the funds allocated for use in this highway plan upgrade the existing highway system by enhancing roadway safety, relieving traffic congestion, widening existing routes for freight accommodation, or completing roadway connections that will bring economic opportunity to the Commonwealth. In addition to the regular state and federal funding made available through the federal government’s recent enactment of the Bipartisan Infrastructure Law (BIL) and the state legislature’s enactment of the previous highway plan, the BIL Act created many new sources of competitive federal grant funding that Kentucky has demonstrated it is prepared to pursue. The 2024 Governor’s Recommended Highway Plan references pursuing those grant programs for significant funding for the construction of the I-69 Ohio River Crossing (ORX) project and the completion of the Mountain Parkway Extension in Eastern Kentucky. KYTC is using the experience gained from the successful application developed by Kentucky and Ohio through which the states were awarded a \$1.6 billion federal grant for the Brent Spence Bridge freight capacity improvement. There are many other projects across Kentucky that state and local governments are coordinating efforts to pursue federal grant funding in the months ahead as we all seek to bring those additional federal funds to Kentucky projects.

To quote Kentucky’s Transportation Strategic Plan, *“A good plan is like a road map - the journey is the safest when the road map is the clearest.”* The 2024 Governor’s Recommended Highway Plan presents a clear path forward that provides both essential highway system investments and enhanced future opportunities for the economy and quality of life for Kentucky’s citizens.

**HIGHWAY
IMPROVEMENT
PROJECTS LISTING**

KEY TO INTERPRETING THE INFORMATION PRESENTED FOR HIGHWAY PLAN PROJECTS

EXAMPLE:

KYTC PROJECT IDENTIFICATION NUMBER: **Adair** (COUNTY)
 ROUTE: **KY-55**
 BEGINNING AND ENDING MILEPOINTS (State Primary Roadway System): **From MP 15.900 To 16.000** (LENGTH (MILES))
 YEAR OF SIX-YEAR HIGHWAY PLAN & ITEM NUMBER FROM WHICH ABOVE ITEM NUMBER WAS DERIVED: **8-80003.00** (Item#), **2018** (Plan Year), **8-80003.00** (Parent#), **2018** (Parent Year), **0.10** (Length)
 DESCRIPTION OF PROJECT AND PROJECT WORK TYPE: **On NHS Description: YES**
Description: KY 55 NEW TURNING LANE AT BETTY'S OR COUNTRY COOKING. (18CCN)(2020CCR) (2022CCR)
Type of Work: SAFETY(P)
Bridge ID:
 FISCAL YEAR IN WHICH PHASE ACTIVITY SHOULD COMMENCE. FOR EXAMPLE, FY 2026 BEGINS JULY 1, 2025 AND ENDS JUNE 30, 2026 FOR STATE PROJECTS. FOR FEDERAL-AID PROJECTS, FY 2026 BEGINS OCTOBER 1, 2025 AND ENDS SEPTEMBER 30, 2026. **2030** (PHASE COST OR TOTAL COST IN SCHEDULED YEAR DOLLARS)
 STAGE OF PROJECT DEVELOPMENT:
 P= PRELIMINARY ENGINEERING/EARLY PUBLIC COORDINATION
 D= DESIGN
 R= RIGHT OF WAY
 U= UTILITY RELOCATION
 C= CONSTRUCTION
 YEAR OF SIX-YEAR PLAN: **2030**
