September 26, 2016

Mr. Greg Thomas
Secretary
Kentucky Transportation Cabinet
200 Mero Street, Room 613
Frankfort, Kentucky 40622

Dear Secretary Thomas:

Subject: Planning Finding for the 2017-2020 Statewide Transportation Improvement Program (STIP)

In accordance with 23 CFR 450.220, the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) have reviewed the FY 2017-2020 Kentucky Statewide Transportation Improvement Program (STIP). There are several noteworthy practices and several recommendations for process improvements. These observations and recommendations form the basis for this STIP approval.

Noteworthy Practices in Kentucky's Planning Processes:

- The KYTC has created *District Transportation Plans (DTPs)*. The DTPs are data driven and provide valuable input to District and Statewide planning documents. This successful effort will be helpful as the FAST Act performance measurement requirements are implemented.
- The Cabinet organized regular meetings with the KYTC Districts, Metropolitan Planning Organizations (MPOs) and Area Development Districts (ADDs) which provide an excellent exchange of information and to insure appropriate coordination of planning efforts. Location maps can be found at <http://transportation.ky.gov/Planning/Documents/BIG%20mapWEB.pdf>.
- The Transportation Cabinet has published a *2016 Regional Transportation Planning Program Rural Consultation Report (23 CFR 450.210(b))* <http://transportation.ky.gov/Planning/Pages/Regional-Planning.aspx>. It outlines the planning process and the interaction of the ADDs, MPOs and statewide local officials. This document outlines in detail the ongoing concentrated effort in soliciting input from mayors, county judge executives, and other local officials to develop the Highway Plan and the resulting Long Range Statewide Transportation Plan (LRSTP) and STIP.
- The STIP is fiscally constrained based on reasonable estimates of anticipated revenues. The

STIP recognizes that there are several major projects that require detailed financial plans prior to advancement. The Apportionments Versus Planned Obligations table helps explain the Kentucky planned federal-aid program. A tracking table of all STIP projects (including Amendments and Administrative Modifications) with approval dates provides continuous tracking of the connection between project planning and implementation.

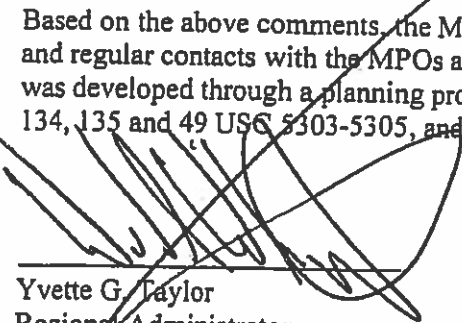

- The KYTC has submitted the *Kentucky Recommended 2010 Adjusted Urban Area (UAB) Boundaries*. It can be found at <http://transportation.ky.gov/planning/pages/urban-area-boundaries.aspx>. A robust outreach effort to public planning partners provided the Commonwealth of Kentucky with a current comprehensive transportation network to develop performance measures and associated targets, and to report the supporting information.
- The list of Transportation Improvement Programs (TIPs) included by reference is listed on page two of the STIP. Approval dates range from 2014 to 2020. The Air Quality Conformity Determinations for Non-Attainment areas and Attainment areas with Maintenance Plans is included in Appendix A-4 in the STIP.
- The *2014 Kentucky Statewide Rail Plan Update* is available at <http://transportation.ky.gov/Railroads/Pages/Rail-Plan.aspx> and is included by reference in the Statewide Freight Plan.
- The 2016 Kentucky Freight Plan is available at <http://transportation.ky.gov/Planning/Pages/2016-Kentucky-Freight-Plan.aspx>.
- Kentucky's *Long Range Statewide Transportation Plan (LRSTP) 2014-2035* is available at <http://transportation.ky.gov/YourTurn/Pages/draft-lrstp.aspx>. The "Your Turn" promotion to gather extensive public comments utilized comprehensive and innovative measures.
- The 2016 Kentucky Transportation Cabinet Public Involvement Process, as per 23 CFR 450.210, can be viewed at <http://transportation.ky.gov/YourTurn/Documents/Final%20Draft%20Combined%202016%20PIP%20Document-111215.pdf>.
- The State and MPOs ensured adequate public involvement and transparency as they developed their competitive selection process for their Transportation Alternatives Program (now part of the Surface Transportation Block Grant (STBG) program). The competitive process will allow project sponsors to understand the project evaluation criteria and how projects are selected. KYTC and the MPOs have cooperated to accelerate solicitation of projects and obligation of funds.
- The KYTC has continued working with the Kentucky Division to reduce inactive LPA projects and implement the recommendations of the 2013 *Kentucky Program Review of Inactive LPA Projects*. In 2016 the KYTC updated the *LPA Project Guide: Federal-Aid Highway Program Project Development Guide for Local Public Agencies* (Guide).

