

# KENTUCKY

## Statewide Transportation Improvement Program

DRAFT

# STIP

Fiscal Years 2025 - 2028  
September 2024

Andy Beshear  
Governor  
Commonwealth of Kentucky

Jim Gray  
Secretary  
Kentucky Transportation Cabinet

Kentucky Transportation Cabinet - Division of Program Management

# Kentucky's

## Statewide Transportation Improvement Program for FY 2025-2028

The Kentucky Legislature enacted House Bill 265; House Bill 266; House Joint Resolution (HJR) 91; House Bill 1; and Senate Bill 91 during the 2024 Regular Session of the General Assembly. House Bill 265 is the Annual Budget for the Kentucky Transportation Cabinet and provides operating funds for FY 2025-2026. House Bill 266 is the Biennial Highway Construction Plan for FY 2024-2026. HJR 91 is the Highway Preconstruction Program Plan for FY 2027 through FY 2030, and these combined bills make up the Enacted 2024 Highway Plan. In addition, House Bill 1 outlines the \$450 million of General Funds for the High Growth Counties (HGC) listed in Enacted Highway Plan (Section 231), and House Bill 1 includes numerous other Kentucky projects to be funded with General Funds. Senate Bill 91 outlines the \$150 million of General Funds for the I-69 ORX project and \$150 million of General Funds for the Mountain Parkway Expansion project, contingent upon receiving USDOT MEGA Grants for each project (Sections 55, 56, 57 on page 19 of 29). The Transportation Cabinet's overall transportation program contained within the FY 2025-2028 STIP is consistent with the state and federal revenue estimates and assumptions and contains projects as identified within the 2024 Highway Plan.

# **STATEWIDE TRANSPORTATION IMPROVEMENT PROGRAM for FY 2025-2028**

## **I. Introduction**

The current Transportation Act, “Infrastructure Investment and Jobs Act” (IIJA), also known as the Bipartisan Infrastructure Law (BIL), was signed into law November 15, 2021, by President Joe Biden. This Act replaces the previous Act, Fixing America’s Surface Transportation Act (Fast Act). The IIJA/BIL is the largest long-term investment in our infrastructure and economy in the Nation’s history. It provides \$550 billion over fiscal years 2022 through 2026 in new Federal investment in infrastructure, including in roads, bridges, mass transit, water infrastructure, resilience, and broadband.

The IIJA/BIL provides the basis for Federal Highway Administration (FHWA) programs and activities through September 30, 2026. It makes a once-in-a-generation investment of \$350 billion in highway programs. This includes the largest dedicated bridge investment since the construction of the Interstate Highway System. New programs under the BIL focus on key infrastructure priorities including rehabilitating bridges in critical need of repair, reducing carbon emissions, increasing system resilience, removing barriers to connecting communities, and improving mobility and access to economic opportunity. Many of the new programs include eligibility for local governments, Metropolitan Planning Organizations (MPOs), Federally recognized Tribes, and other public authorities, allowing them to compete directly for funding.

In accordance with the IIJA/BIL, Section 11132 “Rural Surface Transportation Grant Program” of Title 23, United States Code (U.S.C.) was amended. The amended language includes specific details pertaining to the bundling of eligible projects in a rural area in the Statewide Transportation Improvement Program (STIP) for the Rural Surface Transportation Grant Program.

The IIJA/BIL states that “each State is required to carry out a continuing, cooperative, and comprehensive performance-based statewide multimodal transportation planning process, including the development of a long-range statewide transportation plan and STIP, that facilitates the safe and efficient management, operation, and development of surface transportation systems that will serve the mobility needs of people and freight (including accessible pedestrian walkways, bicycle transportation facilities, and intermodal facilities that support intercity transportation, including intercity bus facilities and commuter van pool providers) and that fosters economic growth and development within and between states and urbanized areas, and take into consideration resiliency needs while minimizing transportation-related fuel consumption and air pollution in all areas of the state, including those areas subject to the metropolitan transportation planning requirements of 23 U.S.C. 134 and 49 U.S.C. 5303.”

As required by Title 23, U.S.C., section 135, paragraph (g) (1): Each state shall develop a statewide transportation improvement program for all areas of the state. Such program shall cover a period of 4 years and be updated every 4 years or more frequently if the Governor elects to update more frequently. The STIP is to be developed for all areas of the state in cooperation with MPOs and local officials, shall be deemed consistent with the applicable State Implementation Plan

developed pursuant to the Clean Air Act (42 U.S.C. 7401 et seq.), shall contain primarily those project phases for which funding can reasonably be expected, and shall reflect the statewide priorities for programming and funds expenditure. The STIP is to be a truly multimodal plan, and the public must be afforded the opportunity to comment on the proposed program. FHWA and FTA reviews the STIP and issues a Planning Finding in accordance with 23 CFR 450.220 as per the requirements of 23 U.S.C. 134 and 135 of 49 U.S.C. 5303-5305.

The IIJA/BIL legislation will:

**1. Ensure every American has access to reliable high-speed internet.**

KentuckyWired is a state-run project constructing over 3,000 miles of high-speed, high-capacity fiber optic cable in every county in Kentucky. The KentuckyWired network is a "middle mile" project connecting government offices, universities, community colleges, state police posts, state parks, and other government institutions to the global internet. Anywhere along its path, Internet Service Providers will be able to connect to the network and bring faster, more reliable internet to every corner of the Commonwealth. Cellular providers will also be able to connect to KentuckyWired and build more cell phone towers throughout the state. Its 288-strand fiber optic cable will serve the needs of government agencies, universities, businesses, and citizens for decades to come.

In addition, as of January 2024, Kentucky has received \$1.3 billion for development and installation of high-speed internet. Kentucky has received \$1.1 billion through the Broadband Equity, Access, and Deployment (BEAD) Program to provide access to highspeed internet to everyone in Kentucky. Also, about 448,000 households in Kentucky are enrolled in the Affordable Connectivity Program.

**2. Repair and rebuild our roads and bridges with a focus on climate change mitigation, resilience, equity, and safety for all users.**

The legislation includes the first ever Safe Streets and Roads for All discretionary grant program to support projects to reduce traffic fatalities, which claimed nearly 43,000 lives in 2021. In fiscal year 2022, Kentucky was awarded 14 action plans totaling \$3,346,104 and one implementation plan in Louisville for \$21,416,800. In fiscal year 2023, the commonwealth was awarded five demonstration plans for \$1,033,344 and two implementation plans for \$29,220,000 – in Lexington and Louisville. All awarded implementation plans include a focus on improvements for pedestrians.

**3. Improve transportation options for millions of Americans and reduce greenhouse emissions through the largest investment in public transit in U.S. history.**

Based on formula funding alone, Kentucky expects to receive approximately \$394 million over five years under the Bipartisan Infrastructure Law to improve public transit across the state. This funding is anticipated to expand healthy, sustainable transportation options in Kentucky, where non-white households are 6.2 times more likely to commute via public transportation and 14% of transit vehicles in the state are currently past useful life. As of January 2024, Kentucky has been allocated \$151 million to improve public transportation options across the state.

**4. Build a national network of electric vehicle (EV) chargers.**

Through the National Electric Vehicle Infrastructure Program alone, Kentucky is expected to receive approximately \$69 million in formula funding over five years to support the expansion of electric vehicle charging in the state. To date, Kentucky has been allocated \$39.9 million to build a network of EV chargers across the state.

KYTC's Division of Planning has completed Electric Vehicle Infrastructure Deployment Plans in the summers of 2022 and 2023. A Request for Proposals (RFP) to solicit qualified entities to design, build, operate, and maintain Direct Current Fast Charging (DCFC) EV Supply Equipment Stations was open for 60 days through August 24, 2023. As a result of developed evaluation criteria, 24 DCFC sites were awarded on designated Alternative Fuel Corridors (AFCs), all interstates and parkways, in October 2023. A second RFP in February 2024 will aim to fill in gaps on AFCs to achieve build out.

**5. Make our infrastructure resilient against the impacts of climate change, cyber-attacks, and extreme weather events.**

The KYTC's Division of Environmental Analysis is leading the effort in to enhance infrastructure resiliency with support from the Kentucky Transportation Center at the University of Kentucky. Statewide assessments regarding the vulnerability of NHS assets to extreme weather and natural hazards, with an emphasis on flooding, earthquakes, sinkholes, and landslides have been completed. The output of these assessments has help develop a GIS-based data system that enables the Cabinet to better track impacts and costs to its infrastructure from natural disasters.

Additionally, these assessments led to the development of a Transportation Resilience Improvement Plan (RIP) for Kentucky that was approved by FHWA in 2023. The RIP will aid KYTC to better prepare for, respond to, and withstand future extreme weather and natural hazard events affecting the transportation system. This plan involves a risk-based assessment that factors the likelihood of the event, the severity of the damages, and the criticality of the transportation assets. Strategies included in this plan can be implemented to improve transportation resilience in support of KYTC's overall mission.

Kentucky was the first state in the Country to have a statewide transportation resilience plan approved by FHWA. With this plan, Kentucky will utilize federal funds through the PROTECT Formula Program to identify and prioritize investments toward repairing and rebuilding transportation assets that have been damaged or destroyed by natural disasters.

It should be noted that Kentucky's transportation programs are developed and implemented under strict legislative oversight at the state level. In particular, the highway program is governed by a section of state law that requires multiple considerations in highway program development. It also requires in-depth reporting to the state legislature of many program events such as monthly program authorizations, bid tabulations, construction project awards, change orders, and cost overruns. The KYTC's Highway Plan is updated biennially under these guidelines, and the first two years of the Plan, the "biennial element," is line-itemed into the state's enacted biennial budget. The STIP covers a period of four years (FY 2024-2027) and contains federally funded projects.

Regionally significant state-funded projects are also included to meet air quality conformity requirements.

Kentucky submitted its first formal STIP document in 1992. Since that time, the KYTC has been working with the Federal Highway Administration (FHWA), the Federal Transit Administration (FTA), MPOs, Area Development Districts (ADDs), and local governmental units to define and strengthen the cooperative processes put into practice by each Transportation Act. Requirements pertaining to management system implementation, public involvement in strategic planning, environmental justice, and statewide and metropolitan planning have all been carefully reviewed and processes identified to facilitate future transportation program development in Kentucky. These processes continue to evolve. This document demonstrates Kentucky's commitment to the development of a continuing planning process.

As noted, the FY 2024-2027 STIP contains all federally funded scheduled projects in Kentucky, including projects located within the metropolitan planning areas for the following urban areas with over 50,000 population: Bowling Green, Cincinnati-Northern Kentucky, Clarksville-Oak Grove, Evansville-Henderson, Huntington-Ashland-Ironton, Lexington, Louisville, Owensboro, and Radcliff-Elizabethtown. A project located within these metropolitan planning areas must be included in the appropriate MPO's TIP before it can be included in the STIP and before funding can be authorized. Since the Paducah urban area was only identified as having a population over 50,000 starting with the 2020 census, they are not required to adopt a TIP until December 29, 2026. Each TIP must be approved by the MPO's Policy Board.

The following TIPs are incorporated by reference into this document:

- Bowling Green TIP approved August 2023
- Cincinnati-Northern Kentucky TIP approved April 2023
- Clarksville-Oak Grove TIP approved October 2022
- Evansville-Henderson TIP approved March 2023
- Huntington-Ashland-Ironton TIP approved April 2023
- Lexington TIP approved September 2020
- Louisville TIP approved May 2023
- Owensboro TIP approved November 2022
- Radcliff-Elizabethtown TIP approved September 2021

When new MPO TIPs or Federal Lands TIP are finalized or existing TIPs are amended, the changes will be incorporated into the STIP document directly or by reference through the STIP amendment or administrative modification process. The KYTC recognizes the role of the MPOs in regional planning and fully supports STIP contributions resulting from MPO decision-making processes.

The Planning and Research Annual Work Program is in compliance with the provisions of 23 CFR 420.111 and includes programs and operations for planning activities in the KYTC and the Kentucky Cooperative Transportation Research Program (KCTRP). The Division of Planning is responsible for recommending, advising, and assisting the chief administrators of the KYTC in the development of the overall goals, policies, project priorities, and procedures relating to the total

transportation program. The KCTRP is concerned with the development and conduct of a comprehensive research program in cooperation with the U.S. Department of Transportation, Federal Highway Administration (FHWA) and is administered through the KYTC State Highway Engineer's Office.

In addition to research developed in cooperation with FHWA, the KCTRP performs other services for the KYTC. The scope of these services includes activities such as research studies and special investigations of various engineering and operation activities. The Research Program and Implementation Advisory Committee (RPIAC), headed by the State Highway Engineer and coordinated through the Research Coordinator, gives direction to the research program.

## **II. STIP Development**

Section 135 of Title 23, United States Code, includes a number of elements, which must be considered within a state's continuous transportation planning process. These planning process elements as outlined in Section 135 (d)(1)(A-J) ensure connectivity between transportation, land use, environmental issues, investment strategies, national energy goals, and other "big picture" components of a comprehensive planning process. The KYTC recognizes the planning process requirements outlined in Sections 135 (d) and (e), and is developing mechanisms for evaluating these items as it strives to implement Kentucky's transportation planning process.

Appendix A, Exhibit A-1, contains the state's certification letters, including a self-certification statement, which certifies that Kentucky's transportation planning process is being carried out in accordance with all applicable federal requirements. Copies of policies and acknowledgments regarding the following are on file in the Highway District Offices and the Central Office of Human Resource Management:

1. Political Activities
2. Conflict of Interest
3. Code of Ethics
4. Smoking
5. Drug-Free Workplace
6. Americans with Disabilities (ADA)
7. Workplace Violence
8. Work Performed Off the Rights-of-Way of State Maintained Roads and Highways
9. Anti-harassment/Anti-discrimination
10. Employee Dress
11. Internet and Electronic Mail Acceptable Use
12. Memo of Holidays for State Personnel
13. Kentucky Employee Assistance Program (KEAP)
14. Confidential and Sensitive Information
15. Translation Services

### **A. Planning Process Considerations**

#### **A-1. Agreements**

To ensure that the statewide transportation planning process is carried out in

coordination with other state and federal agency requirements, the KYTC has formalized agreements with the various transportation and resource agencies. These agreements have defined the roles of these agencies and governments and yield a stronger platform from which future STIPs will be developed. The KYTC hereby affirms its commitment to these agreements for the purpose of stabilizing the statewide planning process. Copies of the MPO agreements for the urban planning processes are included in the MPOs Unified Planning Work Programs submitted to FHWA annually. Copies of the agreements with the ADDs for the non-urban transportation planning process are maintained by the KYTC and available upon request.

## **A-2. Public Involvement Process**

The KYTC works with the ADDs and MPOs to ensure that public involvement processes are utilized that provide opportunities for public review and comments at key decision points. See Exhibit A-2 for a complete detailed description of the public involvement process.

## **A-3. Air Quality Considerations**

### **Conformity**

Projects contained in the FY 2025-2028 STIP and located in areas designated “nonattainment” or “maintenance” for air quality standards must be consistent with Kentucky’s State Implementation Plan (SIP) developed by the Kentucky Energy and Environment Cabinet’s Division for Air Quality (DAQ) pursuant to the Federal Clean Air Act. In the absence of a SIP, transportation conformity requirements still apply. Transportation plans involving areas designated as “nonattainment” and “maintenance” require a transportation conformity determination to ensure that planned projects will neither create nor contribute to violations of the National Ambient Air Quality Standards (NAAQS) and to ensure that the area will be able to meet the NAAQS in future years.

In Metropolitan Planning Areas (MPAs), the transportation conformity determination is conducted for each new TIP or MTP and amendment for the applicable MPO’s MTP. If acceptable, the project list of the shorter-range metropolitan area TIP must also be determined to be consistent with the MTP and in conformance with the SIP. STIP projects for “nonattainment” and “maintenance” areas outside an MPA, KYTC conducts the conformity analysis to demonstrate transportation conformity. All plans, TIPs, and projects are evaluated as required for transportation conformity in each area. Once conformity has been evaluated, USDOT will make a conformity determination for each area. Additionally, project level conformity is required in areas that have been designated as “nonattainment” or “Maintenance” for Particulate Matter 2.5 to ensure that the project does not create, or contribute to, an air quality standard violation.

### **Designations**

The 2015 8-hr Ozone Standard Final Rule was effective May 8, 2018, and the following apply to the following Kentucky counties:

- Boone, Campbell, and Kenton – Northern Portions designated as non-

attainment for the 2015 8-hr Ozone Standard, and they must also show conformity for the entire county for the 1997 8-hr Ozone Standard.

- Bullitt, Jefferson, Oldham – designated as non-attainment for the 2015 8-hr Ozone Standard, and they must also show conformity for the 1997 8-hr Ozone Standard

The 1997 fine particulate matter (PM<sub>2.5</sub>) NAAQS standard was officially revoked for transportation conformity purposes on October 24, 2016, for all Kentucky areas that were in “attainment” or “maintenance” as of that date. The planning requirement is still in effect. This meant the Kentucky counties of Boone, Boyd, Campbell, Kenton, and a portion of Lawrence were no longer required to do transportation conformity for the 1997 PM<sub>2.5</sub> standard. Kentucky counties of Bullitt and Jefferson were “nonattainment” at the date of revocation, which meant the counties are still required to do transportation conformity until redesignated. On April 7, 2017, Bullitt and Jefferson counties were redesignated to “maintenance” for the 1997 PM<sub>2.5</sub> standard. On the same date, KIPDA is no longer required to do transportation conformity for PM<sub>2.5</sub> or Ozone. The planning requirements are still in effect. All 120 Kentucky counties are in “attainment” for the 2012 PM<sub>2.5</sub> standard, which became effective April 15, 2015.

The 1971 SO<sub>2</sub> standard, which included Muhlenberg and a portion of Boyd Counties, was officially revoked in June 2010. At revocation, these counties had been redesignated from “nonattainment” to “maintenance.” In June 2010 the 2010 SO<sub>2</sub> standard was implemented, which included a portion of Campbell and Jefferson counties being designated as “nonattainment.” The portion of Campbell County has since been redesignated to “maintenance” for the standard, while Jefferson County still remains as “nonattainment.” No regional transportation conformity is required for the SO<sub>2</sub> pollutant. However, project level analysis may be needed.

#### **A-4. Congestion Mitigation and Air Quality Improvement Program**

The FY 2025-2028 STIP has been developed in full recognition of Title 23, which establishes a distinct funding source to address Congestion Mitigation and Air Quality (CMAQ) issues. FHWA sets aside funds for CMAQ. The funds are made available for projects within the identified designated air quality areas for the purpose of reducing traffic congestion and improving air quality. Funding for these projects is awarded through an application process and must be transportation related, must reduce emissions, and must be in an air quality nonattainment or maintenance area. Formerly designated areas are still eligible to apply for CMAQ funding. If the proposed project is located within an urbanized area, the sponsor submits applications to the MPO for their prioritization, which then forwards the applications and rankings to the KYTC's Office of Local Programs. The Governor selects eligible CMAQ projects to be funded as the federal CMAQ funding is available. FHWA makes an eligibility determination and the KYTC is responsible for the disbursement and management of the CMAQ funds. Application cycles may vary depending upon the availability of federal CMAQ funding. CMAQ projects are listed in Appendix A, Exhibit A-6.

## **A-5. Fiscal Constraint**

In accordance with 23 CFR 450.216(a)(5), the STIP is required to be financially constrained by year, include sufficient financial information to demonstrate which projects are to be implemented using current revenues, and which projects are to be implemented using proposed revenue sources, while the system as a whole is being adequately operated and maintained. In addition, with the passage of the enabling legislation by the Kentucky General Assembly to use "Grant Anticipation Revenue Vehicles (GARVEEs)" bond funds, the fiscal constraint calculations include the debt service payments for GARVEE bonds (Table 1). The FY 2025-2028 STIP Fiscal Balance Worksheets show anticipated funding levels (apportionments) and compares them against planned outlays (obligations) for each of the next four fiscal years (FY 2025 through FY 2028). The anticipated federal-aid highway funding and scheduled obligations for FY 2025-2028 are shown in Table 2. Also, included within Table 2 are the rolled-up totals for each of the "Infrastructure Investment and Jobs Act (IIJA) federal-aid highway funding categories for "Anticipated Apportionments" vs "Planned Obligations" and "Projected End of Fiscal Year Advance Construction." The anticipated federal transit funding apportionments and scheduled obligations for FY 2025-2028 are shown in Table 3.

The planned federal obligations are based upon the estimated project phase costs in projected "Year of Expenditure" dollars by using the "Cost in Today's Dollars" and using a 4 percent yearly inflation factor for design, utility, and construction phases and using a 5 percent yearly inflation factor for the right-of-way phase (FHWA accepted Financial Plans inflation factors). The FY 2025-2028 STIP federal funding level forecasts are based on the current IIJA Transportation Act, which was enacted by the United States Congress. The IIJA Transportation Act was signed into law by President Joe Biden on November 15, 2021 to provide over \$973 billion for fiscal years FY 2022 through FY 2026.

For the purposes of this edition of the FY 2025-2028 STIP, the funding levels for FY 2022 through FY 2026 are from the IIJA funding, and the anticipated funding for FY 2027 through FY 2028 are a straight-line extension of the FY 2026 funding levels. These state-specific levels of funding are broken down into individual program funding categories as determined by IIJA application to Federal Highway Trust Fund formulas.

Kentucky's federal highway program will be matched with a combination of "toll credits" and "state funding". Toll credits are attributed to Kentucky by federal highway law in accordance with calculations that consider past levels of state fund investment, such as state-sponsored toll roads, in the federal highway system. Toll credits do not generate cash and cannot be accounted as such; however, they do permit the KYTC the flexibility to use 100% federal funding on federal-aid projects. By doing so, the KYTC can allocate more of its own state funding for state-funded projects, yielding increased cash management controls.

The federal funding target amounts used to fiscally balance the FY 2025-2028 STIP, were based upon projected estimated apportionments of category-by-category federal-aid highway funding expectations of total federal-aid dollars available during FY 2022 through FY 2026 are from the IIJA funding, and the anticipated funding for FY 2027 through FY

2028 are a straight-line extension of the FY 2026 funding levels. The FY 2025 – FY 2028 IJA anticipated apportionments for Kentucky are approximately \$4.2 billion. Adding the carry-over federal funding from FY 2024, the total revenue expectation that supports projects in this edition of the STIP is approximately \$4.8 billion. The total of the scheduled federal-aid funding obligations for the FY 2025-2028 STIP is approximately \$4.7 billion.

The ratio of the scheduled federal-aid obligations to the scheduled federal-aid apportionments is 0.985 for the planned projects listed in the FY 2025-2028 STIP. KYTC will utilize the “KYTC State Funding Cash Management Balance” process to monitor daily cash balances to maintain fiscal constraint of the STIP. KYTC will use the cash management balance process to determine if an increase in the amount of state matching funds is required to reduce the amount of federal funding obligations for STIP projects. In addition, KYTC will use the cash management process to determine when to delay the conversion of federal Advance Construct (AC) federally funded projects. This will delay submittal of requests for federal-aid highway reimbursements down to individual federal-aid highway funding categories based upon actual available federal-aid apportionment. By strategically using supplemental state funding via the cash management process the overall combined ratio of planned obligations to anticipated apportionments will be approximately 1.00 as per federal fiscal constraint mandates. Thus, the KYTC FY 2025-2028 STIP is fiscally constrained.

As to planned obligations, the listing of projects in Exhibit A-5 outlines the scheduled projects for FY 2025 – FY 2028 sorted alphabetical by the county name of the location of project, by the SYP Item Number, by scheduled phase (P, D, R, U, and C) of the project. In addition, the project listing includes each scheduled project phase, the scheduled type of funding, the scheduled fiscal year of funding, and the corresponding scheduled amount of federal funding and required matching funds of each scheduled project phase. Also, noted in the list of projects are project phases listed as an “Illustrative Project” in the event that delays occur in project obligations, or if additional federal-aid highway funding becomes available, or special financing mechanisms becomes available beyond the anticipated planned apportionments. The “Illustrative Projects” may be moved into the fiscal constraint calculation in accordance with the process of scheduled projects being delayed, and as KYTC receiving new additional federal-aid highway funding or special financing mechanisms becomes available. Anytime the STIP is amended the KYTC conducts a “fiscal constraint” recalculation to compare the federal funding obligations to the planned obligations to assure that the federal program is “fiscally constrained.”

It is important to note that Kentucky utilizes the federal pre-financing provisions in programming federal funding through FHWA, defined as “Advance Construction” (AC). The federal pre-financing AC process is defined as “Advance Construction of Federal-aid Projects,” whereby the state may request and receive approval from FHWA that the requested project phase meets federal-aid regulations as being eligible for federal-aid funding for reimbursement of project expenditures, but the state elects to defer the use of the current available federal-aid apportionments and obligation authority to a future time period based upon actual project expenditures, using state funding to cover project expenditures and delaying request for reimbursement of federal-aid funding. By using the AC funding mechanism, this provides Kentucky the ability to maximize the use of federal-aid funding,

while at the same time accelerating the start of many federal highway projects, with the expenditures of each phase of the project being spread over several federal fiscal years.

The KYTC's Cash Flow Management Process for using the federal AC pre-financing process outlines that the goal of KYTC is keep the federal-aid highway program "Earned Unbilled" to less than \$150 million. The "Earned Unbilled" federal-aid highway funding amount is the amount of state dollars that have been used to pay vendors and project expenditures on federal AC pre-financed project phases. Through the AC conversion process, these projects will be converted to current federal-aid highway funding apportionments and obligation authority, and then a federal billing request will be sent to FHWA for reimbursement of eligible project expenditures. The current "Earned Unbilled" total for those projects, is under \$150 million. The AC conversion process is a continuous "KYTC State Funding Cash Management Balance" process throughout each fiscal year, to maximize the available state and federal-aid highway funds.

Through the remainder of Kentucky's FY 2024 AC conversion process and anticipated August Redistribution of Additional FY 2024 Obligation Authority, the projected end of fiscal year "advance construction" is \$650 million to \$1.2 billion; \$702 million to \$1.2 billion for FY 2025; \$678 million to \$1.2 billion for FY 2026; \$751 million to \$1.3 billion for FY 2027; and \$556 million to \$1.2 billion for FY 2028. However, the amount of "advance construction" will depend upon several factors including the timing of the actual congressional release of yearly federal-aid highway funding obligation authority and the programming of federal-aid highway funded projects near the end of each federal fiscal year, and the "End of Fiscal Year August Redistribution of Additional Obligation Authority. The availability to use the federal AC pre-financing depends on each state's cash balance of state funding to delay request for reimbursement of eligible expenditures of project phases having AC federal-aid funding as outlined within the approved FHWA-KYTC federal programming agreement for each associated federal-aid funded project.

The KYTC continually monitors the "net cash balance" of the federal AC pre-financed projects, and the results are part of the KYTC management decision of availability of federal-aid highway funding to begin new project phases outlined within the projects listed in the STIP. Through the "Cash Flow Management" procedures, using state funding from the state "Road Fund" cash balance until the federal share of these costs can be billed to the federal government, the KYTC can maximize the usage of both state road funds and federal-aid highway funding to deliver the overall state and federal funded transportation program.

It is also important to note that the KYTC utilizes innovative financing options permitted under federal transportation law. The 2008 General Assembly made available the ability to use \$231 million of GARVEE bond funds to support the Louisville Bridges project within House Bill 410. Also, during the 2010 Extraordinary Session, the General Assembly made available the option to use an additional \$105 million of GARVEE bond funds to support the Louisville Bridges project within House Bill 3. In addition, the option to use \$330 million of GARVEE bond funds to support the construction of the two US 68/KY 80 bridges over Kentucky Lake and Lake Barkley was made available within House Bill 3. Therefore, the Kentucky General Assembly has provided the KYTC the ability to use

\$1.1 billion in GARVEE bond funds, along with the approval of usage of federal-aid highway funding to provide debt service payments on the GARVEE bonds.

The GARVEE financing technique is permitted by federal law and involves the commitment of future federal-aid appropriations as leveraging for current year highway improvements. The primary benefit of such an arrangement is that major highway improvements can be purchased at today's prices and paid for with interest over a multi-year timeframe. The application of the GARVEE principle is very similar to home mortgage financing but is used to purchase major highway investments when "pay-as-you-go" is not the desirable course.

With the passage of the enabling legislation by the Kentucky General Assembly to use GARVEE bond funds, the KYTC has begun activities on the corresponding approved projects. The breakdown of the required federal-aid highway funding to cover the corresponding debt service for each of the GARVEE bond funded projects is shown under the "ZVarious" County item numbers as shown on Table 1, on page 13.

Each of these projects constitutes a necessary investment in Kentucky's future. The need to accommodate both people movement and freight movement is critical to Kentucky's economy in the years ahead. Without the GARVEE bond program, these highway projects would continue to be piecemealed over time, and likely not completed until beyond 2025. The innovative idea of GARVEE bonds, along with determined state leadership, will yield the kind of realistic solution necessary to reverse the "always behind" mentality of the past and help restore hope to Kentucky's transportation program.

The federal funding for the construction phases identified within the GARVEE bond program will be programmed through FHWA as Advance Construct (AC) projects. Again, as explained previously, the AC process is defined as "Advance Construction of Federal-Aid Projects," whereby the state may request and receive approval to construct federal-aid projects in advance of the apportionment of authorized federal-aid funds. The AC conversion of the federal funding for the GARVEE bond program will be distributed over a period of fourteen years, and will be in accordance with the GARVEE bond program Memorandum of Agreement (MOA). At the beginning of each federal fiscal year, federal programming documents for GARVEE bond projects AC conversions will be submitted to FHWA to use current federal-aid highway funding apportionments and current formula funding obligation authority. The total amount of the AC conversions will be the amount of federal funding required to cover the yearly debt service (principal, interest, and other costs incidental to the sale of eligible bond issue) as outlined within each of the approved GARVEE bond programs. The required NHPP and STP funding to cover the yearly debt service amount for the GARVEE bonds will be included in the end-of-year "Fiscal Constraint" determination, and will be included within the preparation of future STIPs and fiscal constraint calculations. The KYTC has set aside the required amount of "toll credits" for the matching funds for the federal-aid highway funding to cover the GARVEE bond debt service payments through 2028.

As noted, the list of projects within the FY 2025-2028 STIP includes federally-funded projects and the state-funded projects that are regionally significant to meet

transportation air quality conformity requirements, including the projects within the MPO areas. The projects located within each of the MPO areas included within the STIP are subject to approval and inclusion within the respective MPO's TIP and subsequent amendments for each of these MPO areas. In addition, like the FY 2025-2028 STIP, in accordance with 23 CFR 450.326(g) each MPO TIP is required to be financially constrained by year and include a financial plan that demonstrates which projects can be implemented using current revenues, and which projects are to be implemented using proposed revenue sources, while the existing transportation system is being adequately operated and maintained. Each of the MPO's TIP financial plans are developed in cooperation with the KYTC and the transit operators, based upon projected estimates of available federal and state funds within the MPO areas. Based upon the financial plan, the MPOs TIPs contain only project phases that funding can be reasonably expected to be available for each of the project's identified phase, funding source, fiscal year schedule, and the estimated cost.

As evidenced by Table 2 and Table 3, Kentucky's STIP is fiscally-constrained for the next four years. For informational purposes, the STIP also contains several state-funded projects, shown in Appendix A, Exhibit A-5 B, which are critical for SIP compliance and conformity determinations. As future allocation of state road funds are being considered for funding authorizations, each of these state-funded projects that are critical for SIP compliance and conformity determinations, will be included in the KYTC prioritization process for the utilization of available state road funds. The authorization and programming of all state and federal funding for the transportation program will be accommodated through the KYTC's cash flow management program. When the planned obligations exceed estimated apportionments by program category, unobligated previous apportionments will be used, funds will be transferred between categories, or flexible funding such as "Minimum Guarantee" will be used to close the program-specific funding gap to the extent that air quality conformity for the region is not jeopardized.

To reiterate, the KYTC's goal is to fund the federal-aid highway program as outlined in the 2024 Enacted Highway Plan as approved by the 2024 Kentucky General Assembly, unless Congress and FHWA direct otherwise. The project phases listed in no way constitute an effort to denigrate the importance of any project to the community or region it serves. The KYTC will work diligently to implement all STIP projects as quickly as funding limitations will permit.

Shifting projects between fiscal years of the STIP may be conducted when determined essential to the effective use of federal-aid highway program dollars. It is expected that such changes would normally be "minor," for example, advancing an Illustrative listed project phase to replace a project phase not able to meet the assigned schedule, with respect to STIP activity. If such adjustments involve actions determined by the KYTC to be "major" in nature (e.g., acceleration of a controversial project), then a formal STIP amendment would be pursued.

The operation and maintenance of existing transportation facilities within the state is a primary concern among Kentucky citizens and included within the FY 2025-2028 STIP are federally-funded system preservation projects. In addition to the federally funded system preservation projects, Table 2 contains a line-item outlining the FY 2025-2028 scheduled

state and local funding for none “Toll Credits” matching funds and for the KYTC’s operations and maintenance program.

Included within each MPO’s TIP is a financial plan that demonstrates how the TIP can be implemented, identifies funding resources from public and private sources, and identifies innovative financing techniques to finance projects and programs. The development of the projected estimates of funding resources is developed through cooperative efforts of the MPO, the KYTC, and Public Transportation Agencies. Also included within the financial plan are grouped project line-items for projected funding and obligations for operations and maintenance activities for existing facilities. Again, the projected funding resources were prepared through cooperative efforts of the MPO, the KYTC, and Public Transportation Agencies by utilizing expenditures data from the KYTC Fiscal Year Audit Reports for actual operations and maintenance expenditures within the MPO areas. (See Appendix B-Metropolitan Planning Organization (MPO) Financial Plans).

2024 STIP FISCAL CONSTRAINT CALCULATIONS  
ANTICIPATED APPORTIONMENTS VS SCHEDULED OBLIGATIONS

TABLE 2

<b>NOTES FOR ITEMS WITHIN FY 2025 - FY 2028 STIP FISCAL CONSTRAINT CALCULATIONS;</b>
<b>(1) THE APPORTIONMENT BALANCES USED TO BEGIN THE FISCAL CONSTRAINT CALCULATIONS AND THE APPORTIONMENT BALANCES SHOWN ARE AS OF JULY 1, 2024.</b>
<b>(2) FEDERAL FUNDS FOR FY 2025, FY 2026, FY 2027, AND FY 2028 ARE BASED ON THE IJJA TRANSPORTATION ACT ANTICIPATED APPORTIONMENT TABLES FOR FY 2022 - FY 2026, AND STRAIGHT LINED FOR FY 2027 THRU FY 2028.</b>
<b>(3) SURFACE TRANSPORTATION PROGRAM BALANCES INCLUDE MINIMUM GUARANTEE AND EQUITY BONUS LIMITATION ADJUSTMENT FUNDING. THE DEDICATED STP FUNDING FOR SHN, SLO, SLX, AND SNK FUNDING CATEGORIES, ALONG WITH OTHER FEDERALLY FUNDED PROJECTS WITHIN THE MPO AREA ARE FISCALLY CONSTRAINED WITHIN EACH OF THE CORRESPONDING MPO TIP'S FINANCIAL PLAN.</b>
<b>(4) TOLL CREDITS WILL BE USED FOR REQUIRED MATCHING FUNDS FOR AC CONVERSIONS FOR PROJECTS OBLIGATED PRIOR TO OCTOBER 1, 2019, AND STARTING IN FY 2020 KYTC WILL BEGIN USING STATE FUNDS AS MATCHING FUNDS FOR NH, STP, HPP, KYD, RRP, RRS, AND HSIP FUNDING. LOCAL MATCHING FUNDS WILL BE REQUIRED FOR CM, TAP, AND DEDICATED STP FUNDS IN THE MPO AREAS FOR FY 2020 THRU FY 2024.</b>
<b>(5) IF PLANNED OBLIGATIONS ARE GREATER THAN THE ANNUAL APPORTIONMENTS IN A GIVEN FISCAL YEAR, THE DIFFERENCE WILL BE MANAGED USING THE FEDERAL "ADVANCE CONSTRUCTION" MECHANISM. THE GOAL OF THE KYTC IS TO MANAGE THE YEARLY TOTAL OF FEDERAL "ADVANCE CONSTRUCTION" THROUGH THE KYTC CASH MANAGEMENT PROCESS AND BY INCREASING THE AMOUNT OF STATE MATCHING FUNDS TO REDUCE THE AMOUNT OF REQUIRED FEDERAL FUNDING. THE AMOUNT OF FEDERAL "ADVANCE CONSTRUCTION" WILL DEPEND UPON SEVERAL FACTORS INCLUDING THE TIMING OF THE ACTUAL CONGRESSIONAL RELEASE OF YEARLY FEDERAL-AID HIGHWAY FUNDING OBLIGATION AUTHORITY AND THE PROGRAMMING OF FEDERAL-AID HIGHWAY FUNDED PROJECTS NEAR THE END OF EACH FEDERAL FISCAL YEAR.</b>

## Grouped Projects

Often times after the identification and scheduling process of transportation projects included within the approved STIP and approved MPO TIPs, new transportation needs arise. In order to address these new transportation needs, the STIP and the MPO TIPs include “Grouped Project” lists outlining categories of types of projects that can be added to the STIP and TIP an Administrative Modification.

Outlined within Exhibit A-5: “Federally-funded ZVarious” is a list of federal funding for various anticipated “Grouped Projects” transportation needs, available to break out individual project funding via the Administrative Modification process for projects throughout the Commonwealth and MPO areas to address these unforeseen and unscheduled project activities.

The following Table 4 illustrates estimated annual statewide obligations by general grouped project category as well as available funding sources for each category. KYTC is responsible for maintaining fiscal constraint for federal-aid highway funds, and works closely with each MPO receiving dedicated STP funding to monitor fiscal constraint within each MPO area.

**TABLE 4**

GROUPED PROJECTS	FY 2025 (MILLIONS)	FY 2026 (MILLIONS)	FY 2027 (MILLIONS)	FY 2028 (MILLIONS)	Total (MILLIONS)	ZVARIOUS GROUP PROJECT FUNDING SOURCES ITEM NUMBER SERIES
Air Quality Improvements	18	18	18	18	72	99-219 SERIES
Bicycle, Pedestrian, and Transportation Alternative Improvements	12.5	12.5	12.5	12.5	50	99-195 SERIES
Roadway and Bridge Preservation, Rehabilitation, and Replacement	54.5	54.5	54.5	52.5	216	99-65; 224; 327; 337; 346; 369; 388; 510; 514; 1063; 1071; 1074; 2700;
Roadway Operational Improvements	30.2	34.2	46.6	50	161	99-66; 239; 518; 600; 601;
Safety Improvements	72	71	71	72	286	99-352; 911; 3011; 8500
<b>TOTAL</b>	<b>187.2</b>	<b>190.2</b>	<b>202.6</b>	<b>205</b>	<b>785</b>	

The listing of grouped project categories defined within each of the MPO TIPs are often more granular than the broad categories shown in the table and description of each of the categories. The following descriptions of “Grouped Projects” outlines the general grouped project categories and type of work within each of the categories.

**Air Quality Improvements** Air Quality Improvement projects consists of the construction congestion mitigation projects to help reduce congestion and improve air quality for areas that do not meet the National Ambient Air Quality Standards for ozone, carbon monoxide, or particulate matter (nonattainment areas) and for former nonattainment areas that are now in compliance (maintenance areas.) Projects that improve traffic flow, including efforts to provide signal systemization, streamline intersections, add turning lanes, improve transportation systems management and operations that mitigate congestion and improve air quality. Transit investments, including transit vehicle acquisitions and construction of new facilities or improvements to facilities that increase transit capacity. Alternative fuel projects including participation in vehicle acquisitions, engine conversions, and refueling facilities.

**Bicycle, Pedestrian, Transportation Alternative Improvements** Bicycle, Pedestrian, and Transportation Alternative Program Improvement projects consists of the construction/reconstruction of bicycle and pedestrian facilities, recreational trails, safe routes to school, community improvements such as historic preservation, and vegetation management, and environmental mitigation related to stormwater and habitat connectivity. Construction, planning, and design of on-road and off-road trail facilities for pedestrians, bicyclists, and other nonmotorized forms of transportation, including sidewalks, bicycle infrastructure, pedestrian and bicycle signals, traffic calming techniques, lighting and other safety-related infrastructure, and transportation projects to achieve compliance with the Americans with Disabilities Act. Construction, planning, and design of infrastructure-related projects and systems that will provide safe routes for non-drivers, including children, older adults, and individuals with disabilities to access daily needs. Conversion and use of abandoned railroad corridors for trails for pedestrians, bicyclists, or other nonmotorized transportation users. Construction of turnouts, overlooks, and viewing areas. Infrastructure-related projects.-planning, design, and construction of infrastructure-related projects on any public road or any bicycle or pedestrian pathway or trail in the vicinity of schools that will substantially improve the ability of students to walk and bicycle to school, including sidewalk improvements, traffic calming and speed reduction improvements, pedestrian and bicycle crossing improvements, on-street bicycle facilities, off-street bicycle and pedestrian facilities, secure bicycle parking facilities, and traffic diversion improvements in the vicinity of schools. SRTS projects must be within approximately two miles of a school for kindergarten through eighth grade as specified in SAFETEA-LU §1404. (23 U.S.C. 402 note)

**Roadway and Bridge Preservation, Rehabilitation and Replacement** Roadway and Bridge Preservation, Rehabilitation, and Replacement projects consists of the construction/reconstruction of roadways, resurfacing, restoration, rehabilitation, or preservation of roadways and bridges to extend the useful life of the existing facility, or replacement of existing facilities. Protection (including painting, scour countermeasures, seismic retrofits, impact protection measures, security countermeasures, and protection against extreme events) for bridges (including approaches to bridges and other elevated structures) and tunnels on public roads, and inspection and evaluation of bridges and tunnels and other highway assets.

**Roadway Operational Improvement** The Roadway Operational Improvement projects consists of design and construction of operational improvements and capital and operating costs for traffic monitoring, management, and control facilities and programs.

**Safety Improvements** The Safety Improvements projects consists of (A) any highway safety improvement project on any public road or publicly owned bicycle or pedestrian pathway or trail; (B) as provided in subsection 23 U.S.C. 148(g)(special rules for High-Risk Rural Road Safety and Older Drivers); or (C) any project to maintain minimum levels of retroreflectivity with respect to a public road without regard to whether the project is included in an applicable State strategic highway safety plan. Terms, including “highway safety improvement project” are defined in 23 U.S.C. 148.

## **A-6. Revisions to the LRSTP or STIP**

On various occasions, revisions may be required to the STIP. Revisions to a STIP may involve a minor revision or a major revision. On a case-by-case basis, the KYTC, FHWA, and/or FTA determines whether the revision is minor or major as per definition of “Administrative Modification” and the definition of “Amendment” outlined in 23 CFR 450.104. The KYTC, FHWA, and FTA will utilize applicable requirements and classifications of projects that are not considered to be of appropriate scale for individual identification in a given program year as outlined in 23 CFR 771.117 (c) and (d) and/or 40 CFR part 93.126 “Exempt Projects” and 93.127 “Projects Exempt from Regional Emissions Analysis.” These appropriately identified projects may be grouped by function, work type, and/or geographic area into the ZVarious programs and other program placeholders to determine if a STIP revision is required.

### **Administrative Modifications to STIP**

Administrative modifications are minor revisions to the STIP that include minor changes to:

- Projects/project phase costs.
- Funding sources of previously included projects.
- Project phase initiation dates.
- The delineation of projects in program placeholders which include:
  - Congestion Mitigation and Air Quality (CMAQ) projects
  - Transportation Alternatives (TA) projects
  - High-Cost Safety Improvement (HSIP-HCS) projects

An administrative modification is a revision that does not require:

- Public review and comment.
- Re-demonstration of fiscal constraint.
- A conformity determination (in air quality conformity nonattainment and maintenance areas).

For administrative modifications to the STIP, the official STIP mailing list will be utilized to distribute information pertaining to the revision. As STIP administrative modifications are made, each administrative modification will be posted on the KYTC web site. Each of these documents will be provided in an electronically accessible format with the means to search and print as appropriate.

### **Amendments to the STIP**

Amendments are revisions to the STIP that include major changes to a project included in the STIP. This includes a major change in:

- Project cost.
- Project/project phase initiation dates.

- Design concept or design scope (e.g., changing project termini or the number of through traffic lanes or changing the number of stations in the case of fixed guideway transit projects).
- The addition or deletion of projects, except those types of projects not considered to be of appropriate scale for individual identification as outlined in 23 CFR 771.117 (c) and (d) and/or 40 CFR part 93.126 “Exempt Projects” and 93.127 “Projects Exempt from Regional Emissions Analysis,” which are the grouped projects listed in the ZVarious programs and other program placeholders such as the Transportation Alternatives (TA) and Congestion Mitigation and Air Quality (CMAQ).

An amendment is a revision that requires:

- Public review and comment.
- Redemonstration of fiscal constraint.
- A conformity determination (in air quality nonattainment and maintenance areas).

For STIP amendments that have not undergone public involvement through the MPO process or the Highway Plan process, a 15-day public review period will be provided and public notice advertisements will be placed in statewide, significant regional, and demographically targeted newspapers. Selected newspapers will be identified through assistance from the corresponding ADDs and MPOs. In addition, other possible public outreach efforts targeted to the specific region of the state directly affected by the proposed STIP amendment may be required and will be determined on a case-by-case basis.

The proposed amendment will be posted on KYTC Central Office as well as the appropriate Highway District, ADD, and MPO websites for public review and comment. KYTC will make available to the public the description of project, location of project, proposed project phases, proposed type of funding, and scheduled fiscal year of each phase that KYTC wants to amend into the STIP. Also, KYTC will revise the “Fiscal Constraint” tables outlined in the STIP to reflect the required funding for the proposed new project versus available funding. KYTC will provide hard copies of the information and the information will be made available on the KYTC STIP web site. The public will be provided the means to submit written and electronic review comments on proposed STIP amendments.

At the conclusion of the 15-day review period, public comments will be addressed, additional public outreach may be conducted as necessary, and the final STIP amendment will be provided to FHWA and FTA for approval. For amendments to the STIP from areas within MPO boundaries, the public involvement process conducted for the respective MPO TIP will suffice as the required public involvement for the STIP.

As STIP amendments are approved, each amendment will be posted on the KYTC web site. Each of these documents will be provided in an electronically accessible format with the means to search and print as appropriate.

## **B. STIP Projects**

The FAST Act advocates that transportation planning processes be broadened to include the intermodal aspects of the nation’s transportation system. The IIJA/BIL continued and expanded on those provisions. The IIJA/BIL continues the National Highway Freight Program (NHFP) to improve the efficient movement of freight on the National Highway Freight Network (NHFN) as support several goals, to include investing in infrastructure and operational improvements that strengthen economic competitiveness, reduce congestion, reduce the cost of freight transportation, improve reliability, and increase productivity; improving the safety, security, efficiency, and resiliency of freight transportation in rural and urban areas; improving the state of good repair of the NHFN; using innovation and advanced technology to improve NHFN safety, efficiency, and reliability; improving the efficiency and productivity of the NFFN; improving State flexibility to support multi-state corridor planning and address freight connectivity; and reducing the environmental impacts of freight movement on the NHFN<sup>1</sup>.

The KY Freight Plan was originally published in September 2016 and amended in September 2017 with final FHWA approval in December 2017. The IIJA/BIL compliant KY Freight Plan was updated in 2022, with final FHWA approval in May 2023. Highway and multimodal projects were added with input from the Kentucky Freight Advisory Committee for Transportation (KY FACT) in accordance with requirements of the NHFP found in IIJA/BIL. The KYTC allocated 10% or approximately \$2 million per year of the NHFP for multimodal projects to improve the National Highway Freight Network. Specific activities the KYTC has undertaken to develop an intermodal planning process include integrating freight movement and modal access tasks into the Annual Work Program of the ADDs, identifying and discussing intermodal issues through the statewide transportation planning meetings, the identification of intermodal access projects and the dedication of specific staff to the freight movement issues. A four-tiered KY Freight Highway Network was developed using a data-driven process with ADD, MPO, HDO, and freight peer input.

Improvement projects and strategies resulting from the studies and prioritization process based on selected criteria, as well as the other pertinent data, will be considered for inclusion in the statewide transportation plan for future implementation.

In accordance with the IIJA/BIL requirements, the KYTC mission is “to provide a safe, efficient, environmentally sound and fiscally responsible transportation system that delivers economic opportunity and enhances the quality of life in Kentucky.”<sup>3</sup> Simply stated, the KYTC’s goal is to provide “safe and reliable roads, roads that lead to jobs,” and the 2024 Enacted Highway Plan and FY 2025-2028 STIP have been developed in support of that goal.

### **B-1. Planned Highway Improvements**

In developing the highway element of the FY 2025-2028 STIP, the KYTC relied heavily upon its ongoing project identification and scheduling mechanisms, particularly the long-range planning process. The KYTC projected federal and state funding levels were used in the development of the Recommended FY 2024-2030 Highway Plan submitted to

---

<sup>1</sup> <https://www.fhwa.dot.gov/bipartisan-infrastructure-law/nhfp.cfm>

<sup>3</sup> *The Strategic Plan*, KYTC Updated September 2021

the Kentucky General Assembly in January 2024. The Kentucky General Assembly by law has the right to remove, add to, or edit projects contained in the Recommended Highway Plan. The 2024 General Assembly approved Kentucky's 2024 Highway Plan (FY 2024-2030) in April 2024. The 2024 Highway Plan is the primary basis for the federal-aid highway element of the FY 2025-2028 STIP. Included within the 2024 Highway Plan are projects that are scheduled to use GARVEE bond funding as described within STIP Development; Section A-5: Fiscal Constraint.

To help achieve these goals, the identification of highway needs has been accomplished through in-house evaluations of highway performance and adequacy, meshed with input received from state legislators, local officials, MPO and ADD transportation committees, the general public, and from within our own agency's Central Office and District Offices. Each of these sources yielded valuable input for consideration in the development of the state's Long-Range Transportation Plan and the Highway Plan.

The KYTC considered technical data on the ability of candidate projects to improve safety, increase system reliability, and contribute toward enhancing regional economic attractiveness. Unfortunately, the needs of our highway system far outweigh available resources. The KYTC is working to improve the evaluation process for active and potential projects to ensure that every dollar we spend is used to address the most critical and cost effective improvements. In doing so, the KYTC can concentrate available funds on those projects that truly result in safer roadway conditions, better pavements and bridges, and improved local economies.

As the Highway Plan was developed, projects were selected using the Strategic Highway Investment Formula for Tomorrow (SHIFT) scoring process. SHIFT uses a data driven process including public input, project identification, project sponsorship, data verification, project prioritization and project selection. Criteria considered are congestion, benefit-cost, safety, economic development, freight and asset management. The Cabinet's long-range planning efforts have and will continue to maintain a stream of prioritized candidate projects for inclusion and advancement in Kentucky's Highway Plan. As the federally-required long-range planning process matures, the Highway Plan and STIP documents will be strengthened by the focus on longer-range program management considerations. It is expected that future editions of Kentucky's STIP will reflect a strategy for implementation resulting from more clearly defined longer-range transportation goals.

As outlined within the STIP Introduction, the FY 2025-2028 STIP is a planning document that covers a period of four years, and is updated every two years upon approval of the KYTC's Highway Plan by the Kentucky General Assembly. With the STIP being a planning document, the projects, schedules, and estimated costs identified within the FY 2025-2028 STIP are based upon the most current project information at the time of preparing the Highway Plan and STIP. As work progresses within each phase of the projects, the project team refines the project scope, schedules, and estimated costs to complete the project. The programming of project funding for project refinements will follow the STIP amendments/revisions process as described within STIP Development; Section A-6: Revisions to the LRSTP or STIP, along with the STIP end of fiscal year "fiscal constraint" recalculations.

The listing of FY 2025-2028 STIP projects is contained in Appendix A, Exhibit A-5. The KYTC will administer each of the projects listed unless clearly indicated in the project description as being handled otherwise. Included as part of the listing of projects, is the “Priority” column, which is a quick reference for project priority of the corresponding project. The project priority is listed as Safety, Reliability, New Routes, or Economic Development as defined by the following definitions:

Safety: Providing for the safety and security of motorized and non-motorized users who travel Kentucky’s highways is the KYTC’s highest priority. The FY 2025-2028 STIP includes several programs of projects that serve to address the safety needs on Kentucky’s highways. In accordance with the FAST Act, Kentucky has developed a Strategic Highway Safety Plan (SHSP) that combines all statewide enforcement, engineering, education, and emergency response issues into a single coherent plan. The “engineering” element of the SHSP is primarily addressed through the Highway Safety Improvement Program (HSIP), which funds infrastructure-related safety improvements. The “educational” and “enforcement” elements of the SHSP are addressed in the Highway Safety Plan (HSP), which funds behavioral-related safety improvements.

Reliability: The condition of roads and highways in the state is a primary concern among Kentucky’s citizens. Poor pavements detract from the driving experience, and road maintenance and resurfacing are the top transportation investment needs in our state. These issues certainly resonate with the KYTC, as we too see the value in protecting the infrastructure in which the public has entrusted to us.

New Routes: This is for the development of a roadway that does not currently exist.

Economic Development: This is for the reconstruction of major interchanges.

In an effort to provide a consistent, ongoing set of performance measurements for the maintenance condition of Kentucky’s state-maintained highway system, the KYTC has developed a Maintenance Rating Program (MRP). The purpose of the MRP is to assess maintenance activities as they relate to customer expectations, provide data to support needed performance improvements, ensure that the KYTC system preservation strategies are working, and to meet federal asset management requirements. Through the MRP, the KYTC has proposed some budgetary adjustments for the FY 2025-2028 STIP to increase funding for the maintenance and resurfacing programs in an effort to improve conditions on Kentucky’s roadways. There has also been a concerted effort to include essential, major pavement reconstruction projects in the FY 2025-2028 STIP. The KYTC’s desire is to improve overall pavement conditions and meet the public expectation that Kentucky’s roads will be kept in the best possible shape.

The process to track bridge condition has changed to match the industry standard of “Good”, “Fair”, and “Poor.” The three levels correspond to the condition of the three main structural elements: deck, superstructure, and substructure. If all elements rate above 7 on a 1 to 10 scale the bridge is rated as “Good.” If any element are rated 4 or lower the bridge is considered “Poor.” According to the KYTC inventory data, approximately 30% of

Kentucky's bridges are in Good condition, 63% are in Fair condition, and 7% are in poor condition.

Economic Development: Kentucky's future economy and congestion concerns: Highway congestion and its impact on economic development in Kentucky is very much a "relative" issue. While Kentucky does not have the overly oppressive highway congestion found in many of the nation's very large cities, there are times when congestion in our urban centers is just as frustrating to Kentucky drivers. Morning and afternoon "rush hours" create traffic problems on many of our city streets, urban beltlines, and metro area interstate highway arteries. Additionally, "just in time" delivery schedules have created "rolling warehouses" on many of Kentucky's rural interstates, resulting in truck percentages of 50% in some instances. Such heavy truck volumes reduce levels of service on our major roadways, and create safety issues and driver frustration. As traffic and freight volumes increase in the years ahead, our existing highway network will become more and more constrained and potentially impact Kentucky's competitiveness in the global marketplace.

Each of the FY 2025-2028 STIP projects, whether identified with a purpose of safety, reliability, or economic development, truly has an effect on Kentucky's future economy and congestion concerns.

## **B-2. Highway Safety Improvement Program (HSIP)**

The HSIP is a core Federal-aid highway program, the purpose of which is to achieve a significant reduction in fatalities and serious injuries on all public roads. The HSIP is a federally-funded, state administered program that is legislated under 23 U.S.C. 148, 23 U.S.C. 150, and 23 U.S.C. 130 and regulated by 23 CFR Parts 924 and 490.

23 CFR 924.5 states: Each State shall develop, implement, and evaluate on an annual basis an HSIP that has the objective to significantly reduce fatalities and serious injuries resulting from crashes on all public roads. HSIP funds shall be used for highway safety improvement projects that are consistent with the State's SHSP (Strategic Highway Safety Plan). HSIP funds should be used to maximize opportunities to advance highway safety improvement projects that have the greatest potential to reduce the state's roadway fatalities and serious injuries.

To be eligible for HSIP funds, all highway safety improvement projects must:

1. Address Strategic Highway Safety Plan (SHSP) priority,
2. Be identified through a data-driven process, and
3. Contribute to a reduction in fatalities and serious injuries.

In addition, all highway safety improvement projects are subject to general requirements under Title 23 of the United States Code.

In general, non-infrastructure projects that promote the awareness of the public and educate the public concerning highway safety matters or enforce highway safety laws are not eligible for HSIP funds. However, eligible non-infrastructure projects include road safety

audits, improvements in the collection and analysis of data, or transportation safety planning activities.

Most projects originate from HSIP Initiatives outlined in the HSIP Investment Plan, which is based on the strategies listed in the SHSP. Further, projects in each HSIP Initiative are identified through Data-Driven Safety Analysis (DDSA) methodologies outlined in the Highway Safety Manual (HSM). Each year, DDSA methods are used to screen the statewide network for safety improvement opportunities in various HSIP Initiatives, such as High Friction Surface, Cable Median Barrier, Guardrail Installation, Roadway Departure, and Intersections. Low cost, systemic safety treatments are often implemented with the HSIP projects identified through network screening, but some systemic-only safety projects are implemented based on analysis of statewide trends and risk factors observed in the crash data.

Projects meeting the program's requirements listed above are submitted to FHWA for review and approval into the program. Upon approval of the identified projects, funding for the projects are initiated based upon statewide priorities for activities that are most likely to reduce the number of, or potential for, fatalities and serious injuries and upon available funding. An annual report is submitted to FHWA that describes the progress being made, assesses the effectiveness of the improvements, and describes the extent to which the improvements funded contribute to the safety goals.

As part of the HSIP report, the state must report annually on the safety performance measures identified later in this document.

### **Railway-Highway Crossings Program**

This program funds safety improvements to reduce the number of fatalities, injuries, and crashes at public grade crossings. The railway-highway crossing program will be conducted in accordance with regulations as outlined in the corresponding section of the FAST Act, Section 1108; and 23 USC 130.

The railway-highway crossings program funding level determined for each state is set aside from the state's HSIP amount. Activities funded under this program are also eligible for funding under the broader HSIP eligibilities. The federal-aid highway funding anticipated apportionments and planned obligations for the Railway-Highway Crossings railroad protective devices (RRP) and the railroad separation (RRS) projects are included within the HSIP – Safety categories in the Fiscal Constraint tables.

### **Highway Safety Plan (HSP)**

The purpose of the Highway Safety Plan (HSP) is to identify opportunities throughout the state regarding the behavioral aspects of highway safety, develop performance goals and objectives, and establish programs and projects to prevent serious injuries and deaths on Kentucky's transportation network. The federal funding is a combination from FHWA and the National Highway Traffic Safety Administration (NHTSA). The HSP is an integral part of Kentucky's overall Strategic Highway Safety Plan

(SHSP) as required by the FAST Act. Emphasis areas in SAFEKY – Kentucky’s 2020-2024 Strategic Highway Safety Plan – are as follows:

- a. Aggressive Driving
- b. Distracted Driving
- c. Impaired Driving
- d. Occupant Protection
- e. Roadway Departure
- f. Vulnerable Road Users

### Grants Management

Grants are a significant part of the HSP for law enforcement, communities, research and data. It takes a cooperative effort by many agencies to prevent deaths and serious injuries on our transportation system. Both FHWA and NHTSA provide federal funding that is dispersed to various agencies based upon the identified opportunities. National high visibility law enforcement mobilizations are conducted each year to specifically draw attention to safety belt usage and impaired driving. These are “Click It or Ticket,” and “Drive Sober or Get Pulled Over.” Our safe summer-driving state initiative is “Blue Lights Across the Bluegrass,” focuses on aggressive driving, but also encompasses other emphasis areas.

### Highway Safety Education Program

The Highway Safety Education Program (Education Branch) was created in 1994 as the educational arm of the Cabinet’s Safety Corridor Program. The Education Branch is now one of the two branches under the Division of Highway Safety Programs. Funding for these programs has come primarily from NHTSA. The Education Branch focuses heavily on community-based events to target the newest and youngest drivers to get them started in the right direction. There are many programs, including simulators that focus attention on different problem areas regarding highway safety. Below is a listing of these.

- a. Active in local highway safety committees
- b. Ghost Out
- c. Mock Crash
- d. Judgement Day
- e. Fatal Vision Goggles
- f. 3D Drunk and Drugged Driving Simulator
- g. Motorcycle Safety events
- h. Mature driving presentations

All of these programs focus on targeted areas of the state where data shows increased opportunities to prevent deaths and injuries, low safety belt usage, and high incidences of drunk or drugged driving.

### **B-3. Intelligent Transportation System (ITS)**

The KYTC has a variety of Intelligent Transportation System (ITS) programs both

operational and under construction throughout Kentucky. The Cabinet manages both regional (TRIMARC) and statewide Traffic Operation Centers (STOC). TRIMARC services Louisville and Northern Kentucky. The STOC provides traffic management services to the remainder of the Commonwealth. The City of Lexington operates an independent operation center. The Cumberland Gap Tunnel (CGT) Center provides traffic management, as well as other tunnel-related services. The Cumberland Gap Tunnel Authority operates for KYTC, but is independent from the State Transportation Operations Center (STOC).

The KYTC has implemented ITS projects in the Lexington, Louisville, Elizabethtown, Bowling Green, Richmond, Paducah, and Ft. Campbell areas. These projects include Dynamic Message Signs (DMS), cameras (CCTV), 13 Truck Parking Information Management Systems (TPIMS), dynamic signage, and advanced signalized intersection detection. The Cabinet is actively working on a Wrong Way Driver Prevention Project to prevent wrong way driving by installing wrong way driver prevention technology across multiple limit access facilities in Louisville and Lexington in 2024/25. The Cabinet is currently updating the Statewide ITS Architecture for 2024.

The TRIMARC system has been expanded within the Louisville Metro area as part of the Ohio River Bridges project. KIPDA is using the reporting capabilities of TRIMARC. Other operational systems include the Road Weather Information Stations (RWIS) in 39 locations to provide Highway District Maintenance personnel, as well as others, with vital roadway weather information for critical purposes such as snow and ice maintenance.

Because of the requirements of 23 CFR 511 and compliance with the Real-Time System Management Information Program (RTSMIP), the KYTC has implemented a new real-time Roadway Advisory Map to process and publish data, GoKy.ky.gov. The partnerships with the Cabinet's District Offices, Transportation Operations Center in Frankfort, Division of Maintenance, Kentucky Vehicle Enforcement, WAZE, and Kentucky State Police ensures the highest level of information provided to the traveling public.

#### **B-4. Maintenance and Traffic Operations**

The KYTC is responsible for ensuring that the State Road System is maintained and operated in a manner focused on the Cabinet's mission. The Cabinet's goal is to provide the highway user maximum safety and comfort with minimal travel interruptions. Table 2 contains a line-item list outlining the FY 2025-2028 scheduled state funding for the KYTC's operations and maintenance program, and Appendix B contains the MPOs Financial Plans, which includes a line-item list outlining the operations and maintenance program within each MPO area.

The annual state-funded Maintenance and Traffic Operations Programs are comprised of four major sub-programs: Roadway Preservation, Bridge Preservation, Roadside Environmental, and Traffic Operations.

The Roadway Preservation unit is responsible for maintenance on the approximately 27,629 miles of highways in Kentucky in the State Road System. This unit is responsible for routine upkeep such as pavement repairs, ditch cleaning, pavement resurfacing, drainage, guardrails and landslides. .

The Bridge Preservation Program performs bridge and tunnel inspections and load ratings of over 14,000 bridges on public roadways within the state and administers projects to repair, preserve and replace bridges on state-maintained roadways.

The Roadside Environmental Program provides upkeep and janitorial services at 22 rest area facilities and 4 truck rest havens across the state, along with the maintenance and upkeep of the various truck weigh stations located throughout the Commonwealth. The unit also administers contracts for statewide mowing, litter pickup and snow and ice activities. Snow and ice activities include contracts for salt, contract drivers and equipment.

The Traffic Operations Program is responsible for the installation and maintenance of electronic traffic control devices, including traffic signals, flashing beacons, LED-enhanced signs, school flashers, roadway lighting, navigational lighting, and aviation obstruction lighting on state-maintained highways. They also provide the development of design plans for electronic traffic control devices and the establishment of material specifications for items used in the installation and maintenance of these devices. Traffic Operations also establishes and maintains coordinated traffic signal systems to support the efficient movement of traffic. This program also administers the federally funded Highway Safety Improvement Program (HSIP).

In addition to the ongoing highway maintenance and traffic operations programs, the KYTC also budgets annual funding to resurface roads on the state road system. These funds are in addition to the monies funneled through the Cabinet's Rural and Municipal-aid Programs for improvements to county roads, city streets, and the state rural-secondary road system. Each of the rural and municipal-aid program components is accomplished through an ongoing dialogue with Kentucky's city and county governmental entities.

## **B-5. Transportation Alternatives Program (TAP)**

The Transportation Alternatives Program (TAP) was continued as a set-aside of the federal Surface Transportation Block Grant (STBG) program under the Bipartisan Infrastructure Law (BIL), with an increase in the size of the TAP Set-Aside. The set-aside funds a variety of smaller-scale transportation projects such as pedestrian and bicycle facilities, construction of turnouts, overlooks, and viewing areas; community improvements such as historic preservation and vegetation management; environmental mitigation related to stormwater and habitat connectivity; recreational trails; safe routes to school projects; and vulnerable road user safety assessments.

Funding for a state's Recreational Trails Program is taken off the top of the state's TAP apportionment unless the Governor opts out.

The remaining funds are divided, with 59% of the funding suballocated to sub-State

areas based on relative population size and 41% of the funding for use in any area of the state using a competitive selection process.

The funding suballocated to sub-State areas is distributed as follows:

- Urbanized areas with populations over 200,000
- Urbanized areas with populations of 50,000 to 200,000
- Urban areas with populations of 5,001 to 200,000 and;
- Areas with population of 5,000 or less.

The funding sub-allocated to areas with populations over 200,000 is managed by the Regional Metropolitan Planning Organization (MPO) and awarded through a competitive application process held by the MPO. The MPO awards projects that are then administered through the KYTC Office of Local Programs (OLP). The other funding categories are awarded through a statewide competitive selection process and also administered by OLP. All TAP projects require a 20% local match. Application cycles are typically held each year but are dependent on the availability of funds. As new project selections are made, the new projects will be incorporated into the STIP thru the STIP Administrative Modification process.

Transportation Alternatives Program (TAP) Projects are listed in Appendix A, Exhibit A-7.

## **B-6. Recreational Trails Program**

The Recreational Trails Program provides funds to develop and maintain recreational trails for motorized and non-motorized recreational trail users. Funds are apportioned under 23 U.S. Code 206 (d). Funds may be used to provide and maintain trails, trailside, and trailhead facilities, including provisions to facilitate access for people with disabilities. Funds may also be used to acquire easements or land for trails. Trail uses are for hiking, walking, biking, mountain biking, skating, equestrian, access to canoeing, and ATVs.

The Governor of a state designates an agency to administer the program, which may be an agency other than the State Department of Transportation. The Kentucky Recreational Trails Program is administered by the Governor's Office, Department for Local Government (DLG).

Planned Recreational Trails Projects are included in Appendix A, Exhibit A-8.

## **B-7. Planned Public Transportation (Transit) Projects**

The Federal Transit Law (49 U.S.C. Chapter 53), is the basis for the federally-assisted public transportation programs. Program funds included for the rural portion of the state (Section 5311), for the small urban and urbanized portions of the state (Section 5307), for seniors and persons with disabilities in the state (Section 5310), for technical assistance and transit planning (Section 5303 & Section 5304), training for rural transit operators (RTAP), for capital bus and bus facilities (Section 5339) and discretionary capital investment grants

for heavy rail, commuter rail, light rail, streetcars, and bus rapid transit (Section 5309) grants. Projects that go beyond the Americans with Disabilities Act (ADA) and that provide transportation for the low income to work and training are included under the Section 5311, 5307 and 5310 programs. Local coordinated plans are required.

Section 5311 program funds are used for planning, capital, and operating assistance by local public bodies, nonprofit organizations, and operators of public transportation services. These funds are used to give people access to health care, shopping, employment, education opportunities, public services, recreation, etc. Public transportation systems in rural areas assume the responsibility of meeting these needs. Kentucky utilizes 15% of these funds for provision of intercity bus services.

Section 5307 program funds are used by transit operators in urbanized areas. The KYTC has approval authority for operating, planning and capital funding for operators in areas of 50,000 to 200,000 populations. These funds do not flow through the Cabinet for all areas, but the allocation is done by the Governor. Areas larger than 200,000 are allocated a specific grant amount by the FTA.

Section 5303 program funds are used for planning purposes by the MPOs and the KYTC. MPO funds are formula allocated by the KYTC and are identified for use in urbanized area unified planning work programs. Statewide transit planning for the rural areas is also funded with Section 5304 funds.

Section 5310 program funds are used primarily for capital purposes. Vans and other equipment critical to providing transportation services for seniors and individuals with disabilities are purchased through this program. Up to 45% of these funds may also be used for public transportation projects that exceed the requirements of the ADA, that improve access to fixed-route services and decrease reliance on complementary paratransit, and/or utilize alternatives to public transportation that assist seniors and individuals with disabilities. This funding can be operating or capital.

The Section 5339 program is a formula capital program that replaces, rehabilitates, and purchases buses and related equipment and constructs bus-related facilities for rural or urbanized public transportation systems. Section 5339(b) are funds that are available to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities, including technological changes or innovations to modify low or no emission vehicles or facilities. Section 5339(c) are funds that are part of the Low or No Emission competitive program that provides funding to state and local governmental authorities for the purchase or lease of zero-emission and low-emission transit buses as well as acquisition, construction, and leasing of required supporting facilities.

The Rural Transit Assistance Program (RTAP) is designed to provide training, technical assistance, research, and other related support services for rural transit operators.

In general, the KYTC receives applications from areas and agencies for the FTA program funds. These applications describe the needs for public transit funds (type of service needed, etc.), the funding required, and local matching sources. The KYTC allocates

the money based on several factors including potential ridership, area to be served, availability of services, etc. Each agency is accountable to the Cabinet for the allocated funds. Required monthly report submissions, site visits and compliance reviews, vehicle inspections, drug and alcohol testing, timely invoicing, and audits are among the monitoring activities the Cabinet performs.

With regard to transit project identification, the KYTC advertises annually for competitive proposals for Sections 5310, 5311, 5303, 5304, and 5339, as well as relying heavily upon past experience to develop the transit element of the FY 2024-2027 STIP. Since the passage of MAP-21 and under the current authorization, Infrastructure Investment and Jobs Act (IIJA), the KYTC has been cognizant of the many opportunities for combining highway and transit funding for individual projects and programs, and fully expects to take advantage of these opportunities in the future. Kentucky's MPOs are seriously studying transit options for addressing metropolitan traffic issues, and are engaged in the project prioritization efforts, which truly represent a multimodal approach to overcoming urban congestion.

Planned transit improvements are listed in Appendix A, Exhibit A-9.

## **B-8. Human Service Transportation Delivery Process**

Welfare reform legislation has greatly influenced changes in the Human Service Transportation Delivery (HSTD) process. This process/program utilized combined transportation resources of the Health and Family Services Cabinet and the Education Cabinet's Vocational Rehab and Blind Services Division to provide a coordinated network of transportation providers to provide safe, efficient, and accessible transportation for Kentucky's health, human service, and workforce program clients.

Medicaid, Vocational Rehabilitation, and Blind Services Division funds will flow from the two human service Cabinets to the KYTC for operating funds for providers and administrative funds for the KYTC to manage the program.

The Commonwealth is divided into fifteen Human Service Transportation Delivery Regions. This division was based upon items such as operating authority, fleet sizes and capacities of existing providers, and historical transportation utilization.

Through the use of a financial consultant, the Cabinets developed a "capitated rate" payment system, essentially a flat rate (a fee paid per member, per month). This will reward providers for operating efficiency, discourages over utilization, and significantly reduces fraud and abuse. Some parts of the program will be paid on a fee-for-service basis.

There will be one broker per region who will be responsible for securing transportation from private and public transportation subcontractors in order to guarantee transportation to non-emergency medical services for eligible recipients. The Kentucky Finance Cabinet will secure and contract with the transportation brokers on behalf of all the programs. The KYTC will monitor all other service requirements of the brokers. A Coordinated Transportation Advisory Committee (CTAC) includes representatives of each

of the different programs and will monitor the programs' interests in the network. The KYTC staff will monitor the brokers to make sure they operate as CTAC agrees. Details of each trip will be recorded by the broker and will be used to report program results to state and federal agencies.

In order to fully implement this program, two accomplishments were needed. One was getting legislation passed (HB 468 and HB 488) which requires brokers and subcontractors to meet safety standards, and the other was getting emergency regulations signed so this initiative could begin operation. This legislation has been passed and the emergency regulations are signed.

The KYTC's Office of Transportation Delivery receives funding from the Department of Medicaid to finance the transportation brokerage for Human Service Transportation Delivery non-emergency medical transportation. The Blind Services Division and Vocational Rehab reimburse the transportation broker at the local level, and funding does not flow through the Transportation Cabinet. Each funding stream meets the respective program requirements. Public Transit, Vocational Rehab, Blind Services Division, and non-emergency medical trips are coordinated at the transportation broker level. Non-Emergency Medical Transportation ridership is over 3.6 million annually.

Beginning August 1, 2020, KYTC's Office of Transportation Delivery begins a new partnership with the Kentucky Justice & Public Safety Cabinet's Department for Corrections. This partnership will provide transportation services to former inmates who are paroled or on probation to jobs, medical appointments, substance abuse treatment, and meetings with parole/probation offices. The goal in this new project is to help reduce the recidivism rate in Kentucky in overcoming barriers to success for these former inmates.

## **B-9. Planned Aviation Improvements**

The Airport Improvement Program (AIP) was established by the Airport and Airway Improvement Act of 1982 (Title V of the Tax Equity and Fiscal Responsibility Act of 1982, Public Law 97-248), and amended by the Airport and Airway Safety and Capacity Expansion Act of 1987, (Public Law 100-223), and the Wendell H. Ford Aviation Investment and Reform Act for the 21st Century of 2000 (AIR-21). Current legislation supports and provides funding for the following: (1) airport planning, (2) noise compatibility planning, and (3) noise compatibility programs as set forth in the Aviation Safety and Noise Abatement Act of 1979, (Public Law 96-193).

The funds for the AIP are distributed in accordance with provisions contained in the 2000 Act, as amended. In grant parlance, funds distributed by formula for use at a specific airport or in a specific state or insular area are referred to as apportionment funds. The remaining funds are for use at the discretion of the Secretary of the U.S. Department of Transportation, and are known as discretionary funds.

The federal apportionment level for Kentucky airports is difficult to project due to historical variances and the addition of onetime COVID monies (FY2020 - \$131m includes CARES; FY2021 - \$107m includes CRRSA/ARPA; FY2022 - \$73m; FY2023 - \$62m).

The entire amount and locations of spending using the FY2024 federal apportionment money in Kentucky is unknown at this time due to continuing distribution announcements but so far this year \$673,620 has been announced (see attached for detail). This decision is made at the FAA district and region level and these projects are typically not identified until late in the federal fiscal year. At present, there is no way to estimate the level of federal discretionary funding that may be made available during the upcoming biennium. Normally both federal apportionment and federal discretionary funding are matched using a 90% federal, 5% state, 5% local ratio. Historically the Kentucky Department of Aviation (KDA) reserves \$2,200,000 million cover the state's portion of the local share for General Aviation airports.

Current projects are identified in Appendix A, Exhibit A-10.

## **B-10. Kentucky's "Mega Projects"**

As the 2024 Highway Plan was developed, strong consideration was given to the funding needs associated with three (3) "Mega Projects" located in Kentucky. The three (3) "Mega Projects" in Kentucky are (1) the proposed Interstate 69 Ohio River Crossing project between Henderson, Kentucky and Evansville, Indiana; (2) completion of the widening of the Mountain Parkway from Campton through Salyersville; and (3) the Interstate 71/75 Brent Spence Bridge project in Northern Kentucky. The combined cost of these three projects is \$4.1 billion, with Kentucky's share of the combined cost being \$2.3 billion. Each of these projects are expensive projects, beyond the current financial means of KYTC without special financing mechanisms.

### **I-69 Ohio River Crossing Project**

KYTC is working closely with Indiana to fund the remainder of the new I-69 bridge and approaches at the Ohio River between Henderson and Evansville. Each state is currently engaged in building approach work on its respective side of the Ohio River with KYTC having "Section 1" under construction from the Henderson Bypass to US 60, and the Indiana Department of Transportation (INDOT) having just recently let to construction "Section 3" of the project which ties into existing I-69 at Evansville. It is anticipated that the Ohio River crossing ("Section 2") will be ready to move to construction around the Year 2027, or sooner if federal grant funding is received. The 2024 General Assembly under Senate Bill 91, Section 55, appropriated General Funds from the Budget Reserve Trust Fund Account (KRS 48.705) in the amount of \$150,000,000 in fiscal year 2023-2024 Biennial Highway Construction Plan for the I-69 ORX project contingent upon award of a federal Multimodal Project Discretionary Grant for the project. To that end, KYTC and INDOT have jointly applied for \$210 million in federal Multimodal Program Discretionary Grant (MPDG) and intend to apply for federal Bridge Investment Program (BIP) grant funding to help offset project cost requirements. The result of the federal MPDG grant selection process will not be known until mid-to-late calendar year 2024.

Kentucky's share of the funding necessary to develop the river crossing, "Section 2", component of the project is \$486 million. The 2024 Enacted Highway Plan has included \$142 million of matched federal NH Funds and is looking to leverage a combination of

significant federal grant funding, state General Fund monies, and GARVEE Bonds alongside Indiana's cost share to complete the I-69 Ohio River crossing. Inflation, financing, and interest could increase these costs, but the states are committed to seeing the project through to completion. When the Ohio River crossing is complete, Kentucky and Indiana will have completed the construction of I-69 from the Tennessee Border all the way to Indianapolis.

### **Mountain Parkway Widening**

KYTC initiated work to 4-lane the Mountain Parkway from Campton through Salyersville in 2014. The final segments of that section of the parkway are currently under construction. Consideration has now shifted to extending the Mountain Parkway as a modern 4-lane facility eastward to Prestonsburg. The extension from Salyersville to Prestonsburg (see the blue line above) would complete the vision of a 4-lane highway connection all the way from I-64 at Winchester to the US 23 Corridor at Prestonsburg. The 2022 Enacted Highway Plan provided funding to initiate the Mountain Parkway Extension project, and a design-build team has been selected to develop the project. The project is to be located on new alignment north of the existing route at an estimated cost of \$403 million. The 2024 Enacted Highway Plan has allocated \$104 million of matched federal NH Funds and expects to use a combination of a significant federal grant, state General Fund monies, and GARVEE Bonds to round out the costs for the project. The 2024 General Assembly under Senate Bill 91, Section 56, appropriated General Funds from the Budget Reserve Trust Fund Account (KRS 48.705) in the amount of \$150,000,000 in fiscal year 2023-2024 Biennial Highway Construction Plan for the Mountain Parkway Project contingent upon award of a federal Multimodal Project Discretionary Grant for the project. KYTC has submitted an application requesting \$116 million of federal MPDG funding which would go a long way toward meeting the project's cost requirement. The result of the federal MPDG grant selection process will not be known until mid-to-late calendar year 2024.

### **Brent Spence Bridge Project**

KYTC has worked alongside the Ohio Department of Transportation (ODOT) for many years to pursue funding for a project to provide relief from the traffic congestion that has been a major chokepoint for freight movement in the I-71/75 Corridor that crosses the Ohio River. With the recent passage of the BIL Act, the states were elated to see that Congress determined the Brent Spence Bridge freight chokepoint as a major infrastructure problem that the nation must solve. In 2022, KYTC and ODOT were provided \$1.6 billion in federal grant funding under the BIL Act to offset a large portion of the project's cost. The \$3.3 billion project will provide a companion bridge for the Brent Spence Bridge and rework the bridge approaches on both sides of the river to achieve the freight capacity so desperately needed at this location. Kentucky's share of the estimated cost of the Brent Spence Bridge Project is estimated at \$1.5 billion. The federal grant funding will cover \$778 million of KYTC's project costs with \$285 million in regular matched federal NH Funds, \$250 million of state General Fund money, and \$195 million of state matching funds to meet the current costs. There is \$150 million of GARVEE bonds in the 2024 Enacted Highway Plan to cover additional costs necessary to move this project toward construction

using design-build techniques that have proven successful on other large Kentucky projects.

## **B-11. FAST Act Grants**

### **Advanced Transportation and Congestion Management Technologies Deployment (ATCMTD)**

As outlined in the FAST Act funding fact sheets, “the Advanced Transportation and Congestion Management Technologies Deployment Program is to provide competitive grants for the development of model deployment sites for large scale installation and operation of advanced transportation technologies to improve safety, efficiency, system performance, and infrastructure return on investment.” For a complete detailed description and eligible activities, please see the following link to the FHWA FAST Act website: <http://www.fhwa.dot.gov/fastact/factsheets/advtranscongmgmtfs.cfm>

### **Fostering Advancements in Shipping and Transportation for the Long-Term Achievement of National Efficiencies (FASTLANE) Grants**

As outlined in the FAST Act funding fact sheets, “the Nationally Significant Freight and Highway Projects (NSFHP) program to provide financial assistance—competitive grants, known as FASTLANE grants, or credit assistance—to nationally and regionally significant freight and highway projects.” For a complete detailed description and eligible activities, please see the following link to the FHWA FAST Act website: <http://www.fhwa.dot.gov/fastact/factsheets/fastlanegrantsfs.cfm>

### **Surface Transportation System Funding Alternatives Program (STSFA)**

As outlined in the FAST Act funding fact sheets, “the Surface Transportation System Funding Alternatives Program is to provide grants to States or groups of States to demonstrate user-based alternative revenue mechanisms that utilize a user fee structure to maintain the long-term solvency of the Highway Trust Fund.” For a complete detailed description and eligible activities, please see the following link to the FHWA FAST Act website: <http://www.fhwa.dot.gov/fastact/factsheets/surftransfundaltfs.cfm>

## **B-12. Performance Measures**

Moving Ahead for Progress in the 21st Century Act (MAP-21) established and the Fixing America’s Surface Transportation (FAST) Act continued performance measurement and reporting requirements associated with safety, asset management, system performance, and Congestion Mitigation and Air Quality (CMAQ) performance. KYTC provided updated non-safety targets in February 2023. Safety targets are reported through the Highway Safety Plan submitted to NHTSA by June 30 each year and the HSIP Annual Report submitted to FHWA by August 31 each year starting in 2017.

The summary below includes performance measures for asset management, system performance, and congestion mitigation and air quality (CMAQ). The subject performance measures have been coordinated with the nine Metropolitan Planning Organizations as various times through the past year.

<b>Asset Management</b>	<b>Target</b>	
<i>Pavement Performance</i>	2 Yr	4 Yr
% Good Interstate	55.0%	60.0%
% Poor Interstate	4.0%	3.0%
% Good Non-Interstate NHS	35.0%	40.0%
% Poor Non-Interstate NHS	6.0%	5.0%
<i>NHS Bridge Performance</i>		
% Good Condition by Deck Area	31.0%	27.0%
% Poor Condition by Deck Area	3.7%	3.6%
<b>System Performance</b>		
<i>Level of Travel Time Reliability (LOTTR)</i>	2 Yr	4 Yr
% Reliable Interstates	95.0%	93.0%
% Reliable Non-Interstate NHS		91%
<i>Truck Travel Time Index (TTTR)</i>	1.3	1.35
<b>Congestion Mitigation and Air Quality (CMAQ)</b>		
OKI Regional Council of Governments		
Peak Hours of Excessive Delay (PHED-hrs)		9.0
Non-Single Occupancy Vehicles (SOV) Travel	18.5%	18.5%
Emissions Measure		
VOC	100	200
NO <sub>x</sub>	100	200

## **Safety**

The safety performance metrics include five measures – number of fatalities, rate of fatalities per 100 million vehicle miles traveled (VMT), number of serious injuries, rate of serious injuries per 100 million VMT, and number of non-motorized fatalities and non-motorized serious injuries. Annual state targets are established for these five performance measures through a collaborative effort involving the Kentucky Office of Highway Safety (KOHS) and the Highway Safety Improvement Program (HSIP). Performance measures are evaluated using a five-year rolling average and are reported to both NHTSA and FHWA. KOHS and HSIP share identical safety performance targets for the following metrics: number of fatalities, rate of fatalities, and number of serious injuries. HSIP includes two additional safety performance targets for rate of serious injuries and number of non-motorized fatalities/serious injuries.

Metropolitan Planning Organizations (MPOs) are also required to set targets for the five HSIP safety performance measures. To provide MPOs with flexibility, MPOs may support all the state targets, establish their own specific numeric targets for all of the performance measures, or any combination.

KYTC’s most recent target setting efforts focused on the 2024 calendar year and resulted in the following safety targets for Kentucky:

<u>Safety Performance Measure</u>	<u>2024 Target</u>
Number of Fatalities	764
Rate of Fatalities per 100 Million Vehicle Miles Traveled	1.575
Number of Serious Injuries	2,658
Rate of Serious Injuries per 100 Million Vehicle Miles Traveled	5.52
Number of Non-motorized Fatalities and Non-Motorized Serious Injuries	289

**Asset Management**

The asset management performance metrics include pavement condition and bridge condition for the National Highway System (NHS). Both metrics require 2- and 4- year targets. Each metric reports the percentage of the system in “Good” and “Poor” condition with minimum condition levels for both bridge and pavement condition. KYTC submitted its Transportation Asset Management Plan (TAMP) in December 2022 in accordance with MAP-21 and FAST ACT requirements. In June 2020, an implementation progress report was provided to FHWA in outlining KYTC efforts to align investments with the TAMP.

**System Performance**

Targets required to be set at the state level include Level of Travel Time Reliability (LOTTR) and Truck Travel Time Index (TTTI). LOTTR measures the percent of reliable occupancy-weighted vehicle-miles traveled on Interstates and non-Interstate National Highway System routes. TTTI indicates the additional factor of time beyond the average travel time that freight movers must factor into delivery times to ensure on-time delivery 95% of the time. Both metrics require 2- and 4- year targets.

**Congestion Mitigation and Air Quality (CMAQ)**

MPOs with an urbanized area population greater than 1 million that are in maintenance or non-attainment for air quality must report per-capita Peak Hours of Excessive Delay (PHED), percent non-SOV travel and CMAQ funded emissions reductions. Currently the only area in Kentucky subject to this requirement is the Cincinnati-Northern Kentucky urbanized area; the designated MPO for this area is the Ohio-Kentucky-Indiana Regional Council of Governments (OKI). In addition to the statewide targets, some targets are specific to the urbanized area and are reported by each state (Kentucky and Ohio).

Re: Delegation of Transportation Planning Approvals

Dear Secretary Gray,

I hereby delegate to you my approval authority for the following actions:

- Statewide Transportation Improvement Programs and Amendments;
- Metropolitan Transportation Improvement Programs and Amendments;
- Metropolitan Transportation Plans and Amendments;
- Designation of Metropolitan Planning Organizations; and
- Annual Certification of Public Road Mileage.

I authorize you to act on my behalf to ensure that Kentucky's transportation planning efforts are accomplished as directed by federal transportation law.

Sincerely,

## Transportation Planning Process Certification

In accordance with 23 CFR 450.220 (a), the Kentucky Transportation Cabinet hereby certifies that, to the best of its knowledge and belief, the federally required transportation planning process is being carried out in accordance with all applicable requirements of:

- (1) 23 U.S.C. 134 and 135, 49 U.S.C. 5303 and 5304, and this part;
- (2) Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
- (3) 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
- (4) Section 1101(b) of the FAST Act (Pub. L. 114-357) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in DOT funded projects;
- (5) 23 CFR part 230, regarding implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
- (6) The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37, and 38;
- (7) In States containing nonattainment and maintenance areas, sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) and (d)) and 40 CFR part 93;
- (8) The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
- (9) 23 U.S.C. 324, regarding the prohibition of discrimination based on gender; and
- (10) Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

Subject: Certification for Grants, Loans, and Cooperative Agreements

Dear Ms. Givan:

The Kentucky Transportation Cabinet hereby certifies, to the best of its knowledge and belief, that:

- (1) No federal appropriated funds have been paid or will be paid, by or on behalf of the Kentucky Transportation Cabinet, to any person for influencing or attempting to influence an officer or employee of any federal agency, a member of Congress in connection with the awarding of any federal contract, the making of any federal grant, the making of any federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any federal contract, grant, loan, or cooperative agreement.
- (2) If any funds other than federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any federal agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with this federal contract grant, loan, or cooperative agreement, the Kentucky Transportation Cabinet will complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.
- (3) The Kentucky Transportation Cabinet has required that the language of this certification be included in the award documents for all subawards at all tiers (including subgrants and contracts and subcontracts under grants, subgrants, loans, and cooperative agreements) which exceed \$100,000 and that all such subrecipients shall certify and disclose accordingly.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jim Gray".

Subject: Certification Regarding Debarment, Suspension, and  
Other Responsibility Matters – Primary Covered Transactions

Dear Ms. Givan:

The Kentucky Transportation Cabinet hereby certifies, to the best of its knowledge and belief, that it and its principals:

- (a) Are not presently debarred, suspended, proposed for debarment, declared ineligible or voluntarily excluded from covered transactions by any federal department or agency.
- (b) Have not, within a three-year period preceding this proposal, been convicted of or had a civil judgement rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (federal, state, or local) transaction or contract under a public transaction, violation of federal or state antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property.
- (c) Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (federal, state, or local) with commission of any of the offenses enumerated in paragraph (b) of this certification.
- (d) Have not within a three-year period preceding this application/proposal had one or more public transactions (federal, state, or local) terminated for cause or default.