Recommendations for Process Improvements:

- KYTC should continue its proactive steps to prepare for new planning requirements issued under the FAST Act titled *Metropolitan and Statewide Planning Regulations (23 CFR 450)*. These will result in performance-based approaches with performance measures, targets and an annual performance report. New planning agreements should be developed to address these new provisions. These requirements are effective for new STIPs and Amendments after May 27, 2018, or two years after the effective date of each final performance measure rule.
- 23 CFR 450.216 requires that the STIP must be fiscally constrained and account for project authorizations, STIP Amendments and STIP Modifications. There are numerous STIP amendments and administrative modifications. STIP delivery continues to lag for highway construction phases. The STIP delivery and fiscal constraint should be reported at the end of federal fiscal year 2017.
- Projects that are shown as illustrative in the metropolitan transportation plan (MTP) or metropolitan transportation improvement program (TIP) must be shown as illustrative in the STIP until the MPO amends them in the MTP and TIP as outlined in 23 CFR 450.218.
- As per 23 CFR 450.336 the KYTC and MPOs self-certify compliance with Title VI and the Americans with Disabilities Act (ADA) in their planning documents. 28 CFR 35.150(d) requires governments (both state and local with 50 or more employees) to develop a transition plan by July 26, 1992. Early involvement in KYTC planning and project delivery processes can provide the greatest opportunity for ADA compliance and decision-making. KYTC and the MPOs should ensure that ADA Transition Plans are in place and updated in all LPAs with 50 or more employees. The KYTC has a DRAFT ADA Transition Plan and is conducting extensive inventories of sidewalks on state routes. We anticipate a timely final Transition Plan that provides for identification of barriers and funding to improve ADA accommodations.

The KYDO requests that KYTC submit an annual report to address progress on the recommendations for process improvements.

Based on the above comments, the MTP certification reviews, the self-certification statements, and regular contacts with the MPOs and Cabinet planning activities FHWA finds that the STIP was developed through a planning process that substantially meets the requirements of 23 USC 134, 135 and 49 USC 5303-5305, and related regulations.

Greg Thomas
Secretary

September 6, 2016

Mr. Thomas Nelson
FHWA Division Administrator
330 West Broadway
Frankfort, KY 40601

Dear Mr. Nelson:

As per the August 2016 review comments from FHWA and FTA, we have finalized the Kentucky Transportation Cabinet's Fiscal Years 2017-2020 Statewide Transportation Improvement Program (STIP) for your approval. The 2016 STIP was developed in accordance with federal regulations. The implementation of the 2016 STIP will be in accordance with the FAST Act programs and guidelines, and will be conducted through the cooperative efforts of the KYTC, FHWA, and FTA to ensure that all federal-aid funding is utilized in accordance with federal guidelines and federal regulations.

The STIP contains listings of highway and transit projects within the 120 Kentucky counties and the District 99 ZVarious funding categories. The identified STIP projects located within Metropolitan Planning Organizations (MPO) areas provides the entire listing of statewide and MPO transportation projects within the Commonwealth of Kentucky. However, the projects located within a MPO designated area and not identified within the current MPO's TIP will be processed through the corresponding MPO's TIP modification or amendment process. Upon completion of the MPO TIP modification or amendment, the modification or amendment will be added to the STIP prior to authorization of federal funding for the corresponding project.