ANDY BESHEAR  
GOVERNOR

GERINA D. WHETHERS  
SECRETARY

**MEMORANDUM**

**TO:** All Executive Branch State Employees  
**FROM:** Gerina D. Whethers, Secretary  
**DATE:** August 23, 2021  
**SUBJECT:** Drug-Free Workplace

---

The federal statute governing drug-free workplace requirements for federal grant recipients requires recipients of federal funds to certify that they have met requirements designed to promote a drug-free workplace (41 U.S.C. § 8103). In compliance with this Act, and at the discretion of the Governor, all state employees are notified that:

- A. The unlawful manufacture, distribution, dispensing, possession, or use of any controlled substance is strictly prohibited in the workplace.
- B. The Personnel Cabinet will continue to improve drug-free awareness programs through employee assistance and, in cooperation with state agencies, to eradicate the dangers that drugs in the workplace create for our employees. State-supported health insurance provides coverage for employees referred to or seeking treatment for drug and alcohol-related problems.
- C. Compliance with drug-free workplace requirements is a condition of continued employment with state government for all state employees. Each employee is obligated to report any conviction he or she receives as a result of a violation of any criminal drug statute occurring in the workplace within five (5) days after such conviction. Such a report is to be made to the employee's appointing authority and is required by federal law. Failure of any employee to report his or her conviction to the appointing authority may result in disciplinary action. The agency is obligated to report such conviction to the federal grantor within ten (10) days after it receives notice.
- D. Employees found to be in violation of drug-free workplace requirements may face disciplinary action by the appointing authority up to and including dismissal, in accordance with state law, or may be required to satisfactorily participate in a drug abuse assistance or treatment program.

Please contact your agency Human Resources Office with any questions concerning this directive.

## KYTC TRANSLATION SERVICES

*Bridging the Language Divide*

**6%** of Kentucky citizens  
are speakers of a  
non-English language.

### ***Did you know after Spanish, German is the third most common language in Kentucky?***

As public servants in today's global world, it's key we are equipped to serve ALL Kentuckians. One of the simplest ways is by ensuring information is accessible. The Kentucky Transportation Cabinet offers language translation services for work-related communications at no cost to your business unit. Together, we can ensure equity in the services we provide to all Kentuckians, regardless of their English language proficiency, to help them engage in meaningful ways. Offering language translation is about more than compliance, it is the right thing to do. KYTC has a contract with Language Services Associates (LSA).

### **Questions?**

For questions about the terms of use, contact Tiffany Squire ([Tiffany.Squire@ky.gov](mailto:Tiffany.Squire@ky.gov)) Administrative Branch Manager of the Office for Civil Rights and Small Business Development.

For technical issues or questions, contact LSA's Client Experience Department at (866) 221-1301 or [clientexperience@LSAweb.com](mailto:clientexperience@LSAweb.com).

*Here's what you need to know.*

### **Services Offered:**

- 24/7 live or written translation services in 230 languages
- Trained interpreters available for planned and unplanned calls/visits
- Voiceover translation of videos recorded in English
- Sign language interpretation

### **Eligibility:**

- The business unit is responsible for paying for the translation services (*\$100 minimum for document translation services*).

## **GETTING STARTED**

### **Live Translation:**

- To access a qualified interpreter, call 866.287.3527 and enter the 4-digit department code sent to your department head.
- To schedule an interpreter call, refer to the document titled [“INTERPRETALK\\_How to schedule a call.”](#) Calls must be scheduled for a 30-minute minimum.
- To access a scheduled call, refer to the document titled [“DRC- How to access a scheduled call.”](#)

### **Written or Voiceover Translation:**

- Fill out TC 18-20 form.
- Email the form and a PDF of the document you'd like to translate to Tony Youssefi ([tony.youssefi@ky.gov](mailto:tony.youssefi@ky.gov)) and Tiffany Squire ([tiffany.squire@ky.gov](mailto:tiffany.squire@ky.gov)). A cost estimate will be emailed to you. If your business unit agrees, the Office for Civil Rights and Small business development will authorize LSA to proceed.

### **Next Steps for Managers:**

- Print the [“Please Point” poster](#) and post it in a highly visible spot for office visitors.
- Print the [“One Moment Please” poster](#) and keep it at any desks where visitors may interact with staff.
- Schedule a 30-minute training for your team to know how to use the services. Ensure anyone who interacts commonly with the public is trained on the process (administrative assistant, project manager fielding public comments, etc.) Email [onboarding@LSAweb.com](mailto:onboarding@LSAweb.com) to schedule a live training.

Mrs. Amanda R. Spencer, P.E.  
Director  
Division of Planning  
Kentucky Transportation Cabinet  
200 Mero Street, 5<sup>th</sup> Floor  
Frankfort, KY 40622

Dear Mrs. Spencer:

The Kentucky Division of the Federal Highway Administration, in consultation with Region 4 of the Federal Transit Administration, have reviewed the following Metropolitan Planning Organization's (MPO) Unified Planning Work Programs (UPWP) and found their proposed activities eligible for federal planning funds.

2020 Bowling Green-Warren County MPO UPWP	(Policy Committee approval on 04/08/19)
2020 Cincinnati Area MPO UPWP	(Board of Directors approval on 04/11/19)
2020-2021 Clarksville Area MPO UPWP	(Executive Board approval on 07/18/19)
2019 & 2020 Evansville MPO UPWP	(Policy Committee approved on 03/14/19)
2020 KYOVA MPO UPWP	(Policy Board authorization on 03/01/19)
2020 Lexington Area MPO UPWP	(Policy Committee adoption on 04/24/19)
2020 Louisville/Jefferson County MPO UPWP	(Policy Committee approval on 04/25/19)
2020 Owensboro-Daviess County MPO UPWP	(Policy Committee approval on 04/09/19)
2020 Radcliff/Elizabethtown MPO UPWP	(Policy Committee approval on 04/11/19)

We appreciate the effort that went into the development of these work programs and thank you and your staff for working with our office to make improvements.

Sincerely,

Bernadette Dupont  
Transportation Specialist

Amanda Ratliff Spencer, P.E.  
Director of Planning  
Kentucky Transportation Cabinet  
200 Mero Street, 5<sup>th</sup> Floor  
Frankfort, Kentucky 40622

Dear Mrs. Spencer:

The Kentucky Division of the Federal Highway Administration, in consultation with Region 4 of the Federal Transit Administration, has reviewed the following document and found the proposed activities eligible for federal planning funds under 23 U.S.C. 134, 135, 505 or 49 U.S.C. 5303-5305, 5313(b) and the provisions of 2 CFR § 200, 23 CFR § 420 and 23 CFR§ 450.

Planning Work Program  
SP 0020 (016)  
(2020 SPR Work Program - Subpart A)

The work program should be administered in accordance with the provisions of 2 CFR § 200 and 23 CFR § 420. The effective funding period is from June 16, 2019 – June 15, 2020. Authorization of this work is subject to the availability of funds.

Prior approval is required for the following changes to the SPR Work Program:

- Budgetary changes,
- Increase in federal funds,
- Cumulative transfer among already approved work program line items of 10% of the total federal funds or \$100,000,
- Programmatic changes,
- Change in the scope or objectives of activities (e.g., adding or deleting items),
- Extending the period of performance past the approved work program period,
- Transferring substantive programmatic work to a third party (e.g., consultant work not identified in the original work program), and/or
- Capital expenditures including purchase of equipment.

There are two additional program monitoring and reporting requirements associated with the SPR Work Program, an independent audit and an annual performance and expenditure report.

The Single Audit Act of 1984, subsequent amendments, and corresponding regulations, required an annual audit require that an independent audit be completed of any non-federal entity expending \$500,000 or more in Federal funds from all sources in a fiscal year. (2 CFR § 200).

The annual performance and expenditure report is required to be submitted within 90 days after the end of the report period. The report may be more frequent if deemed necessary by FHWA. [23 CFR 420.117 (b) and (c)].

We appreciate the work that went into the development of this work program and thank you for working with our office to make improvements.

Sincerely yours,

A handwritten signature in cursive script that reads "Bernadette Dupont".

**RESOLUTION OF THE TRANSPORTATION POLICY COMMITTEE  
OF THE  
LEXINGTON AREA METROPOLITAN PLANNING ORGANIZATION  
CERTIFICATION OF THE URBAN TRANSPORTATION PLANNING PROCESS**

WHEREAS, the Lexington Area Metropolitan Planning Organization {MPO} is the officially designated agency for transportation planning in the Lexington Urbanized area; and

WHEREAS, the federal regulations pertaining to Urban Transportation Planning, published as 23 CFR 450.334, require the MPO and the Kentucky Transportation Cabinet {KYTC} to certify that the transportation planning process be carried on cooperatively in conformance with the regulations; and

WHEREAS, the federal regulations also require that the metropolitan transportation planning process be carried out in accordance with all applicable requirements including:

- (1) 23 U.S.C. 134, 49 U.S.C 5303; and 23 CFR part 450 Subpart C (450.300 – 450.340);
- (2) Sections 174 and 176 {c} and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506(c) and (d)) and 40 CFR part 93;
- (3) Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
- (4) 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
- (5) Section 1101 (b) of the FAST-ACT (Pub. L. 114-357) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;
- (6) 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
- (7) The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 *et seq.*) and 49 CFR parts 27, 37, and 38;
- (8) The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination based on age in programs or activities receiving Federal financial assistance;
- (9) Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
- (10) Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

WHEREAS, the U.S Department of Transportation conducted an on-site certification review at the Lexington Area MPO offices in June, 2019, and issued a subsequent finding that the Lexington Area MPO was fully certified as meeting all pertinent requirements; and

THEREFORE BE IT RESOLVED, that the Lexington Area MPO Transportation Policy Committee (TPC) at its regular public meeting of October 28, 2020 certifies, in consideration of the requirements listed herein and to the degree appropriate for the size of the area and the complexity of its transportation problems, that the urban transportation planning process is being carried out in conformance with all the applicable federal requirements.

David K West 11/9/2020  
The Honorable Judge David West, Jessamine Co. Judge Executive Date  
Lexington Area MPO Transportation Policy Committee Chairman

[Signature] 11/9/2020  
Kelly Baker, P.E. KYTC District 7 Chief District Engineer Date  
MPO TPC Representative for the Kentucky Transportation Cabinet

I hereby certify that the foregoing legal requirements have been met as certified by the U.S. Department of Transportation in September 2019.

Max D. Conyers 11/9/2020  
Max D. Conyers - Lexington Area MPO Director Date

**TRANSPORTATION PLANNING PROCESS  
CERTIFICATION FY 2024**

In accordance with 23 CFR 450.334, the Indiana Department of Transportation and the Ohio-Kentucky-Indiana Regional Council of Governments hereby certify that the transportation planning process is addressing the major issues in the metropolitan planning area and is being conducted in accordance with all applicable requirements of:

1. 23 U.S.C. 134, 49 U.S.C. 5303, and 23 CFR part 450.300;
2. Sections 174 and 176(c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506(c) and (d)) and 40 CFR part 93;
3. Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
4. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
5. Section 1101(b) of the FAST ACT (Pub. L. 114-357) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;
6. 23 C.F.R. part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
7. The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37 and 38;
8. The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
9. Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
10. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

## Metropolitan Transportation Planning Process Self-Certification

In accordance with 23 CFR 450.334, the Kentucky Transportation Cabinet and the Owensboro-Daviess County Metropolitan Planning Organization hereby certify that the transportation planning process is addressing the major issues in the metropolitan planning area and is being conducted in accordance with all applicable requirements of Titles 23 and 49 U.S.C., specifically:

1. 23 U.S.C. 134, 49 U.S.C. 5303 and this subpart;
2. Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
3. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex or age in employment or business opportunity;
4. Section 1101(b) of the SAFETEA-LU (Pub. L. 109-59) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises and USDOT-funded projects;
5. 23 CFR part 230, regarding the implementation of an equal employment opportunity on Federal and Federal-aid highway construction contracts;
6. The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 *et seq.*) and 49 CFR parts 27, 37 and 38;
7. The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
8. Section 324 of Title 23 U.S.C., regarding the prohibition of discrimination based on gender; and
9. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27, regarding discrimination against individuals with disabilities.

## METROPOLITAN TRANSPORTATION PLANNING PROCESS CERTIFICATION

In accordance with 23 CFR 450.334, the Kentucky Transportation Cabinet and the Radcliff/Elizabethtown Metropolitan Planning Organization hereby certify that the transportation planning process is addressing the major issues in the metropolitan planning area and is being conducted in accordance with all applicable requirements of Titles 23 and 49 USC, specifically:

1. 23 U.S.C. 134, 49 U.S.C. 5303, and this subpart;
2. Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
3. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
4. Section 1101(b) of the SAFETEA-LU (Pub. L. 109-59) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;
5. 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
6. The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37, and 38;
7. The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
8. Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
9. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

## TRANSPORTATION PLANNING PROCESS CERTIFICATION

In accordance with 23 CFR 450.336, the Indiana Department of Transportation and the Evansville Metropolitan Planning Organization certify that the transportation planning process is addressing the major issues in the metropolitan planning area and is being conducted in accordance with all applicable requirements of:

1. 23 U.S.C. 134, 49 U.S.C. 5303, and 23 CFR part 450.300;
2. Sections 174 and 176(c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506(c) and (d)) and 40 CFR part 93;
3. Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
4. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
5. Section 1101(b) of the FAST ACT (Pub. L 114-357) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in DOT funded projects;
6. 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
7. The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37 and 38;
8. The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
9. Section 324 of Title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
10. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

In January 2021, the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) conducted virtual certification review of the Evansville MPO urban transportation planning process. FHWA and FTA issued a subsequent finding that the Evansville MPO was fully certified as meeting all pertinent requirements.

# KENTUCKY TRANSPORTATION CABINET THE PUBLIC INVOLVEMENT PROCESS FOR STATEWIDE TRANSPORTATION PLANNING AND PROJECT DELIVERY: Interested Parties, Public Involvement, and Consultation Process

## **1. INTRODUCTION**

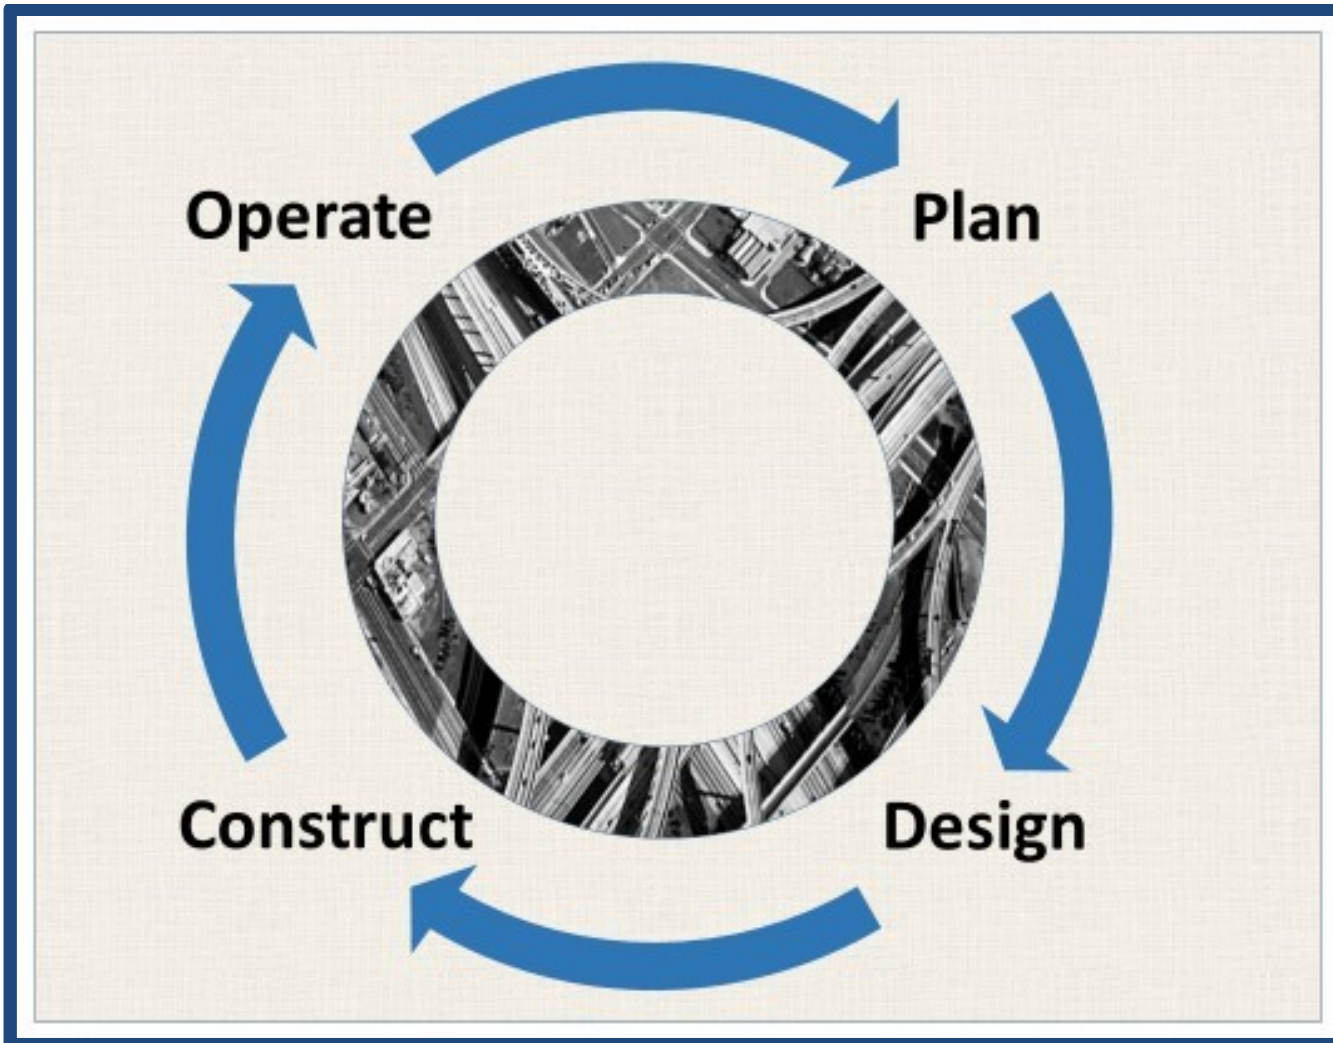

The Kentucky Transportation Cabinet (KYTC) has established procedures for the development of the Long Range Statewide Transportation Plan (LRSTP) and the Statewide Transportation Improvement Program (STIP) as mandated by Fixing America's Surface Transportation (FAST) Act of 2015 and continued re-authorizations, the Congressional Acts that authorized ongoing federal-aid to transportation programs. In developing these procedures, the KYTC complied with Title 23 of the Code of Federal Regulations under Chapter 1, Subchapter E, Part 450, Subpart B, 450.210 ([23 CFR 450.210](#)) "Interested Parties, Public Involvement, and Consultation" processes by providing opportunities for public review and comment at key decision points.

Within this document, the KYTC has established procedures to cover the LRSTP, the STIP, the Consultation Process, and the development and delivery of transportation improvements. The work that the KYTC conducts in pursuing its mission through project development and delivery moves in a continuous life cycle rather than a linear path. This process links the four main areas of transportation system development and maintenance as shown in [Figure 1.0-1](#) -- planning, design, construction, and operations -- to deliver a safe, efficient, environmentally sound and fiscally responsible transportation system that facilitates safe and efficient movement of people and goods. It is important to note the Figures within this Public Involvement Process (PIP) document also serve as a story map to follow this effort as defined under the Table to Contents.

A knowledge-driven process based upon valid, broad-based input is essential to the effective decision-making required to address the maintenance and improvement of Kentucky's transportation system. This input comes from government, public and technical sources as graphically displayed in [Figure 1.0-2](#).

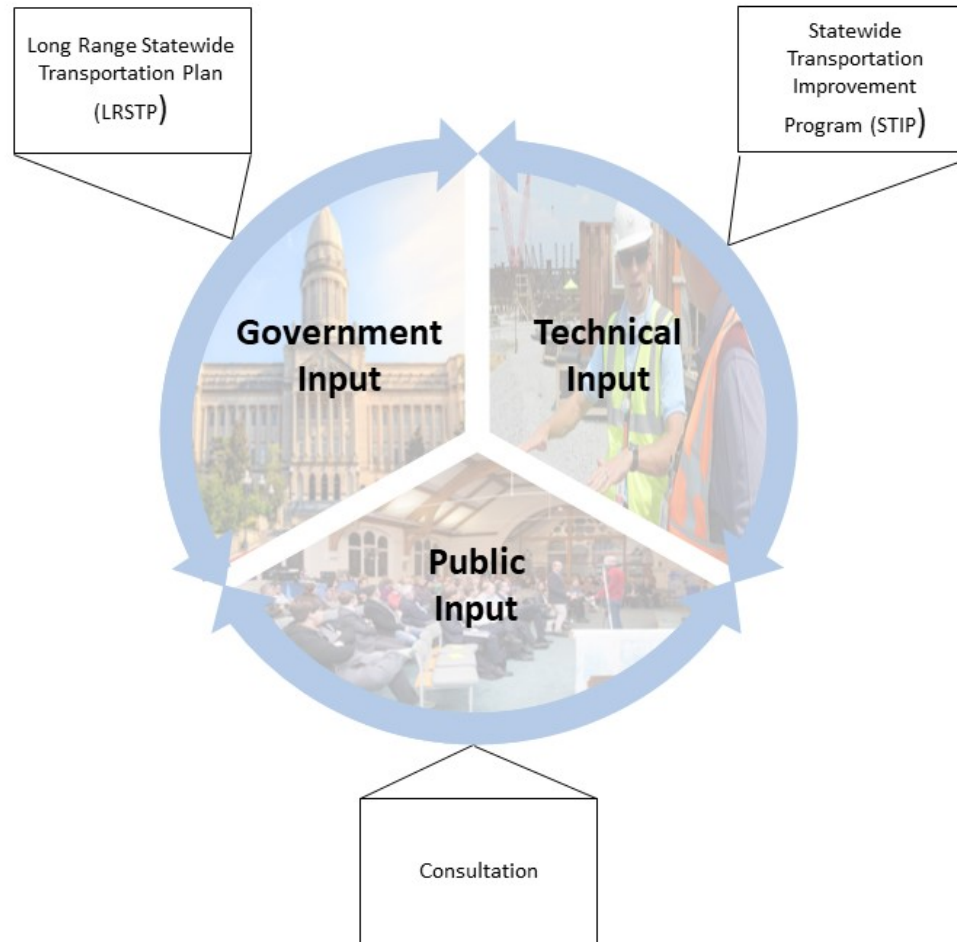

Government input includes guidance, as well as financial support, from state and national government leadership. Public input is feedback received by all users of the system, including those citizens in communities directly affected by proposed improvements. Analysis of the existing system's form and function as well as the impacts of anticipated improvements is the primary source of technical input.

**Intentionally Blank**

[Figure 1.0-1](#) - KYTC Transportation Project Life Cycle

Interested Parties, Public Involvement and Consultation Process: A Visual Guide

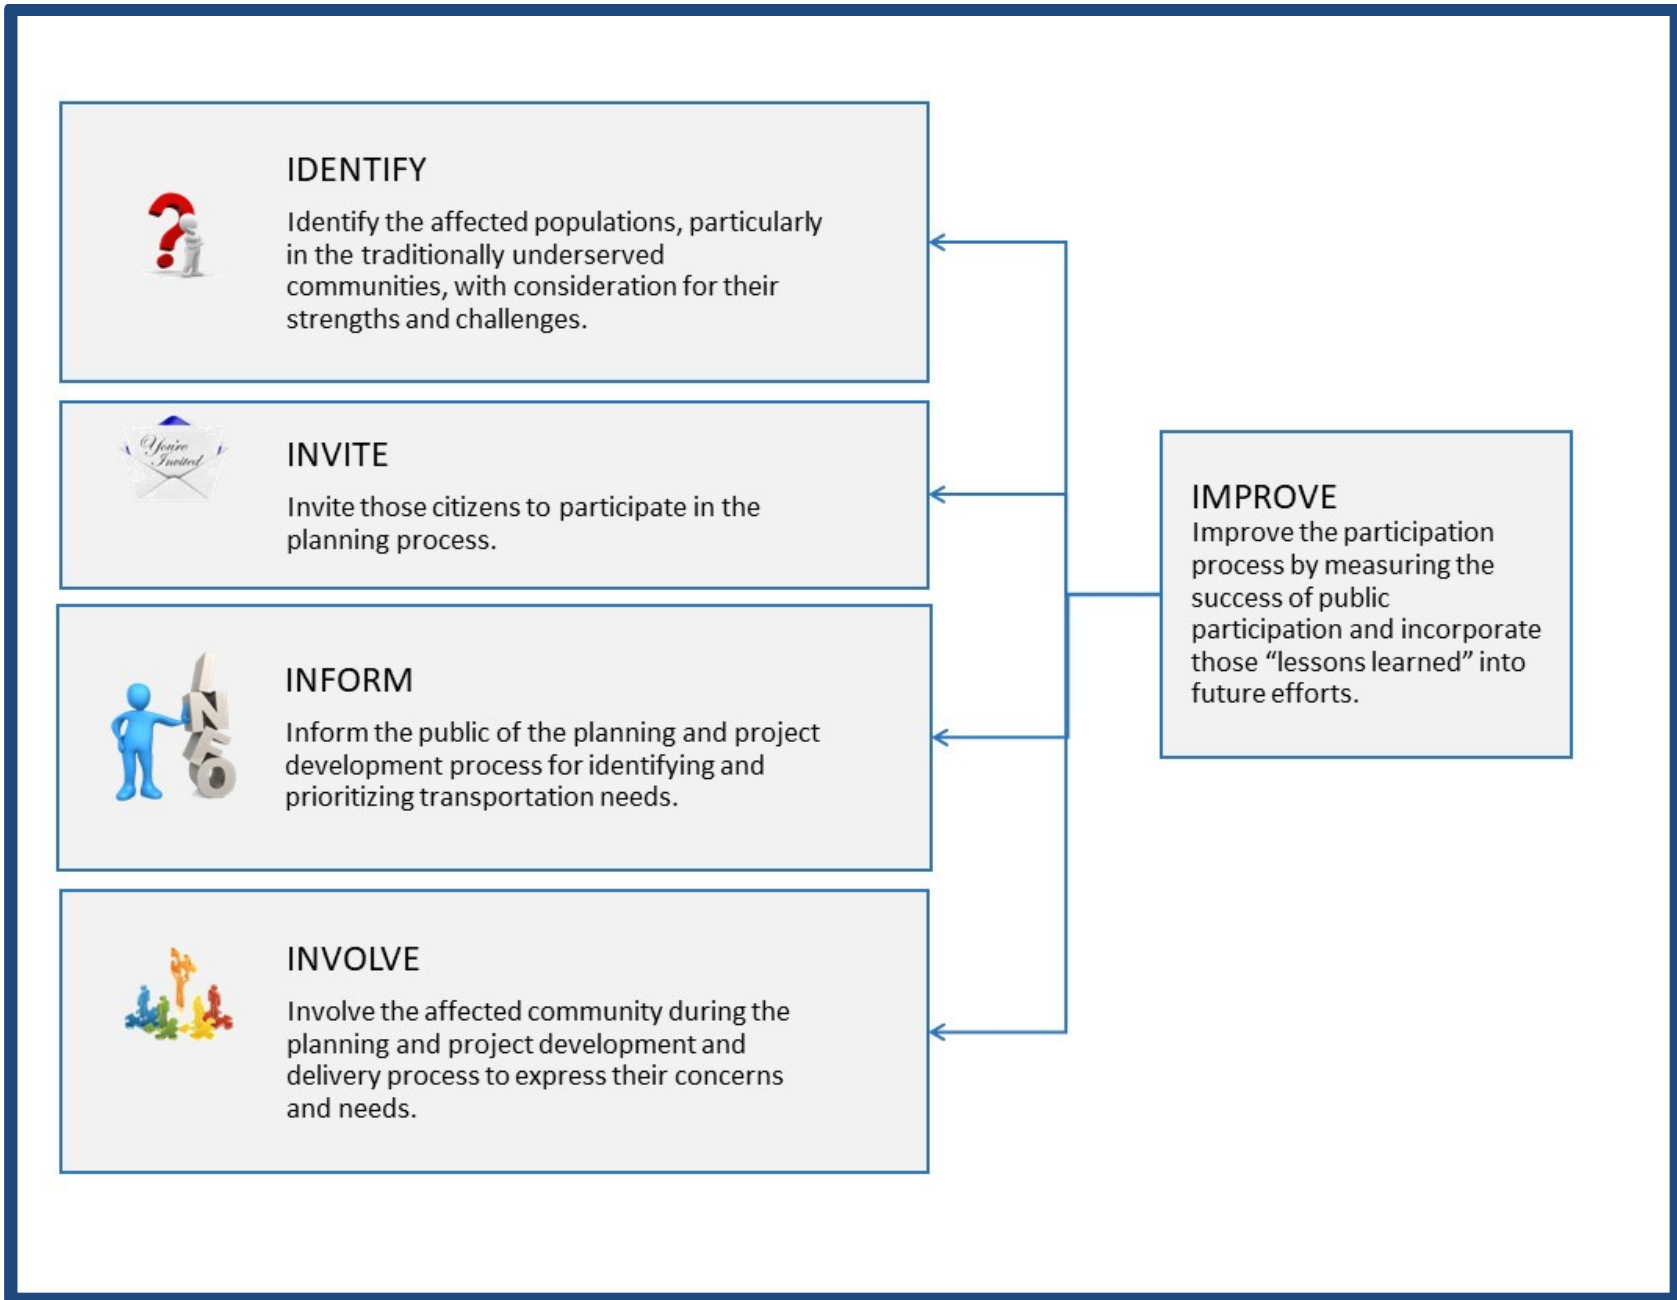

**Figure 1.0-2** – Public Involvement with STIP, LRSTP and Consultation Process

The Public Involvement Process goal is to provide Kentuckians the opportunity to aid in the identification of transportation needs and priorities, the planning for how to meet those needs and priorities, and the development and delivery of transportation projects to turn those plans into realized improvements to the transportation system. In order to achieve this goal, there are several public involvement objectives to follow as listed below:

- “Identify” the affected populations, particularly in the traditionally underserved communities, with consideration for their strengths and challenges.
- “Invite” those citizens to participate in the planning process.
- “Inform” the public of the planning and the project development processes for identifying and prioritizing transportation needs.
- “Involve” the affected community during the planning and project development and delivery process to express their concerns and needs.
- “Improve” the participation process by measuring the success of public participation and incorporate those “lessons learned” into future efforts.

[Figure 1.0-3](#) shows the visual representation and connection of these objectives also known as the “Five I’s of Public Involvement.”

These procedures include the identification of interested parties, the use of the Area Development District(s) (ADD), Metropolitan Planning Organization(s) (MPO), the KYTC Central Office and Highway District Offices (s) (HDO), where applicable, to assist in engaging the public, throughout the consultation process for the identification and prioritization of transportation needs. Located within this document in **Appendix A** is a visual representation of the diversity of the state’s population (demographics) to apply as part of the public involvement activities.

**Figure 1.0-3 – Public Involvement Objectives**

## **2. INTERESTED PARTIES**

The KYTC’s mission is to “provide a safe, efficient, environmentally sound and fiscally responsible transportation system that delivers economic opportunity and enhances the quality of life in Kentucky.”

The KYTC LRSTP and STIP processes incorporate this mission and involve a spirit of cooperation by working with the Federal Highway Administration (FHWA), the Federal Transit Administration (FTA), Metropolitan Planning Organizations (MPOs), Area Development Districts (ADDs), local city and county governmental agencies, and other interested parties located throughout the Commonwealth of Kentucky.

The entire planning process and the identification of transportation needs throughout the Commonwealth, utilizes input from the KYTC Central Office Divisions, the 12 KYTC HDOs, city mayors, county judges, MPOs, ADDs, state legislators, and through written comments and requests from a variety of sources, as noted in [23 CFR 450.210](#), such as:

- Citizens,
- Affected public agencies,
- Representatives of public transportation employees,
- Public ports,
- Freight shippers,
- Private providers of transportation services,
- Representatives of users of public transportation,
- Representatives of users of pedestrian walkways and bicycle transportation facilities,
- Representatives of the disabled,
- Providers of freight transportation services,
- Other interested parties.

[Figure 2.0-1](#) provides a visual representation of potential input from public involvement sources throughout planning and project delivery.

**Input is what fuels the process!**  
**Sources of input into the project identification, prioritization and development process**

**Figure 2.0-1 – Public Involvement Sources**

### **3. PUBLIC INVOLVEMENT PROCESS**

The KYTC is working in concert with the ADDs and MPOs to ensure that public involvement processes are utilized that provide opportunities for public review and comments throughout the LRSTP and STIP document development, the consultation process as well as the project identification, prioritization, development, and delivery process.

#### **3.1 AREA DEVELOPMENT DISTRICT PUBLIC INVOLVEMENT PROCESS**

Kentucky has fifteen Area Development Districts (ADDs) mapped in [Figure 3.1-1](#).

The ADDs utilize public involvement procedures as a supplement to the KYTC's public involvement outreach efforts. Each ADD has documented their process with those documents are available on the individual ADD Office website and/or are available upon request.

In addition, the KYTC and each ADD has established a transportation committee for each ADD area. The membership of this committee includes a diverse group of individuals with a variety of interests on impacts to the transportation system and/or how the transportation system affects them. These committees set goals and objectives for the regional transportation system, evaluating the transportation systems, identifying needs, and evaluating, prioritizing, and ranking transportation needs every two years as input into Kentucky's project selection process. The establishment of this transportation committee is to also identify and involve underserved populations to ensure consideration for the needs of the underserved populations such as low-income and minorities.

The ADDs hold transportation committee meetings several times each year to reevaluate the regional transportation system, and provide information to committee members about the statewide transportation planning process and current transportation issues and projects. Each ADD also includes members with a specific interest in highway safety on their transportation committee to incorporate safety-conscious planning into the transportation planning process.

The ADDs planners may attend public meetings and various civic events throughout their district to discuss the statewide transportation planning process and solicit direct input from interested individuals or groups at key decision points as required. The ADDs maintain minutes from committee and public meetings. These minutes are available upon request and posted on the websites of the ADD offices. They periodically review their processes to determine the effectiveness and revise as appropriate.

**Figure 3.1-1 – Kentucky Area Development District Offices and Boundary Map**

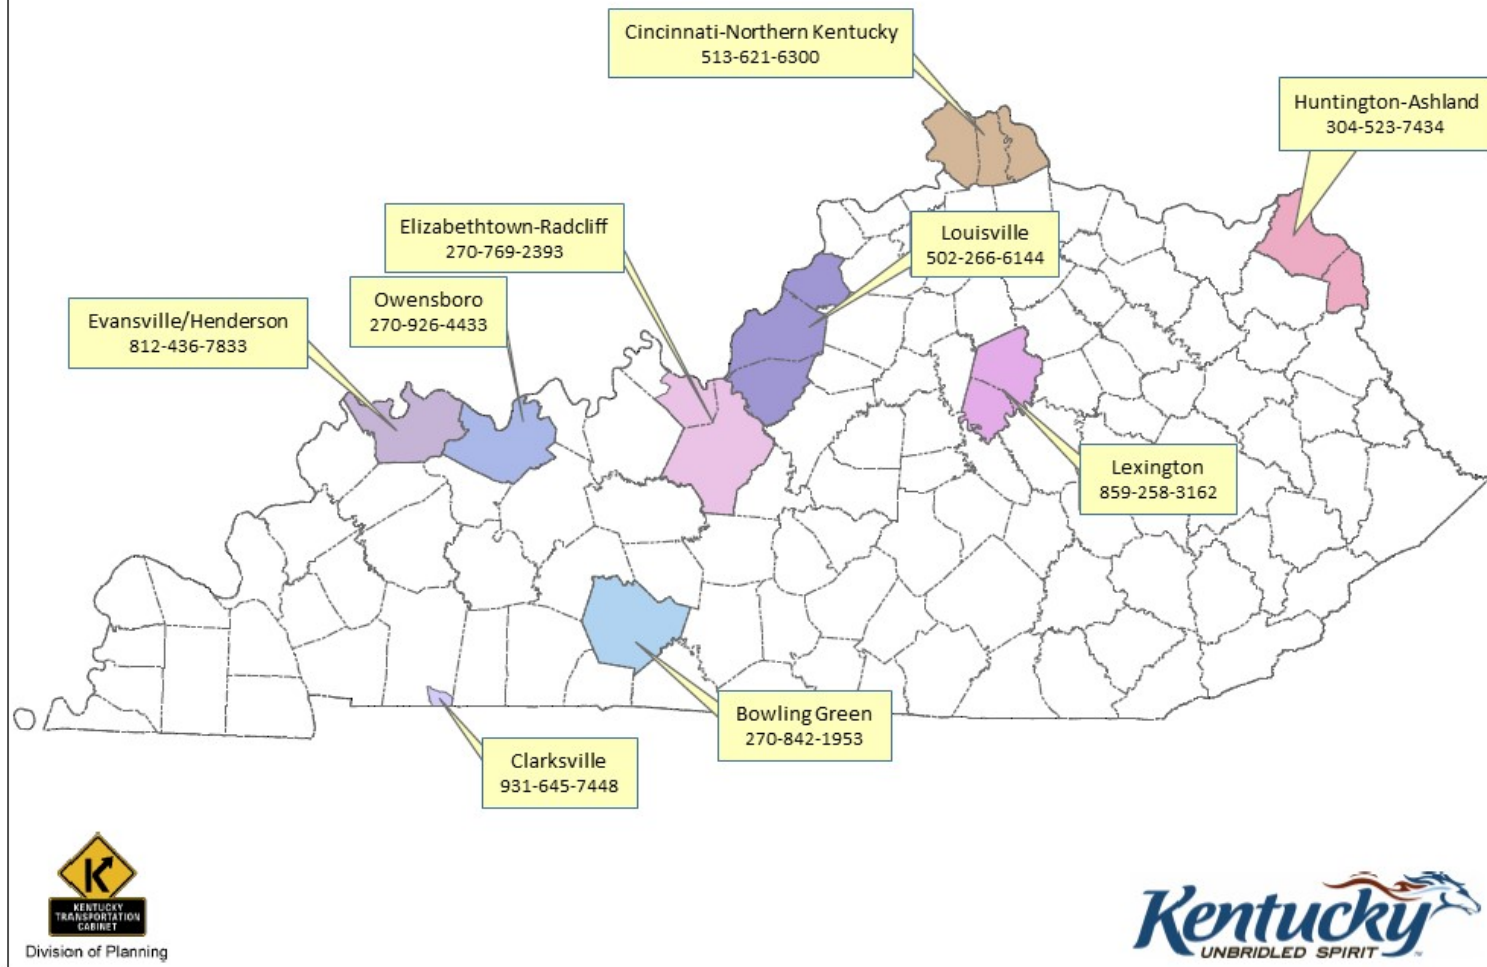

## **3.2 METROPOLITAN PLANNING ORGANIZATION PUBLIC INVOLVEMENT PROCESS**

Kentucky has nine MPOs mapped in [Figure 3.2-1](#).

Supplemental to the KYTC's public involvement efforts, the MPOs use their public involvement procedures in the development of their respective Metropolitan Transportation Plans (MTPs) and Transportation Improvement Programs (TIPs). All activity pursuant to development of projects in the MPOs' TIPs is considered a part of the STIP through "TIP revisions and relationship to the STIP" ([23 CFR 450.328](#)) and complies with ([23 CFR 450.326](#)) "Development and content of the transportation improvement program (TIP)." In addition, each MPO is required to develop a Public Participation Plan that defines reasonable opportunities for interested parties to be involved in the MPO transportation planning process as identified under ([23 CFR 450.316](#)). MPO documents are available electronically on the respective MPO's web pages, as well as being available upon request.

The MPOs hold meetings several times each year to continue to evaluate the metropolitan transportation system and to educate committee members about the metropolitan transportation planning process as well as current transportation projects and issues. The MPO members attend various civic meetings to discuss the metropolitan planning process and to solicit direct input from interested individuals and groups. The MPOs maintain minutes from committee meetings that are available upon request, and may be posted on the MPOs' webpages. The MPOs periodically review this process to determine its effectiveness and revise as deemed appropriate.

**Figure 3.2-1 – Kentucky Metropolitan Planning Organization Offices and Boundary Map**

### **3.3 KENTUCKY TRANSPORTATION CABINET PUBLIC INVOLVEMENT PROCESS**

In carrying out statewide transportation planning, including development of the LRSTP and the STIP, the KYTC has developed a public involvement process that provides opportunities for public review and comment at key decision points.

Through assistance from the ADDs and MPOs, the KYTC pursues appropriate measures to reach the public including traditionally underserved populations within the state who may face challenges accessing employment and other services through transportation. The ADDs, MPOs, and the KYTC should hold public meetings in places where these populations are comfortable gathering. After identifying these areas, the agencies include a process for seeking out and considering the needs of these traditionally underserved populations. These agencies place advertisement notices requesting public review and comment within statewide, and/or regional newspapers, and/or through digital advertisement notices via online sites and social media outlets as determined most effective to reach a diverse population. Some of these newspapers (many with an online presence) include the following:

- Ashland Independent
- Bowling Green Daily News
- Covington Kentucky Enquirer
- Lexington-Herald Leader
- Louisville Courier-Journal
- Owensboro Messenger Inquirer
- Paducah Sun
- Somerset Commonwealth Journal

**Appendix A** provides an analysis of the most recent United States Census Bureau data and applicable American Community Survey (ASC). The ADDs, MPOs, and the KYTC use this data to identify the demographic diversity throughout the state at a county level to be more effective in reaching the broad spectrum of citizens across Kentucky. This effort includes outreach to our traditionally underserved populations, specifically targeted to Environmental Justice (EJ) populations based upon low income, minority status, and low English proficiency.

To reach minority and underserved populations within the state, the KYTC may choose to place notices in minority newspapers and/or through digital advertising via social media and/or online media sites devoted to serving these populations. Some example minority newspapers (many with an online/social media presence) include the following:

#### Minority Newspapers

- Cincinnati Herald
- Key News journal – Lexington
- Louisville Defender

#### Spanish Newspapers

- Al Dia en America – Louisville
- La Voz de Kentucky – Lexington

These advertisements specify the number of calendar days for the public review and comment period, identify a contact to whom they will send comments, and inform the public of the appropriate website address. The KYTC also considers other accommodations upon request, as required.

The KYTC may consider incorporating minority radio stations, as needed, to reach minority populations within a coverage area, in addition to the national, state and regional radio stations with the largest coverage areas as part of public outreach. Listed below are some of these minority radio stations to consider:

<u>Call Letters</u>	<u>Band</u>	<u>Frequency</u>	<u>City of License</u>	<u>State of License</u>	<u>Primary Format</u>
WBTF	FM	107.9	Lexington	KY	Urban Contemporary
WCND	AM	940	Shelbyville	KY	Regional Mexican
WCVG	AM	1320	Covington	KY	African-American Gospel
WIZF	FM	101.1	Erlanger	KY	Urban Contemporary
WUBT	FM	101.1	Russellville	KY	Urban Contemporary
WLRS	AM	1600	Eminence	KY	Spanish
WLOU	AM	1350	Louisville	KY	African-American Gospel
WMJM	FM	101.3	Jeffersontown	KY	Urban AC
WENS	LP	96.9	Vine Grove	KY	Spanish Religious
WDPJ	LP	93.5	Danville	KY	Spanish Religious

The minimum number of calendar days the KYTC will provide public review and comment are as follows:

- Interested Parties, Public Involvement & Process Consultation Process Document 45 calendar days
- New LRSTP or STIP 30 calendar days
- Amendments to LRSTP or STIP 15 calendar days
- Administrative Modifications to LRSTP or STIP Not Required

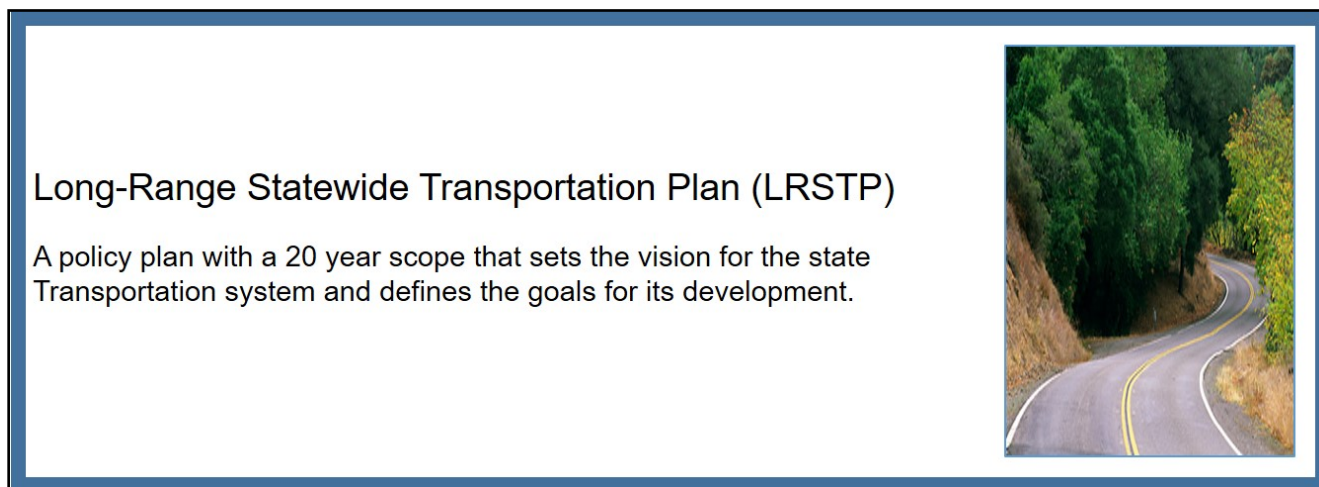

### **3.3.1 KYTC Interested Parties, Public Involvement and Consultation Process Documents**

The KYTC continuously evaluates ways of reshaping current public involvement procedures to comply with [23 CFR 450.210](#) "Interested Parties, Public Involvement, and Consultation Processes." When the KYTC updates the STIP, as needed (usually every two years and at minimum every 4 years), the effectiveness of the public involvement process is reviewed and revised as appropriate. The KYTC will allow a minimum of 45 calendar days for public review and written comments before adopting revisions to the public involvement process. The final document will be available as part of the Cabinet's commitment to the use of visualization technique and public involvement on the KYTC website at [www.transportation.ky.gov](http://www.transportation.ky.gov) and the KYTC [Planning Website](#) at <https://transportation.ky.gov/Planning/Pages/default.aspx>. or directly at <https://transportation.ky.gov/Planning/Pages/Public%20Involvement%20Plan.aspx>.

### **3.3.1-1 New Long-Range Statewide Transportation Plan and/or Statewide Transportation Improvement Program**

The formal LRSTP document will cover a minimum 20-year planning horizon, and periodically the KYTC will evaluate, revise, and update the LRSTP as appropriate as noted in [Figure 3.3-1](#). The LRSTP will also incorporate the MPOs' Metropolitan Transportation Plans (MTPs) by reference. A graphical representation of the LRSTP common points of discussion are on the following page in [Figure 3.3-2](#).

**Figure 3.3-1** – What is the LRSTP

The LRSTP wants to know...

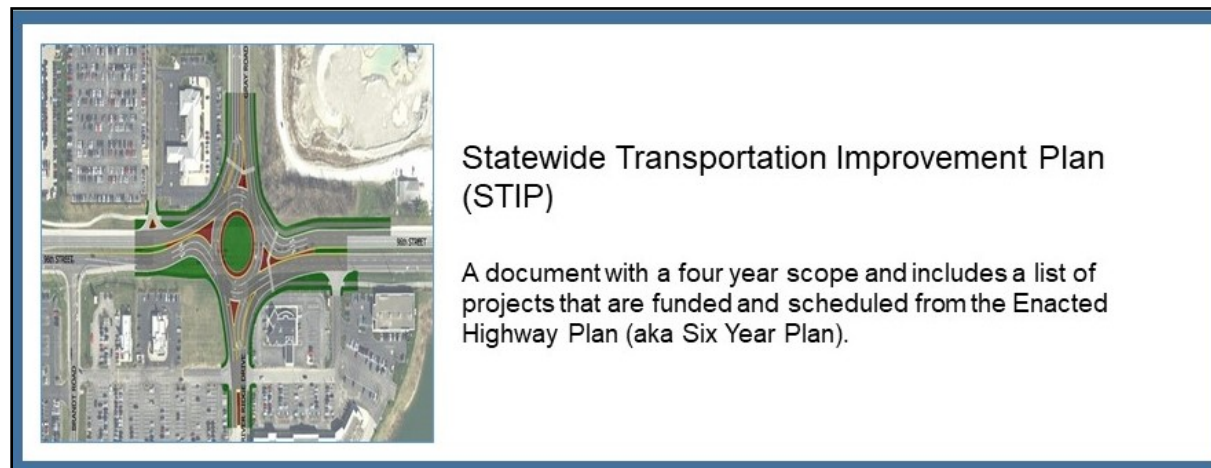

**Figure 3.3-2** – The LRSTP Connection

The formal STIP document (see [Figure 3.3-3](#)) may be prepared on a biennial basis (usually every two years and at minimum every 4 years) to coincide with state legislative approval of the biennial update to the Kentucky Enacted Highway Plan. Development of the STIP document is in accordance with [23 CFR 450.218](#). [Figure 3.3-4](#) shows this STIP Update effort graphically. The KYTC also incorporates the MPOs TIPs into the STIP by amendment and/or reference to their specific federally required documents as appropriate.

As required by the Kentucky Revised Statutes ([KRS](#)), [Chapter 176](#), the KYTC submits the Governor's Recommended Highway Plan (Recommended Plan) to the Kentucky General Assembly in January of even numbered years for their review and approval through the middle of April. During this same timeframe, the Recommended Plan is available to the public, who can contact the General Assembly members voicing their concerns and/or support of projects. As per the KRS, the General Assembly by law has the authority to make revisions, additions, and deletions of highway projects, along with having the responsibility of voting on and approving a final Highway Plan by the middle of April of even numbered years. In addition, the approved Highway Plan serves as a supplement to the Commonwealth's Executive Branch Biennial Budget, and every two years, the entire Highway Plan process repeats.

Derived from the approved Highway Plan, the listing of highway improvement projects in the STIP consists of projects that have gone through an extensive identification process. This process is where the public had the opportunity to comment at various key decision points such as project identification and prioritization. In addition, the general public and concerned citizens have the opportunity to contact their legislators prior to the approval of the Highway Plan by the Kentucky General Assembly.

**[Figure 3.3-3](#) – What is the STIP**

## Public Participation in the Development of the STIP

**Figure 3.3-4** – The STIP Connection

Upon completion of the approved Highway Plan, the final stages of preparing the new STIP begins. Around May, in even-numbered years, the process to prepare the Draft STIP begins in which the KYTC incorporates projects from the recently approved Highway Plan into this draft document. This draft has 30-day public review and comment period, as well as a review and approval of the final STIP by FHWA and FTA. Once approved, the final STIP document is printed and distributed between late fall of even-numbered years to late winter.

The process of preparing the STIP information, in conjunction with preparing the Highway Plan, begins in the winter of odd-numbered years and continues through the approval of the STIP. [Figure 3.3-5](#) visually displays this STIP outreach effort in more detail.

As required by [23 CFR 450.218](#) (e), Federal Lands Transportation Highway Program and Federal Lands Access Program, Kentucky project within those TIPs shall be included without change in the STIP, directly or by reference, once approved by FHWA.

To ensure that the public has ample opportunity to review and comment on the LRSTP as shown graphically in [Figure 3.3-6](#) and with the STIP documents, the KYTC allows a minimum of 30 calendar days for public review and written comments for each proposed new LRSTP and each proposed new STIP. The KYTC also provides notice of the 30-day public review and comment period in statewide, significant regional and/or demographically targeted newspapers and/or online media sites throughout the Commonwealth of Kentucky, with assistance from the ADDs and MPOs as appropriate.

During this 30-day review and comment period, the KYTC makes the Draft LRSTP and Draft STIP documents also available to the FHWA and FTA for their review and comment.

The KYTC publicly displays the Draft LRSTP and Draft STIP in the KYTC Central Office, and each of the 12 Highway District Offices, 15 ADD offices, and 9 MPO Offices. Upon release of the Draft LRSTP and Draft STIP, the following groups receive a letter providing information on the availability of these documents:

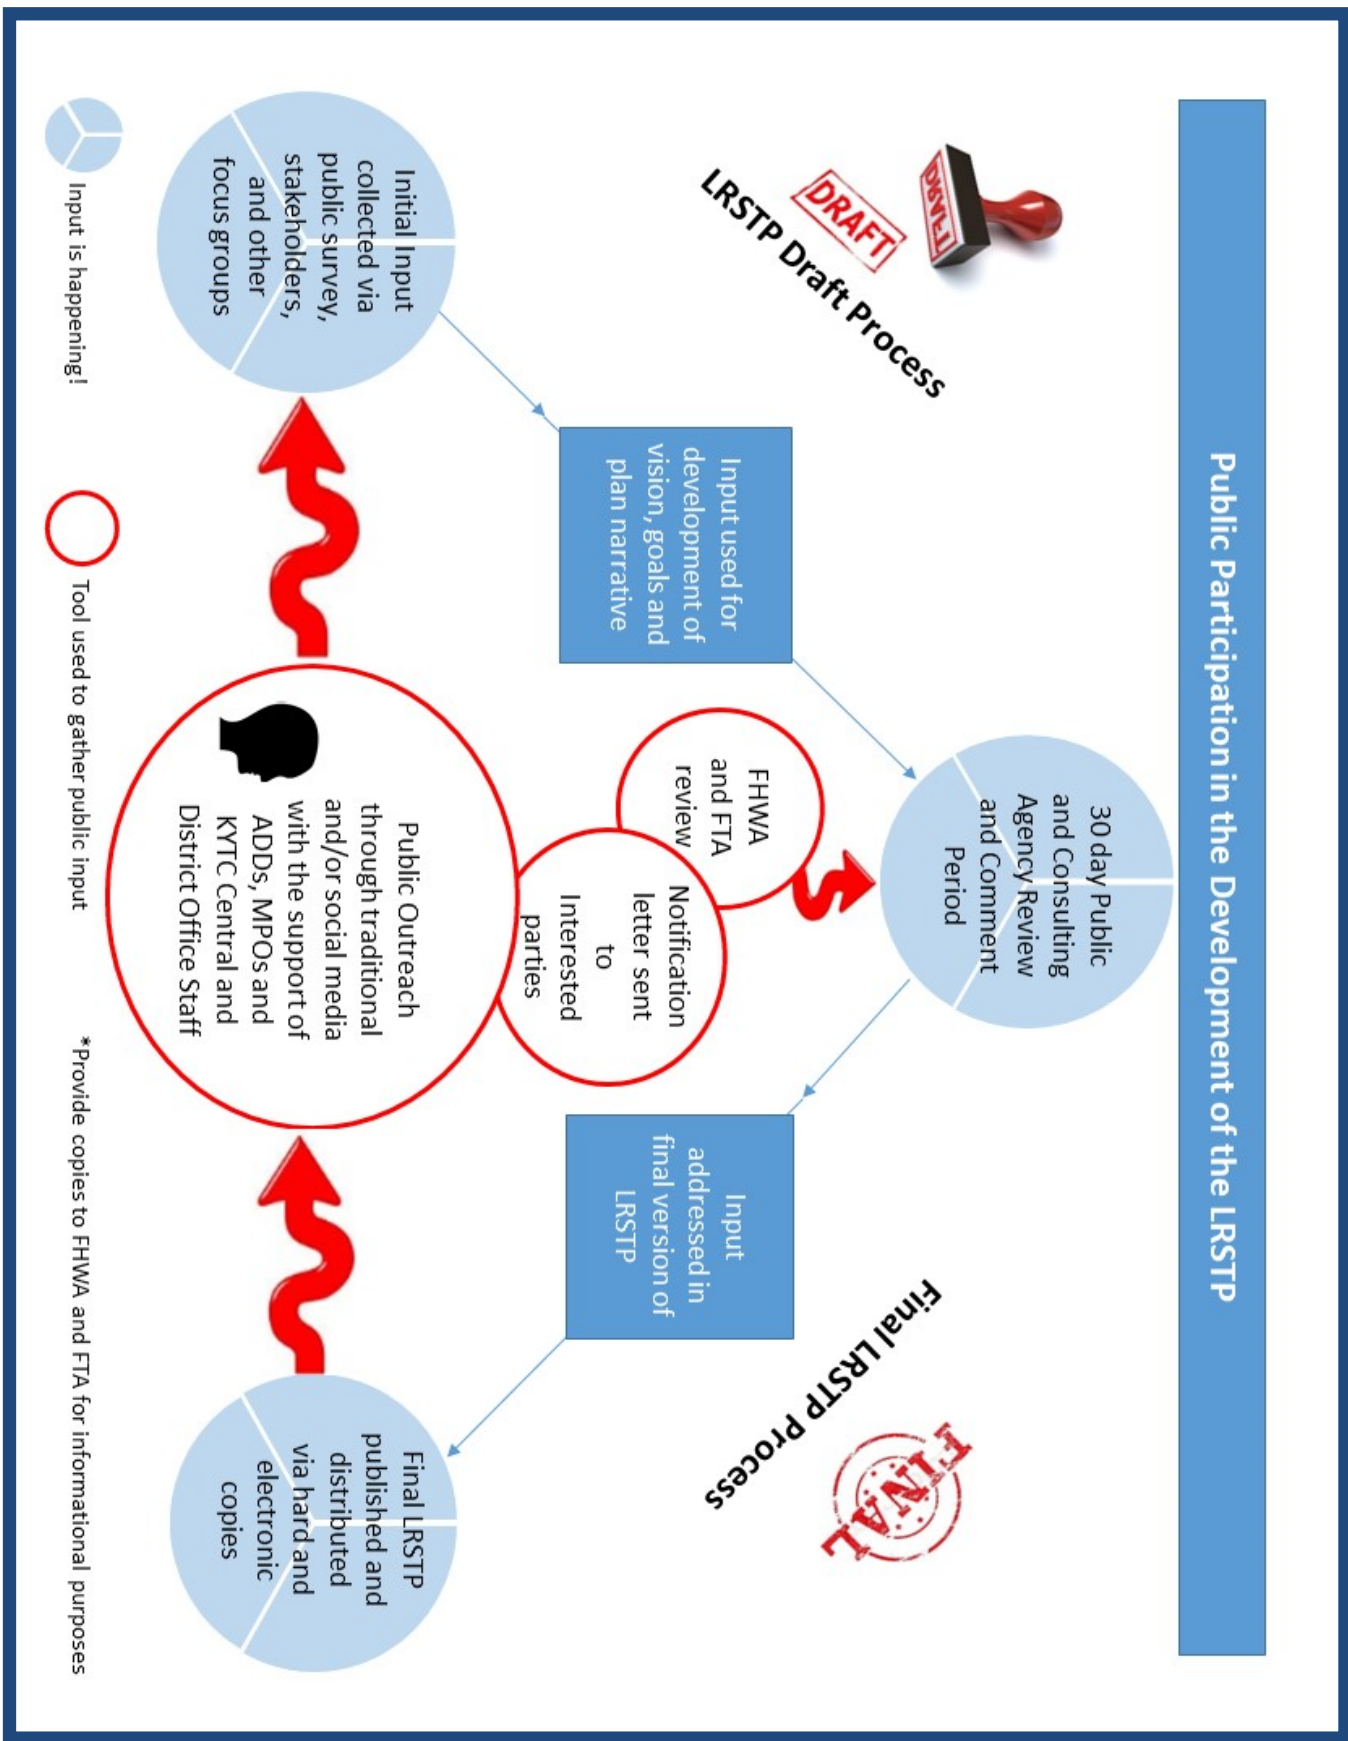

- Transit providers, FTA,
- USDA Forest Service,
- US Fish and Wildlife,
- National Forestry Service,
- US Army Corp of Engineers,
- FHWA Eastern Federal Lands Highway Division,
- Other federal, regional, and state agencies responsible for land use management, natural resources, environmental protection, conservation, and historic preservation,
- All county judge/executives,
- Mayors of all communities over 5,000 in population,
- Any individuals who ask to be included on an official mailing list maintained by the KYTC.

## Public Participation in the Development of a NEW STIP

**Figure 3.3-5 – The STIP Process and Public Involvement**

**Figure 3.3-6 – The LRSTP Process and Public Involvement**

The KYTC considers additional public involvement in those instances where the complexity of the LRSTP and STIP, or magnitude of public response indicates the need for additional efforts.

The KYTC website will house the Draft LRSTP and Draft STIP document in an electronically accessible format available to search and print during public review periods. The KYTC will establish an electronic process for those reviewing the Draft LRSTP and Draft STIP to submit their comments and questions to the KYTC. Visualization techniques will be used to the maximum extent practicable to describe the Draft LRSTP and Draft STIP documents in accordance with [23 CFR 450.210 \(a\)\(1\)\(v\)](#). Figures within this PIP document are available as a story map to follow this effort as defined under the Table to Contents.

In reviewing a Draft LRSTP or Draft STIP, the KYTC shall involve various interagency groups that represent environmental, traffic, ridesharing, parking, transportation safety and enforcement, airports, port authorities, toll authorities, and appropriate private transportation provider concerns. The KYTC will also involve city officials, as appropriate, as well as local, state, and federal environmental resources and permit agencies. In each case, the expectation is for the reviewing entity to provide comments within the specified review period. As noted in Section 1 – Interested Parties and Section 3 – Consultation Process, the various state, federal, and local agencies are involved in the development process of the LRSTP and STIP at key decision points throughout the entire process, such as project identification and prioritization, where appropriate.

Review of the Draft LRSTP and Draft STIP may consist of public meetings held at convenient/accessible times and locations, and/or when needed virtually as discussed further in **Appendix B**. Public notices for meetings can include notifications to neighborhood associations, legal notices in local newspapers, and/or digital advertisements through online sites and social media, or any additional efforts to significantly enhance the public's understanding of the planning-level recommendations being presented by the Draft LRSTP or STIP document. The KYTC will establish the number, time, and location and/or virtual approach to any public meeting to fit current circumstances. Online tools and/or methods are among options available to KYTC to capture public input. If necessary, the option of extending the Draft LRSTP or Draft STIP comment period is available to allow more time for receipt of post-meeting comments. Whenever possible, the ADD and MPO public involvement processes will coordinate with the statewide process to enhance public consideration of the issues, plans, programs, and to reduce redundancies and costs.

### **3.3.1-1.1 For the LRSTP, the following apply:**

After the initial 30-day public review and comment period, the KYTC will aggregate comments, prepare responses demonstrating consideration and respond to public input, and finalize the LRSTP document. The KYTC will make available copies of the final edition of the LRSTP document for public information and provide a final copy to both the FHWA and FTA. In addition, the KYTC will post the final LRSTP document on the KYTC website.

### **3.3.1-1.2 For the STIP, the following apply:**

After the initial 30-day public review and comment period, the KYTC will aggregate comments, prepare responses demonstrating consideration and respond to public input including possible feedback from the FHWA and FTA, and finalize the STIP document. The KYTC will provide copies of the final edition of the STIP document to both the FHWA and FTA for their review and comment. After addressing the FHWA and FTA comments, the KYTC will prepare the final STIP document to include a copy of the joint approval letter from FHWA and FTA. The KYTC will make available copies of the final STIP for public information and distribution as well as the consulting partner agencies (in the list noted earlier in this section) and to any individuals who ask to be included on an official correspondence list maintained by the KYTC. In addition, the KYTC will post the final approved STIP document on the KYTC website.

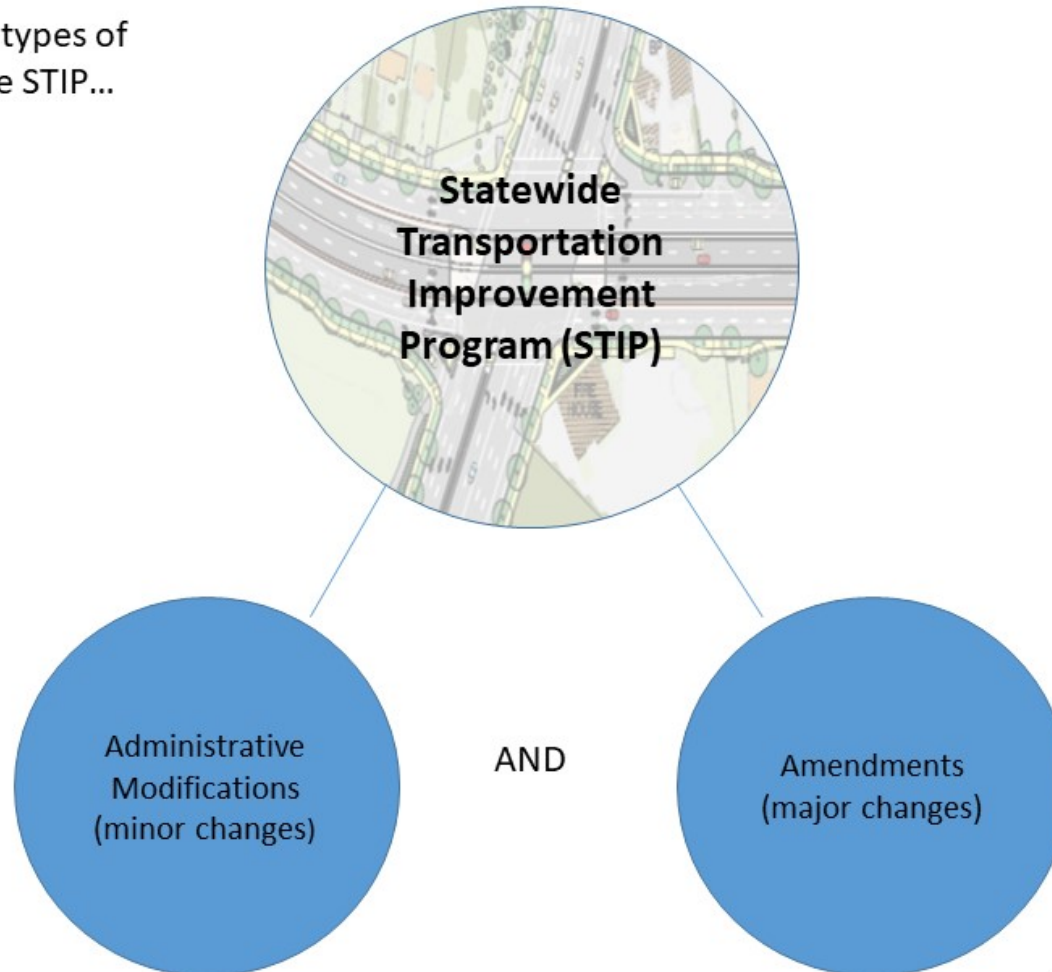

### **3.3.1-2 Revisions to the LRSTP and/or STIP**

On various occasions, revisions may be required to the LRSTP or STIP. Revisions to a LRSTP or STIP may involve a minor or major revision. On a case-by-case basis, the KYTC, FHWA, and/or FTA determines whether the revision is minor or major as per definition of “Administrative Modification” and the definition of “Amendment” outlined [23 CFR 450.104](#). On the following page, [Figure 3.3-7](#) displays the graphical representation of these two types of revisions regarding the STIP.

The KYTC, FHWA, and FTA will utilize applicable requirements and classifications of projects that are not considered to be of appropriate scale for individual identification in a given program year as outlined in [23 CFR 450.218](#) (j) using applicable classification under [23 CFR 771.117](#) (c) and (d) and/or [40 CFR part 93.126](#) “Exempt Projects” and [part 93.127](#) “Projects Exempt from Regional Emissions Analysis.” These appropriately identified projects, also known as grouped projects, may be “grouped” by function, work type, and/or geographic area into the ZVarious programs and other program placeholders to determine if a STIP revision is required.

## Public Participation in *Revisions* to the STIP

There are two types of revisions to the STIP...

How are the types different?

**Figure 3.3-7 – STIP Revision Types**

### **3.3.1-2.1    Administrative Modifications to STIP**

Administrative modifications are minor revisions to the STIP that include minor changes to the following:

- Projects/project phase costs,
- Funding sources of previously included projects,
- Project phase initiation dates (not crossing an analysis year in air quality conformity nonattainment and maintenance areas),
- The delineation of projects in program placeholders which include:
  - Congestion Mitigation and Air Quality (CMAQ) projects,
  - Surface Transportation Block Grant (STBG) - Transportation Alternatives (TA) projects,
  - Highway Safety Improvement Program HSIP projects.

An administrative modification is a revision that does not require the following:

- Public review and comment,
- Re-demonstration of fiscal constraint,
- A conformity determination (in air quality conformity nonattainment and maintenance areas).

For administrative modifications to the STIP, the KYTC uses the official STIP mailing list to distribute information pertaining to the revision. The KYTC also posts each STIP administrative modification on the KYTC website. These documents are also accessible in an electronic format with the means to search and print as appropriate.

[Figure 3.3-8](#) shows different changes that would require one revision type over another.

### **3.3.1-2.2    Amendments to the STIP**

Amendments are revisions to the STIP that include major changes to a project included in the STIP. This includes a major change in:

- Project Cost,
- Project/project phase initiation dates,
- Design concept or design scope (e.g., significant change in project termini or the number of through traffic lanes).
- Addition or deletion of projects, (except those types of projects not considered to be of appropriate scale for individual identification as outlined in [23 CFR 450.218](#) (j) using applicable classification under [23 CFR 771.117](#) (c) and (d) and/or [40 CFR part 93.126](#) “Exempt Projects” and [part 93.127](#) “Projects Exempt from Regional Emissions Analysis.” These appropriately identified projects, also known as grouped projects, may be “grouped” by function, work type, and/or geographic area into the “Zvarious” programs and other program placeholders such as STBG-TA and CMAQ).

[Figure 3.3-9](#) shows the requirement differences between STIP Amendments and Administrative Modifications.

## Public Participation in Revisions to the STIP

The difference is...

### Administrative Modifications

**MINOR** revisions to the STIP that include *minor* changes to:

- Projects/project phase costs
- Funding sources of previously included projects
- Project phase initiation dates
- The delineation of projects in a program place holder
  - Congestion Mitigation and Air Quality projects (CMAQ)
  - Transportation Alternatives (TA) projects
  - Highway Safety Improvement Program (HSIP) projects

VS

### Amendments

**MAJOR** revisions to the STIP that include *major* changes in:

- Project costs
- Project/project phase initiation dates
- Design concept or design scope (e.g. significant change in the project termini or changing the number of through traffic lanes)
- The addition or deletion of projects, except those types of projects not considered to be of appropriate scale for individual identification as outlined in the 23 CFR 771.117© and (d) and/or CFR part 93.126 "Exempt Projects" and 93.127 "Projects Exempt from Regional Emissions Analysis," which are the grouped projects listed in the "Zvarious" programs and other program placeholders such as the Transportation Alternatives (TA) and Congestion Mitigation and Air Quality (CMAQ)

**Figure 3.3-8 – Differences between STIP Revision Types**

## Public Participation in *Revisions* to the STIP

The difference in requirements...

### Administrative Modifications

#### DO NOT require...

- Public review and comment
- Re-demonstration of fiscal constraint
- A conformity determination

VS.

### Amendments

#### DO require...

- Public review and comment
- Re-demonstration of fiscal constraint
- A conformity determination (in air quality conformity nonattainment and maintenance areas)

**Figure 3.3-9** – Requirements between STIP Revision Types

An amendment is a revision that requires:

- Public review and comment,
- Re-demonstration of fiscal constraint,
- A conformity determination (in air quality nonattainment and maintenance areas).

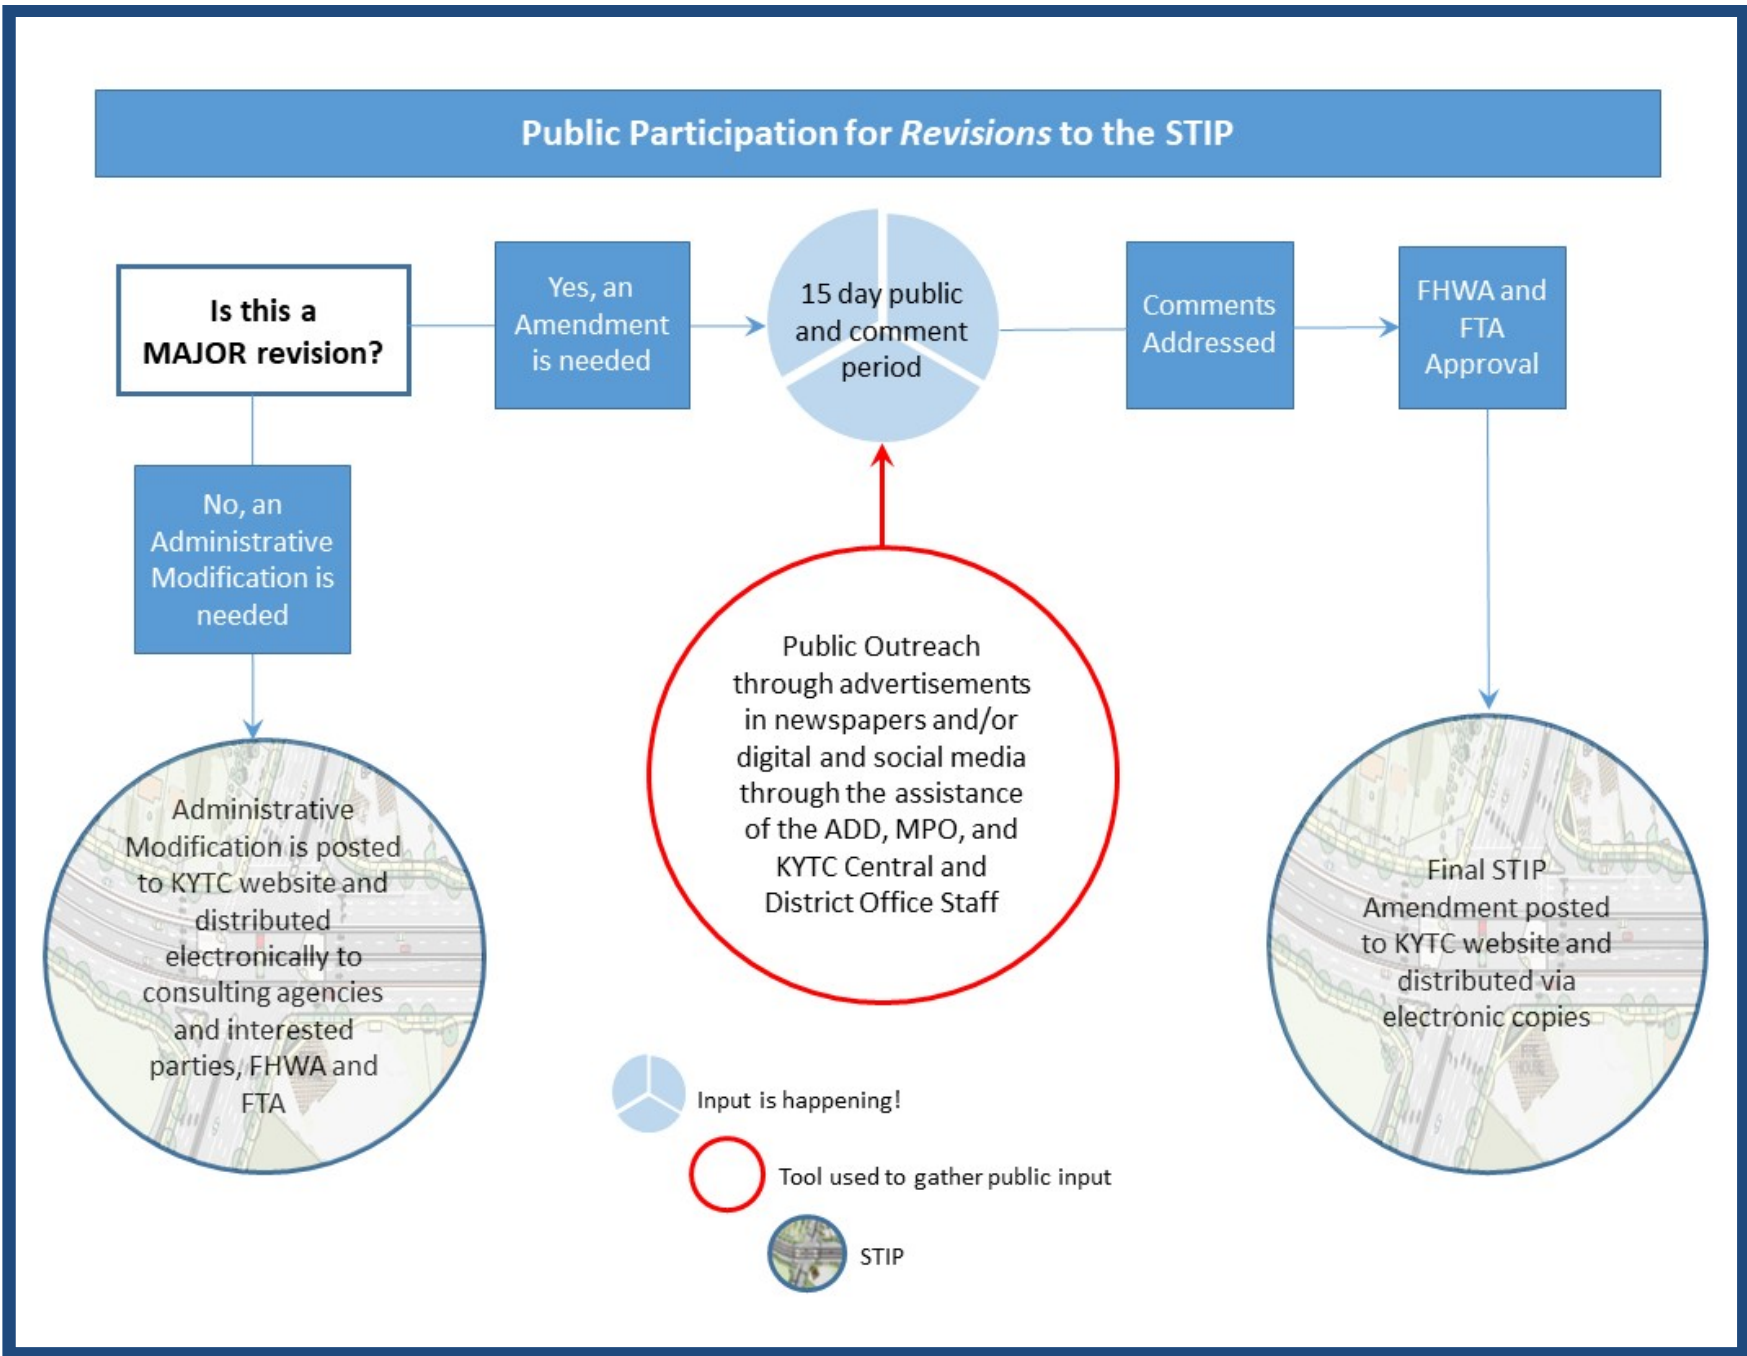

[Figure 3.3-10](#) provides a graphical representation of the decision-making process for the different STIP revision types.

For STIP amendments that have not undergone public involvement through the MPO process or the Highway Plan process, a 15-day public review period and public notice advertisements will occur to more effectively reach diverse populations through any combination of statewide, regionally significant, and/ or demographically targeted newspapers and digital advertising via online sites and social media outlets. The KYTC may inquire with ADDs and MPOs to assist in identifying the appropriate public outreach methods. In addition, other possible public outreach efforts targeted to the specific region of the state directly affected by the proposed STIP amendment may be required and determined on a case-by-case basis.

The KYTC Division of Program Management will share the proposed STIP amendment at the KYTC Central Office and share with the HDOs, ADDs, and MPOs for public review and comment. The KYTC will make the project description, location of the project, proposed project phases and type of funding, and scheduled fiscal year of each phase for which KYTC wants to amend the project into the STIP available to the public. In addition, KYTC will revise the “Fiscal Constraint” tables outlined in the STIP to reflect the required funding for the proposed new project vs. available funding. The KYTC will provide hard copies of the information upon request and place the information on the KYTC STIP website. The public will also receive a means by which to submit written and electronic review comments on proposed STIP amendments.

At the conclusion of the 15-day review period, the KYTC will address public comments and additional public outreach may occur as necessary. The KYTC will provide the final STIP amendment to FHWA and FTA for approval. For amendments to the STIP from areas within the MPO boundaries, the public involvement process conducted for the respective MPO TIP will suffice as the required public involvement for the STIP.

The KYTC will post each approved STIP amendment on the KYTC website and provide such amendment in an electronically accessible format with the means to search and print as appropriate.

**Figure 3.3-10 – STIP Public Involvement Process for Different Revision Types**

## **4. CONSULTATION PROCESS**

The KYTC receives numerous requests each year to help identify potential projects from the 12 KYTC Highway District Offices (HDOs), input from city mayors, county judges, MPOs, ADDs, state legislators, and through written comments and requests from the general public and concerned citizens. The KYTC has established guidelines for ADDs, MPOs, local city and county elected officials, and other interested parties located throughout the Commonwealth of Kentucky to identify and recommend potential projects.

The KYTC considers these requests on a case-by-case basis, and each requestor may receive written correspondence explaining what can occur at the current time and possible recommendations for future actions. These requests are assembled with an electronic transportation needs database called the Continuous Highway Analysis Framework (CHAF) database. This list of identified transportation needs was previously known as the “Unscheduled Needs List (UNL).”

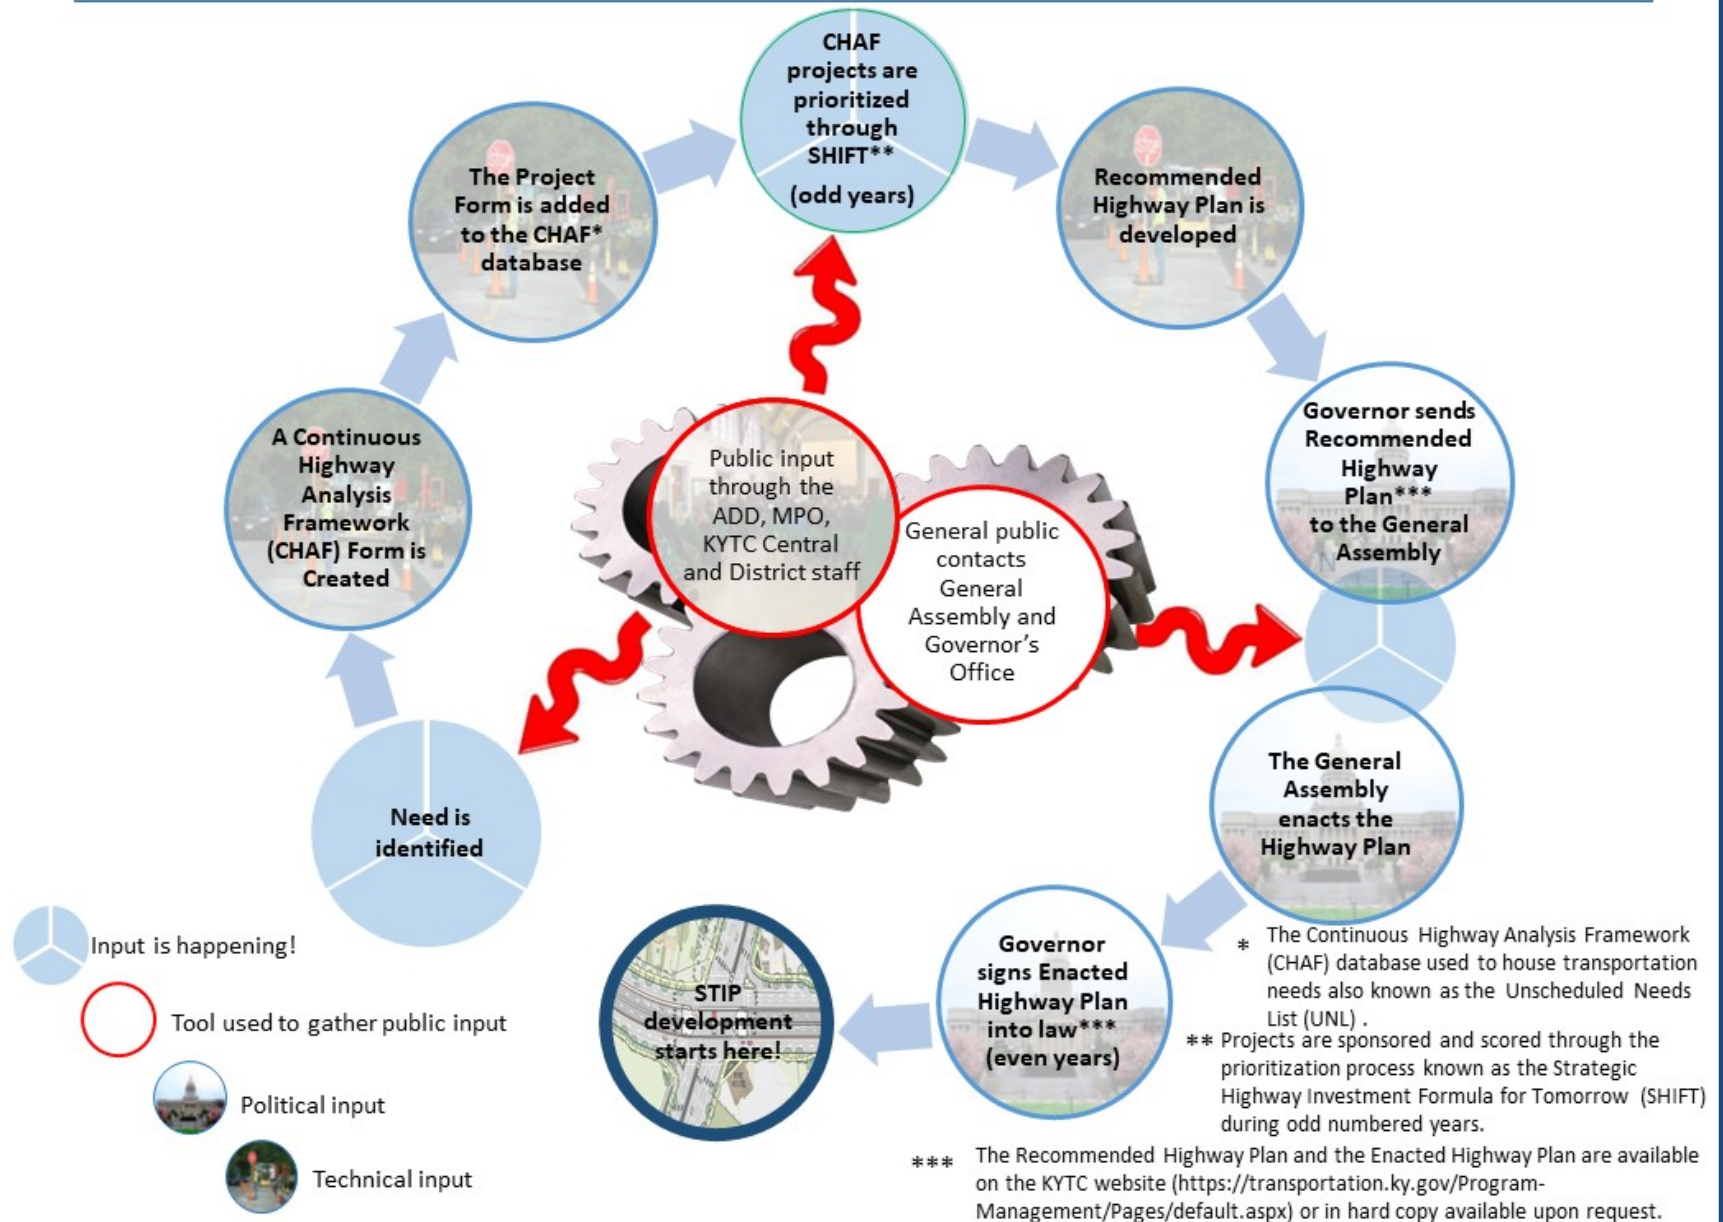

The KYTC maintains the CHAF database. Projects may include but are not limited to the following: highway, bikeway, pedway, intermodal access, and intelligent transportation system (ITS) projects. The KYTC HDOs may also maintain a district list of safety projects, bridge projects, and other operations and maintenance projects for local reference. The KYTC checks each newly suggested transportation need against the current STIP, Highway Plan, and CHAF database to make sure there are no duplicate projects.

Newly identified project requests should include the following information to be a CHAF project:

- Route number or “new route”,
- A clear problem statement that describes the need for the project in terms that can be verified by data analysis or from professional studies,
- A thorough description of the project and location (including road or street names, if applicable),
- Beginning and ending termini mile points for projects located on state-maintained roads,
- Length of project to the nearest tenth of a mile,
- Any existing data concerning the condition, safety, or capacity of the roadway,
- Cost estimates for the proposed projects which are prepared by the Highway District Offices,
- Any other information available to describe the purpose, need, and/or justification for the project.

[\*\*Figure 4.0-1\*\*](#) provides a graphical representation of the consultation process for the identification of individual transportation projects or needed corridor improvements for further consideration to assign relative priorities and rankings by local officials, ADDs, and MPOs as well as HDOs. In odd numbered years, the ADDs, MPOs, and HDOs sponsor projects, then the KYTC scores and prioritizes those projects using a mix of qualitative and quantitative criteria to compete for funding and inclusion in the development of the Recommended Highway Plan. This is known as the Strategic Highway Investment Formula for Tomorrow (SHIFT) process. The SHIFT process itself, is a prioritization model that brings balance and dependability to the development of the Kentucky Recommended Highway Plan.

## Public Participation in the Consultation Process

**Figure 4.0-1 – Public Involvement in the Consultation Process**

Every two years, this prioritization process repeats to ensure that the KYTC keeps the transportation needs current and assures a continuing, cooperative and comprehensive planning process.