We appreciate the assistance of FHWA and FTA, and look forward to implementation of the FY 2017-2020 Statewide Transportation Improvement Program (STIP).

Sincerely,

A handwritten signature in black ink that reads "Ronald B. Rigney".

Ronald B. Rigney, P.E. & P.L.S.

Director, Division of Program Management

An Equal Opportunity Employer M/F/D

Kentucky's

Statewide Transportation Improvement Program for FY 2017-2020

The Kentucky Legislature enacted House Bill 304, House Bill 129 and House Joint Resolution 160 during the 2016 Regular Session of the General Assembly. House Bill 304 is the Biennial Budget for the Kentucky Transportation Cabinet and provides operating funds for FY 2017 and FY 2018. House Bill 129 is the Biennial Highway Construction Plan for FY 2017 and FY 2018 and House Joint Resolution 160 is the Highway Preconstruction Program Plan for FY 2019 through FY 2022. Collectively, HB 129 and HJR 160 make up the 2016 Highway Plan. The Transportation Cabinet's overall transportation program contained within the FY 2017-2020 STIP is consistent with the state and federal revenue estimates and assumptions and contains projects as identified within the 2016 Highway Plan.

STATEWIDE TRANSPORTATION IMPROVEMENT PROGRAM for FY 2017-2020

I. Introduction

The current Transportation Act, “Fixing America’s Surface Transportation Act” (FAST Act), was signed into law December 4, 2015 by President Barack Obama. This Act replaces the previous Act, Moving Ahead for Progress in the 21st Century Act (MAP-21). It is the first long-term surface transportation authorization enacted in a decade that provides long-term funding certainty for surface transportation.

The FAST Act funds surface transportation programs, including, but not limited to, federal-aid highways at over \$305 billion over fiscal years 2016 through 2020. This Act also establishes a National Multimodal Freight Policy that includes national goals to guide decision-making and establishes a National Highway Freight Program that provides \$6.3 billion in formula funds over five years for states to invest in freight projects on the National Highway Freight Network. Up to 10 percent of these funds may be used for intermodal projects.

Section 1201 “Metropolitan Transportation Planning,” Section 1202 “Statewide and Nonmetropolitan Transportation Planning,” Section 134 “Metropolitan Transportation Planning” and Section 135 “Statewide and Nonmetropolitan Transportation Planning” of Title 23, United States Code was amended. The amended language includes specific details pertaining to the development of the Long Range Statewide Transportation Plan (LRSTP), Statewide Transportation Improvement Program (STIP), and the development of Metropolitan Transportation Plans (MTPs) and Transportation Improvement Programs (TIPs) within areas served by Metropolitan Planning Organizations (MPOs), which perform transportation planning functions in urbanized areas with a population of 50,000 or greater.

The FAST Act states that “each State is required to carry out a continuing, cooperative, and comprehensive performance-based statewide multimodal transportation planning process, including the development of a long-range statewide transportation plan and STIP, that facilitates the safe and efficient management, operation, and development of surface transportation systems that will serve the mobility needs of people and freight (including accessible pedestrian walkways, bicycle transportation facilities, and intermodal facilities that support intercity transportation, including intercity bus facilities and commuter van pool providers) and that fosters economic growth and development within and between states and urbanized areas, and take into consideration resiliency needs while minimizing transportation-related fuel consumption and air pollution in all areas of the state, including those areas subject to the metropolitan transportation planning requirements of 23 U.S.C. 134 and 49 U.S.C. 5303.”

As required by Title 23, United States Code, section 135, paragraph (g) (1): Each state shall develop a statewide transportation improvement program for all areas of the state. Such program shall cover a period of 4 years and be updated every 4 years or more frequently if the Governor elects to update more frequently. The STIP is to be developed for all areas of the state in cooperation with MPOs and local officials, shall be deemed consistent with the applicable State Implementation Plan developed pursuant to the Clean Air Act (42 U.S.C. 7401 et seq.), shall contain

primarily those project phases for which funding can reasonably be expected, and shall reflect the statewide priorities for programming and funds expenditure. The STIP is to be a truly multimodal plan, and the public must be afforded the opportunity to comment on the proposed program. FHWA and FTA reviews the STIP and issues a Planning Finding in accordance with 23 CFR 450.220 as per the requirements of 23 USC 134 and 135 of 49 USC 5303-5305.

The FAST Act also states:

1. The transportation planning process is to improve the resiliency and reliability of the transportation system and reduce or mitigate stormwater impacts of surface transportation.

The KYTC's Division of Environmental Analysis is leading the effort for KYTC on infrastructure resiliency with support from the Kentucky Transportation Center at the University of Kentucky. The process that they are going through is as follows:

- a) Assess the vulnerability of NHS assets to extreme weather and natural hazards, with an emphasis on flooding, earthquakes, sinkholes, and landslides. Other weather-related hazards are a secondary focus of the assessment.
- b) Identify those assets that are most vulnerable to these hazards.
- c) Represent the findings and results so they can be formulated from the vulnerability assessment into the Cabinet's ongoing decision-making for planning, design, operations and maintenance processes.

The output of these assessments will include a GIS-based data system compatible with existing Cabinet systems, and the extent of this project will continue the assessment of the NHS as defined by MAP-21. For this project, the scope of this assessment will be limited to NHS assets in KYTC Districts 2 through 12 (KYTC District 1 was completed as a pilot project to refine the assessment methodology) and are scheduled to be completed by December 2017.

2. Enhance travel and tourism.

Any improvements that the KYTC undertakes on the system that results in a safe, efficient, environmentally sound, fiscally responsible transportation system will enhance travel and tourism throughout the Commonwealth.

3. Integrate into the statewide transportation planning process, directly or by reference, the goals, objectives, performance measures, and targets per 23 CFR 450.206(c), in other State transportation plans and transportation processes, as well as any plans developed pursuant to chapter 53 of Title 49 by providers of public transportation in areas not represented by an MPO required as part of a performance-based program.

The KYTC Division of Planning is working to integrate performance measures into the Statewide Planning Process and targets as required per 23 CFR 450.206(c). KYTC is prepared to meet or exceed the schedule which will be required by FHWA and USDOT. As state transportation planning documents are updated they will incorporate discussions regarding performance measures and targets as well as the appropriate elements of performance management once those elements are finalized by (rulemaking is completed by) USDOT.

It should be noted that Kentucky's transportation programs are developed and implemented under strict legislative oversight at the state level. In particular, the highway program is governed by a section of state law that requires multiple considerations in highway program development. It also

requires in-depth reporting to the state legislature of many program events such as monthly program authorizations, bid tabulations, construction project awards, change orders, and cost overruns. The KYTC's Highway Plan is updated biennially under these guidelines, and the first two years of the Plan, the "biennial element," is line-itemed into the state's enacted biennial budget. The STIP covers a period of four years (FY 2017-2020) and contains federally-funded projects. Regionally significant state-funded projects are also included in order to meet air quality conformity requirements.

Kentucky submitted its first formal STIP document in 1992. Since that time, the KYTC has been working with the Federal Highway Administration (FHWA), the Federal Transit Administration (FTA), MPOs, Area Development Districts (ADDs), and local governmental units to define and strengthen the cooperative processes put into practice by each Transportation Act. Requirements pertaining to management system implementation, public involvement in strategic planning, environmental justice, and statewide and metropolitan planning have all been carefully reviewed and processes identified to facilitate future transportation program development in Kentucky. These processes continue to evolve. This document demonstrates Kentucky's commitment to the development of a continuing planning process.

As noted, the FY 2017-2020 STIP contains all the federally-funded scheduled projects in Kentucky, including projects located within the metropolitan planning areas for the following urbanized areas: Bowling Green, Cincinnati-Northern Kentucky, Clarksville-Oak Grove, Evansville-Henderson, Huntington-Ashland-Ironton, Lexington, Louisville, Owensboro, and Radcliff-Elizabethtown. A project located within these metropolitan planning areas must be included in the appropriate MPO's TIP before it can be included in the STIP and before funding can be authorized. Each TIP must be approved by the MPO's Policy Board.