#### **4.1 DETERMINATION OF CONSULTATION EFFECTIVENESS**

In accordance with [23 CFR 450.210](#), at least every 5 years the KYTC will review and solicit comments from non-metropolitan local officials and other interested parties for a period of not less than 60 calendar days regarding the effectiveness of the KYTC statewide transportation planning cooperative consultation process including proposed changes. The KYTC will send specific requests for comments to the Kentucky Association of Counties, Kentucky League of Cities, regional planning agencies, or directly to non-metropolitan local officials as to the effectiveness of the KYTC cooperative consultation process and any proposed changes.

Upon receipt, the KYTC will review the comments and proposed changes, and at its discretion, determine whether to adopt any of the proposed changes. If a proposed change is not adopted, the KYTC will make publically available the reason(s) for not accepting the proposed, including notification to non-metropolitan local officials or associations. If the KYTC elects to revise their current public involvement process to include any of the proposed changes, a 45-day public review and comment period will be conducted prior to officially adopting the proposed changes to the public involvement process.

### **5. PUBLIC INVOLVEMENT DURING THE PROJECT LIFE CYCLE**

Public involvement is more than just a single hearing or only one meeting near the end of the project development process. Public involvement should be early and continuous throughout the life cycle of a project. [Figure 5.0-1](#) illustrates the four principal transportation phases of the project life cycle.

A key element of effective communication with the public is to cultivate their general understanding of the KYTC project development and delivery process as described in [Figure 5.0-2](#).

Furthermore, it is essential for the KYTC staff to understand the community's values in order to avoid, minimize, and mitigate impacts as well as to narrow the range of alternatives for a transportation improvement. The KYTC should help make the community aware of the tradeoffs and constraints involved in the process, which should encourage public acceptance of the project. If involved early, the public can provide significant insight (directly or indirectly) into the project's goals, needs, and its effects on their community.

**Figure 5.0-1** - Transportation Phases of Project Life Cycle

## How We Build Roads

### Step 1: Long-Range Planning

- Identify/prioritize purpose & need
- Identify & address public concern
- Identify priorities for State Highway Plan

### Step 2: State Highway Plan

- Project revenue for federal & state funds
- Break revenue into funding categories
- Match required state funds to federal funds
- Balance all fund categories
- Determine projects & programs that can be funded with projected revenues

### Step 3: Project Planning

- Determine project limits
- Verify funding needs
- Identify public concerns
- Verify project needs
- Identify project goals
- Identify environmental concerns
- Coordinate with resource agencies
- Make project recommendations

*Duration: 1-2 Years*

### Step 4: Preliminary Design & Environmental Analysis

- Conduct field surveys
- Inventory existing resources to identify protected, endangered & important resources
- Identify & address public concerns by conducting meetings & distributing reports
- Develop alternatives
- Prepare environmental documentation

*Duration: 1-2 Years*

### Step 5: Final Design

- Develop final alignments
- Develop right-of-way needs
- Drill for soil & rock samples
- Identify & address public comments
- Review environmental commitments
- Develop construction plans

*Duration: 1-2 Years*

### Step 6: Right-of-Way Purchase (Land Acquisition)

- Determine property values
- Meet with property owners
- Address property owner concerns
- Make offers and buy property
- Sign deeds
- Assist with relocations

*Duration: 1 Year*

### Step 7: Utility Relocation

- Move utilities out of construction zone
- Pay utility companies for relocations

*Duration: 1 Year*

### Step 8: Construction

- Address public concerns
- Construct roadway
- Fulfill environmental commitments
- Maintain traffic

*Duration: 1-2 Years*

### Step 9: Maintenance

- Remove snow and ice
- Patch potholes and resurface
- Mowing and many other items

*Duration: Life of the roadway*

**Figure 5.0-2 – KYTC Project Development and Delivery Process**

The viewpoints and opinions of the public are important considerations in the transportation decision-making process. The public includes:

- Users of the facility
- Nearby property owners affected by the project
- Elected officials
- Others interested in the outcome of the project

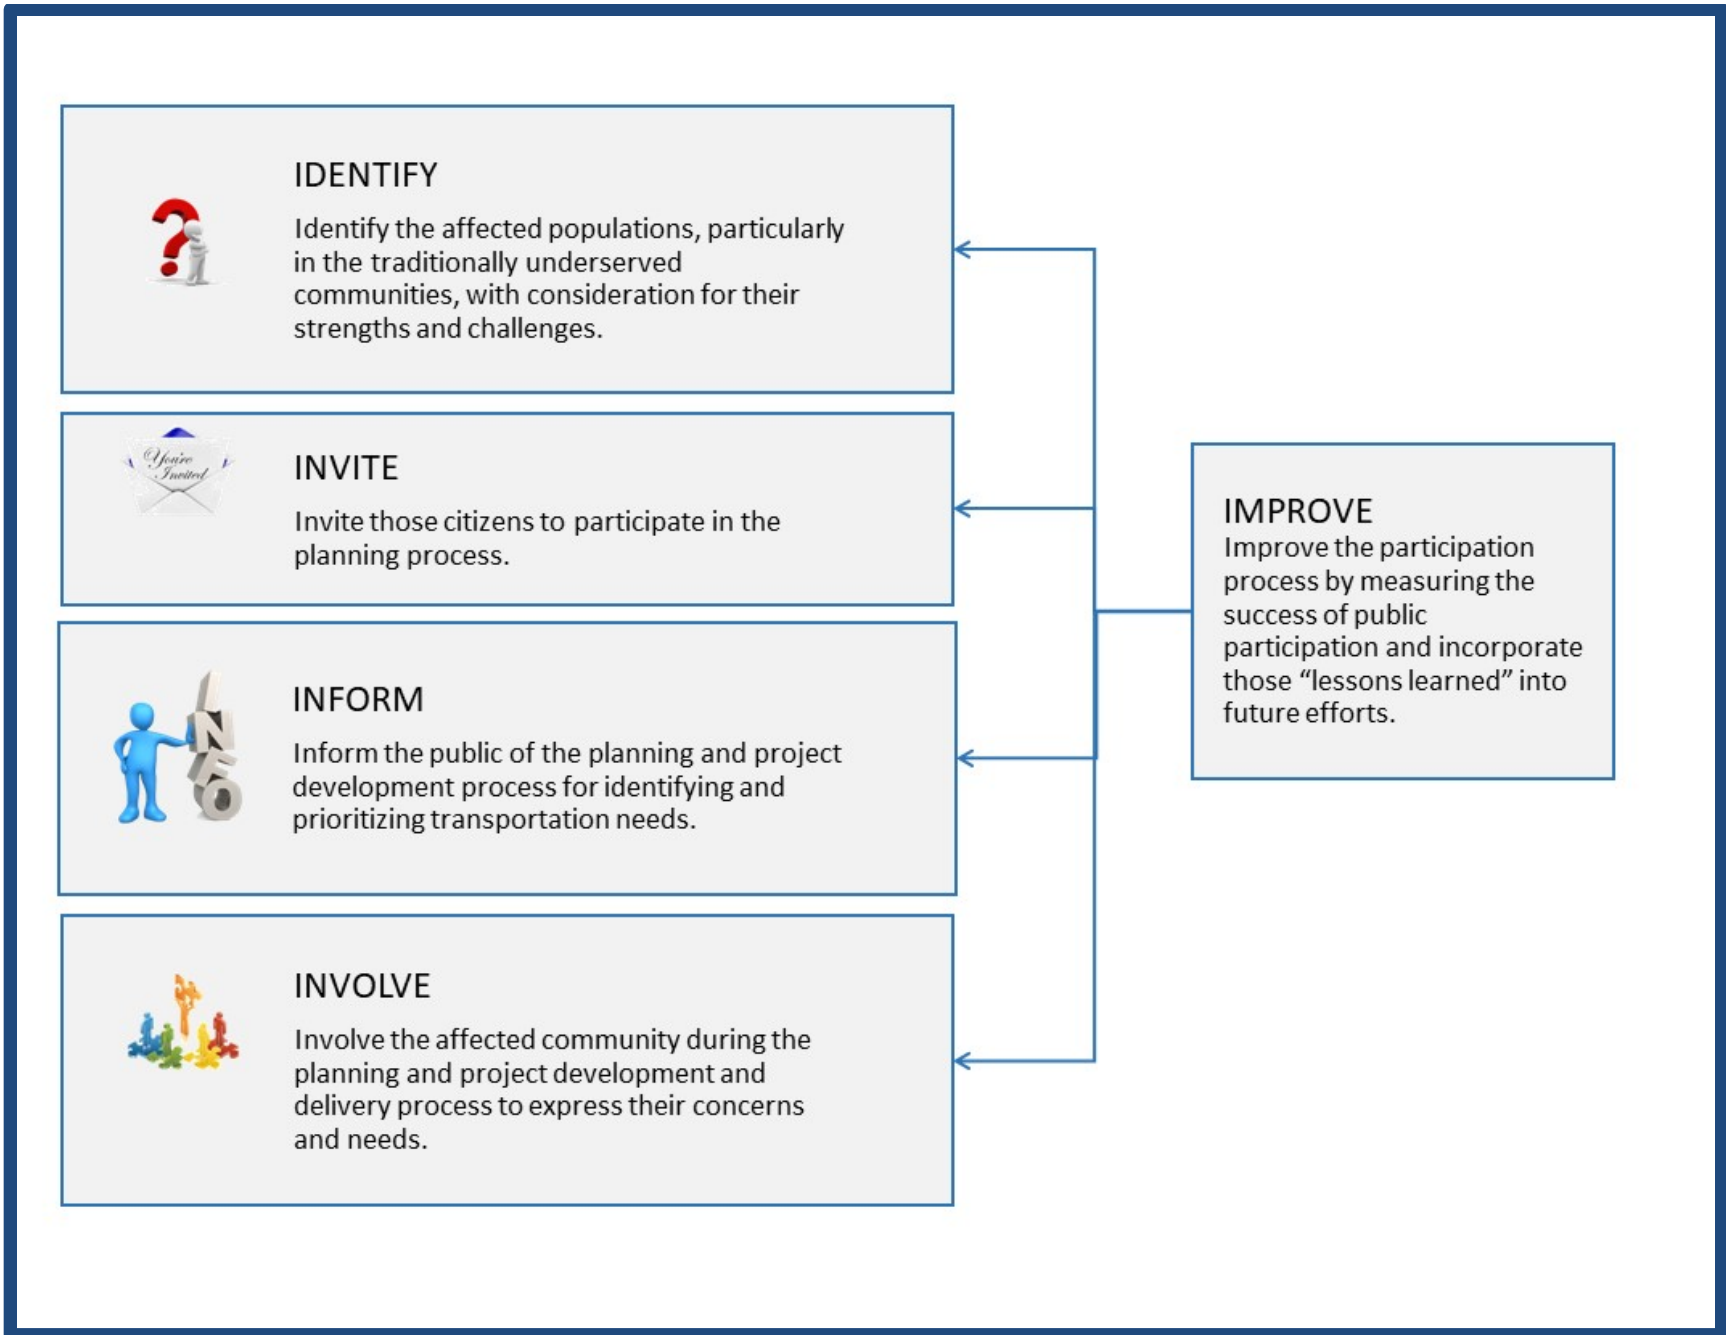

The seven basic steps for effective public involvement in managing any project are:

1. Create a plan for public involvement activities with consideration for members of the public as previously noted. The project budget should account for public involvement expenses. If the public involvement is significant, the KYTC should create a separate budget for this effort.
2. “Identify” the affected populations, particularly in the traditionally underserved communities
3. “Invite” those citizens to participate in the planning process.
4. “Inform” the public of the planning and the project development processes for identifying and prioritizing transportation needs (e.g. existing conditions, issues and concerns, and potential solutions)
5. “Involve” the affected community during the planning and project development and delivery process to express their concerns and needs (e.g. Conduct public involvement activities to collect the concerns and preferences of the public and assist the public to facilitate their involvement. This can include but is not limited to providing interpreters.)
6. Review and consider input, and provide feedback to the public. If significant time lapses between the public involvement meetings and the letting (aka construction advertising) of the project, consider updating the public through media, newsletters, websites and/or other means as appropriate.
7. “Improve” the participation process by measuring the success of public participation and incorporate those “lessons learned” into future efforts (e.g. Evaluate the public involvement activities and improve the process accordingly.)

On the following page, [Figure 5.0-3](#) illustrates the summary process referred to as the “Five I’s of Public Involvement.

## **5.1 PROJECT DEVELOPMENT**

During the project life cycle, public involvement activities are the most extensive during the project development phase. This phase is critical because it links the planning process with the actual human and natural aspects of the project, as well as design, and eventual construction and operation. The responsible party for the public involvement efforts on a particular project goes primarily through the associated KYTC HDO and the designated project manager or resident engineer(s). [Figure 5.1-1](#) provides the contact number for each of the 12 HDOs throughout Kentucky as well as their color-coded district boundaries by county and associated interstates and parkways for reference.

**Figure 5.0-3 – Five I's of Public Involvement**

# KENTUCKY HIGHWAY DISTRICT OFFICES AND BOUNDARY MAP

## Highway Districts Legend

 KYTC District 1 phone: 270-898-2431	 KYTC District 7 phone: 859-246-2355
 KYTC District 2 phone: 270-824-7080	 KYTC District 8 phone: 606-677-4017
 KYTC District 3 phone: 270-746-7898	 KYTC District 9 phone: 606-845-2551
 KYTC District 4 phone: 270-766-5066	 KYTC District 10 phone: 606-666-8841
 KYTC District 5 phone: 502-210-5400	 KYTC District 11 phone: 606-598-2145
 KYTC District 6 phone: 859-341-3661	 KYTC District 12 phone: 606-433-7791

**Figure 5.1-1 – Kentucky Highway District Offices and Boundary Map**

### **5.1.1 Corridor or Area Transportation Planning Studies**

While typical system-wide plans are policy-based, corridor or area transportation planning studies are focused either on a specific facility, such as a roadway, or on the transportation needs for a defined area such as a rural county, a small community, or a neighborhood. Corridor planning activities can include the planning for new corridors to provide for the future mobility or access needs of a region, community, or the identification of improvements to existing corridors in order to preserve or enhance the ability of that facility to move traffic safely and efficiently. Area transportation planning studies focus upon the transportation needs within a small geographic unit such as town or county. Both planning efforts must consider possible environmental impacts upon the human and natural resources within the study area.

Throughout corridor or area transportation planning studies, KYTC makes extensive efforts to reach out to as many groups as possible to receive comments directly from the people who may benefit from and those upon whom impacts may occur by the identified transportation improvements. These studies provide the public and interested stakeholders with opportunities to learn about the planning process, possible outcomes, and project schedules, as well as provide an opportunity to build relationships and show the public the importance of their participation. The KYTC Division of Planning shares public notices and makes their planning studies available to the public through their [Planning Website](https://transportation.ky.gov/Planning/Pages/default.aspx) at <https://transportation.ky.gov/Planning/Pages/default.aspx> as well as providing the public various transportation related data resources. Each of the 12 KYTC Highway District Offices also share public notices regarding projects within their districts.

### **5.1.2 Design, Right-of-Way Acquisition and Utility Relocation**

The KYTC Division of Professional Services (DPS) in accordance with [KRS 45A.825 \(2\)\(c\)](#), maintains their website by providing procurement bulletins and public notices of a request for proposals. The website also provides notices of the materials that the procuring agency will provide to a firm to assist that firm in responding to a request for proposals concerning planning and design engineering services. These materials shall include, but are not limited to, the request for proposals form and the project evaluation sheet for the relevant selection committee. The notice shall also set a deadline for filing responses to a request for proposals with the procuring agency. The intent is that firms, in all regions of the Commonwealth, be given an equal opportunity to be selected.

The request for professional engineering services are advertised on the KYTC [DPS website](#) at <https://transportation.ky.gov/ProfessionalServices/Pages/default.aspx> on the 2<sup>nd</sup> Tuesday of each month, and the Consultant Selection Results are also posted on this website immediately following each consultant selection meeting in accordance with the previously noted KRS and the DPS Guidance Manual.

The Chairperson of the Professional Engineering and Engineering-Related Services Selection Committee notifies the Director of Professional Services, or designee, of the firms determined by the selection committee to be the three best qualified and shares their order of ranking as part of the selection process. The Director of Professional Services, or designee, will then notify these top-ranked firms of their selection and send a letter to these three finalists advising them of their ranking.

Once the source for engineering services has been determined and any necessary contracts executed the project proceeds into the design phase. Public involvement outreach for the design of highway projects is dependent on project location, type of project, and magnitude. The review of demographic information can identify any underserved or special audiences within a project area and will assist in the determination of the appropriate level of outreach.

In project areas where demographics indicate a population of non-English speaking individuals, public involvement will include a mechanism to access project information. The KYTC shall make efforts to identify and accommodate any disabled or any other special need participants.

Formal and informal meetings are the backbone of a public involvement program. People expect and need opportunities to discuss agency programs and plans.

Public hearings are required when the environmental document for the project is an Environmental Assessment/Finding of No Significant Impact (EA/FONSI) or an Environmental Impact Statement (EIS). Projects approved as a categorical exclusion (CE) may utilize a public meeting. When no major relocations are involved and little controversy appears likely, a project approved as a CE may not require any direct public involvement. Public hearings are more regulatory in nature than public meetings. It is possible to conduct public meetings the same way as public hearings, but this is not a requirement, since public hearings are more regulatory in nature than public meetings. **Appendix B** also provides further guidance to consider a virtual approach to public meetings and/or hearings.

A primary objective of early public meetings is to identify issues and concerns for further consideration as the project advances. A primary objective of public hearings or public meetings during later stages of a project is to provide details for public review and comment and to discuss the resolution of the issues and concerns identified in the earlier meetings, particularly when involved with environmental commitments. The following [Figure 5.1-2](#) shows a table to help define the differences between public hearings versus public meetings.

Differences between Public Hearings versus Public Meetings	
Public Hearing	Public Meeting
Records comments from the public into an official Public Record.	Discussion with comments that are not entered into an official record
Required by regulations	Not required by regulations
Coordinated in a comment format	Coordinated in a question and answer format
Hearing officer and court reporter are present to officially, open, close, and document the public comment period	Hearing officer and court reporter are not required but may utilize a facilitator

**Figure 5.1-2 – Differences between Public Hearings versus Public Meetings**

With approval from the Chief District Engineer, the Project Development Branch Manager (PDBM) is responsible for initiating all public meetings, public hearings, or other public involvement as early as feasible in the design process. With insight from the Project Team, the PDBM determines the level of public involvement for state-aid projects. The PDBM has the responsibility and authority for scheduling and holding public meetings and public hearings or for offering the opportunity to request a public hearing.

In compliance with [23 CFR 771.111 \(h\)\(2\)\(iii\)](#), the KYTC will provide the opportunity to request a public hearing or will hold a corridor preliminary line and grade and/or design public hearing for any major federal-aid project. A public hearing or the opportunity to request a public hearing shall be required on any federal-aid project that:

- Requires an Environmental Assessment, Findings of No Significant Impacts (EA/FONSI) or an Environmental Impact Statement (EIS) document
- May require significant amounts of right of way acquisition
- May substantially change the layout or functions of connecting roadways or of the subject facility
- May have a substantial adverse impact on abutting property
- May have a significant social, economic, environmental or other effect
- The FHWA has determined that a public hearing is in the public interest

In accordance the [23 United States Code \(USC\) part 128 - Public Hearing](#), the KYTC is responsible to submit a copy of the hearing transcript to FHWA along with the certification and report.

Before a public hearing is scheduled, the PDBM may elect to offer an “Opportunity to Request a Public Hearing.” Offering the opportunity for a public hearing may be appropriate if additional information was not obtained during a recently held public meeting.

Design, right-of-way acquisition, and utility relocation phases of project development happen concurrently and are dependent upon one another. Considering this relationship among these phases, representatives from all phases of project development should be present at these public meetings and public hearings.

Further information on project development and required NEPA documentation is available in the [KYTC Highway Design Manual](https://transportation.ky.gov/Organizational-Resources/Policy%20Manuals%20Library/Highway%20Design.pdf) under Section 400 –Environmental Considerations, Subsection 403 -Environmental Documents at <https://transportation.ky.gov/Organizational-Resources/Policy%20Manuals%20Library/Highway%20Design.pdf>.

## **5.2 PROJECT DELIVERY AND PRESERVATION**

### **5.2.1 Construction**

During the construction phase of the project life cycle, public involvement takes on more of a public information role, informing citizens about the award of construction project contracts, lane closures, median changes, business access impacts, work hours and work zones, detours, and ribbon cuttings. The KYTC HDO is responsible for providing up-to-date information and solicits the public’s concerns in order to minimize the disruption to businesses, residents, and commuters during the construction phase.

The KYTC Division of Construction Procurement (DCP) website contains vital information relating to the procurement of highway construction and maintenance projects. This includes the notice for project lettings, noting advertisements for projects occur three weeks in advance of the letting date. The KYTC posts these notices on the [DCP website](#) and in a statewide paper (Lexington Herald Leader).

The Division of Construction Procurement posts the results of each letting (aka advertising for construction services) on their website immediately after the letting. These results include the bids and the Engineer’s Estimate for every project in the letting. Approximately 10 days after the letting deadline, the KYTC holds the Awards Meeting and this procurement schedule is available on the [DCP website](#). After the Awards Meeting, the KYTC updates the website to provide the status of the project, and if the project was awarded, and the contractor to whom it was awarded.

The Office of Public Affairs (OPA) attends the Awards Meeting as their office provides the public notice on larger projects or projects that will have a significant impact on the public. The District Public Information Officers (PIO) disseminate information about the awarded projects and the effects these projects will have on traffic. More information on PIOs are available on the [OPA Website](#).

The public must be informed of construction-related activities prior to beginning and during the construction phase of the project. This includes the use of alternative routes during construction, contacts for additional information, and so on. If a significant amount of time has elapsed (because of funding or other issues) between the end of the project design (and its associated coordination activities) and the start of construction, extra effort may be necessary to remind the public of the upcoming improvements and changes to travel routes. Media advisories, a project social media campaign, and project website, as well as dynamic message boards, and public meetings are examples of potential techniques for public involvement activities during this phase.

### **5.2.2 Operations and Maintenance**

Public involvement, during the operations and maintenance phase, typically focuses on informing the public about lane closures, work zones, detours, and temporary access impacts, but the KYTC also uses public outreach to receive feedback on certain proposed improvements. Examples of operations activities include but are not limited to the following: modifications to traffic signals, pavement markings, and signage. Some examples of maintenance activities include roadside mowing/landscaping, winter weather activities, pavement repairs, bridge repairs, and drainage system upkeep.

The KYTC HDO uses a menu of various possible techniques for public involvement activities during this phase, which may include the following: media advisories, a project social media campaign, specific project website, dynamic message boards, and public meetings as needed. Specific example applications of these techniques are the use of social media to inform the public of specific lane closures in construction and maintenance zones and the use of smart phone apps to report major scheduled disruptions to traffic flows for large work zone issues or for major events such as “Thunder over Louisville”, the Kentucky Derby, marathon races, etc.

## **5.3 EVALUATING THE PUBLIC INVOLVEMENT PROCESS FOR THE PROJECT LIFE CYCLE**

Public involvement evaluation is not a single event but a continual review and analysis of the public participation processes, strategies, and techniques. The KYTC is committed to constantly improve its process to achieve its goal of ensuring that anyone wishing to do so have sufficient knowledge and participation opportunities in the transportation decision-making process.

## **6. CONTACT INFORMATION**

The KYTC Division of [Planning Website](https://transportation.ky.gov/Planning/Pages/default.aspx) at <https://transportation.ky.gov/Planning/Pages/default.aspx> provides a link to the Final 2020 Public Involvement Process (PIP) Plan Update webpage for future reference and review. Direct access to this document is available at <https://transportation.ky.gov/Planning/Pages/Public%20Involvement%20Plan.aspx>.

An associated ten short question public survey on the draft version of this document was available for public feedback from Friday, October 30, 2020 through Tuesday, December 15, 2020. This public outreach effort resulted in 46 respondents for which 42 provided insight on the draft PIP document. The KYTC reviewed and considered comments during document finalization and addressed respondents in a separate spreadsheet document provided on the above stated Public Involvement Process (PIP) Plan Webpage for the first 45 days from the posted date of the final 2020 PIP Update.

Additionally, any individual, agency, or organization may provide written comments at any time concerning the public involvement process to:

State Highway Engineer  
Department of Highways  
Transportation Cabinet Office Building, 6th Floor  
200 Mero Street  
Frankfort, Kentucky 40622  
Phone: 502-564-3730

For additional information and special accommodation, please contact KYTC Office of Public Affairs (OPA) at 502-564-3419 or through the [OPA website](https://transportation.ky.gov/PublicAffairs/Pages/default.aspx) at <https://transportation.ky.gov/PublicAffairs/Pages/default.aspx> and/or under [Media Inquiry Form](#).

**Intentionally Blank**

**GUIDELINES  
FOR  
REQUESTING NEW PROJECTS FOR UNSCHEDULED NEEDS LIST**

- **New Projects** may include: Highway, Intermodal Access, and Intelligent Transportation System (ITS) Projects among others.
- Safety projects, bridge projects, etc. should be noted as such and referred to the Highway District Office first. The Highway District Office staff will advise you as to whether this project should be included in the CHAF database or referred through another program.
- Check any NEW Project against the current Highway Plan and CHAF database first, to make sure that this project has not already been added to the Highway Plan or previously been created in CHAF. When the Highway Plan is approved by the Kentucky Legislature, projects should be checked against the approved list of projects.
- All New Projects should include the following:
  - Route Number or “New Route”
  - A thorough description of the project and location (including road or street names, if applicable)
  - The beginning and ending termini
  - Milepoints, using HIS Route Log (accessible on the Internet)
  - Length of project to the nearest thousandth of a mile
  - Any existing data concerning the condition, safety, or capacity of the roadway
  - A clear problem statement for the project
  - Any other information available to describe the purpose, need and/or justification for this project
  - Cost estimates to be prepared by the Highway District Offices, unless otherwise available.
- Purpose Statement - Provide a purpose statement that describes the need for the roadway in terms that can be verified by data analysis or from professional studies. Typical statements can include needs such as capacity, safety, system linkage, geometric deficiencies, transportation demand, social demands, economic development, and intermodal relationships. The purpose statement should focus on the need for a project instead of possible solutions to solve the problems.
- Need Statement - Provide as thorough a description of the project and termini as possible. Consult the Highway District Office for clarification of road/route names of state-maintained routes. The project description should utilize the information presented in the purpose statement to identify the actions to be taken. These may include terms such as capacity additions, safety improvements, corridor completion, alignment improvements, freight movement, and connections to other transportation modes.

- Milepoints - Locate the beginning and ending points of the road improvement as closely as possible. If you have questions, call the Highway District Office or some other local expert to clarify this information.
- New Routes - For new routes on the state-maintained system, contact the Highway District Office and ask for help in determining the point where the new road diverges from an existing road, marking the milepoint and the route number on the project list, and then do the same at the other end. If the new route is to serve as a bypass or draw traffic off roadway, please indicate the existing route that is to be relieved along with the milepoint range affected.
- Project Cost - ADDs do not provide the cost for a totally new project. The Highway District Offices will provide the cost estimates for a project. For MPOs, the Highway District Offices will clarify any cost estimates. Cost estimates should be periodically reviewed and updated to reflect current year construction costs.
- Please provide the total miles of the project as accurately as possible, to the nearest thousandth. For new routes and bypasses where the exact location is not known, please make an estimate as to the expected length of the project.
- Segmenting a New Project - When adding a new project, please try to determine the segments as realistically and logically as possible. Please consult with the Highway District Office staff if in doubt. Further segmenting of projects will not be allowed after the prioritization process begins.
- Segmenting an Existing Project - Segmenting of existing projects is allowed during the Identification/Evaluation Phase only. Please consult the Highway District Office for logical and realistic segmenting of projects.
- Format - Please use the CHAF database when submitting any new projects and include as much data as possible.
- The CHAF database for requesting projects can be accessed by following the link below:
  1. Non KYTC Users -----<https://apps.transportation.ky.gov/pdp>
  2. KYTC Users----- <https://apps.intranet.kytc.ky.gov/pdp>
- All non-KYTC users will first need to set up a Kentucky Online Gateway (KOG) Account prior to requesting a CHAF user account by following the link as below:  
  
<https://kog.chfs.ky.gov/public/requestaccount/>

Good afternoon Mr. Jeter,

The Kentucky Transportation Cabinet (KYTC) is proud to announce that we have completed our 2022-2045 Long-Range Statewide Transportation Plan (LRSTP). The full plan, along with all supporting documentation, is posted on the KYTC Division of Planning website at the following location:

<https://transportation.ky.gov/Planning/Pages/Long-Range-Statewide-Transportation-Plan.aspx>.

The public will be notified via a press release, scheduled for tomorrow, January 10<sup>th</sup>, 2023.

Please let us know if you need additional information concerning the 2022-2045 LRSTP, or if you have any questions or comments.

Thanks for your help and have a great day!

Thanks,

**Mikael B. Pelfrey, P.E.**

Jack Marchbanks, Ph.D.  
Director  
Ohio Department of Transportation  
1980 West Broad Street  
Columbus, OH 43223

Dear Director Marchbanks:

This is in response to your letter September 15, 2023 regarding a request for a USDOT conformity determination for the Ohio-Kentucky-Indiana Regional Council of Governments (OKI) 2050 Metropolitan Transportation Plan (MTP) and FY 2024-2027 Transportation Improvement Program (TIP), as amended. We have completed our review of the conformity documentation to support adoption of the amended MTP and TIP. The conformity analysis includes documentation to demonstrate conformity for applicable standards within the Cincinnati air quality area.

Based on our review, in consultation with the United States Environmental Protection Agency, we find the OKI MTP and TIP conform to the applicable state implementation plan in accordance with the provisions of the EPA's Transportation Conformity Rule (40 CFR Parts 51 and 93).

If you have any questions or comments, please contact Mr. Andy Johns at (614) 280-6850 or [andy.johns@dot.gov](mailto:andy.johns@dot.gov).

Sincerely,

Kelley Brookins

Jeffrey Tyndall, Director of Planning  
Clarksville Urbanized Area Metropolitan Planning Organization  
c/o Clarksville Montgomery County Regional Planning Commission  
329 Main Street  
Clarksville, TN 37040

Dear Mr. Tyndall:

The Federal Highway Administration (FHWA) Kentucky Division and Federal Transit Administration (FTA) Region IV Office, in coordination with the FHWA Tennessee Division and the Environmental Protection Agency (EPA) Region IV Office, have reviewed the Air Quality Conformity Determination adopted by the Clarksville Urbanized Area Metropolitan Planning Organization (MPO) Executive Board on August 10, 2023.

Based on our review, we find that the following documents conform to the 1997 8-hour ozone National Ambient Air Quality Standards (NAAQS) for the former maintenance area of Clarksville-Hopkinsville, TN-KY:

Amendment 1 to the 2023-2026 Transportation Improvement Program (TIP) and  
Amendment 4 to the 2045 Metropolitan Transportation Plan (MTP) for the  
Clarksville Area Metropolitan Planning Organization (MPO)  
(MPO approval resolution signed on August 10, 2023)

The changes included in these amendments only impact projects in the Kentucky portion of the metropolitan planning area.

These conformity decisions are made in accordance with the EPA's *Transportation Conformity Guidance for the South Coast II Court Decision*, the four-year MTP update cycle per 40 CFR 93.104, and the five-year TIP update cycle per 23 CFR 450.324.

If you have any questions regarding these determinations, please contact Nick Vail, Community Planner, FHWA Kentucky Division at (502) 223-6727 or Andres Ramirez, Community Planner, FTA Region IV at (404) 865-5611.

Sincerely,

Todd A. Jeter

Subject: Air Quality Conformity Determination for Clarksville-Hopkinsville, TN-KY

Dear Mr. Meservy:

The Federal Highway Administration (FHWA) Tennessee Division and Federal Transit Administration (FTA) Region IV Office, in coordination with the FHWA Kentucky Division and the Environmental Protection Agency (EPA) Region IV Office, have reviewed the Air Quality Conformity Determination adopted by the Clarksville Urbanized Area Metropolitan Planning Organization (MPO) Executive Board on October 19, 2022.

The Air Quality Conformity Determination covers the Clarksville-Hopkinsville, TN-KY former maintenance area for the 1997 8-hour ozone National Ambient Air Quality Standards (NAAQS) and addresses the planned transportation improvements from the MPO's newly adopted Fiscal Years 2023-2026 Transportation Improvement Program.

Based on our review, we find the documents conform to the ozone NAAQS for Clarksville-Hopkinsville, TN-KY.

If you have any questions regarding this determination, please contact Melanie Murphy, Transportation Planning Specialist, FHWA Tennessee Division at (615) 781-5767 or Andres Ramirez, General Engineer, FTA Region IV at (404) 865-5611.

HDA-KY

Mr. Jarrett Haley, Executive Director  
Louisville Area Metropolitan Planning Organization  
c/o Kentuckiana Regional Planning and Development Agency  
11520 Commonwealth Drive  
Louisville, KY 40299

Dear Mr. Haley:

The Kentucky Division of the Federal Highway Administration (FHWA) and Region 4 of the Federal Transit Administration (FTA), in consultation with the Indiana Division Office of the Federal Highway Administration and Regions 4 and 5 of the United States Environmental Protection Agency (EPA), have reviewed the following document(s):

Amendment 4 to the 2023-2026 Transportation Improvement Program (TIP) and  
2050 Metropolitan Transportation Plan (MTP) for the  
Louisville Area Metropolitan Planning Organization (MPO)  
(MPO approval resolution signed on October 26, 2023)

The Kentucky Environmental and Public Protection Cabinet's Division for Air Quality, the Kentucky Transportation Cabinet's Division of Planning, the Kentucky Transportation Cabinet's Office of Transportation Delivery, the Louisville Metro Air Pollution Control District, and the Transit Authority of River City also had an opportunity to review and comment on the aforementioned documents.

We found that this document meets the five primary criteria of the Transportation Conformity Rule (40 CFR Part 93):

- use of the latest planning assumptions
- use of the latest emissions model
- use of appropriate consultation procedures
- consistency with the mobile vehicle emission budgets in the State Implementation Plan (SIP)
- provisions for the timely implementation of transportation control measures in the SIP.

We found that these documents met the criteria outlined in the July 1, 2004 Transportation Conformity Rule Amendments for New 8-hr Ozone and PM<sub>2.5</sub> National Ambient Air Quality

Standards (NAAQS), Response to March 1999 Court Decision and Additional Rule Changes (69 FR 40004). We therefore find that these documents conform to the 2015 8-hour Ozone NAAQS.

Sincerely,

Todd Jeter  
Division Administrator

200 West Adams St., Suite 320 575 N. Pennsylvania St., Rm 254  
Chicago, IL 60606-5253 Indianapolis, IN 46204-1576

April 4, 2023

Roy Nunnally, Director  
Asset Management Division  
Indiana Department of Transportation  
100 N Senate Ave. N925  
Indianapolis, IN 46204

Dear Mr. Nunnally:

The Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) have completed our review of the documents necessary to make an air quality conformity finding for the Evansville Metropolitan Planning Organization's (EMPO) planning documents. The Evansville Metropolitan Planning Area is within the 2-county Evansville air quality conformity area comprised of Vanderburg and Warrick Counties. The need for this new conformity finding stems from a recent update to the EMPO 2050 Metropolitan Transportation Plan (MTP) and adoption of the FY2024-2028 EMPO Transportation Improvement Program.

Vanderburgh and Warrick Counties are designated as Maintenance for the 1997 Ozone Standard until October 19, 2027. Appropriate consultation and public involvement on the updated MTP and TIP was completed. The Indiana Department of Environmental Management, the Indiana Department of Transportation, and the US Environmental Protection Agency have completed their reviews and have determined that air quality conformity requirements have been met.

This conformity finding supersedes all previous conformity findings for this MPO. Therefore, FHWA and FTA affirms the following planning documents conform to air quality conformity rule requirements:

Evansville MPO 2050 Metropolitan Transportation Plan  
Evansville MPO 2022-2026 TIP (Amendment TIP-9)  
Evansville MPO 2024-2028 (original)

Please note that the 2024-2028 TIP is not incorporated into INDOT's current Statewide Transportation Improvement Program (STIP), therefore, the 2022-2026 TIP is the only TIP officially recognized by FHWA and FTA.

If you have any questions, please feel free to contact Erica Tait, FHWA, at 317-226-5629 or [k.carmanygeorge@dot.gov](mailto:k.carmanygeorge@dot.gov); or Cecilia C. Godfrey, FTA, at 312-705-1268 or [cecilia.crenshaw@dot.gov](mailto:cecilia.crenshaw@dot.gov).

**Re: Air Quality Conformity Determination – KYOVA Interstate Planning Commission  
Transportation Improvement Program (TIP) 2024-2027**

Dear Secretary Wriston:

The Clean Air Act Amendments of 1990 (CAAA) require that transportation plans, programs, and projects cannot create new National Ambient Air Quality Standards (NAAQS) violations, increase the frequency or severity of existing NAAQS violations or delay the attainment of the NAAQS. The Federal Highway Administration (FHWA) and Federal Transit Administration (FTA) is required to make a transportation conformity determination in non-attainment and maintenance areas as outlined in 40 CFR 93.104 and 23 CFR Part 450.

The Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) have completed our review of Kentucky, Ohio, West Virginia Interstate Planning Commission (KYOVA) FY 2024-2027 Transportation Improvement Program (TIP) and Air Quality (AQ) Conformity Analysis submitted by letter dated June 2, 2023, and adopted by the KYOVA MPO on April 23, 2023. The AQ Conformity Analysis is based on the FY 2024-2027 Transportation Improvement Program (TIP). This determination was triggered as a result of having completed the review of the Fiscal Year (FY) 2024-2027 TIP. The last air quality conformity determination was made on August 24, 2023.

The FTA and FHWA coordinated the transportation air quality conformity determinations submittal with the Environmental Protection Agency (EPA) and are jointly making this air quality conformity determination.

On June 20, 2023, in a letter to FHWA's West Virginia Division regarding the review of the Huntington-Ashland 1997 8-hour ozone Maintenance area, the EPA acknowledged its review and included technical documentation that supports the conformity finding of the region's FY 2024-2027 TIP.

Mr. Jimmy Wriston

Page 2

FTA and FHWA find that the analytical results provided by the KYOVA to demonstrate conformity are consistent with EPA's Transportation Conformity Rule (40 CFR Part 93), as amended. FTA and FHWA find that the FY 2024-2027 TIP conforms to the region's State Implementation Plans and that the conformity determination has been performed in accordance with the requirements specified in the Transportation Conformity Rule (40 CFR Part 93), as amended.

FTA and FHWA find that the FY 2024-2027 TIP was developed based on a continuing, cooperative, and comprehensive transportation planning process carried on cooperatively by the KYOVA, their state partners, and the Regional Transportation Authorities in accordance with the requirements of 23 USC 134 and 49 USC 5303.

Based on our transportation planning regulatory requirements, our day-to-day involvement, and extensive review of technical analysis reports, and in accordance with the provisions of 23 USC 134(i)(2)(E), 49 USC 5303, FTA and FHWA find the financial information needed to support our fiscal constraint determination is complete.

Any questions concerning this approval should be directed to Ms. Kara Greathouse, Planner, FHWA West Virginia Division, at (304) 347-3571, or Ms. Chelsea Beytas, Community Planner, FTA Region III, at (215) 656-7961.