The following TIPs are incorporated by reference into this document:

- Bowling Green FY 2016-2020 TIP; approved September 2015
- Cincinnati-Northern Kentucky FY 2016-2019 TIP; approved April 2015
- Clarksville-Oak Grove FY 2014-2017 TIP; approved October 2013
- Evansville-Henderson FY 2016-2019 TIP; approved May 2015
- Huntington-Ashland-Ironton FY 2016-2019 TIP; approved April 2015
- Lexington FY 2013-2016 TIP; approved April 2013
- Louisville FY 2015-2018 TIP; approved August 2014
- Owensboro FY 2014-2019 TIP; approved October 2014
- Radcliff-Elizabethtown FY 2013-2018 TIP; approved October 2013

When new TIPs are finalized or existing TIPs are amended, changes will be incorporated into the STIP document through the STIP amendment process by reference. The KYTC recognizes the role of the MPOs in regional planning and fully supports STIP contributions resulting from MPO decision-making processes.

The Planning and Research Annual Work Program is in compliance with the provisions of 23 CFR 420.111, and includes programs and operations for planning activities in the KYTC and the Kentucky Cooperative Transportation Research Program (KCTRP). The Division of Planning is responsible for recommending, advising, and assisting the chief administrators of the KYTC in the development of the overall goals, policies, project priorities, and procedures relating to the total transportation program. The KCTRP is concerned with the development and conduct of a comprehensive research program in cooperation with the U.S. Department of Transportation, Federal Highway Administration (FHWA) and is administered through the KYTC State Highway Engineer's Office.

In addition to research developed in cooperation with FHWA, the KCTRP performs other services for the KYTC. The scope of these services includes activities such as research studies and special investigations of various engineering and operation activities. The Research Program and Implementation Advisory Committee (RPIAC), headed by the State Highway Engineer and coordinated through the Research Coordinator, gives direction to the research program.

II. STIP Development

Section 135 of Title 23, United States Code, includes a number of elements which must be considered within a state's continuous transportation planning process. These elements were identified as factors which, when properly addressed, would ensure connectivity between transportation, land use, environmental issues, investment strategies, national energy goals, and other "big picture" components of a comprehensive planning process. The KYTC recognizes the planning process requirements outlined in Sections 135 (d) and (e), and is developing mechanisms for evaluating these items as it strives to implement Kentucky's transportation planning process.

Appendix A, Exhibit A-1, contains the state's certification letters, including a self-certification statement which certifies that Kentucky's transportation planning process is being carried out in accordance with all applicable federal requirements. Copies of policies and acknowledgments regarding the following are on file in the Highway District Offices and the Central Office of Human Resource Management:

1. Political Activities
2. Conflict of Interest
3. Code of Ethics
4. Smoking
5. Drug-Free Workplace
6. Americans with Disabilities (ADA): **The KYTC is working with FHWA on finalizing the Americans with Disabilities Act Transition Plan. An approval will be determined once the minor changes have been addressed.**
7. Workplace Violence
8. Work Performed Off the Rights-of-Way of State Maintained Roads and Highways
9. Anti-harassment/Anti-discrimination
10. Employee Dress
11. Internet and Electronic Mail Acceptable Use
12. Memo of Holidays for State Personnel
13. Kentucky Employee Assistance Program (KEAP)
14. Confidential and Sensitive Information

A. Planning Process Considerations

A-1. Agreements

To ensure that the statewide transportation planning process is carried out in coordination with other state and federal agency requirements, the KYTC has formalized agreements with the various transportation and resource agencies. These agreements have defined the roles of these agencies and governments, and yield a stronger platform from which future STIPs will be developed. The KYTC hereby affirms its commitment to these agreements for the purpose of stabilizing the statewide planning process. Copies of the MPO agreements for the urban planning processes are included in the MPOs Unified Planning Work Programs submitted to FHWA annually. Copies of the agreements with the ADDs for the non-urban transportation planning process are maintained by the KYTC and available upon request.

A-2. Public Involvement Process

The KYTC works with the ADDs and MPOs to ensure that public involvement processes are utilized that provide opportunities for public review and comments at key decision points. All public comments are addressed and forwarded to the appropriate project design team for consideration in the collaborative decision making process. The “Draft” STIP was available for public review for 30 days beginning July 18, 2016, and ending August 16, 2016. As part of the 30-day public participation process, copies of the “Draft” FY 2017-2020 STIP were available for public inspection at statewide Highway District Offices, Area Development District (ADD) Offices, Metropolitan Planning Organizations (MPOs), and Transportation Cabinet Offices in Frankfort. Letters were mailed to Kentucky’s County Judge/Executives, Mayors of Kentucky’s cities (with population over 5,000), Transit Providers, and persons on our STIP distribution list that stated the locations of the “Draft” STIP that was available for public inspection.

The “Draft” FY 2017-2020 STIP was available for public review for the 30-day review period via the KYTC web site with email capabilities for sending review comments and questions concerning the “Draft” FY 2017-2020 STIP. We received 31 emails from the public with comments regarding the “Draft” STIP. In addition, the Public Notice was published in seven newspapers outlining the 30-day public availability period for public review and comments on the “Draft” FY 2017-2020 STIP.

See Exhibit A-2 for a complete detailed description of the public involvement process and Exhibit A-3 for the public involvement documents and comments.

A-3. Air Quality Considerations

Conformity

Projects contained in the FY 2017-2020 STIP and located in areas designated “nonattainment” or “maintenance” for air quality standards must be consistent with Kentucky’s State Implementation Plan (SIP) developed by the Kentucky Energy and Environment Cabinet’s Division for Air Quality (DAQ) pursuant to the Federal Clean Air

Act. In the absence of a SIP, transportation conformity requirements still apply. Transportation plans involving areas designated as “nonattainment” and “maintenance” are subject to a conformity analysis to ensure that planned projects will neither create nor contribute to violations of the National Ambient Air Quality Standards (NAAQS) and to ensure that the area will be able to meet the NAAQS in future years.

In urbanized areas, the transportation conformity analysis is performed during the development and amendment processes of the urbanized area’s MTP. If acceptable, the project list of the shorter-range metropolitan area TIP must also be determined to be consistent with the MTP and in conformance with the SIP. STIP projects for rural “nonattainment” and “maintenance” areas must also be evaluated to demonstrate transportation conformity. All plans, TIPs, and projects are evaluated as required for transportation conformity in each area. Once conformity has been evaluated, USDOT will make a conformity finding for each area and, ultimately, approve the STIP. Additionally, project level conformity must be demonstrated (where “as needed” or “as required”) to ensure that the project does not create, or contribute to, an air quality standard violation.

Designations

The Kentucky counties of Boone, Kenton, and Campbell have partial portions of their county designated as “nonattainment” for the 2008 8-hour Ozone standard based on EPA airsheds. The 2008 8-Hour Ozone designations took effect July 20, 2012. The previous 1997 8-Hour Ozone standard was partially revoked, for conformity only. The planning requirement is still in effect.

The 1997 fine particulate matter (PM2.5) NAAQS standard has been partially revoked with the implementation of the new 2012 standard. So, only the conformity portion of the 1997 standard is still required. The Kentucky counties of Boone, Boyd, Campbell, Kenton, and a portion of Lawrence County have been re-designated by the EPA as “attainment with a maintenance plan” for the PM2.5 standard. Currently, Bullitt and Jefferson Counties are designated as “nonattainment” for the 1997 fine particulate matter (PM2.5) NAAQS. Huntington-Ashland (Boyd and a portion of Lawrence County) is not required to calculate regional emissions for the transportation conformity report due to an “insignificance” finding. Muhlenberg County and a portion of Boyd County are designated as “attainment with a maintenance plan” for SO2 standard. No regional transportation conformity is required; however, project level analysis is needed.

As required, regional conformity for ozone and PM2.5 has been demonstrated as required for the metropolitan planning areas of Louisville (Bullitt and Jefferson Counties), Huntington-Ashland (Boyd and a portion of Lawrence County), and Cincinnati-Hamilton (Boone, Campbell, and Kenton Counties). The KYTC has shown conformity for these areas as required for the current 8-hour Ozone standard and for the existing PM2.5 standard, and through subsequent MPO TIP/MTP amendments and updates.