Sincerely yours,

---

Terry Garcia Crews  
Regional Administrator  
Federal Transit Administration

**RECREATIONAL TRAILS  
PROJECTS**

RECREATIONAL TRAILS PROGRAM PROJECTS AS OF JULY 2024

County	Project Name	Applicant	ADD	Project Description	RTP Request	Local Match
Allen	Allen County Park: Walking Trails	Allen County Fiscal Court	Barren River	Construct a 1.82 mile paved walking trail at the new Allen County Park.	\$100,000.00	\$125,000.00
Barren	Beaver Creek Park: Track Widening	City of Glasgow	Barren River	Widen the existing walking/running trail from 4' to 12' wide to allow walkers, runners, and bicyclists enjoy the path simultaneously.	\$22,128.00	\$7,375.00
Bath	Tater Knob Fire Tower Trail Rehabilitation	Bath County Fiscal Court	Gateway	Bath County is partnering with the US Forest Service to rehabilitate and re-open the Tater Knob Trail (.25 mile) and Tater Knob Fire Tower located in Daniel Boone National Forest. Scope of work includes: 1) Replacement and repair of deteriorated steps and handrails on trail's wooden staircases, 2) Address localized minor corrosion on trail's steel staircases and tower structure, 3) Reinstall two flights of exterior steel stairs onto the tower for platform access, 4) Construction of a railing around the 10-foot by 10-foot center section of the platform or re-construction of the cab, 5) Replace missing conductor to original specifications, 6) Improve trail head amenities such as parking, picnic tables, and update signage, 7) Improvements to the Tater Knob connector trail including water control features, signage, and corridor clearing.	\$75,000.00	\$93,750.00
Bourbon	Bourbon County Park: Walking & Jogging Trail	Bourbon County Fiscal Court	Bluegrass	Construct a 8 feet wide, 1,400 feet (.26 mile) long, walking and jogging trail at Bourbon County Park. The path will create a continuous loop that will border a section of court sports within the park.	\$68,810.28	\$17,202.57
Boyle	Stanford Avenue Safety Trail Crossing	City of Danville	Bluegrass	Add a pedestrian trail crossing on Stanford Avenue, linking two popular trail segments, Clark's Run and Henson Trail.	\$96,000.00	\$24,000.00
Campbell	Purple Bridge Maintenance and Upgrades	City of Newport	Northern Kentucky	Address maintenance needs on the Purple People Bridge, especially the joint between the bridge sections. Project also includes repainting and improving the electrical and plumbing services to the bridge.	\$190,400.00	\$47,600.00
Christian	Pardue Lane Park: Trails	City of Hopkinsville	Pennyriple	Construct .59 miles of trails within Pardue Lane Park. The trails will provide a link from the Hopkinsville Greenway System to Pardue Lane Park.	\$250,000.00	\$50,000.00
Estill	Estill County Park: Trail Improvement	Estill County Fiscal Court	Bluegrass	This project will extend Estill County's Kentucky River Park asphalt trail to be .80 mile and the nature trail to .70 miles, bringing the total trails in the park to 1.5 miles. A fishing doc will connect to the nature trail. This project will also add benches to the asphalt trail and picnic tables at the nature trail. Lastly, funding will be used for a wilderness trail and a camping section.	\$45,000.00	\$56,250.00
Floyd	Dewey Dam Recreational Dewey Dam Recreational Trail	City of Prestonsburg	Big Sandy	Construct a 3/4 mile pedestrian walking trail. The proposed project will tie into an existing trail and circumnavigate the recreational area. In addition, city will add fencing in selected locations to increase safety.	\$175,000.00	\$44,950.00
Franklin	Schnekel Lane Shared-Use Path	City of Frankfort	Bluegrass	Construct a 8-foot wide, 1-mile long pedestrian and biking shared-use path along Schnekel Lane, between Bypass Plaza Drive and Northwood Road. The path will join the Indian Hills neighborhood with Cove Springs Nature Preserve.	\$150,000.00	\$187,500.00
Hardin	City of Lynch Walk of Legends Trail Phase II	City of Lynch	Lincoln Trail	City was selected for an 2022 RTP grant to lay gravel for a 1/2 mile trail at Portal 31 RV Campground (Phase I). Phase II includes the purchase of asphalt for the trail.	\$40,000.00	\$10,000.00
Harlan	Portal 31 RV Campground Walk of Legends Trail	City of Lynch	Cumberland Valley	Pave the existing 1/2 mile, 10 ft. wide, Walk of Legends trail with two inches of asphalt. Purchase and install 10 benches, four picnic tables, one meter box for lighting, and landscaping.	\$25,000.00	\$31,250.00
Hopkins	Mahr Park Phase III Nature Trail	City of Madisonville	Pennyriple	Construct a .65 mile nature trail. The trail will connect to the park's existing 2.5 miles and will continue the winding path design. It will be paved and feature a wooden bridge and natural stone features, allowing two observation points near park ponds.	\$97,728.00	\$24,432.00
Jefferson	Veterans Memorial Amphitheater Park - Regional Bicycle/Pedestrian Trail	City of Jeffersontown	KIPDA	Construct a 0.3 mile bicycle/pedestrian trail at Veterans Memorial Park. The trail is the last segment of the city's Gaslight Recreational & Workplace Trail System. The project also includes lighting and landscaping.	\$140,000.00	\$565,000.00
Johnson	Dawkins Line Rail Trail Enhancements	Johnson County Fiscal Court	Big Sandy	Add wayfinding and interpretative signage, benches, a bike air station, and a bike repair station to Johnson County's first 12 miles of the Dawkins rail trail. The project is in partnership with the KY Department of Parks.	\$40,740.00	\$10,185.00
Laurel	Levi Jackson Wilderness Park: New Trail Signs & Trail Maintenance	City of London	Cumberland Valley	Scope of work includes: 1) Purchase new information, direction, and trail regulation signs, and trash receptacles to install alongside existing trails. 2) Add one trailhead. 3) Replace six small footbridges. 4) Purchase materials such as culvert pipes, DGA gravel, rock, and equipment to upgrade current trail composition. 5) Smooth surface on all trails to make them more handicap accessible.	\$51,200.00	\$12,800.00

RECREATIONAL TRAILS PROGRAM PROJECTS AS OF JULY 2024

County	Project Name	Applicant	ADD	Project Description	RTP Request	Local Match
Letcher	Jenkins Trail Development	City of Jenkins	Kentucky River	Design and develop a trail from the Little Shepherd Amphitheater to the Jenkins Combs Overlook. The proposed trail will include informational signs that detail the history of the mountain terrain, moonshine production, and civil war activity.	\$100,000.00	\$125,000.00
Letcher	Tanglewood Trail East Whitesburg	Letcher County Fiscal Court	Kentucky River	Expand the Tanglewood Trail by three miles. Activities include finalizing recreational trail easements, constructing three pedestrian bridges over the North Fork of the KY River, grade, gravel, and surface portions of the route, and installing benches, signage, and info kiosks.	\$248,854.00	\$160,000.00
Lincoln	Logan-Hubble Memorial Park: Trail Improvements and Expansion	Lincoln County Fiscal Court	Bluegrass	Scope of work includes: 1) Improvements to 8 miles of existing dirt trails (using a chip finish to improve condition and safety). 2) Constructing (chip finish) and connecting 3.89 miles of proposed trails. 3) Enhancing (chip and seal mix) 2.25 miles of previously developed trails for bicycling. 4) Evaluating restrooms to determine if a new facility should be built. 5) Adding lighting, a kiosk, and signage.	\$250,000.00	\$114,120.00
Madison	City of Berea Scaffold Cane Trail	City of Berea	Bluegrass	Construct a 10 feet wide, 2/3 mile long, shared-use path along Scaffold Cane Road. The proposed trail will connect the downtown area and the campus of Berea College to the residential area immediately south of town. In addition, the City plans to widen the existing culvert 8-10 feet, increasing the trail's pedestrian safety.	\$250,000.00	\$789,467.00
Mason	Maysville-Mason Co Recreational Park Walking Trail Phase 1	City of Maysville	Buffalo Trace	Construct a 1.03 mile long, 5 feet wide, paved walking trail with three foot bridges within the Maysville-Mason County Recreational Park.	\$138,644.00	\$34,661.00
Menifee	Menifee County Equestrian Trail Improvements	Menifee County Fiscal Court	Gateway	Menifee County is partnering with US Forest Service to make improvements to multi-use equestrian and hiking trails located near Cave Run Lake in the Daniel Boone National Forest. The proposed project will make improvements to the following existing trails: Buck Creek Trail, Cave Run Lake Trail, and Leatherwood Loop Trail. Trail improvements include repair of stream crossings, trail hardening, trail widening, and ditching/water damage repairs.	\$200,000.00	\$250,000.00
Mercer	Mercer Trail Reseal	Mercer County Fiscal Court	Bluegrass	Reseal the trail surrounding Anderson Dean Park in Harrodsburg, Kentucky. The project includes assessing the trail's condition, conducting the necessary repairs, and applying a new sealant. New sealant will improve the trail's safety, accessibility, and aesthetics.	\$31,680.00	\$7,920.00
Muhlenberg	Ray Jones Trail	City of Greenville	Pennyrile	Extend the Muhlenberg County Rails to Trails by an additional 6,460 feet (1.2 miles) and join the trail to the Ray Jones Family Athletic Complex. The trail will be paved.	\$55,000.00	\$68,750.00
Perry	Perry County Park: Trails Development Phase 3	Perry County Fiscal Court	Kentucky River	Construct 3.5 miles of hiking and mountain biking trails within the boundaries of the Perry County Park. The project includes the development of an overlook onto KY15 with a gazebo, picnic tables, and primitive camping spots. The projects also includes signage.	\$80,584.00	\$100,730.00
Pike	Bob Amos Park: Multi-Use Trail Repair/Upgrade	City of Pikeville	Big Sandy	Repair and upgrade the existing 2.3 mile long multi-use trail located at Bob Amos Park. Currently, .7 miles of the trail is paved with the remainder of the trail being gravel. The proposed project will add 3" of gravel to the trail, installing 3" of top coat asphalt where needed, and addressing some drainage control and erosion issues along the trail.	\$192,000.00	\$48,000.00
Powell	Hollerwood Off-Road Park: Trail Maintenance	Powell County Fiscal Court	Bluegrass	Address the mud, dirt, and various debris being carried from the trails to the roadways at 7 access points. These 7 points are being considered as erosion control mitigation spots. At 3 of the spots, concrete aprons with raffles embedded will be installed, as well as a corrugated drainpipe and ditching to address water run-off and erosion. At 4 of the spots, the county will install Geotech material with a covering of rocks, stone, and finished with a layer of dense grade aggregate. The project will also address lake dam erosion, trail maintenance and repairs to existing trails, land clearing and improvements to existing event area, expand parking lot, repair/replace/add trail markers and signage, construct a restroom, and develop a long term comprehensive plan. *Motorized Trail*	\$198,900.00	\$49,900.00
Powell	2022 Hollerwood Off-Road Park RTP Application	Powell County Fiscal Court	Bluegrass	The project scope of work includes: 1) Development of new trails, 2) Improve handicap accessibility to all trails, event areas, and structures, 3) Improve existing parking area, 4) Creation of additional parking, 5) Development of an event facility, 6) Development of infrastructure and utilities for overnight camping, 7) Improvements to mitigate lake dam erosion and spillway erosion on existing Sun Oil Lake, and 8) Establish long term land use and comprehensive plan.	\$245,000.00	\$306,250.00
Powell	Hollerwood Offroad Park Phase 3	Powell County Fiscal Court	Bluegrass	Scope of work includes 1) Trail construction and maintenance of existing trails. 2) Improvements to parking. 3) Construction of a restroom facility. 4) Signage.	\$225,000.00	\$45,000.00

RECREATIONAL TRAILS PROGRAM PROJECTS AS OF JULY 2024

County	Project Name	Applicant	ADD	Project Description	RTP Request	Local Match
Pulaski	Pulaski County Park: Maintenance & Expansion	Pulaski County Fiscal Court	Lake Cumberland	Add one mile of trail to the existing trail network in Pulaski County Park. Project also includes repairs to the park's existing trails, repairs to the Piney Grove Suspension Bridge, and replacing the Hamby Cutoff Bridge.	\$84,500.00	\$16,900.00
Trimble	Trimble County Park: Trail System Improvements	Trimble County Fiscal Court	KIPDA	Construct .95 miles of new trails within Trimble County Park. The new trails will run adjacent to existing trails. The project also includes improvements to the park's existing 1.14 miles of trails. Improvements include trailhead facilities, footbridges over streams and natural drainage areas, benches, trash receptacles, and signage.	\$50,000.00	\$62,500.00
Warren	Weldon Peete Park: Dual Slalom and Mini Skills Bike Course	Warren County Fiscal Court	Barren River	Contract with a firm to plan, engineer, and construct a dual slalom measuring 1,000 feet and a mini skills bike course totaling 500 feet. The Dual Slalom Course will feature a 2-lane mirrored course with berm turns. The Bike Skills Course will be a series of manmade technically progressive wooden features.	\$25,000.00	\$6,200.00

Financial Plan**

## Fiscal Constraint

---

The Bipartisan Infrastructure Law (BIL) / Infrastructure Investment and Jobs Act (IIJA) identifies federal funding sources for road, highway, transit, and other transportation related improvements. The BIL/IIJA is a generational investment in our nation's infrastructure. The key aspect of the BIL is its flexibility of funds, empowerment of local jurisdictions in assigning project priorities, public participation to a greater extent in planning and decision making, and fiscal constraint.

Federal law requires that TIPs be financially constrained. That is, this document should include the estimated cost associated with each project and the anticipated revenue source. Additionally, only those projects for which a current or proposed revenue source can be identified may be listed, thus ensuring a balance between total project costs and revenues. This requirement helps the MPO and the KYTC develop a deliverable program of projects.

Although the Bowling Green-Warren County MPO has significant input in the identification of needs and the determination of project funding priorities, it should be understood that the MPO does not have direct control over any source of funding identified herein. Final decisions regarding the allocation of funds (project selection, revenue source, schedule, etc.) are made by the KYTC and the State Legislature. Projects scheduled in the biennium (2022-2023) of the Kentucky State Highway Plan have an associated commitment of the funding identified in the Plan by KYTC and the State Legislature. Funding identified in this document for the years 2024 and beyond represent "reasonably expected" funding to carry out those projects based on their inclusion in the Plan.

**Table 2** on **page 11** provides a summary of costs and revenues by funding type and year (all costs and revenues here and elsewhere in this document are shown in Year-of-Expenditure dollar values). A balance between costs and revenues is indicated; therefore, financial constraint is demonstrated.

The specific projects shown in the Federally Funded Transportation Projects table (**Table 4**) beginning on **page 14** have been identified by KYTC, along with associated programmed or planned revenue source and schedule, in the KYTC Statewide Transportation Improvement Plan (STIP) and/or the Kentucky Highway Plan. To show fiscal balance and distinction of funds, the project tables (**pages 17 – 33**) are identified by federally funded transportation projects (**Table 4**). It should be expected that this program of projects will be subject to periodic changes in schedules and/or revenue sources due to the adjustments that must be made to balance costs and revenues (or maintain financial constraint) at the statewide level, and also due to various project related delays. These changes will be initiated by KYTC and will be reflected in this document by TIP Administrative Modifications or Amendments.

## **Project Types and Project Funds Classification**

---

In order to address the full range of transportation needs, on a statewide level and within the MPO area, the KYTC makes use of a variety of available revenue sources (or funding types). The revenue sources eligible and currently allocated for use within the Bowling Green-Warren County area are identified below:

### **Federal Transit Programs**

FTA – Federal Transit Administration

Section 5307 – Capital Projects and Operating Assistance for Transit Systems

Section 5310 – Enhanced Mobility for Seniors and Individuals with Disabilities

Section 5339 – Bus and Bus Facilities Program

### **Federal Highway Programs**

HSIP – Highway Safety Improvement Program

NHPP/NH – National Highway Performance Program

BRO – Federal Bridge Replacement on Federal System

IM – Interstate Maintenance

NH – Federal National Highway System

RRP – Safety – Railroad Protection

RRS – Safety – Railroad Separation

STPG/STP – Surface Transportation Block Grant Program

BRX – Federal Bridge Replacement Off Federal System

BRZ – Federal Bridge Replacement Local System

TAP – Surface Transportation Block Grant Set-Aside (Transportation Alternatives Projects)

### **State Programs**

SPP – State Construction High Priority

## Grouped Projects

---

Transportation planning regulations applicable to the development and content of the TIP allow that projects that are not considered to be of appropriate scale for individual identification in a given program year may be grouped by function, work type, and/or geographic area. Such projects are usually non-controversial and produce negligible impacts - other than positive benefits for safety, traffic operations, or system preservation. The TIP includes a list of these types of projects (called Grouped Projects) that may be allocated federal funding through a variety of federal funding programs. These projects are typically identified in an effort to improve existing problems/deficiencies, enhance preservation, or improve safety. They may also be the result of competitive grant awards.

For the reasons noted above, KYTC and FHWA have developed streamlined procedures for incorporating such projects into the TIP. Individual projects from grouped project categories will be incorporated into the TIP by Administrative Modification as they are defined (in terms of project description, scope, and cost) and approved. Allowing such TIP changes to be made by Administrative Modification, rather than Amendment, simplifies and streamlines TIP maintenance and project approval processes.

Grouped project categories utilized by the Bowling Green-Warren County MPO are shown in **Table 1** on **page 10**. The list of grouped projects was developed cooperatively with KYTC and FHWA. By listing these project types in the TIP and MTP documents, planning process stakeholders and the general public are informed of the types of potential projects that may be added to the TIP in the future via streamlined procedures. TIP actions for these projects will not require additional public review, demonstration of fiscal constraint, or a conformity determination (if applicable).

When projects are identified, with estimated costs, and funding decisions (type of funds and year) are made by KYTC (on an annual or ongoing basis), the Cabinet will forward the project to the MPO for inclusion in the TIP – with a commitment of additional funding within financially constrained balances available on a statewide level. Financial constraint for grouped projects is maintained by KYTC on a statewide level and is demonstrated on an annual basis for the STIP.

## TABLE 1 | Grouped Projects

HSIP – Highway Safety Improvement Program Implementation

Intersection Improvements for Safety or Efficiency

Guardrail, Median Barrier, and Crash Cushion Projects

Other Highway Safety Improvements

Intelligent Transportation System (ITS) Projects

Traffic Signal System Improvements

Highway Signing

Pavement Markers and Striping

Pavement Resurfacing, Restoration, and Rehabilitation

Bridge Replacement (no additional lanes)

Bridge Rehabilitation

Bridge Inspection

Bridge Painting

Railroad/Highway Crossing Protection

Recreational Trails Projects

Transportation Alternatives Projects

Congestion Mitigation Air Quality (CMAQ) Projects\*\*

Commuter Ridesharing Programs

Bicycle Facilities

Pedestrian Facilities

Park & Ride Facilities

Purchase of New Buses

Rehabilitation of Transit Vehicles

Transit Operating Assistance

Transit Operating Equipment

Small Transit Passenger Shelters and Informational Kiosks

Reconstruction or Renovation of Transit Facilities

Federal Lands Access Program (FLAP)

\*\*The Bowling Green MPO area is not currently eligible for Congestion Mitigation and Air Quality (CMAQ) Improvement Program funds. However, if Warren County becomes designated as a transportation air quality non-attainment area in the future, local entities would become qualified to submit applications for eligible CMAQ funded projects.

## Summary of Funding

The table below provides a summary of costs and revenues by funding type and year (all costs and revenues here and elsewhere in this document are shown in Year-of-Expenditure dollar values). A balance between costs and revenues is indicated; therefore, financial constraint is demonstrated.

TABLE 2   SUMMARY OF HIGHWAY FUNDING TYPES

**Clarksville-Oak Grove FY 2023-2026 TIP  
Financial Plan**

## SECTION 2. FINANCIAL PLAN

The TIP is required to include a financial plan that demonstrates how the program of projects can be implemented. TDOT, the KYTC, local jurisdictions and transit operators and agencies with projects in the TIP have indicated that they have the financial resources to provide the necessary matching funds to complete their projects. In addition, these agencies have determined that funding is available for the maintenance of all existing transportation systems.

Detailed financial breakdowns are included in Table 2.1, Table 2.2 and Table 2.3 below in this section. The funding tables are tabulated from the funding amounts given on the individual TIP sheets for each project. The total amount of money available in each funding category is shown, as well as the total amount programmed for various projects. These tables indicate available funds, programmed funds, and remaining funds by funding source by year. The tables show that programmed expenditures are within the balance of expected fund allocations and therefore demonstrate fiscal constraint.

The projects included in this TIP are funded in accordance with current and proposed revenue sources. All revenue and cost estimates use an inflation rate to reflect "year of expenditure dollars" based upon reasonable financial principles. The inflation rate of 5.0% for TN and 4.0% for KY projects was used to project expenditure dollars for each future year in the TIP and will be for the development of the 2050 MTP. There are no new State funded projects in the TIP, except those awarded through a competitive grant process. The funding for TDOT and KYTC projects is a continuation of existing projects. Each project listed in the TIP has an estimated cost assigned to it. These cost estimates were derived through consultation with TDOT, KYTC, consultants, local governments, the MPO staff and CTS. The estimated cost for each project is in line with the estimates in the 2045 MTP for that project. Annual federal allocations and adopted state and local budgets substantiates that anticipated funding will be available to implement the projects in the TIP. The same inflation rates were used for future year revenues by the MPO staff to estimate anticipated L- STBG annual allocations and by the CTS staff to estimate the Section 5307, 5339, 5310 and UROP annual allocations. If the appropriated funds are less than the authorized amounts or there is a significant shift of projects within the years, then the MPO will develop a revised list in coordination with the State and CTS staff.

## FY2023-FY2026 Transportation Improvement Program

### **Maintenance and Operations:**

The Clarksville MPO and its member jurisdictions must assure the maintenance and efficient operation of existing transportation infrastructure. Maintenance activities are those that occur primarily in reaction to situations that have an immediate or imminent adverse impact on the safety or availability of transportation facilities, such as pavement resurfacing and markings, street lighting, sidewalk repair, sinkhole repair, bridge repair, guardrail and sign replacement, and traffic signal maintenance. Operations may include more routine items such as painting and right-of-way maintenance. While these annual activities are not scheduled or funded in the TIP, they are included in Figure 5 to demonstrate that jurisdictions have the resources to operate and maintain the new or improved facilities, equipment, and services programmed in the TIP for FY2023. These numbers are based on expected continual economic growth. Actual numbers may change.

The Clarksville Transit System (CTS) provides fixed route and paratransit service in the urbanized area. Funds for transit operations and maintenance are provided through FTA Section 5307 funds from TN and KY for operating assistance, and through TDOT and local funds contributed by the City of Clarksville. These funds are spent on daily operations activities, and maintenance of vehicles and equipment, which are principal components in sustaining a safe and efficient public transportation infrastructure.

Montgomery County, Tennessee expends approximately \$7.3 million annually to operate and maintain existing roadways. Annual funds in the form of state-shared revenue sources and property taxes provide funding for Montgomery County's operations and maintenance expenditures.

The City of Clarksville, Tennessee expends approximately \$17.4 million annually to operate and maintain the existing road network. State-shared revenue sources, sales taxes and property taxes provide funding for the City of Clarksville's operations and maintenance expenditures.

The City of Oak Grove, Kentucky expends approximately \$257,300 annually to operate and maintain the existing road network. State-shared revenue sources, payroll taxes, sales taxes and property taxes provide funding for the City of Oak Grove's operations and maintenance expenditures.

Hopkinsville, Kentucky expends approximately \$660,000 annually to operate and maintain the existing roadways. Annual funds in the form of state-shared revenue sources and payroll taxes, sales taxes and property taxes provide funding for the City of Hopkinsville's operations and maintenance expenditures.

Christian County, Kentucky expends approximately \$129,919 annually to operate and maintain the existing roadways. Annual funds in the form of state-shared revenue sources and payroll taxes, sales taxes and property taxes provide funding for Christian County's operations and maintenance expenditures.

KYTC expends approximately \$925,798 annually to operate and maintain the existing state routes and interstate in Christian County, KY MPO planning area.

TDOT expends approximately \$24,893,024 annually to operate and maintain the existing state routes and interstate in Montgomery County, TN MPO planning area.

For future years, an estimate of a four (4) percent increase in the budget is used as shown in Figure 6; except for KYTC. KYTC uses 0.02199987% for their growth rate that the STIP assumes. In the event federal transportation funds are made available for maintenance and operations projects, it will be identified in the TIP.

## FY2023-FY2026 Transportation Improvement Program

**Figure 5. Highway Operations and Maintenance Budgets – FY2023**

Maintenance and Operations	Estimated Annual Revenues	Estimated Annual Cost
City of Clarksville, TN	\$17,400,000.00	\$ 17,400,000.00
Montgomery County, TN	\$ 7,304,000.00	\$ 7,304,000.00
City of Oak Grove, KY	\$ 257,300.00	\$ 257,300.00
City of Hopkinsville, KY	\$ 660,000.00	\$ 660,000.00
Christian County, KY*	\$ 239,998.00	\$ 239,998.00
KYTC-Christian County, KY	\$ 925,798.00	\$ 925,798.00
TDOT-Montgomery County/Clarksville, TN	\$ 24,893,024.00	\$ 24,893,024.00
Clarksville Transit System (CTS) – FTA 5307 Operating Funding with State and Local Match	\$ 5,253,342.00	\$ 5,253,342.00
<b>Total Maintenance and Operations</b>	<b>56,933,462.00</b>	<b>\$ 56,933,462.00</b>

\*The local match to the KYTC maintenance funds for 25% of the Christian County area that is within the MPO area. KYTC provided \$499,668.00 in Transportation maintenance funds for Christian County.

**Figure 6. Future Operations and Maintenance Budgets FY2024-FY2026**

Maintenance and Operations	FY2024	FY2025	FY2026
City of Clarksville, TN	\$18,096,000	\$ 18,819,840	\$ 19,572,634
Montgomery County, TN	\$ 7,596,160	\$ 7,900,006	\$ 8,216,007
City of Oak Grove, KY	\$ 267,592	\$ 278,296	\$ 289,427
City of Hopkinsville, KY	\$ 686,400	\$ 713,856	\$ 742,410
Christian County, KY	\$ 249,598	\$ 259,582	\$ 269,965
KYTC-Christian County, KY	\$ 946,165	\$ 966,981	\$ 988,254
TDOT-Montgomery County/Clarksville, TN	\$ 25,888,745	\$ 26,924,295	\$ 28,001,267
Clarksville Transit System (CTS) – FTA 5307 Operating Funding with State and Local	\$ 5,463,476	\$5,682,015	\$ 5,909,295
<b>Total Maintenance and Operations</b>	<b>\$ 59,194,136</b>	<b>\$ 61,544,871</b>	<b>\$ 63,989,259</b>

### Public Participation:

The TIP public participation process follows the process outlined in the adopted Participation Plan (PP). After receiving public input on the TIP, it must be submitted to TDOT and KYTC for inclusion in the respective State Transportation Improvement Plan (STIP).

Public input is a critical element in the development of plans and programs by the MPO. The TIP is a significant document because it provides citizens, the business community, and agencies a comprehensive understanding of the types of transportation projects that will be funded and implemented over the next several years. The public participation process for the TIP is based on the policies and procedures outlined in the MPO's Participation Plan (PP).

**Evansville-Henderson FY 2024-2028 TIP  
Financial Plan**

---

Federal regulations require the programming of state and local transportation programs and projects into a Transportation Improvement Program (TIP). This section will provide descriptions and sources of the varied federal, state, and local transportation funds supporting the TIP program of projects. Current and projected funding and revenue levels in the Evansville MPO Planning Area is also reviewed.

There are a variety of funding options available for programmed improvements in the TIP. The majority of transportation projects programmed in the TIP involve a combination of federal, state, and local funding sources.

## 03 FUNDING THE TIP

## Federal Funds

Federal transportation funding is authorized through the federal transportation funding bill Infrastructure Investment and Jobs Act (IIJA), as described in Chapter 1. The five-year transportation authorization continues the initiatives instituted with its predecessors MAP-21 and FAST-Act, and contains a number of new programs targeting equity, sustainability and resiliency. IIJA core programs include, but are not limited to, the following:

Federal Highway Administration (FHWA) Administered		Federal Transit Administration (FTA) Administered
Surface Transportation Block Grant (STBG)	PROTECT Formula Program	Section 5303 - Metropolitan Planning Program
Highway Safety Improvement Program (HSIP)	National Highway Performance Program (NHPP)	Section 5307 - Urbanized Area Formula Program
Congestion Mitigation and Air Quality (CMAQ)	National Highway Freight Program (NHFP)	Section 5339 - State of Good Repair Program
Carbon Reduction Program (CRP)		Section 5310 - Enhanced Mobility of Seniors and Individuals with Disabilities Program

## FHWA Administered Funds

### Surface Transportation Block Grant (STBG) Program

The IIJA continues the long-standing Surface Transportation Block Grant Program (STBG), acknowledging that this program has the most flexible eligibilities among all Federal-aid highway programs and aligning the program's name with how FHWA has historically administered this reimbursement program. The STBG program provides funds that States and localities may use for projects to preserve or improve conditions and performance on any Federal-aid highway, bridge projects on any public road, facilities for non-motorized transportation, transit capital projects, and public bus terminals and facilities.

The STBG program under the IIJA continues all prior STBG eligibilities including several added under the FAST Act. Activities of some programs that are not separately funded are incorporated as funding set-asides, including transportation alternatives and recreational trails. A portion of STBG funds (equal to 20 percent of the State's FY 2009 Highway Bridge Program apportionment) is to be set aside for bridges not on Federal-aid highways (off-system bridges), unless the Secretary determines the State has insufficient needs to justify this amount. For public understanding purposes, the set-aside funds are noted in this document, as applicable (TA, RTP, STBG-B).

STBG funds can qualify for interstate construction and maintenance, which receive up to 90% federal obligation, while all other STBG funds receive up to 80% obligation. Funding priority within the urbanized area using MPO apportionment funds is determined by the MPO, while projects in rural areas must compete for statewide STBG funds administered by the State DOTs.

### Highway Safety Improvement Program (HSIP)

IIJA continues the successful HSIP for safety improvement projects to reduce traffic fatalities and serious injuries on all public roads. The Act also clarifies the range of eligible HSIP projects, limiting eligibility to activities listed in statute (mostly infrastructure safety-related). The Railway-Highway Crossings Program continues as a set-aside from HSIP funding. The federal participation for HSIP projects is up to 90% reimbursement, with a few project types eligible for up to 100% reimbursement.

### Congestion Mitigation and Air Quality (CMAQ) Improvement Program

Funding is available to reduce congestion and improve air quality for areas that do not meet the National Ambient Air Quality Standards for ozone, carbon monoxide, or particulate matter (nonattainment areas) and for former nonattainment areas that are now in compliance (maintenance areas). Projects or programs which demonstrate air quality benefits, such as reductions in ozone or carbon monoxide levels, are eligible to receive CMAQ funds. Projects may include traffic flow improvements, transit strategies, and other demand management techniques. However, projects which result in expanded capacity for single-occupant vehicles (such as added travel lanes) are ineligible

---

for CMAQ funds. The federal obligation for CMAQ projects and programs is up to 80% reimbursement. CMAQ funds are only available to the Indiana portion of the MPO planning area.

### **Carbon Reduction Program (CRP)**

The purpose of the Carbon Reduction Program (CRP) is to provide federal funding to projects that decrease transportation emissions, which are defined as the carbon dioxide (CO<sub>2</sub>) emissions that result from on-road, highway sources. By November 15, 2023, States are required to develop a Carbon Reduction Strategy that identifies projects, strategies, and policies to reduce transportation emissions.

### **Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (PROTECT) Program**

PROTECT funding is available to make transportation infrastructure more resilient to future weather events and other natural disasters by focusing on resilience planning, making resilience improvements to existing transportation assets and evacuation routes, and addressing at-risk highway infrastructure.

### **National Highway Performance Program (NHPP)**

The IIJA continues the National Highway Performance Program, which was established under MAP-21. The NHPP provides support for the condition and performance of the National Highway System (NHS), for the construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a State's asset management plan for the NHS. The federal share is up to 90% for projects on the Interstate System and up to 80% for all other projects.

### **National Highway Freight Program (NHFP)**

The NHFP is focused on improving the efficient movement of freight on the National Highway Freight Network (NHFN). Funds are distributed to States by formula for eligible activities, such as construction, operational improvements, freight planning, and performance measurement. Although the program is highway-focused, each State may use up to 10% of its NHFP funds for each

fiscal year for public or private freight rail, water facilities (including ports), and intermodal facilities. Beginning December 4, 2017, a State must have a State Freight Plan (compliant with 49 U.S.C. 70202 and approved by DOT) in order to obligate NHFP funds. The federal share is up to 90% for projects on the Interstate system and up to 80% for any other project.

## **FTA Administered Funds**

The FTA has several funding sources for operating, maintenance and capital expenses.

### **Section 5303 Metropolitan Planning**

Section 5303 funds are available for multimodal transportation planning resulting in long-range plans and short-range programs of transportation investment priorities. The program is jointly administered by FTA and FHWA.

### **Section 5307 Urbanized Area Formula Funding Program**

These funds are available for transit capital projects, operating assistance and planning activities. Funding is based on the Evansville-Henderson Urbanized Area's population and population density, and the revenue miles and passenger miles of METS and HART. The program covers up to 50% of annual operating costs and up to 80% of annual capital and planning costs, after excluding projected annual fare box revenue from fixed routes and mobility service (up to a predetermined operating cap). The City of Evansville or City of Henderson must provide the local match.

### **Section 5310 Enhanced Mobility of Seniors and Individuals with Disabilities Program**

Section 5310 funds are available to improve mobility for seniors and individuals with disabilities. This fund is also a formula program based on the Urbanized Area's population of seniors and individuals with disabilities. Eligible projects include bus or van purchases for paratransit services (METS and HART) or for non-profits that provide client transportation. At least 55% of a region's funding must be used for "traditional" 5310 projects, which includes vehicle acquisitions and other capital items related to those vehicles, and prioritizes non-profit providers over public transportation providers. Funds not used by non-

---

profits may be used by METS and HART for vehicle acquisition. The remaining funds, up to 45% of the Urbanized Area's total, may be used by METS and HART for other projects that provide access to public transportation, such as ADA ramps and sidewalks. The program covers up to 80% of capital project costs. A local match is required from the City of Evansville, City of Henderson or non-profit organization.

### **Section 5339 Bus and Bus Facilities Formula Funding Program**

These funds are available to replace, rehabilitate and/or purchase buses and related equipment and to construct bus-related facilities. These funds are allocated using the same formula as the Section 5307 program. The program covers up to 80% of capital project costs. The City of Evansville or City of Henderson must provide the local match.

## **State Funds**

State funds can be used as the sole funding instrument for a project or as matching funds to the federal assistance for state-initiated highway projects or programs. The state funds are administered by INDOT and KYTC and are allocated through their agency project selection processes.

State transit funding is provided by INDOT for METS. The State of Indiana Public Mass Transportation Fund (PMTF) provides grant funds to public transit systems throughout Indiana that receive federal funds under the Federal Transit Administration. Capital and operating funds are allocated through a performance-based formula. Operating and capital projects require a 50% local match.

KYTC provides State transit funding for HART. The Commonwealth of Kentucky matches capital funds at 10% of the total cost of projects under Section 5307 and 5339, leaving just a 10% local match for the City of Henderson. Transportation Development Credits (Toll Credits) may be used as a credit toward the non-Federal matching share of federally assisted transit projects. Toll credits reward states that spend their toll revenue on projects that would otherwise require federal-aid support. Toll Credits do not provide cash to the project to which they are applied, but their use effectively raises the federal share up to 100 percent on projects receiving Toll Credits. Kentucky does not provide funding for planning and operating costs.

## **Local Funds**

There are a variety of transportation funding mechanisms available to local governments. Although many options are available, not all revenue sources may be used to fund or serve as a match to federal funds for improvement projects. Portions of some revenue sources are allocated to fund routine maintenance of transportation facilities, pay employee wages, and maintain equipment. A description of potential local funding sources are as follows:

### **Local Road and Street funds**

Local Road and Street funds provide revenue to both city and county highway departments in Indiana. These funds may be used for various improvements to the local transportation systems, including right of way acquisition, preliminary engineering, construction, or reconstruction activities. They may also be used for bond repayment.

### **Motor Vehicle Highway Account**

This is the principal source of revenue for operation of street and highway departments. This fund is used for the purchase of materials, equipment, and labor for the maintenance and construction of streets and roads.

### **Cumulative Bridge Fund**

The Cumulative Bridge Fund may be used to finance the construction or repair of county-wide bridges and grade separations.

### **Local Option Auto Excise and Wheel Tax**

The State of Indiana also provides for a local option auto excise and wheel tax. Both Vanderburgh and Warrick counties exercise this taxing option. Revenue must be distributed evenly between the county and the municipalities based upon the ratio of city miles to total county miles.

### **Municipal Road Aid and County Road Aid**

Local governments in Kentucky may receive Municipal Road Aid (applicable to cities and unincorporated urban places) or County Road Aid (applicable to counties) to construct, reconstruct or maintain roads and streets.

---

## Local Government Economic Assistance Fund

The Kentucky Local Government Economic Assistance Fund is disbursed to coal producing and coal impact counties. Thirty percent must be spent on the coal haul road system, while the remaining 70% can be used for anything except administrative costs.

## Rural Secondary Program

The Kentucky Rural Secondary Program allocates funds to counties for the construction, reconstruction and maintenance of secondary and rural roads.

## Local Transit Funding

Local transit funding includes fare revenue and funding from the city's general fund. Fare revenue is subtracted from the total operating cost to calculate a net operating cost. The net operating cost is the portion eligible for FTA funding. All other local transit funding comes from general funds of the City of Evansville and City of Henderson. Local non-profits derive their local match from a variety of sources, but primarily rely on donations from their boards, clients, and the local community.

## Fiscal Constraint

The TIP must be fiscally constrained, which is defined as sufficient financial information to demonstrate that the proposed transportation system improvements can be implemented using committed, available, or reasonably available resources, and with assurance that funding is available to operate and maintain the federally supported transportation system. The funding projections used in the federal fiscal constraint analysis are based on the estimated apportionment levels in the IIJA which runs through federal fiscal year 2026. The funding projections for the outer years of the TIP assume the federal funding remains at the estimated FY 2026 apportionment levels. Federal fiscal constraint for the FY 2024-2028 TIP is demonstrated in Tables 3.1 and 3.3. Federal funds within the first four years of the TIP are within the anticipated Federal funding levels, indicating fiscal constraint for local federal-aid projects.

For purposes of Indiana local fiscal constraint, revenue from the Motor Vehicle Highway, Local Road and Street, Local Option Highway User Tax and Cumulative Bridge accounts is considered.

Kentucky revenues include Municipal and County Road Aid, Local Government Economic Assistance, and Rural Secondary Program. Table 3.2 summarizes local revenues and federal fund matching costs for the five years of the TIP. Local fiscal constraint is verified by positive balances for regional LPAs. Operations and maintenance efforts are sustainable based on funds available in excess of TIP costs.

During the five-year period of this TIP, both METS and HART will continue to rely on federal, state and local funds for operating, maintenance and capital expenses. Maintenance of existing services as well as scheduled capital equipment replacement will require revenue beyond the means of the City of Evansville and City of Henderson, requiring the need for multiple revenue sources.

METS is eligible for FTA Section 5307, 5310 and 5339 funding. In addition to these federal funds, METS also receives funding from INDOT through the Public Mass Transit Fund (PMTF). These funds can be used to assist in the financing of operating costs. All other METS funding is from the City of Evansville, primarily through the City's general fund. Riverboat funds may also be used as a local match for capital projects.

HART is also eligible for Section 5307, 5310 and 5339 funding from the FTA. Through a request to KYTC, HART may receive a 10% match for capital projects, reducing the City of Henderson's share for capital projects to 10%. These funds assist in the financing of maintenance costs, bus purchases, paratransit service, and other capital needs. All other HART funding is from the City of Henderson general fund.

Table 3.3 is a summary of the local transit fiscal analysis. Estimated federal, state and local funding for METS, HART and local non-profits is compared to the programmed amounts as detailed in Table 4.4. More specific project information and detailed funding amounts are provided during the grant development process. Additional public outreach is also provided during the grant development process to solicit input regarding the projects and funding sources.

In compliance with the FTA Financial Capacity Policy (Circular 7008.1), it has been determined that financial capacity exists to fund the METS and HART programmed projects during fiscal years 2024 through 2028.

# 03 FUNDING

## IN THIS CHAPTER:

Roadway

Public Transportation

Other Funds

Summary of Funding Award Authority Financial Plans

Transit Program of Projects

Operations and Maintenance

The IIJA/BIL furthers the commitment to funding programs for highways, transit, bicycle, and pedestrian programs that were established in previous transportation acts. The IIJA/BIL creates a streamlined, performance-based program and provides the funds necessary to maintain and improve our nation's transportation infrastructure.

## ROADWAY

The following programs primarily focus on strengthening America's highways, establishing a performance-based program, creating jobs, and supporting economic growth, supporting the Department of Transportation's safety agenda, streamlining transportation programs, and accelerating project delivery and promoting innovation. Funding for roadways is provided for projects through several core formula programs.

### National Highway Performance Program (NHPP)

The National Highway Performance Program (NHPP) provides funding for projects on the National Highway System (NHS) for construction of new facilities on the NHS, and to ensure that investments of federal aid funds in highway construction support the achievement of performance targets.

NHPP projects must be on an eligible facility, and support progress toward achievement of national performance goals for improving infrastructure condition, safety, mobility, or freight movement on the NHS.

NHPP eligible activities include the following:

- Construction, reconstruction, resurfacing, restoration, rehabilitation, preservation, or operational improvements of NHS segments
- Construction, replacement (including replacement with fill material), rehabilitation, preservation, and protection (including scour countermeasures, seismic retrofits, impact protection measures, security countermeasures, and protection against extreme events) of NHS bridges and tunnels
- Bridge and tunnel inspection and evaluation on the NHS and inspection and evaluation of other NHS highway infrastructure assets

- Training of bridge and tunnel inspectors
- Construction, rehabilitation, or replacement of existing ferry boats and facilities, including approaches that connect road segments of the NHS
- Construction, reconstruction, resurfacing, restoration, rehabilitation, and preservation of, and operational improvements for, a federal-aid highway not on the NHS, and construction of a transit project eligible for assistance under chapter 53 of title 49, if the project is in the same corridor and in proximity to a fully access-controlled NHS route, if the improvement is more cost-effective (as determined by a benefit-cost analysis) than an NHS improvement, and will reduce delays or produce travel time savings on the NHS route and improve regional traffic flow.
- Bicycle transportation and pedestrian walkways;
- Highway safety improvements on the NHS
- Capital and operating costs for traffic, and traveler information and monitoring
- Management, and control facilities and programs
- Development and implementation of a State Asset Management Plan for the NHS including data collection, maintenance and integration, software costs, and equipment costs
- Infrastructure-based ITS capital improvements
- Environmental restoration and pollution abatement
- Control of noxious weeds and establishment of native species
- Environmental mitigation related to NHPP projects
- Construction of publicly-owned intracity or intercity bus terminals servicing the NHS

Additional eligible uses of NHPP funds are workforce development, training, and education activities. The typical federal share of NHPP funds for a project is 80%, but that share is reduced to 65% as a penalty, if a state has not implemented an asset management plan within the established time frame.

## Surface Transportation Block Grant (STBG)

The Surface Transportation Block Grant (STBG) is a funding category that provides flexible funding to be used by states and Metropolitan Planning Organizations to preserve and improve the federal-aid highway, bridge and tunnel projects, pedestrian and bicycle infrastructure, and transit capital projects.

From the federal money allocated to a state for distribution through STBG, a proportionate share of funds is set aside for the state's Transportation Alternatives (TA) program, as well as for state planning and research, and off-system bridges.

Fifty percent of the apportionment can be used in any area of the state, while the other fifty percent is sub-allocated as follows:

- Urbanized areas with a population greater than 200,000 will receive a portion based on their relative share of population
- Areas with population greater than 5,000 but no more than 200,000 receive funding for projects identified by the state in consultation with the regional planning organization
- Areas with population of 5,000 or less

STBG funds, allocated to the Louisville/Jefferson County KY-IN MPA, are to be awarded on a priority basis that is determined by the MPO in consultation with the state's respective Department of Transportation, in this case either the Kentucky Transportation Cabinet or the Indiana Department of Transportation. STBG monies obligated to the areas outside a Transportation Management Area (TMA) are to be spent at the discretion of the state department of transportation. INDOT and KYTC have the authority to award the state's share of STBG funds to projects within the Louisville/Jefferson County KY-IN MPA.

All STBG funds, other than those used for interstate completion or interstate maintenance projects, receive an 80% federal share toward the cost of each project. STBG funds used for interstate completion and interstate maintenance receive a 90% federal match.

## Congestion Mitigation and Air Quality Improvement Program (CMAQ)

Projects and programs that assist in the attainment or maintenance of standards for air quality outlined in the Clean Air Act Amendments of 1990 are eligible to use Congestion Mitigation and Air Quality Improvement Program (CMAQ) funds. Eligible projects must:

- Contribute to the attainment or maintenance of a national ambient air quality standard or;
- Be an element of a strategy that will contribute to the attainment or maintenance of a national ambient air quality standard

In Kentucky, the MPO recommends priorities for their non-attainment/maintenance area, and the responsibility for determining final priorities for funding rests with the state. In Indiana, the responsibility for setting priority for CMAQ funds sub-allocated to the non-attainment/maintenance areas rest with the MPO. CMAQ funds typically represent an 80% federal obligation toward the cost of each project.

## Highway Safety Improvement Program (HSIP)

The Highway Safety Improvement Program provides funding dedicated to highway safety. These are federal funds aimed at reducing traffic fatalities and serious injuries on all public roads. Responsibility for setting priority for Highway Safety Improvement Program projects in Kentucky rest with KYTC, and in Indiana, INDOT sub-allocates funds to the MPOs. The federal share of all Highway Safety Improvement Program projects are typically 90%.

## Transportation Alternatives (TA)

The Transportation Alternatives Program was established to fund alternative transportation projects, most notably for bicyclists and pedestrians. Fifty percent of the state's TA apportionment is sub-allocated by both Indiana and Kentucky to MPOs based on their relative share of the total state population.

TA funds can be used for the following eligible activities:

- Construction, planning, and design of on-road and off-road trail facilities for pedestrians, bicyclists, and other non-motorized forms of transportation
- Construction, planning, and design of infrastructure-related projects and systems that will provide safe routes for non-drivers, including children, older adults, and individuals with disabilities to access daily needs
- Conversion and use of abandoned railroad corridors for trails for pedestrians, bicyclists, or other non-motorized transportation users
- Construction of turnouts, overlooks, and viewing areas
- Community improvement activities, including—
  - ◊ Inventory, control, or removal of outdoor advertising
  - ◊ Historic preservation and rehabilitation of historic transportation facilities
  - ◊ Vegetation management practices in transportation rights-of-way to improve roadway safety, prevent against invasive species, and provide erosion control
  - ◊ Archaeological activities relating to impacts from implementation of a transportation project eligible under 23 USC
- Any environmental mitigation activity, including pollution prevention and pollution abatement activities and mitigation to—
  - ◊ Address storm water management, control, and water pollution prevention or abatement related to highway construction or due to highway runoff

- ◊ Reduce vehicle-caused wildlife mortality or to restore and maintain connectivity among terrestrial or aquatic habitats.

In addition, the following activities can be funded using these funds:

- The recreational trails program under 23 USC 206
- The safe routes to school program under §1404 of SAFETEA-LU
- Planning, designing, or constructing boulevards and other roadways largely in the right-of-way of former Interstate System routes or other divided highways

## Railway-Highway Crossing Hazard Elimination (Rail Safety)

This program provides funding for safety improvements to reduce the number of fatalities, injuries, and crashes at public railroad grade crossings. Of the total received by each state, 50% must be set aside for the installation of protective devices at railway-highway crossings. The federal share of Railway-Highway Crossings projects is 90%. INDOT and KYTC have the authority to award these funds.

## Carbon Reduction Program (CRP)

The IIJA/BIL establishes the Carbon Reduction Program (CRP), which provides funds for projects designed to reduce transportation emissions, defined as carbon dioxide (CO<sup>2</sup>) emissions from on-road highway sources. States, in consultation with MPOs, are required to develop a carbon reduction strategy within two years of program enactment and update that strategy at least every four years.

## Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (PROTECT) Formula Program

The IIJA/BIL establishes the Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (PROTECT) Formula Program to help make surface transportation more resilient to natural hazards, including climate change, sea level rise, flooding, extreme weather events, and other natural disasters through support of planning activities, resilience improvements, community resilience and evacuation routes, and at-risk cost infrastructure.

### Other Roadway Programs

There are many other roadway programs that FHWA manages such as the Intelligent Transportation System (ITS) Research and Development Program. The majority of them are competitively awarded by the FHWA. More information about all FHWA programs under IIJA/BIL is available [here](#).

### Carbon Reduction Program (CRP)

The IIJA/BIL establishes the Carbon Reduction Program (CRP), which provides funds for projects designed to reduce transportation emissions, defined as carbon dioxide (CO<sub>2</sub>) emissions from on-road highway sources. States, in consultation with MPOs, are required to develop a carbon reduction strategy within 2 years of program enactment and update that strategy at least every four years.

## PUBLIC TRANSPORTATION

The IIJA/BIL also provides programmatic funding to enhance safety in public transportation and emphasizes restoring and replacing our country's aging public transportation infrastructure.

## Section 5307: Urbanized Area Formula Grants

The Section 5307 program provides grants to urbanized areas for public transportation capital, planning, job access and reverse commute projects, as well as operating expenses in certain circumstances. Eligible activities include capital projects, planning, job access, and reverse commute projects that provide transportation to jobs and employment opportunities for welfare recipients and low-income workers, operating costs in areas with fewer than 200,000 in population, and operating costs up to certain limits for grantees in areas with populations greater than 200,000 and which operate a maximum of 100 buses in fixed-route service during peak hours (rail fixed guideway excluded).

TARC receives an annual allocation of funds through this program. The federal share is 80% for capital assistance, 50% for operating assistance, and 80% for Americans with Disabilities Act (ADA) non-fixed-route paratransit service using up to 10% of a recipient's apportionment. However, TARC is generally not eligible to use these funds for operating assistance.

## Section 5309: Fixed Guideway Capital Investment Grant (New starts)

Section 5309 is a discretionary program that provides grants for new and expanded rail, bus rapid transit, and ferry systems that reflect local priorities to improve transportation options in key corridors. Eligible projects include new fixed-guideways or extensions to fixed guideways (projects that operate on a separate right-of-way exclusively for public transportation, or that include a rail or a catenary system), bus rapid transit projects operating in mixed traffic that represent a substantial investment in the corridor, and projects that improve capacity on an existing fixed-guideway system. The maximum federal share is 80%.

This is a discretionary grant program whereby transit agencies are required to complete a series of steps over several years prior to receiving grant funds. These funds are very competitive and are typically used to build new fixed guideway systems using light rail and streetcars.

## Section 5310: Enhanced Mobility of Seniors and Individuals with Disabilities

The goal of the Section 5310 program is to enhance mobility for seniors and persons with disabilities by providing funds for programs to serve the special needs of transit-dependent populations beyond traditional public transportation services and Americans with Disabilities Act (ADA) complementary paratransit services.

These funds have two specific requirements:

- At least 55% of program funds must be used on capital projects that are:
  - ◊ Public transportation projects planned, designed, and carried out to meet the special needs of seniors and individuals with disabilities when public transportation is insufficient, inappropriate, or unavailable.
- The remaining 45% may be used for:
  - ◊ Public transportation projects that exceed the requirements of the ADA
  - ◊ Public transportation projects that improve access to fixed-route service and decrease reliance by individuals with disabilities on complementary paratransit
  - ◊ Alternatives to public transportation that assist seniors and individuals with disabilities

## Section 5311: Formula Grants for Rural Areas

The FTA Section 5311 program provides capital, planning, and operating assistance to states to support public transportation in rural areas with populations less than 50,000, where many residents often rely on public transit to reach their destinations. Eligible activities include planning, capital, operating, job access and reverse commute projects, and the acquisition of public transportation services.

These funds are awarded by INDOT's Office of Transit and KYTC's Office of Transportation Delivery to rural transit agencies. The federal share is 80% for capital projects, 50% for operating assistance,

and 80% for Americans with Disabilities Act (ADA) non-fixed-route paratransit service using up to 10% of a recipient's apportionment.

## Section 5337: State of Good Repair Grants

Section 5337 is a formula-based program dedicated to repairing and upgrading the nation's rail transit systems along with high-intensity motor bus systems that use high-occupancy vehicle lanes, including bus rapid transit.

Eligible activities include development and implementation of a Transit Asset Management Plan as well as the replacement and rehabilitation of:

- Rolling stock
- Track
- Line equipment and structures
- Signals and communications
- Power equipment and substations
- Passenger stations and terminals
- Security equipment and systems
- Maintenance facilities and equipment
- Operational support equipment, including computer hardware and software

## Other Funds

In 1976, the Kentucky General Assembly appropriated funds to allow the Kentucky Transportation Cabinet (KYTC) to begin matching public transportation capital grants. Since that time, KYTC has been able to provide up to half of the nonfederal share of capital costs, within budgetary limitations. All transit systems operating in Kentucky are requested to annually review their capital equipment needs for the coming three-year period. The resulting Kentucky Public Transportation Capital Improvement Program is used as the basis for awarding state funds.

The Indiana Department of Transportation (INDOT) provides funds from the Public Mass Transportation Fund to match federal transit grants. Created in 1980, the fund is derived from a dedication of 0.76 percent of the state's seven percent general sales and use taxes. The state helps provide up to two-

thirds of the nonfederal share required to match a federal capital or operating grant by matching up to 100 percent of locally derived income up to the allocation amount. State funds are allocated each calendar year by a performance-based formula.

Local funding for TARC is provided by a one-fifth of one percent occupation tax approved by the voters of Louisville and Jefferson County on November 4, 1974. The occupational tax became legally effective on January 1, 1975, and can be used by TARC for operating and capital matching funds.

## SUMMARY OF FUNDING AUTHORITY

Understanding which agencies have the ability to award federal funds in the Louisville/Jefferson County KY- IN MPA for the different USDOT programs can be complicated. On the next page is a chart which explains the agencies that have the authority to award funds from the core federal transportation programs. There are many other smaller funding programs not listed below for which INDOT and KYTC, as the state DOTs, also have authority to award. In addition, both entities award state transportation funds through a variety of programs.

Although there are different agencies that have the authority to award funds from different programs, the TPC and KIPDA staff still have the ultimate responsibility to officially program (i.e. add) the projects and the associated funds TIP.

## FINANCIAL PLANS

The IJJA/BIL requires the MPO to ensure the funds in the TIP are based on the Year of Expenditure, meaning they are adjusted to reflect how much each phase of a project will cost in the year in which they are scheduled. The TIP must be fiscally constrained, which means the MPO cannot program more dollars in the TIP than are anticipated to be received between FY 2023 – 2026. A financial plan of federal funds that are programmed in the TIP for FY 2023 -2026 is shown in **Figure 3** for Indiana programs and **Figure 4** for Kentucky programs.

## TRANSIT PROGRAM OF PROJECTS (POP)

Transit projects requesting federal funds must be included in the TIP and endorsed by the TPC. TARC receives the majority of Federal Transit Administration

(FTA) formula funding through the Urbanized Area Formula Grants (Section 5307) and Bus and Bus Facilities Program (Section 5339), however, there are several small, traditionally non-profit and/or private agencies that may be awarded funding through the competitive Enhanced Mobility of Seniors and Individuals with Disabilities Program (Section 5310). FTA Section 5310 grants are available to private non-profit groups to assist them in providing transportation services to elderly and disabled persons for whom mass transit services are unavailable, insufficient, or inappropriate. TARC is also eligible to apply for Federal Highway Administration (FHWA) funds through the CMAQ, CRP, PROTECT, STBG, and TA programs.

TARC's proposed Fiscal Year 2023 – 2026 POP for FTA Section 5307 can be found in **Figure 5**. FTA Section 5310 projects are usually added to the TIP by administrative modification because the funds are awarded competitively on an annual basis. The anticipated annual allocations for FTA Section 5310 funds can be found in **Figure 6**. To date, TARC has not awarded any Section 5310 funds between FY 2023 – 2026. As additional FTA Section 5310 funds are awarded, the TIP will be updated to add the newly awarded transit projects. TARC's proposed Fiscal Year 2023 - 2026 POP for FTA Section 5339 funds can be found in **Figure 7**. Any FHWA funds that a transit agency receives are also listed in the TIP.

Lastly, TARC has provided additional financial information for incorporation in the TIP. TARC provides statements of capital and operating expenditures and revenues, contribution sources and subsidy amounts, use of the local Mass Transit Trust Fund, and a projected operating statement as depicted in Figures 8 and 9. TARC's five-year Capital Improvement Program is shown in **Figure 10**.

These statements are included in the TIP as required by the Federal Transit Administration and to provide the public an opportunity to review the financial plans of TARC.

## OPERATIONS AND MAINTENANCE

The maintenance of all interstates and state routes is the responsibility of the Indiana Department of Transportation and the Kentucky Transportation Cabinet. Other local agencies also have the responsibility of maintaining certain city/county-owned facilities. The amounts provided are the total costs including local,

state and federal funds. \$269,532,051 is anticipated to be expended over the four-year period of the TIP to maintain the roadways in Clark and Floyd counties. \$380,939,300 is anticipated to be expended over the four-year period to maintain roads in Bullitt, Jefferson, and Oldham counties. TARC has projected spending \$288,519,760 to operate transit in the five-county area over the next four years. Between Fiscal Year 2023 and Fiscal Year 2026 there will be approximately \$938,991,111 available to maintain and operate the transportation system for the Louisville and Southern Indiana urbanized area.

## INDOT

- National Highway Freight Program (NFHP)
- National Highway Performance Program (NHPP)
- Railway-Highway Crossing Hazard Elimination (Section 130)
- Surface Transportation Block Grant (STBG)

## KYTC

- Congestion Mitigation and Air Quality (CMAQ) - Statewide
- Highway Safety Improvement Program (HSIP) - Statewide
- National Highway Freight Program (NHFP)
- National Highway Performance Program (NHPP)
- Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (PROTECT) Formula Program
- Surface Transportation Block Grant (STBG)
- Transportation Alternatives (TA)

## TARC

- Section 5307: Urbanized Area Formula Grants
- Section 5310: Enhanced Mobility for Seniors and Individuals with Disabilities
- Section 5339: Grants for Buses and Bus Facilities Formula Program

## KIPDA

- Congestion Mitigation and Air Quality (CMAQ) - Indiana Only
- Highway Safety Improvement Program (HSIP) - Indiana Only
- Surface Transportation Block Grant (STBG) - Both States
- Transportation Alternatives (TA) - Both States

FIGURE 6: SECTION 5310 - ENHANCED MOBILITY OF SENIORS WITH DISABILITIES PROGRAM

Section 5310 - FY 2022 (Apportioned Year is 2022 / Programmed in FY 2023)

KIPDA ID	Project Name	Description	Federal Funding	State/Local Funding	Total Funding
3060	Operating Expenses (Section 5310-22 OTHER Project)	Operating expenses for Transit Authority of River City (TARC) for the "Suburban Work Trips for Paratransit Customers Outside of the ADA Service Area" project to continue to provide paratransit work trips for people with disabilities who live or work outside the ADA service area.	\$254,532	\$254,532	\$509,064
3061	Operating Expenses (Section 5310-22 OTHER Project)	TARC performance of Program Administration of the Section 5310 Program for the period from July 1, 2022 through June 30, 2023	\$142,209	\$0	\$142,209
3045	Preventive Maintenance (Section 5310-22 TRADITIONAL Project)	Day Spring Wheelchair Van Maintenance Project. Purchase of preventive maintenance for its wheelchair-accessible van. The project will enable Day Spring to provide for individuals with disabilities in the Louisville Urbanized Area.	\$2,400	\$600	\$3,000
3046	Purchase Transit Vehicles (Section 5310-21 TRADITIONAL Project)	Purchase one (1) ADA-accessible full-size van with enhanced HVAC and extended warranty; and one (1) non-ADA-accessible standard 12-passenger van with extended warranty. The project will provide fixed route and on-demand transportation service in Jefferson County for individuals with disabilities to get to day training programs, jobs, and medical appointments.	\$109,600	\$27,400	\$137,000
3064	Purchase Transit Vehicles (Section 5310-22 OTHER Project)	Ztrip (WHC SAF, LLC, dba Ztrip) for the Wheelchair Van Project. Purchase four (4) ADA-accessible minivans to provide shared ride service as part of the existing TARC3 program.	\$243,200	\$60,800	\$304,000
3043	Purchase Transit Vehicles (Section 5310-22 TRADITIONAL Project)	Blue River Services, Inc. Floyd County Urbanized Area Transportation Project. Purchase of one (1) ADA-accessible full-size van with enhanced HVAC and all-wheel-drive. The project will provide transportation for seniors and individuals with disabilities in the urbanized area of Floyd County, Indiana.	\$68,494	\$17,124	\$85,6183057
3058	Purchase Transit Vehicles (Section 5310-22 TRADITIONAL Project)	Rauch, Inc. Accessible Vehicle Project. Purchase of one (1) ADA-accessible minivan; and one (1) non-ADA-accessible standard minivan with all-wheel-drive. The project will transport individuals with disabilities to work, doctor appointments, shopping, community activities, entertainment, dining, and volunteer opportunities.	\$103,600	\$25,900	\$129,500
3044	Purchase Transit Vehicles (Section 5310-22 TRADITIONAL Project)	Christian Care Communities Old Louisville Area Seniors Transportation Project. Purchase of one (1) ADA-accessible full-size van with enhanced HVAC. The project will provide transportation for seniors in the Old Louisville area of Louisville, Kentucky.	\$62,400	\$15,600	\$78,000
3063	Purchase Transit Vehicles and Equipment (Section 5310-22 TRADITIONAL Project)	Zoom Group, Inc. for the Zoom Group Transportation Project. Purchase one (1) ADA-accessible full-size van with enhanced HVAC; one (1) ADA-accessible full-size van with enhanced HVAC and all-wheel drive; two (2) GPS Lockbox (Wayfinder) systems; and four (4) signage graphics. The project will provide transportation for seniors and individuals with disabilities to jobs, job training, job interviews, classes, and medical and mental health appointments. The project will serve approximately 250 physically and developmentally disabled adults, many of whom would be otherwise unable to acquire and maintain employment and access the community.	\$135,200	\$33,800	\$169,000
3048	Purchase Transit Vehicles and Equipment (Section 5310-22 TRADITIONAL Project)	Harbor House of Louisville, Inc. Improve Mobility for Seniors and Individuals with Disabilities Project. Purchase of two (2) ADA-accessible full-size vans with enhanced HVAC; one (1) non-ADA-accessible standard minivan; six (6) vehicle wrap graphics; six (6) in-vehicle cameras; and six (6) dispatch radios. The project will provide transportation for individuals with developmental and intellectual disabilities to and from Harbor House, to medical appointments, and other necessary trips.	\$215,178	\$53,795	\$268,973
3060	Operating Expenses (Section 5310-22 OTHER Project)	Operating expenses for Transit Authority of River City (TARC) for the "Suburban Work Trips for Paratransit Customers Outside of the ADA Service Area" project to continue to provide paratransit work trips for people with disabilities who live or work outside the ADA service area.	\$154,062	\$0	\$154,062
3061	Operating Expenses (Section 5310-22 OTHER Project)	TARC performance of Program Administration of the Section 5310 Program for the period from July 1, 2022 through June 30, 2023	\$17,118	\$0	\$17,118

# **Huntington-Ashland-Ironton FY 2024-2027 TIP Financial Plan**

## Section 7: Financial Plan

One of the planning requirements of the IIJA/BIL is that the TIP must include “a financial plan that demonstrates how the TIP can be implemented and indicates resources from public and private sources that are reasonably expected to be available to carry out the program.” (23 U.S.C. 134 (j)(2)(B)(i-ii))

KYOVA's 2024-2027 TIP Financial Plan demonstrates that existing transportation facilities are being adequately operated and maintained by designating 80% of the final TIP funding for system maintenance and preservation.

In this TIP, those projects that have been selected by WVDOT, KYTC, or ODOT will be analyzed by the respective state and will be programmed accordingly. The burden of financial constraint will be the responsibility of the respective states.

### Federal Aid Highway Program Funds

Under the IIJA, there are 9 basic highway formula funding programs:

- National Highway Performance Program (NHPP)
- Surface Transportation Block Grant Program (STBG)
  - Transportation Alternatives Set-Aside
- Highway Safety Improvement Program (HSIP)
- Railway-Highway Crossings Program

- Congestion Mitigation & Air Quality (CMAQ)
- National Highway Freight Program (NHFP)
- Metropolitan Planning Program
- Carbon Reduction Program (new)
- Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (PROTECT)(new)

Other highway funding programs include the Appalachian Development Highway System (ADHS) and the Bridge Program, and. The IIJA also includes several new discretionary grant programs such as Safe Streets and Roads for All (SS4A), Bridge Investment Program (BIP), Strengthening Mobility and Revolutionizing Transportation (SMART) Grant, Rural Surface Transportation Grant Program, and Reconnecting Communities Pilot Program.

The National Highway Performance Program (NHPP), Highway Safety Improvement Program (HSIP), Congestion Mitigation & Air Quality Improvement Program (CMAQ) and Surface Transportation Block Grant (STBG) Program (formerly TAP) are managed by the West Virginia Department of Transportation, the Kentucky Transportation Cabinet, and the Ohio Department of Transportation; additionally, STBG, and CRP funds are also sub-allocated to KYOVA. Projects funded through the STBG program are selected by KYOVA in cooperation with WVDOT, KYTC and ODOT. A list of funding source designations used in this document can be found in the table below.

Table 7-1: TIP Funding Sources

Program Funds		Programming Agency
NHPP	National Highway Performance Program	WVDOT, ODOT, KYTC
NH	National Highway	WVDOT, ODOT, KYTC
NHPG	National Highway Performance Safety (G)	WVDOT, ODOT, KYTC
HSIP	Highway Safety Improvement Program	WVDOT, ODOT, KYTC
STP	Surface Transportation Program	WVDOT, ODOT, KYTC, & KYOVA
NRT	National Recreational Trails	WVDOT, ODOT, KYTC
TAP	Transportation Alternatives Program	WVDOT, ODOT, KYTC, & KYOVA
TAP <5K POP	Transportation Alternatives Program Population < 5,000	WVDOT, ODOT, KYTC, & KYOVA
TAP 5-50K POP	Transportation Alternatives Program Population 5,000-50,000	WVDOT, ODOT, KYTC, & KYOVA
TAP 50-200K POP	Transportation Alternatives Program Population 50,000-200,000	WVDOT, ODOT, KYTC, & KYOVA
TAP TMA	Transportation Alternatives Program Transportation Management Area	WVDOT, ODOT, KYTC, & KYOVA
TE	Transportation Enhancements	WVDOT, ODOT, KYTC
STBG	Surface Transportation Block Grant Program	WVDOT, ODOT, KYTC & KYOVA
STBG FLEX	Surface Transportation Block Grant Program FLEX	WVDOT, ODOT, KYTC & KYOVA
STBG <5,000 POP	Surface Transportation Block Program under 5K Population	WVDOT, ODOT, & KYTC
STBG-OFF	Surface Transportation Block Grant Program – Off System Bridge	WVDOT, ODOT, & KYTC
STBG-TMA	Surface Transportation Block Grant Program – Transportation Management Area	WVDOT, ODOT, & KYTC
CMAQ	Congestion Mitigation & Air Quality Program	WVDOT, ODOT, KYTC, & KYOVA
CMAQ-FLEX	Congestion Mitigation & Air Quality Program - FLEX	WVDOT, ODOT, & KYTC
MTP	Metropolitan Transportation Planning	KYOVA
RRP	Railroad Protective Devices	WVDOT, ODOT, & KYTC
CRRSAA	Coronavirus Response and Relief Supplemental Appropriations Act	WVDOT, ODOT, & KYTC
SAH (DED STP)	Dedicated STP	KYTC
MTP	Metropolitan Transportation Planning	KYOVA
HWI – BR	Highway Infrastructure - Bridge	WVDOT
MSTP	MPO Surface Transportation Program (Ohio)	KYOVA
CSTP	County Surface Transportation Program (Ohio)	COUNTY ENGINEER
OTHER-BOND	Other Bond (Go-Bond Funding)	WVDOT
FLAP	Federal Lands Access Program	WVDOT, ODOT, KYTC
5339	Bus and Bus Facilities	WVDOT, ODOT, KYTC
5307/5340	FTA Formula (Operating Capital)	WVDOT, ODOT, KYTC
5310	FTA Elderly/Handicapped Capital Grants	KYOVA/TTA
5303	Transit Planning	KYOVA
4BG	Ohio Reference for Local Share	ODOT
002	Ohio Reference for State Share	ODOT

## Innovative Financing – ODOT & WVDOT

Using innovative financing tools allows ODOT, WVDOT and MPOs such as KYOVA to develop and create innovative procedures to build, manage, maintain, and operate our transportation infrastructure. These tools assist all agencies in reducing costs, enhancing efficiency, and generating revenue. Types of innovative financing include Advance Construction, Public-Private-Partnerships (P3s), and Toll Credits.

### Advance Construction

WVDOT and KYOVA utilize advance construction for the management of fund appropriations and obligation limitation provided by FHWA. Advance construction allows agencies to gain federal authorization to begin federally eligible activities without obligating funding. At the time of authorization, FHWA confirms that WVDOT and KYOVA follow all requirements necessary to execute a federal agreement. By placing the funds into advance construction, FHWA does not guarantee funding for the project, but is indicating that the activities would be eligible.

By utilizing advance construction in short-term projects, WVDOT and ODOT can convert its appropriations and obligation limitation for costs that are currently being incurred and maintain a balance throughout the federal fiscal year. The long-term projects can be used primarily for State DOTs, MPOs or CEAO SIB (County Engineers Association of Ohio State Infrastructure Bank) loans that are utilized and managed by State DOTs and MPOs, such as KYOVA. The SIB loans are taken out by a local sponsor and paid off utilizing federal MPO or CEAO funding. These loans have a typical repayment term of 10 years and are paid down using a level principal amortization schedule. These loans typically have two annual payments due. At the designated payment dates, advance construction is converted in the amount of the federal participating principal and interest due.

An example of a long-term project using the SIB loan method in the KYOVA region is the South Point Intermodal Cargo Dock/Intermodal Facility. This SIB loan was in the amount of \$2,600,000 to facilitate the initial construction of this piling/intermodal dock facility.

### Public-Private Partnerships (P3c)

Chapter 5501 of Title LV of the Ohio Revised Code governs the use of public private partnerships (P3s) for state transportation projects in Ohio. P3s can provide numerous benefits in the finance, design, construction, maintenance and operation of transportation facilities.

One of the P3 projects in the KYOVA regional area is the Portsmouth Bypass project in Scioto County, Ohio, which opened to traffic in 2018. This project was a new roadway just outside of Portsmouth, connecting U.S. Route 52 east of New Boston to U.S. Route 23 north and west of Lucasville. This project was procured as a Design Build Finance Operate and Maintain (DBFOM) with availability payments. DBFOM with availability payments combines the complete spectrum of equity finance and delivery. The project was financed by the private partner with a combination of private debt and equity along with Transportation Infrastructure Finance and Innovation Act (TIFIA) loans through FHWA. ODOT will repay the private partner using availability payments for the capital and operations costs over a thirty-year period provided the transportation facility meets the performance specifications of the public-private agreement.

### Toll Credits

Toll Credits are credits that states earn from nonfederal capital expenditures that public or private agencies make “to build, improve, or maintain highways, bridges, or tunnels that serve the public purpose of interstate commerce.”

Section 120(j) of Title 23 permits the use of Toll Credits to fulfill some or all of the federal matching fund requirements normally associated with the financing of eligible Title 23 and Title 49 surface transportation capital, operating, or planning

projects. The application of TCs increases the federal share of a project, thereby reducing required non-federal match requirements.

It is important to note that TCs are not “cash” or additional funding, but instead are credits that can be applied to surface transportation federal aid projects. Utilizing TCs increases the percentage and amount of federal funding that is used to finance an eligible project. These credits are made available to some ODOT capital programs, including the MPO and Large City Program.

## Grouped Projects

### West Virginia

With the new 2023-2028 STIP, the WVDOH includes “Groupable Buckets” which most projects will fall into. Projects with a phase cost larger than \$10,000,000, Safety projects, new traffic signal projects, new lane additions, new roads or new bridges, expansion projects that add capacity and projects that affect air quality are considered not groupable. All other projects will be considered groupable under the new STIP/TIP operating guidelines. The groupable buckets are described below and can be further explained in Appendix C of the 2023-2028 STIP.

Table 7-2: West Virginia Grouped Projects

Bucket Group #	Bucket Program Name	Bucket Program Description
1	Bridge Program	Inspections; Bridge Replacement; Bridge Rehabilitation; Bridge and Concrete Overlays/Sealers; Bridge Clean & Paint
2	Community Development and Connectivity Program	Metropolitan Planning; Community Development; Bike and Pedestrian Projects
3	Localized Mobility Program	Slide Correction; Road/Curve Improvement; New Road/Bridge Construction; Add Auxiliary Lane; New Lane Construction
4	Planning and Workforce Development Program	Workforce Development; Training; Statewide Planning and Research Program; Metropolitan Planning Program
5	Regional Mobility Program	New Road/Bridge Construction; APD Program; Other
6	Pavement Program	Fed Aid (FA) Other Resurfacing; FA Interstate Resurfacing; APD Program; Safety Improvement
7	Traffic Program	Traffic Signals; Striping; Signing; Safety Improvement; RR signals; Lighting
8	Transit Program	Section 5304, 5307, 5310, 5311, 5329, 5337, 5339

*TIP Amendment vs. Administrative Adjustment Process*

Under groupable projects, an amendment is a major change in the approved STIP/Transportation Improvement Program (TIP). It is defined as follows:

- Adding, deleting or moving across federal fiscal years a number of projects with a sum cost greater than 10% of the bucket size, which is found in the WV STIP; or
- A major change of project scope, such as a change that is inconsistent with the National Environmental Policy Act (NEPA) documentation or will change the NEPA determination, or a change that affects the approved Air Quality conformity finding; examples include changing the number of through lanes, adding/deleting non-motorized facilities, changing mode (FTA - rolling stock or facility type), changing capital category (FTA), and may include changing termini which changes the project from groupable to not groupable; or
- Any change requiring a new regional air quality conformity finding which changes the project from groupable to not groupable; or
- A greater than \$10,000,000 cost increase or cost decrease in a phase of a project listed in the current STIP/TIP which changes the project from groupable to not groupable.

For projects considered not groupable, an amendment is any major change in the approved STIP/Transportation Improvement Program (TIP). It is defined as follows:

- Adding or deleting any safety project; or
- Adding or deleting any project that adds new traffic signals; or
- Adding or deleting any project that affects air quality; or

- Adding or deleting any project that changes traffic capacity of a road or bridge; or
- Adding or deleting any expansion project; or
- Adding or deleting any regionally significant, non-federal aid project; or
- Major change in scope of work or cost changes greater than \$2,000,000.

Amendments may be made to the STIP/TIP at any time during the life of the STIP/TIP and require federal approval by FHWA and/or FTA. The amendment, when required, must be consistent with 23 CFR 450 including public involvement procedures, air quality conformity and fiscal constraint.

An administrative adjustment is a minor change in the approved STIP/TIP. Adjustments may be made to the STIP/TIP at any time during the life of the STIP/TIP and do not require federal approval, but will be submitted to FHWA and/or FTA for informational purposes. The administrative adjustment is to meet requirements of the 23 CFR 450 and is defined as follows:

- A minor change in project description that does not change the Air Quality conformity finding in maintenance and nonattainment areas or change the project scope; or
- Shifting programmed funds between projects (i.e., funding sources and projects already identified in the STIP/TIP); or
- Moving programmed projects from year to year within an approved STIP/TIP, except those that cross Air Quality horizon years; or
- A cost change to a groupable project that is less than \$10,000,000 and doesn't change the groupable bucket size by more than 10%; or
- A change to a project that is considered groupable as long as the change does not make it not groupable

### Kentucky

Transportation planning regulations applicable to the development and content of TIPs allow that projects that are not considered to be of appropriate scale for individual identification in a given program year may be grouped by function, work type, and/or geographic area. Such projects are usually non-controversial and produce negligible impacts - other than positive benefits for safety, traffic operations, system preservation, etc. Typically, these projects are not generated through the metropolitan planning process; they are usually initiated by traffic operations or maintenance staff to correct existing problems or deficiencies, or they are the result of successful grant applications by local government agencies.

For the reasons noted above, KYTC and KYOVA have developed streamlined procedures for

incorporating such projects into the TIP. Instead of being identified individually, these projects are grouped into project categories. By listing these grouped projects in the TIP, planning process stakeholders and the general public are informed of the types of potential projects that may be implemented in the Metropolitan Planning Area without modifying the TIP to individually identify such projects. With respect to fiscal constraint for Kentucky grouped projects, it should be noted that dollar amounts do not reflect actual funding levels, but are intended only to provide an illustrative estimate of the amount of funds that might be spent in each grouped projects category on an annual basis. Fiscal constraint for Kentucky grouped projects is maintained by KYTC on a statewide level and is demonstrated on an annual basis for the Statewide Transportation Improvement Program.

Table 7-3: Kentucky Grouped Project List

<b>Description</b> (All projects are located in Boyd or Greenup County)
Pavement resurfacing/rehabilitation projects
Pavement widening with no additional travel lane
Shoulder improvements
Slope stabilization/landslide repairs
Drainage improvements
Bridge replacement/rehabilitation projects with no additional travel lanes
Bridge painting
Bridge inspections
Repair of damage caused by natural disasters, civil unrest, or terrorist acts with no substantial changes in function, location, or capacity
Traffic signal maintenance and operations
Highway signage
Lighting improvements
Skid treatments
Sight distance improvements
Curve realignment projects
Median installation
Fencing

Description (All projects are located in Boyd or Greenup County)
Guardrail/median barriers/crash cushions
Pavement markers and markings
Railroad/highway crossing safety improvements and warning devices
Highway Safety Improvement Program projects
Driver education programs
Bicycle/pedestrian facilities, including pedestrian facility improvements identified in local public agencies' Transition Plan to meet requirements of the Americans with Disabilities Act ADA
Operating assistance to transit agencies
Rehabilitation of transit vehicles
Construction of transit passenger shelters and information kiosks
Transportation Enhancement activities including streetscaping, landscaping, plantings, and informational signs
Planning and Technical Studies

### Ohio

Ohio utilizes Grouped Projects in the TIPs and STIP as shown in the following Grouped Project List. Federal regulations establish the parameters as to whether a project is able to be included on the STIP/TIP as part of a Group. ODOT has automated the Group Process for determining if an individual project was eligible for inclusion in a Group.

#### Process

When a project is programed in Ellis, an automated report determines whether the project meets the requirements for inclusion in a Group. If the project is eligible to be part of a Group, the *CO Approved STIP Line Item Eligibility* field on the Project Overview screen in Ellis is marked with a *Yes*. A Group Report is generated monthly for projects/phases within the current STIP period that are Group eligible. This monthly report is sent to Districts, MPOs, RTPOs and program managers for a coordinated review (1 week). After the review period, Ellis is updated with the STIP Group Reference ID and the Group Report is posted to the STIP website. All projects identified on the

posted Group Report are considered to be on the TIP/STIP via the Group(s) identified.

#### Exceptions

As the Group Process is automated, it may be possible for a project to be misidentified as eligible or ineligible to be included in a Group. As such during the review period, the District, MPO, RTPO, and/or program manager may request that a project be reviewed to further determine eligibility or ineligibility.

An MPO, RTPO, District, or program manager may submit a waiver request via email to the Statewide STIP Coordinator to remove or add a project from or to the Group Report. The request is to include the project name, PID, reason for the request, and action being requested. The request will be reviewed and processed accordingly.

#### Fiscal Constraint

STIP/TIP fiscal constraint is maintained by fiscal year per Group and not on the individual projects utilizing the Group "OHIO ONLY".

Table 7-4: Ohio 2024-2027 Highway STIP Group Summary

November 2022 Costs in \$Millions	2024 Budgets	2025 Budgets	2026 Budgets	2027 Budgets	Total Budgets
<b>STIP Group</b> (Programs Related to Group)					
<b>Discretionary / Earmark (40)</b> (Appalachian Development, Discretionary, Earmark)	\$1.0	\$1.0	\$1.0	\$1.0	\$4.0

## Transit Allocated Funds

Each of the transit agencies in the urbanized area provides KYOVA Interstate Planning Commission with a Fiscally Constrained projected budget for the years the document will cover.

Funds for the Specialized Transportation Program (FTA Section 5310) are programmed into the TIP by Tri-State Transit Authority, the Designated 5310 recipient for the Huntington, WV-KY-OH Urbanized Area. Ohio continues to program a portion of the 5310 allocation into their numbers for the TIP. The TIP tables reflect Ohio's projects, but with the caveat that the portion they project for 5310 is a part of the entire allocation for the TMA area, and is not counted towards totals for the TMA. Any eligible agencies may apply for these funds as a subrecipient.

Funds for Section 5307 and Section 5339 (Bus and Bus Facilities) are equitably split between the three Urban Transit Agencies in a split letter which is

then sent to each FTA region involved. The transit agencies may then apply to FTA for the portion of the 5307 or 5339 funds to which they agreed.

## Fiscal Constraint Analysis for FY 2024-2027

The KYOVA Interstate Planning Commission has developed the TIP in cooperation with the West Virginia DOT, Kentucky Transportation Cabinet and Ohio DOT. Based on information provided by the respective state Departments of Transportation concerning funding availability, KYOVA has concluded that the projects identified in the TIP are financially feasible and can be expected to be funded as programmed within the timeframe of the TIP. Transit projects are based on future section 5307 funding at current levels and Section 5339 funding which can be reasonably anticipated. Tables 7-6 through 7-8 display the Financial Plan for West Virginia, Kentucky, and Ohio.

Table 7-6: TIP Financial Plan for West Virginia per Fiscal Year by Funding Category (FY 2024-2027)

### KYOVA Sub-Allocated Funds

WVDOT, KYTC, and ODOT sub-allocate federal funding to KYOVA for the Congestion Mitigation and Air Quality (CMAQ) Program (Ohio only) and the Surface Transportation Block Grant Program (STBG), which includes a set-aside for Transportation Alternatives (TA). As part of the development of the TIP, WVDOT, ODOT, and KYTC provided a forecast of these funds anticipated to be available during the fiscal years 2024 through 2027 as shown in tables 7-9 through 7-11.

KYOVA uses an application process to award these funds to project sponsors and is outlined on the

KYOVA website under Funding Opportunities. The project selection policy was approved by the Policy Committee and provides all project sponsors with an understanding of the process utilized by this planning agency for developing the TIP and for the administration of STBG (including TA) and CMAQ Ohio funds. New applications are reviewed for eligibility, completeness and required prerequisites to be included in the program. All of the project requests must be reviewed by the Policy Committee and are subjected to a ranking process to prioritize the projects for funding priority.

**Lexington FY 2021-2024 TIP  
Financial Plan**

---

## 3 FINANCIAL PLAN

Updated February 16, 2024

The following information summarizes the Lexington Area MPO's FHWA and FTA program funding. Fundamental features of the TIP are: (1) a listing of the financial resources that are available to carry out TIP programs and projects which demonstrates financial constraint by balancing the estimated cost of projects and the expected revenue; and (2) the inclusion of highway and transit operations and maintenance costs and revenues. All funding estimates have been developed together with the MPO, KYTC and public transit providers.

### 3.1 Financial Resources

The FAST Act identifies federal funding sources for road, highway, transit and other transportation related improvements. The key aspects of the FAST Act include flexibility of funds, empowerment of local jurisdictions in assigning project priorities, an emphasis on public participation in planning and decision making, and fiscal constraint.

Most all federal transportation funding programs require a local match commitment for projects. This local match may come from a variety of state or local fund sources; however, the match cannot come from any federally allocated source. The major FAST Act funding programs are listed below. A detailed overview of these programs can be found in Appendix B.

- Surface Transportation Block Grant Program (STBG)
- STBG Suballocation for Lexington (STBG-SLX)
- STBG Set-Aside for Transportation Alternatives (STBG-TA)
- National Highway Performance Program (NHPP)
- Congestion Mitigation and Air Quality Improvement Program (CMAQ)
- Highway Safety Improvement Program (HSIP)
- Federal Transit Administration (FTA) Programs

#### 3.1.1 Highway Fiscal Considerations

Highway programs and projects are listed in the project tables in Appendix 4 with various funding categories identified and funding for each phase shown by fiscal year. Two quick-lookup tables, Table 5 and Table 10 are also provided. The quick-lookup tables also provide an estimated total project cost including any and all costs previously authorized for the project, the required FY 2021 - FY 2024 costs and any future costs beyond the TIP period. The TIP provides programming information on planned future-year funding for projects to give a current and accurate total cost estimate. However, cost estimates can be subject to change as more detailed information is gathered through the project development process. Table 2 shows a summary of the anticipated highway revenue and expenditures, for both locally and KYTC sponsored non-transit projects over the TIP years.

HIGHWAY ELEMENT	FY 2021-2024 TOTALS
Total Programmed Expenditures	\$371.323.140
Total Anticipated Revenues	\$371,323,140
Ratio of Expenditures to Revenue	1.0

Table 2: Anticipated Highway Revenue and Expenditures

The MPO works closely with its federal and state transportation partners when planning, selecting, and prioritizing Surface Transportation Block Grant Program funds dedicated to the Lexington MPO area (STBG-SLX). The STBG-SLX program consists of federal funds matched with state or local program funds. The MPO has decision authority over the STBG-SLX funds and is responsible for selecting and prioritizing STBG-SLX projects within the fiscal constraints of the current STBG-SLX allocation (see Table 1 for STBG-SLX projects). The MPO currently receives approximately \$9.0 million available for programming projects and programs for STBG-SLX funds (\$7.2 million federal funds matched with \$1.8 million local funds) each fiscal year.

Although the Lexington Area MPO has significant input in identifying local needs and in determining project funding priorities (the MPO has complete control for STBG-SLX projects), it should be understood that the MPO does not have direct control over many Federal, State, and other funding sources identified in the TIP. Final decisions regarding the allocation of funds (project selection, revenue source, schedule, etc.) are made by the Kentucky Transportation Cabinet (KYTC) and the KY State Legislature. In order to address transportation needs on a statewide level and within the Lexington urbanized area, the Cabinet and Legislature make use of a variety of available revenue sources.

### 3.1.2 Transit Fiscal Considerations

The transit financial element shown in Table 14 identifies the various Federal Transit Administration (FTA) funding categories as well as an annual STBG-SLX allocation for Lextran. The MPO coordinates with Lextran and other transit/ paratransit service providers to ensure FTA funding obligations and forecasts are current and accurate. The transit financial forecast was compiled from existing financial data, financial trends and projections. Local share funding for Lextran comes from property tax revenue and is used as the source for local match of federal funds and operating expenditures. In addition to the revenue outlined in Table 14, local transit providers (predominantly Lextran) receive funding from a variety of other sources. The total anticipated transit revenue and expenditures are shown in Table 3. The transit financial element is estimated to total approximately \$190 million from FY 2021 through FY 2024.

<b>TRANSIT ELEMENT</b>	<b>FY 2021-2024 TOTALS</b>
<b>Expenditures</b>	
Operating & Maintenance Expenditures	\$108,000,000
Capital Outlays	\$86,685,156
<b>Total</b>	<b>\$194,685,156</b>
<b>Revenue</b>	
FTA 5307	\$19,789,201
FTA 5310	\$4,972,120
FTA 5311	\$39,454,765
FTA 5339	\$9,990,200
FTA 5339(c) Grant	\$7,624,850
FTA AIM Grant	\$528,625
FTA B & BF Grant	\$5,134,552
CMAQ Grant	\$5,880,084
Carbon Reduction Program	\$943,581
Local Tax Levy	\$79,794,331
Passenger Fares	\$5,518,085
University of Kentucky Partnership	\$9,457,548
State Revenue	\$550,000
Lex MPO STBG-SLX Allocation	\$3,000,000
Fuel Tax Refund	\$651,214
Advertising Sales	\$1,396,000
<b>Total</b>	<b>\$194,685,156</b>
Ratio of Expenditures to Revenue	1.0

Table 3: Anticipated Transit Revenue and Expenditures

### 3.1.3 Fiscal Constraint

Federal law requires that TIPs be financially constrained. That is, this document should include the estimated cost associated with each project and the anticipated revenue source. Additionally, only those projects for which a current or proposed revenue source can be identified may be listed, thus ensuring a balance between total project costs and revenues. This requirement helps the MPO and the State develop a deliverable program of projects.

As indicated in Tables 2 and 3, the estimated ratio of revenues to expenditures for all funding sources for FY 2021-2024 is 1.0, which means our planned expenditures balance with our anticipated revenues. A balance between costs and revenues is indicated; therefore, financial constraint is demonstrated. The specific projects and the program or planned revenue source and schedule shown in the Project Tables have been identified by the KYTC in the Statewide Transportation Improvement Program and/or the Kentucky State Highway Plan. It should be expected that this program of projects will be subject to periodic changes in schedules or planned revenue source due to adjustments that must be made to balance costs and revenues at the statewide level, and also due to various project-related delays. These changes will be initiated by the Cabinet and will be reflected in this document by TIP Administrative Modifications or Amendments.

**Cincinnati-Northern KY FY 2024-2027 TIP  
Financial Plan**

## **CHAPTER 3: FINANCIAL**

---

### **Federal Funds**

Federal transportation funding is authorized through the federal transportation bill, the Infrastructure Investment and Jobs Act (IIJA), also known as the Bipartisan Infrastructure Law. The IIJA was signed into law on November 15, 2021. The IIJA represents a historic investment to modernize the nation's roads, bridges, transit, rail, ports, airports, broadband, drinking and wastewater infrastructure. The Federal Highway Administration (FHWA) and Federal Transit Administration have many formula-based and discretionary funding programs. Most FHWA and FTA funding programs require a state or local match. Fiscal Constraint for Federal Funds Allocated to the States

An additional feature of the TIP is that the projects listed in the document are financially constrained. All highway and transit programs list associated funding sources and amounts that are needed to complete the projects. These sources include federal, state, and local funds that have been committed to a project in a specific fiscal year. Table 3-1 shows budgets, estimates, and balances for funding types in the Statewide TIP (STIP). Budgets include any carryover from the prior fiscal year.

**Fiscal Constraint for Federal Funds Allocated to the OKI Region**

In Ohio, ODOT sub-allocates Surface Transportation Block Grant Program (STBG), Carbon Reduction (CRP), and Transportation Alternatives (TA) federal funds to OKI for the fiscal years covered by the current TIP. Table 3-2 shows OKI’s sub-allocated federal funds for Ohio. The OKI budget is fiscally constrained in Ohio during the period fiscal year 2024 through 2027. The Ohio CMAQ program is a statewide program for the MPO’s, and fiscal constraint is demonstrated on a statewide level rather than on an individual MPO level.

Table 3-3 provides information on the fiscal constraint analysis for OKI’s sub-allocated federal funds for Kentucky. The Kentucky Transportation Cabinet sub-allocates Surface Transportation Program for Northern Kentucky (SNK) funds, CRP, and TA federal funds; the Cabinet does not

pass through CMAQ funding to the MPO's, nor does it require constraint against a pass-through obligation ceiling. The comments listed in the table provide information on the specific highway or planning projects that are utilizing the sub-allocated SNK federal funds for each fiscal year covered with the current TIP. The table documents that the Kentucky portion of the region has achieved fiscal constraint for pass-through funds with the FY 2024 – 2027 TIP.

Table 3-4 provides information on the fiscal constraint analysis for the Indiana portion of the region. The Indiana Department of Transportation (INDOT) sub-allocates STBG, CMAQ, HSIP, Carbon Reduction, PROTECT and TA federal funds to the MPO's in Indiana. The table demonstrates that the Indiana portion of the region has achieved fiscal constraint with pass-through funds between FY 2024 – 2027.

**Fiscal Constraint for Funds Allocated to Transit Agencies**

There are six transit agencies in the OKI region: Butler County RTA, City of Cincinnati Streetcar, Clermont Transportation Connection, SORTA, TANK and Warren County Transit System. These agencies rely on federal, state, and local funds for operations, maintenance and capital expenses. The Federal Transit Administration (FTA) has several funding sources for operating, maintenance and capital expenses. Section 5307 funds can cover up to 50% of annual operating costs and 80% of annual capital and planning costs, after excluding projected annual fare revenue. Section 5339 funds can cover up to 80% of capital costs to replace, rehabilitate and purchase buses and related equipment, and to construct bus-related facilities. Section 5310 funds are used for the transportation needs of seniors and persons with disabilities and can cover up to 80% of capital costs to replace, rehabilitate and purchase paratransit vehicles and equipment. OKI acts as the designated recipient for the Section 5310 program. 5310 funds have been awarded to various private non-profit agencies in the region. In addition, the transit agencies can apply to receive OKI sub-allocated FHWA STBG and CMAQ funds.

Table 3-5 below, summarizes the transit funds included in the TIP. Table 3-6 demonstrates fiscal conformity for FTA funds and Table 3-7 shows the most recent funding split for all six agencies in the OKI region.

	FY 22 Section 5307	FY 22 Section 5339	FY 22 Section 5337	Totals
SORTA	\$16,006,959	\$1,414,527	\$17,578	\$17,439,064
CONNECTOR	\$256,517	\$0	\$0	\$256,517
TANK	\$5,487,225	\$492,398	\$0	\$5,979,623
BCRTA	\$2,218,851	\$229,051	\$0	\$2,447,902
CTC	\$1,056,447	\$0	\$0	\$1,056,447
WCTS	\$575,800	\$0	\$0	\$575,800
<b>TOTAL</b>	<b>\$25,601,799</b>	<b>\$2,135,976</b>	<b>\$17,578</b>	<b>\$27,755,353</b>

Authorized representatives from each agency have reviewed, discussed, and agreed upon these funding splits. With no fixed route public transit service in the Indiana portion of the Cincinnati UZA, the six transit agencies agreed that those funds will be allocated to the transit authorities based on each authority's proportionate share of the allocation for each factor. WCTS will not be a part of the 5339 allocations until, and if, WCTS establishes fixed route service.

In addition, the \$2,149,336 FY22 Section 5310 funds apportioned to the UZA is awarded competitively to agencies providing transportation to seniors and those with disabilities.

**Owensboro FY 2023-2028  
TIP Financial Plan**

## SHIFT

In 2017, KYTC developed a data-driven process to prioritize projects called Strategic Highway Investment Formula for Tomorrow (SHIFT). The SHIFT process utilizes data related to safety, congestion, asset management, economic growth and benefit cost to provide a technical score for each project. The technical score makes up 70% of the scoring process. The MPO uses its planning process to evaluate and add points to boost project scores, which makes up 15% of the overall project score. The final 15% comes from the KYTC Highway Districts through their own planning process. This process takes place every two years to prioritize projects in preparation for the development of the KYTC Highway Plan. The SHIFT process begins in odd-numbered years, so KYTC can prepare a plan to deliver to legislators for the biennium beginning in even-numbered years.

Through these prioritization and ranking processes, projects are advanced into the KYTC's Highway Plan and ultimately in the MPO TIP:

1. Support the economic vitality of the United States, the states, nonmetropolitan areas and metropolitan areas, especially by enabling global competitiveness, productivity and efficiency;
2. Increase the safety of the transportation system for motorized and non-motorized users;
3. Increase the security of the transportation system for motorized and non-motorized users;
4. Increase the accessibility and mobility of people and for freight;
5. Protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and state and local planned growth and economic development patterns;
6. Enhance the integration and connectivity of the transportation system, across and between modes throughout the state, for people and freight;
7. Promote efficient system management and operation;
8. Emphasize the preservation of the existing transportation system.
9. Improve the resiliency and reliability of the transportation system and reduce or mitigate storm water impacts on surface transportation; and
10. Enhance travel and tourism.

## FISCAL CONSTRAINT

---

The Bipartisan Infrastructure Law (BIL) identifies federal funding sources for road, highway, transit and other transportation-related improvements. Federal law requires the Transportation Improvement Programs be financially constrained. That is, this document should include the estimated cost associated with each project and the anticipated revenue source. This requirement helps the MPO and the state develop a deliverable program of projects. Although the MPO has significant input in the identification of needs and the determination of project funding priorities, it should be understood the MPO does not have direct control over any source of funding identified herein. Final decisions regarding the programming of funds (project selection, revenue source, schedule etc.) are made by the Kentucky Transportation Cabinet and the state Legislature. Projects scheduled in the current biennium (Fiscal Years 2022-2023) of the Kentucky State Highway Plan have an associated commitment of the funding identified in the Plan by KYTC and the State Legislature. Funding identified in this document for the years 2024 and beyond represent "reasonably expected" funding to carry out those projects based on their inclusion in the Plan. In order to address the full range of transportation needs, on a statewide level and within the Owensboro-Daviess County urbanized area, the Cabinet makes use of a variety of available revenue sources or funding types. The revenue sources eligible and currently allocated for use within the Owensboro-Daviess County area are identified on Pages 5.

The specific projects shown in the Project Listing tables on Pages 9 and 10 have been identified by the Transportation Cabinet, along with the associated programmed or planned revenue source and schedule, in the Cabinet's Six Year Highway Plan. It should be expected that this program of projects will be subject to periodic changes in schedules and/or revenue sources due to adjustments that must be made to balance costs and revenues (or maintain financial constraint) at the statewide level, and because of various project-related delays. These changes will be initiated by the Cabinet and will be reflected in this document by TIP Administrative Modifications or Amendments.

Table 3 on Page 8 provides a summary of costs and revenues by funding type and year (all costs and revenues here and elsewhere in this document are shown in Year-of-Expenditure dollar values). A balance between costs and revenues is indicated; therefore, financial constraint is demonstrated.

### **Project Types and Funding Classifications**

The type of funds to be utilized for the projects involving federal and state funds are in accordance with the Fixing America's Surface Transportation Act (FAST) and State Highway Plan. They are abbreviated as follows:

#### **Federal Transit Programs**

- FTA – Federal Transit Administration
  - Section 5307 – Capital Projects and Operating Assistance for Transit Systems
  - Section 5310 – Enhanced Mobility for Seniors and Individuals with Disabilities
  - Section 5339 – Bus and Bus Facilities Program

#### **Federal Highway Programs**

- CMAQ – Congestion Mitigation and Air Quality Improvement Program
- HSIP/SAF – Highway Safety Improvement Program
- NHPP/NH – National Highway Performance Program
  - IM – Interstate Maintenance
  - NH – National Highway
  - BRO – Federal Bridge Replacement on Federal System
- RRP – Safety – Railroad Protection
- RRS – Safety – Railroad Separation
- STPG/STP – Surface Transportation Block Grant Program
  - TAP – Surface Transportation Block Grant Set-Aside (Transportation Alternatives Program)
  - BRX – Federal Bridge Replacement off Federal System
  - BRZ – Federal Bridge Replacement Local System

#### **State Programs**

- SP – State Construction Funds
- SPB – State Bonds
- SPP – State Construction High Priority

## **GROUPED PROJECTS**

---

Transportation planning regulations applicable to the development and content of Transportation Improvement Programs allow projects that are not considered to be of appropriate scale for individual identification in a given program year may be grouped by function, work type and/or geographic area. Such projects are usually noncontroversial and produce negligible impacts – other than positive benefits for safety, traffic operations or preservation. Typically, these types of projects are not generated by the planning process; they are usually initiated by traffic operations or maintenance functions to correct existing problems or deficiencies, or they are the result of successful grant applications by local governments or entities. KYTC identifies many of these types of projects as “Z-Variou” in the Statewide Transportation Improvement Program. For the reasons noted above, KYTC and FHWA have developed streamlined procedures for incorporating such projects into the TIP.

Individual projects from grouped project categories will be incorporated into the TIP by Administrative Modification as they are defined (in terms of project description, scope and cost) and approved for funding. Allowing such TIP changes to be made by Administrative Modification, rather than Amendment (and the corresponding requirement for public review and demonstration of fiscal constraint), simplifies and streamlines TIP maintenance and project approval processes.

Grouped project categories used by the Owensboro-Daviess County MPO are shown in Table 1 on Page 6. The list of grouped projects utilized here is a combination and simplification of two lists recommended by the

KYTC/FHWA Consolidated Planning Guidance. This process was used for applicability to the Owensboro-Daviess County area and to facilitate understanding by MPO committee members and the public. By listing these project types in the TIP, planning process stakeholders and the public are informed of the types of potential projects that may be added to the TIP in the future via streamlined procedures. TIP actions for these projects will not require additional public review, demonstration of fiscal constraint or a conformity determination (if applicable). With respect to financial constraint for grouped projects, please see to the Fiscal Constraint section of this document on Page 4 for a discussion of the relative roles of the MPO and the Kentucky Transportation Cabinet. When projects are identified, with estimated costs, and funding decisions (type of funds and year) are made by the Transportation Cabinet (on an annual or ongoing basis), the Cabinet will forward the project to the MPO for inclusion in the TIP – with a commitment of additional funding within financially constrained balances available on a statewide level. Financial constraint for grouped projects is maintained by KYTC on a statewide level and is demonstrated on an annual basis for the Statewide Transportation Improvement Program.

<b>Table 1: GROUPED PROJECTS</b>
<b>HSIP – Highway Safety Improvement Program Implementation</b>
<b>Intersection Improvements for Safety or Efficiency</b>

## COMPLETED PROJECTS

Federal law requires the TIP to contain a list of projects from the previous TIP that have been completed.

Table 2: COMPLETED PROJECTS FROM THE 2019-2024 TIP						
KYTC ID	Route	Phase	Year	Funding Type	Amount	Project Description
2-237	US 60	C	2019	STP	\$2,900,000	Reconstruction on US 60 between Oakford Loop Road (CR 1370) to address flooding in the vicinity of Kimberly Clark.
2-2092.1	WN 9007	R	2019	NH	\$200,000	I-65 Spur Corridor: Modernization of existing Natcher Parkway from the Ohio-Butler County line (MP 37.143) to the US 60 interchange (MP 72.264) in Owensboro
		C	2020		\$30,994,040	
2-9004.1	KY 2831	C	2018	SAF	\$243,000	Offset left turn lanes along KY 2831, install supplemental signal heads and rebuild the traffic signal at the intersection of KY 2831, KY 54 and KY 81
2-9004.2	US 431	C	2018	SAF	\$462,000	Construct turn lane improvements, rebuild the traffic signal and update the striping at the intersection of US 431 and Goetz/ Salem Drive
2-10003	CR 1129	D	2019	STP	\$175,000	Address deficiencies of old KY 54 bridge over branch of north fork of Panther Creek
		C	2020		\$647,500	
2-10023	KY 764	D	2019	STP	\$70,000	Address deficiencies of KY 764 bridge over unnamed stream
		C	2020		\$350,000	
2-20020	WN 9007	C	2020	STP	\$1,059,500	Address pavement condition of William Natcher Parkway (both directions) from MP 61.553 to MP66.08
				NH	\$3,178,500	
2-20021	WN 9007	C	2020	STP	\$1,442,000	Address pavement condition of William Natcher Parkway (both directions) from MP 66.08 to MP 72.26
				NH	\$4,326,000	
2-20047	US 60	C	2022	STP	\$402,250	Address pavement conditions on US 60 from MP 23.77 to MP 27.54
				NH	\$1,206,750	
2-293	CR 1215	C	2021	SAF	\$90,059	Roadway improvements (use of High Friction Surface) to enhance safety on CR 1215 (Veach Road ) between MP 0.1 and MP 0.6
		C	2019	RTP	\$23,315	Development of trailhead and trailhead facilities and maintenance of existing loop trail at Joe Ford Nature Trail.
		C	2020	RTP	\$28,776	Resurface trail through Whitesville Community Park.

## SUMMARY OF FUNDING

This table provides a summary of costs and revenues by funding type and year (all costs here and elsewhere in this document are shown in Year-of-Expenditure dollar values.) A balance between costs and revenue is indicated; therefore, financial constraint is demonstrated.

**Table 3: SUMMARY OF PROJECT FUNDING BY TYPE**

Fiscal Year		Funding Type						Total
		BRO	BRZ	FBP	HSIP	NH	STP	
2023	Estimated Cost	\$0	\$5,000	\$2,640,000	\$500,000	\$0	\$1,600,000	\$4,745,000
	Revenue	\$0	\$5,000	\$2,640,000	\$500,000	\$0	\$1,600,000	\$4,745,000

2026	Estimated Cost	\$0	\$0	\$0		\$0	\$15,000,000	\$15,000,000
	Revenue	\$0	\$0	\$0		\$0	\$15,000,000	\$15,000,000
2027	Estimated Cost	\$0	\$0	\$0		\$4,565,000	\$8,040,000	\$12,605,000
	Revenue	\$0	\$0	\$0		\$4,565,000	\$8,040,000	\$12,605,000
2028	Estimated Cost	\$0	\$0	\$0		\$0	\$0	\$0
	Revenue	\$0	\$0	\$0		\$0	\$0	\$0
Total	Estimated Cost	\$4,620,000	\$365,000	\$10,850,000	\$500,000	\$14,541,560	\$46,390,000	\$77,266,560
	Revenue	\$4,620,000	\$365,000	\$10,850,000	\$500,000	\$14,541,560	\$46,390,000	\$77,266,560

**\* Fund Types:**

- BRO: Federal Bridge Replacement, On System
- BRZ: Federal Bridge Replacement, Off System
- FBP: Federal Bridge Program
- HSIP: Highway Safety Improvement Program
- NH: National Highway
- STP: Surface Transportation Block Grant Program

**Radcliff/Elizabethtown FY 2022-2026  
TIP Financial Plan**

- Where possible and warranted, encourage the incorporation of bicycle/pedestrian facilities into major improvement projects
- Study the potential need and possible implementation of a public transit system in the Elizabethtown/Fort Knox/Radcliff/ Vine Grove area

### **TIP Approval Process**

The TIP, once approved by the MPO Policy Committee, is the official document that directs the flow of transportation improvements in the MPO planning area. Following approval by the Policy Committee, the TIP is submitted to the Kentucky Transportation Cabinet (KYTC) who, in turn, submits it to the Federal Highway Administration and the Federal Transit Administration. KYTC uses the TIP as a basis for preparing its request for federal funding through their Statewide Transportation Improvement Program (STIP). The TIP is used by KYTC in the preparation of the Commonwealth's Highway Plan, which is approved by the state legislature every two (2) years and outlines KYTC's construction program over the next six (6) years for both state and federal funding.

### **Financial Constraint**

The Fixing America's Surface Transportation Act (FAST) requires that Transportation Improvement Programs be financially constrained. That is, this document should include the estimated cost associated with each project and the anticipated revenue source. Additionally, only those projects for which a current or proposed revenue source can be identified may be listed, thus ensuring a balance between total project costs and revenues. This requirement helps the MPO and the State develop a deliverable program of projects.

Although the Radcliff-Elizabethtown MPO has significant input in the identification of needs and the determination of project funding priorities, it should be understood that the MPO does not have direct control over any source of funding identified herein. Final decisions regarding the allocation of funds (project selection, revenue source, schedule, etc.) are made by the Kentucky Transportation Cabinet (KYTC). In order to address the full range of transportation needs, on a statewide level and within the Radcliff-Elizabethtown urbanized area, the Cabinet makes use of a variety of available revenue sources (or funding types). The revenue sources eligible and currently allocated for use within the Radcliff-Elizabethtown area are identified on Tables 1, 2, and 3 on pages 10 and 11.

The specific projects shown in the Project Listing tables beginning in Appendix A have been identified by KYTC, along with the associated programmed or planned revenue source and schedule, in the KYTC's Statewide Transportation Improvement Program and/or the Six Year Highway Plan. It should be expected that this program of projects will be subject to periodic changes in schedules and/or revenue sources due to adjustments that must be made to balance costs and revenues (or maintain financial constraint) at the statewide level, and also due to various project related delays. These changes will be initiated by the Cabinet and will be reflected in this document by TIP Administrative Modifications or Amendments.

The table on page 25 provides a summary of costs and revenues by funding type and year (all costs and revenues here and elsewhere in this document are shown in Year-of-Expenditure dollar values). A balance between costs and revenues is indicated; therefore, financial constraint is demonstrated.

### **Project Types and Project Funding Categories**

The type of funds to be utilized for the projects involving Federal and State funds are in accordance with the Fixing America's Surface Transportation Act (FAST) and are abbreviated as follows:

<b>Table 1 Kentucky Funding Sources</b>		
<b>Funding Program</b>	<b>Abbreviation</b>	<b>Source</b>
JP 2 BRAC Bond Projects - Second Program	BR2	KYTC
State Construction Projects	SP	KYTC
State Bonds	SB2	KYTC
State Bonds	SBP	KYTC
State Construction High Priority	SPP	KYTC

<b>Table 2</b>			
<b>Current Federal Funding Sources under the FAST Act</b>			
<b>Funding Program</b>	<b>Abbreviation</b>	<b>Source</b>	<b>Funding Share</b>
Surface Transportation Block Grant Program/Surface Transportation Program	STBG/STP	FHWA	80% Federal 20% Match
National Highway Performance Program	NHPP	FHWA	80% Federal 20% Match
Surface Transportation Block Grant Program set-aside for Transportation Alternatives	TA	FHWA	80% Federal 20% Match
Highway Safety Improvement Program	HSIP	FHWA	90% Federal 10% Match
Rail-Highway Crossings Program	RRX/RRP	FHWA	90% Federal 10% Match
Section 5307 Urbanized Area Formula	5307	FTA	80% Federal 20% Match
Section 5307 Operating Expenses	5307	FTA	50% Federal 50% Match
Section 5303 Planning Funds	5303	FTA	80% Federal 20% Match
Section 5309 Bus and Bus Facilities Program (Ladders of Opportunity)	5309	FTA	80% Federal 20% Match
Section 5310 Enhanced Mobility of Seniors and Individuals with Disabilities	5310	FTA	80% Federal 20% Match
Section 5337 State of Good Repair	5337	FTA	80% Federal 20% Match
Section 5339 Bus and Bus Facilities	5339	FTA	80% Federal 20% Match

<b>Table 3</b>			
<b>Carryover Federal Funding Sources from Previous Transportation Bills</b>			
<b>Funding Program</b>	<b>Abbreviation</b>	<b>Source</b>	<b>Funding Share</b>
Interstate Maintenance	IM	FHWA	90% Federal 10% Match
National Highway System	NHS	FHWA	80% Federal 20% Match
Transportation Alternatives Program	TAP	FHWA	80% Federal 20% Match
Federal Bridge Replacement - On-System	BRO	FHWA	80% Federal 20% Match
Federal Bridge Replacement - Off System	BRZ	FHWA	80% Federal 20% Match

### **Public Participation**

The 2022-2026 Transportation Improvement Program (TIP) was developed in accordance with the MPO Participation Plan. To ensure that the TIP received adequate public review, the Radcliff/ Elizabethtown MPO shared the TIP on the MPO website and through social media on Facebook and Twitter. The public comment period began on August 13 and ended on September 13, 2021. The document was also available for review at the Lincoln Trail ADD office in Elizabethtown. The MPO website is [www.radcliff-elizabethtown-mpo.org](http://www.radcliff-elizabethtown-mpo.org).

Summary of Public Comments is located in Appendix C.

### **TIP Amendments/Administrative Modifications**

Occasionally, project information currently listed in the document needs to be changed or projects need to be added or deleted. Project sponsors, such as the Kentucky Transportation Cabinet, local communities or transit agencies will inform the Radcliff/Elizabethtown MPO when such changes are needed to reflect current conditions for transportation projects.

#### **Amendments**

Amendment means a revision to the TIP, including the addition or deletion of a project or a major change in design concept or design scope (e.g. changing project termini or the number of through traffic lanes) that requires federal action and is not eligible for an Administrative Modification (see Administrative Modification description below). An amendment is a revision that requires public review and comment and redemonstration of fiscal constraint. An amendment to the TIP requires a 15-day public review and comment period and approval by the Policy Committee.

### **Administrative Modifications**

Some changes to a transportation project are minor and only require an administrative modification to show the change in the TIP. Administrative modification means a minor revision to the TIP that includes changes to project costs or schedule (that do not impact fiscal constraint) and minor changes to funding sources of previously included projects. Additionally, certain types of projects (see Grouped Projects section on page 13) may be added to the TIP by administrative modification. An administrative modification is a revision that does not require public review and comment or a redemonstration of fiscal constraint.

Additional discussion of procedures that govern TIP Modifications and Amendments can be found in the MPO's Participation Plan ([https://radcliff-elizabethtown-mpo.org/wp-content/uploads/2021/04/2021\\_Participation\\_Plan.pdf](https://radcliff-elizabethtown-mpo.org/wp-content/uploads/2021/04/2021_Participation_Plan.pdf))

All TIP Amendments and Administrative Modifications will be placed on the MPO website at <https://radcliff-elizabethtown-mpo.org/index.php/library/transportation-improvement-plan/>.

### **Air Quality**

Currently, the planning area for the Radcliff/Elizabethtown MPO is in attainment with all Federal air quality regulations. An attainment area is an area considered to have air quality that meets or exceeds the U. S. Environmental Protection Agency (EPA) health standards used in the Clean Air Act.

### **Grouped Projects**

Transportation planning regulations applicable to the development and content of Transportation Improvement Programs allow that projects that are not considered to be of appropriate scale for individual identification in a given program year may be grouped by function, work type, and/or geographic area. Such projects are usually non-controversial and produce negligible impacts - other than positive benefits for safety, traffic operations, or preservation. Typically, these types of projects are not generated by the planning process; they are usually initiated by traffic operations or maintenance functions to correct existing problems or deficiencies, or they are the result of successful grant applications by local governments or entities.

KYTC identifies many of these types of projects as "Z-Variou" in the Statewide Transportation Improvement Program (STIP). For the reasons noted above, KYTC and FHWA have developed streamlined procedures for incorporating such projects into the TIP. Individual projects from grouped project categories will be incorporated into the TIP by Administrative Modification as they are defined (in terms of project description, scope, and cost) and approved. Allowing such TIP changes to be made by Administrative Modification, rather than Amendment (and the corresponding requirement for public review and demonstration of fiscal constraint), simplifies and streamlines TIP maintenance and project approval processes.

Grouped project categories utilized by the Radcliff-Elizabethtown MPO are shown in Table 4. The list of grouped projects utilized here is a combination and simplification of two lists recommended by the “KYTC and MPO Coordination – Final Recommendations of the Consolidated Planning Guidance Process Team”, July 20, 2007. This was done for applicability to the Radcliff-Elizabethtown area and to facilitate understanding by MPO committee members and the public. By listing these project types in the TIP, planning process stakeholders and the general public are informed of the types of potential projects that may be added to the TIP in the future via streamlined procedures. TIP actions for these projects will not require additional public review, demonstration of fiscal constraint, or a conformity determination (if applicable).

With respect to financial constraint for grouped projects, the reader is referred first to the Financial Constraint section of this document on pages 8 and 9 for a discussion of the relative roles of the MPO and the Kentucky Transportation Cabinet. When projects are identified, with estimated costs, and funding decisions (type of funds and year) are made by the Transportation Cabinet (on an annual or ongoing basis), the Cabinet will forward the project to the MPO for inclusion in the TIP - with a commitment of additional funding within financially constrained balances available on a statewide level. Financial constraint for grouped projects is maintained by KYTC on a statewide level and is demonstrated on an annual basis for the Statewide Transportation Improvement Program.

There may be instances where the MPO receives sub-allocated funds and the MPO has the authority to award to specific projects in the MPO planning area. Sub-allocated funds are provided directly to the MPO and are identified revenue sources and, therefore, will not require additional financial constraint analysis.

Table 10 - Summary of Highway Funding Types

FUNDING TYPE												
Fiscal Year		BRO	BRX	IM	NHPM	NH	HSIP	STP	STPF	TAP	CRP (Carbon Reduction Program)	TOTAL
2020-2021*	Est. Cost					\$550,000	\$7,896,000	\$6,250,000		\$642,294		\$15,338,294
	Revenue					\$550,000	\$7,896,000	\$6,250,000		\$642,294		\$15,338,294
2022	Est. Cost					\$17,552,000	\$4,036,042	\$4,384,000				\$25,972,042
	Revenue					\$17,552,000	\$4,036,042	\$4,384,000				\$25,972,042
2023**	Est. Cost	\$150,000	\$4,422,000		\$100,000	\$30,502,000		\$21,862,950	\$1,000,000			\$58,036,950
	Revenue	\$150,000	\$4,422,000		\$100,000	\$30,502,000		\$21,862,950	\$1,000,000			\$58,036,950
2024**	Est. Cost					\$7,175,660	\$420,000	\$60,172,800		\$86,770	\$400,000	\$68,255,230
	Revenue					\$7,175,660	\$420,000	\$60,172,800		\$86,770	\$400,000	\$68,255,230
2025	Est. Cost		\$370,000		\$11,000,000	\$18,195,000		\$18,065,000				\$47,630,000
	Revenue		\$370,000		\$11,000,000	\$18,195,000		\$18,065,000				\$47,630,000
2026	Est. Cost					\$1,950,000		\$65,000				\$2,015,000
	Revenue					\$1,950,000		\$65,000				\$2,015,000

\*Carryover from Previous TIP

\*\*The figures under STP for 2023 and 2024 are correct as presented in previous Administrative Modifications already published.

**APPENDIX C**

**GLOSSARY OF  
TRANSPORTATION TERMS AND  
ABBREVIATIONS**

# GLOSSARY OF TRANSPORTATION TERMS AND ABBREVIATIONS

## **Access Control Codes**

- 1 Full control of access
- 2 Partial control of access
- 3 No access control or access by permit

**ADA** – Americans with Disabilities Act of 1990 - The ADA requires accessible public transportation services and facilities for persons with disabilities, including supplemental service in areas where fixed route transit service is operated.

**ADD** – Area Development District - One of 15 regional planning organizations covering the state. See: <http://www.kcadd.org> for more information.

**Adequacy Rating** – A numerical score from 0 to 100 evaluating the current condition of a roadway segment based on congestion, safety, and pavement condition. See: [http://www.e-archives.ky.gov/pubs/transportation/TC\\_Rpt/KTC\\_02\\_30\\_SPR\\_256\\_01\\_1F.pdf](http://www.e-archives.ky.gov/pubs/transportation/TC_Rpt/KTC_02_30_SPR_256_01_1F.pdf)

**ADHS** – Appalachian Development Highway System - An administrative designation of a highway system in the ARC region of Kentucky.

**ADT** – Average Daily Traffic Volume (sometimes referred to as AADT, Average Annual Daily Traffic).

**AASHTO** – American Association of State Highway and Transportation Officials - An organization of state Departments of Transportation. See: <http://www.transportation.org>

**ASTM** – American Society for Testing and Materials - One of the largest voluntary standards development organizations in the world; produces for technical standards for materials, products, systems, and services. See: <http://www.astm.org>

**APD** – Appalachian Development Highway Program - Geographically targeted matching funds, at an 80/20 ratio, for eligible roads (US 460 and US 119 are the only remaining eligible corridors).

**Bike** – Designated Kentucky bicycle system routes. Information is available in HIS. See also: <http://bikewalk.ky.gov/>

**BR** – Various Federal Bridge Replacement programs, including “on system” (BRO), “off system” (BRZ), and “on or off system” (BRX) which are, respectively, 65%, 15%, and 20% of the state’s total BR program. These categorical funds are matched 80/20 and are used to repair or replace bridges on state systems (BRO), local streets and roads (BRZ), and on the Rural Secondary system (BRX) based on an analysis of bridge condition. MAP-21 eliminated the designated allocations for the BR program, and combined the previously funded BR program within the NHPP and STP federal-aid highway funding programs.

**BR2** – BRAC Bond Projects Second Program

**BRC** – BRAC Bond Projects

**BTS** – Bureau of Transportation Statistics - An agency of USDOT.

See: <http://www.bts.gov/>

**C** – for Construction Phase of project

**CAA** – Clean Air Act - The CAA was amended in 1990 (often referred to as the Clean Air Act Amendment) and imposes more stringent requirements for State Implementation Plans to improve air quality. The Environmental Protection Agency published the Transportation Conformity Rule in the Federal Register on November 24, 1994 (40 CFR 51). This rule established the criteria and procedures for determining that transportation plans, programs, and projects, which are approved in 23 United States Code or the Federal Transit Act, conform to the state or federal air quality implementation plans.

**CBD** – Central Business District - Generally considered being the downtown area of a metropolitan area.

**CE** – Categorical Exclusion - One possible result of an environmental assessment (EA). See EA below and also: <http://www.environment.fhwa.dot.gov/projdev/docuce.asp>

**CIA** – Community Impact Assessment - A process for evaluating the effects of proposed transportation projects on a community and its quality of life. The assessment should include all items of importance to people, such as mobility, safety, employment effects, relocation, isolation, and other community issues.

**CMAQ** – Congestion Mitigation and Air Quality - A category of federal-aid highway funds that may be used only to support projects in air quality nonattainment areas of Kentucky. Such projects must demonstrate an air quality improvement as a result of their use.  
See: <http://www.fhwa.dot.gov/environment/cmaqpgs/>

**Coal Haul** - Those routes over which coal was reported transported by truck during the previous calendar year. This database is updated in July of each year; therefore, the previous calendar year's data will become available in July of each year. Number of tons is reported separately for each direction of travel for state-maintained roads. Information is available in HIS.

**Conformity Determination** – The Long-Range Plan and TIP/STIP must demonstrate that the projects and program, as a whole, emit less pollution than baseline or are less than a given budget as designated in the SIP (40 CFR 51). This is achieved through project and program evaluation using transportation Models (Mobile Model Analysis).

If the Long-Range Plan and/or the Transportation Improvement Program (TIP) do not conform according to the transportation conformity regulations (Federal Register; November 24, 1994 40 CFR 51), the subject document cannot be approved by the metropolitan planning organization. If this is the case, projects cannot be authorized for federal-aid funding.

**Context Sensitive Design** – A process through which the design of a transportation facility addresses safety, mobility, the preservation of scenic, aesthetic, historic, and environmental issues, and community values in a balanced manner to achieve design excellence.

See: <http://www.ktc.uky.edu/csd.html>

**CRF** - Critical Crash Rate Factor - The quotient showing the ratio of the crash rate for a roadway spot or segment divided by the critical crash rate for that roadway spot or segment based on roadway type, number of lanes, and median type. The critical rate for a roadway type is determined annually by the Kentucky Transportation Center.

See: [http://www.ktc.uky.edu/Reports/KTC\\_09\\_16\\_KSP2\\_09\\_1F.pdf](http://www.ktc.uky.edu/Reports/KTC_09_16_KSP2_09_1F.pdf)

**D** – for Design Phase of project

**Defense** - This network contains the routes and bridges to be used for defense material shipments, troop movements during a national defense emergency, and/or for evacuation of the general public from disaster areas. Information is available in HIS.

**EA** – Environmental Assessment - The general term used to describe the assessment of environmental impacts of a transportation development project. An EA may result in increasing order of level of detailed analysis in either (a) a CE (categorical exclusion) from formal assessment, (b) a FONSI (finding of no significant impact), or (c) the development of a formal EIS (environmental impact statement).

See: <http://www.epa.gov/compliance/resources/faqs/nepa/index.html>

**EIS** – Environmental Impact Statement - One possible result of an environmental assessment (EA); see EA above and also: <http://www.epa.gov/compliance/nepa/eisdata.html>

**EJ** – Environmental Justice - A term used to encapsulate the requirements of Federal Executive Order 12898 which state, in part, that “...each Federal agency shall make achieving environmental justice part of its mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of its programs, policies, and activities on minority populations and low-income populations...” and hence to ensure equal environmental protection to all groups potentially impacted by a transportation development project.

See: [http://www.fhwa.dot.gov/environment/environmental\\_justice/index.cfm](http://www.fhwa.dot.gov/environment/environmental_justice/index.cfm)

**Extended Weight** – A designated highway network over which certain vehicular weight limits are relaxed for coal haul vehicles.

See: [http://apps.transportation.ky.gov/HIS\\_EWBridge/](http://apps.transportation.ky.gov/HIS_EWBridge/)

**FAF** – Freight Analysis Framework - A federal database that integrates data from a variety of sources to estimate commodity flows and related freight transportation activity among states, regions, and major international gateways.

See: [http://www.ops.fhwa.dot.gov/freight/freight\\_analysis/faf/index.htm](http://www.ops.fhwa.dot.gov/freight/freight_analysis/faf/index.htm)

**FAST Act** – Fixing America’s Surface Transportation Act. This Act was signed into law by President Barack Obama on December 4, 2015. This Act funds surface transportation programs, including, but not limited to, Federal-aid highways at over \$305 billion over fiscal years 2016 through 2020. It is the first long-term surface transportation authorization enacted in a decade that provides long-term funding certainty for surface transportation.

**FONSI** – Finding of No Significant Impact - One possible result of an environmental assessment (EA). See: <http://www.environment.fhwa.dot.gov/projdev/docuFONSI.asp>

**Forest** - Routes that are officially recognized jointly by the U.S. Forest Service and the KYTC as forest highway routes. The U.S. Forest Service assigns the ‘Road Number.’ Other U.S. Forest Service routes exist that are not included in this database. Information is available in HIS. FH or Federal Forest Highway Funding (annual amount for Kentucky is about \$400,000) is available solely for improvements on the system.

### **Functional Class Codes**

- 1 Rural Interstate
- 2 Rural Other Principal Arterial
- 6 Rural Minor Arterial
- 7 Rural Major Collector
- 8 Rural Minor Collector
- 9 Rural Local
- 11 Urban Interstate
- 12 Urban Interstate Other Freeway or Expressway
- 14 Urban Other Principal Arterial
- 16 Urban Minor Arterial
- 17 Urban Collector
- 19 Urban Local

**GARVEE** – Grant Anticipation Revenue Vehicles - An innovative financing technique permitted by federal law and involves the commitment of future federal-aid appropriations as leveraging for current year highway improvements.

**GIS** – Geographic Information System - Refers to databases and/or software routines that store and graphically depict electronic data.

**HCM/HCS** – Highway Capacity Manual/Highway Capacity Software - A set of analytical tools that attempts to quantify the quality of service provided by a highway facility as perceived by the users of that facility. A common measure of that quality of service is the “Level of Service” provided, described as A through F.

**HERS** - FHWA's Highway Economic Requirements System - Software that evaluates the relationship between highway investment and system condition, performance, and user cost levels.

**HES** - Federal Hazard Elimination and Safety Program - Categorical funding matched at an 80/20 ratio for safety projects selected from among those with benefit/cost ratios >1.0.

**Highway Plan** - The Kentucky Transportation Cabinet’s legislatively mandated program (costs and schedule) of highway project development phases submitted biennially to the General Assembly in even numbered years.

See: <http://transportation.ky.gov/Program-Management/Pages/2016-Highway-Plan.aspx>

**HIS** – Highway Information System - A comprehensive database of highway inventory information maintained by, and in many cases collected by, the Division of Planning. See: [www.transportation.ky.gov/planning](http://www.transportation.ky.gov/planning)

**Horizontal Alignment Adequacy Codes:**

- 0 No curve data on urban segments
- 1 All curves meet design standards
- 2 While some curves may not meet current design standards, all can be safely and comfortably negotiated at prevailing speed
- 3 Infrequent curves with reduced speed necessary for safety
- 4. Frequent curves with reduced speed necessary for safety

**HOV** – High Occupancy Vehicle - A vehicle with at least a predefined number of occupants, generally two or more.

**HPMS** – Highway Performance Monitoring System - A data extract, in Kentucky’s case from the HIS database, that is submitted annually to FHWA as a part of that agency’s periodic reporting to Congress on the condition and performance of the nation’s highway system.

**HPP** – Federal High Priority Program - Projects earmarked by Congress for Congressional High Priorities; funding is 80/20 match ratio.

**IM** – Federal Interstate Maintenance Program - Federal match monies at a 90/10 ratio dedicated to maintenance of Kentucky’s interstate highways.

**IRI** - International Roughness Index - A measure of pavement roughness. IRI values less than 100 generally indicate smooth pavements; between 100 and 150 somewhat rough pavements, and greater than 150 very rough pavements.

**ITS** – Intelligent Transportation Systems - A generic description of signal systems, traffic monitoring devices, and other traffic operations projects to improve capacity and safety (or ‘TOPICS’ projects as they were known in the 1960’s) without major capital investment in facility reconstruction. See: <http://www.its.dot.gov/>

**KYD** – Kentucky Demonstration Program - Represents Congressional earmarks, usually at an 80/20 ratio, for projects identified through the annual federal appropriations process.

**Management Systems** - These include a pavement management system (PMS), bridge management system (BMS), safety management system (SMS), congestion management system (CMS), public transportation facilities and equipment management system (PTMS), intermodal facilities and systems management system (IMS), and traffic monitoring system for highways (TMS/H). Current guidelines for setting up or revising these systems were issued on December 1, 1993 in the Federal Register, 23 CFR 500.

Management Systems is a systematic process designed to assist decision-makers in selecting cost-effective strategies/actions to improve the efficiency and safety of, and protect the investment in the nation’s infrastructure. A management system includes performance measures, data collection and analysis, determination of needs, evaluation and selection of strategies/actions to address the needs, and evaluation of the effectiveness of the implemented strategies/actions. A management system is only one of the decision support tools available to the governing bodies of the region.

**MAP-21** - Moving Ahead for Progress in the 21st Century Act. This Act was signed into law on July 6, 2012, and is the first multi-year transportation authorization enacted since 2005. This Act funds surface transportation programs for FY 2013 and 2014 and expired October 1, 2014.

### **Median Type Codes**

- 1 Curbed
- 2 Positive Barrier
- 3 Unprotected
- 4 None

**Metropolitan Planning Area Boundary** – This boundary must enclose at least the existing urban area and the contiguous area expected to become urban in the next twenty years. This boundary establishes the area covered by the Transportation Improvement Program and is eligible for urban STP funds.

**MP** – Mile point - Used, along with county and route number, to identify location of a highway segment.

**MPO** – Metropolitan Transportation Planning Organization - A KYTC designated, FHWA approved organization to conduct ongoing transportation planning activities in areas with population greater than 50,000 persons.

See: <http://www.transportation.ky.gov/planning/pages/metropolitan-planning.aspx>

**MUTCD** – Manual of Uniform Traffic Control Devices - Defines the standards used by road managers nationwide to install and maintain traffic control devices on all streets and highways.

See: <http://mutcd.fhwa.dot.gov/>

**NCHRP** – National Cooperative Highway Research Program - Along with the Transit Cooperative Research Program (TCRP) and the new Airport Cooperative Research Program (ACRP), are applied, contract research programs that develop near-term, practical solutions to problems facing transportation agencies.

See: <http://www.trb.org/NCHRP/Public/NCHRP.aspx>

**NH** – National Highway System projects - Federal match monies at an 80/20 ratio to support projects on Kentucky's 3,294-mile portion of the National Highway System.

**National Highway Freight Program** – This program was established by the FAST Act to improve the efficient movement of freight on the National Highway Freight Network (NHFN).

**NN** – National Truck Network - Those routes on the state-maintained road system which have been specifically designated by the KYTC and approved by FHWA for use by motor vehicles (trucks) with increased dimensions (e.g., 102 inches wide, 13'-6" high, semi-trailers up to 53 feet long, trailers 28 feet long - not to exceed two (2) trailers per truck). Information is available in HIS.

**Nonattainment Area** – A nonattainment area is one where air quality monitors show that the area exceeds the level of toxic emissions (ozone or carbon monoxide) permitted by the Clean Air Act. The boundary of the area is determined by the Environmental Protection Agency. All nonattainment areas must demonstrate conformity, as required in the transportation conformity rule, before federal-aid funds may be authorized in the given area.

**Nonexempt** – A project that adds capacity to an existing roadway system, and the project is located within a designated “nonattainment” or “maintenance” area for air quality standards pursuant to the Federal Clean Air Act.

**NR Properties** – National Register of Historic Places Properties - An environmental concern that triggers a special analysis and/or treatment. Avoidance of such properties is almost always mandatory. See: <http://www.cr.nps.gov/nr/>

**P** – for Preliminary Engineering and Environmental Phase of project

**PLH** - Public Lands Highways Program - Originally established in 1930; intent of the program is to improve access to and within the federal lands of the nation.

See: <http://www.fhwa.dot.gov/discretionary/012304a3.htm>

**PM 2.5** - Particulate matter that is 2.5 micrometers or smaller in size; an air quality issue.

See: <http://www.epa.gov/region4/sesd/pm25/p1.html>

**P & N** - Purpose and Need - A brief statement of the problem a potential transportation project is to address. In later project development phases, a concise purpose and need statement is essential in establishing a basis for the development of reasonable alternatives to be evaluated in accordance with a project’s EIS.

**PUBLIC INVOLVEMENT PROCESS** – The process that the KYTC uses to be compliant with 23 CFR 450.210 (a) which states that “In carrying out the statewide transportation planning process, including development of the long-range statewide transportation plan and the STIP, the State shall develop and use a documented public involvement process that provides opportunities for public review and comment at key decision points.”

**R** – for Right-of-Way acquisition phase of project

**ROD** – Record of Decision - A formal decision published in the federal register of a federal agency’s decision on a federally-funded project on which an EIS was prepared. See 23 CFR 771.127, 40 CFR 1505.2, 40 CFR 1506, et al. An example of a ROD for a Kentucky transportation project may be found at: <http://www.kyinbridges.com/pdfs/rod.pdf>.

**RRP** – Federal Railroad Protection Program - Match monies at an 80/20 ratio dedicated to installing protective devices at rail/highway crossings.

**RRS** - Federal Railroad Separation Protection Program - Federal match monies at an 80/20 ratio dedicated to replacing at-grade rail/highway crossings with a grade separation (overpass or underpass).

**RSE** – An identifier for GIS purposes consisting of county and route number.

**RTPO** – Regional Transportation Planning Organization – Added in the language of the FAST Act. A policy board that may be established by the Governor that consists of nonmetropolitan local officials or their designees created to carry out the regional transportation planning process.

**SAFETEA-LU** – Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users. This Act authorized the Federal Surface Transportation Programs for highways, highway safety, and transit for the 5-year period 2005-2009.

**SB2** – State Bonds 2010

**SC** – State Contingency Account - A discretionary account available to the Secretary of the Kentucky Transportation Cabinet for emergency or economic development projects.

**Scenic Byway** - These routes are nominated by local support groups and designated by the Transportation Cabinet because they are deemed to have roadside or view sheds of aesthetic, historical, cultural, natural, archaeological, and/or recreational value worthy of preservation, restoration, protection, and/or enhancement. Information is available in HIS.

**SIP** – State Implementation Plan - A plan that provides for implementation, maintenance, and enforcement of primary and secondary air quality standards. It requires the development of a comprehensive emissions inventory and it includes enforceable emission limitations and other control measures, means, or techniques as well as schedules and timetables for compliance. [www.air.ky.gov/](http://www.air.ky.gov/)

**SP** – State Funded Projects - Monies dedicated to a 100% state-funded project development program. Funding in this program is the “balancing account” within the transportation development program, and hence is subject to cash availability. Projects in this category are subject to substantial delay should cash not be available to support planned expenditures.

**SPB** – State Bonds 2009

**SPP** – State Funded Projects – High Priority Projects

**STBG** – Surface Transportation Block Grant Program – A program established with the FAST Act which was previously the Surface Transportation Program (STP). States and localities may use these funds for projects to preserve or improve conditions and performance on any Federal-aid highway, bridge projects on any public road, facilities for nonmotorized transportation, transit capital projects, and public bus terminals and facilities.

**STP** – Federal Surface Transportation Program – The FAST Act converted this long-standing program into the Surface Transportation Block Grant Program (STBG). (See STBG definition above). The STBG program under the FAST Act continues all prior STP eligibilities. Subcategories include:

- SAH – dedicated to Ashland Metro Area
- SHN – dedicated to Henderson Metro Area
- SLO – dedicated to Louisville Metro Area
- SLX – dedicated to Lexington Metro Area
- SNK – dedicated to Northern Kentucky Metro Area

**STRAHNET** – Strategic Highway Network - A designated system of public highways that provides access, continuity, and emergency transportation of personnel and equipment in times of peace and war. The 61,000-mile nationwide system, designated by the Federal Highway

Administration in partnership with the Department of Defense and the state DOTs, comprises about 45,400 miles of interstate and defense highways and 15,600 miles of other public highways. STRAHNET is complemented by about 1,700 miles of connectors - additional highway routes linking more than 200 military installations and ports to the network.

**SUA** – Small Urban Area - Population centers of between 5,000 and 50,000 persons.

**TAP** – Transportation Alternatives Program – This program was established by MAP-21 and eliminated by the FAST Act. The FAST Act replaces it with a set-aside of Surface Transportation Block Grant (STBG) funding for transportation alternatives. These set-aside funds include all projects and activities that were previously eligible under TAP, encompassing a variety of smaller-scale transportation projects such as pedestrian and bicycle facilities, Recreational Trails, Safe Routes to School projects, community improvements such as historic preservation and vegetation management, and environmental mitigation related to stormwater and habitat connectivity.

**TCM** – Transportation Control Measure - Transportation control measures may be identified in the State Implementation Plan as a means of controlling air quality and may consist of such projects as vehicle emissions testing program, ridesharing, transit improvements, etc.

**TCSP** – Transportation and Community and System Preservation (TCSP) Program - TCSP provides funding for a comprehensive initiative including planning grants, implementation grants, and research to investigate and address the relationships between transportation and community and system preservation, and to identify private sector-based initiatives. Projects eligible for TCSP funding include any project eligible for funding under Title 23 or Chapter 53 of Title 49 U.S.C. or any other activity relating to the purposes of this section determined appropriate by the Secretary. This includes corridor preservation activities necessary to implement transit oriented development plans, traffic calming measures, or other coordinated preservation practices. MAP-21 eliminated the TCSP Program.

**TDM** – Transportation Demand Management - TDM consists of techniques to control demand on roadways, such as offering incentives to use transit, raising parking costs in the CBD, and telecommuting.

**TE** – FHWA Transportation Enhancement Program - A category of federal highway funds, with strict eligibility requirements that exists to support non-traditional transportation-related projects. In Kentucky, this funding source has traditionally supported Renaissance Kentucky and other historic preservation projects. MAP-21 eliminated the TE Program, however, the states are permitted to use the remainder of allocated TE funding for projects.

**TIP/STIP** – Transportation Improvement Program/State Transportation Improvement Program - A fiscally balanced project listing that constitutes an agencies transportation project development schedule for a certain time period.

**TMA** – Transportation Management Area - An urbanized area over 200,000 in population as defined by ISTEA. A TMA is given responsibility, through the MPO, for making decisions as to how some categories of federal transportation funds will be spent.

**TPC** – Transportation Policy Committee - The TPC is the MPO committee responsible for deciding how local federal transportation dollars will be spent and for determining local transportation planning policy.

**Transportation Study Area/Transportation Planning Area** – This federally mandated area includes the urban area, the contiguous area expected to become urban in the next 20 years, and the nonattainment area.

**Travel Forecasting Model** – A travel model developed for use with a computer. This model utilizes a geographic and mathematical simulation of area travel which estimates traffic volume on the existing system, and projects future traffic volumes. Congestion problems may be located, and traffic impacts of a particular project can be evaluated.

**TSM** – Transportation System Management -TSM techniques are designed to improve the level of efficiency at which the existing transportation system works. A project to synchronize traffic signals along corridors, for instance, will improve traffic flow and the efficiency of the road.

**U** – for Utility relocation phase of project

**UNL** – Unscheduled Needs List (formerly Unscheduled Projects List, or UPL) - A list maintained by the Division of Planning, of potential transportation projects with project data derived from the KYTC Project Identification Form.

**Urban Area** – Defined as a place of 5,000 or more in population, including the urbanized area as defined by the Bureau of Census. An urban area boundary, which encircles the urbanized areas in a region, may be developed by states in cooperation with local officials. This boundary is the line of demarcation for rural/urban functional classification of roadways.

**VMT** – Vehicle Miles of Travel - VMT is a measure of the level of travel activity in an area. The figure is generally found by multiplying the average length of trip by the total number of trips. As vehicle miles of travel increase, congestion and auto emissions that degrade air quality may be expected to increase (see PMT).

**V/SF** – Volume to Service Flow ratio - A quotient showing the ratio of a facility's actual vehicular traffic volume to its theoretical maximum potential vehicular traffic volume. A ratio higher than about 0.6 indicates traffic volumes are approaching congested conditions. This is also referred to V/C or Volume to Capacity ratio.