Responsibilities

A conformity determination is required for the transportation plans for each of these designated areas prior to the authorization of any federally-funded projects to ensure that air

quality will not be adversely affected for the criteria pollutants (i.e., no increase in particulate matter (PM)). For “nonattainment” or “maintenance” areas within or including an MPO area, the MPO is responsible for the conformity analysis. Currently, all areas in Kentucky have a conforming transportation plan. The Louisville Metro Air Pollution Control District (LMAPCD) performs the conformity analysis for the Louisville MPO’s MTP. The Ohio-Kentucky-Indiana (OKI) Regional Council of Governments performs the conformity analysis for the Cincinnati-Hamilton MPO’s MTP. The Kentucky-Ohio-Virginia (KYOVA) Interstate Planning Commission performs the conformity analysis for the Huntington-Ashland MPO’s MTP. The Division for Air Quality (DAQ) and U.S. Environmental Protection Agency (EPA) evaluates each conformity analysis and the U.S. Department of Transportation makes the conformity determination. SIP conformity documentation is incorporated by reference into the STIP as the individual TIP updates are amended into the STIP. (See Appendix A, Exhibit A-4 for air quality conformity letters). Project level conformity is the responsibility of the KYTC’s Division of Environmental Analysis (DEA).

A-4. Congestion Mitigation and Air Quality Improvement Program

The FY 2017-2020 STIP has been developed in full recognition of Title 23, which establishes a distinct funding source to address Congestion Mitigation and Air Quality (CMAQ) issues. FHWA and the FTA have set aside funds for CMAQ. The funds are made available for projects within the identified designated air quality areas for the purpose of reducing traffic congestion and improving air quality. Funding for these projects is awarded through an application process and must be transportation related, must reduce emissions, and must be in an air quality nonattainment or maintenance area. Formerly designated areas are still eligible to apply for CMAQ funding. If the proposed project is located within an urbanized area, the sponsor submits applications to the MPO for their prioritization which then forwards the applications and rankings to the KYTC’s Office of Local Programs. The Governor selects eligible CMAQ projects to be funded as the federal CMAQ funding is available. FHWA makes an eligibility determination and the KYTC is responsible for the disbursement and management of the CMAQ funds. Application cycles may vary depending upon the availability of federal CMAQ funding. CMAQ projects are listed in Appendix A, Exhibit A-6.

A-5. Fiscal Constraint

In accordance with 23 CFR 450.216(a)(5), the STIP is required to be financially constrained by year, include sufficient financial information to demonstrate which projects are to be implemented using current revenues, and which projects are to be implemented using proposed revenue sources, while the system as a whole is being adequately operated and maintained. In addition, with the passage of the enabling legislation by the Kentucky General Assembly to use "Grant Anticipation Revenue Vehicles (GARVEEs)" bond funds, the fiscal constraint calculations include the debt service payments for GARVEE bonds (Table 1, page 13). The FY 2017-2020 STIP Fiscal Balance Worksheets show anticipated funding levels (apportionments) and compares them against planned outlays (obligations) for each of the next four fiscal years (FY 2017 through FY 2020). The anticipated federal-aid highway funding and anticipated federal transit funding apportionments for FY 2017-2020 are shown in Table 2 on page 14. The anticipated federal-aid highway funding and

anticipated federal transit funding obligations for FY 2017-2020 are shown in Table 3 on page 15. And, the rolled up totals for each of the FAST Act federal-aid highway funding categories for “Anticipated Apportionments” vs “Planned Obligations” and “Projected End of Fiscal Year Advance Construction” are shown in Table 4 on page 16.

The planned federal obligations are based upon the estimated project phase costs in projected “Year of Expenditure” dollars by using the “Cost in Today’s Dollars” and using a 4 percent yearly inflation factor for design, utility, and construction phases and using a 5 percent yearly inflation factor for the right-of-way phase. The FY 2017-2020 STIP federal funding level forecasts are based on the current Transportation Act, “FAST Act,” which was enacted by the United States Congress. The FAST Act was signed into law by President Barack Obama on December 4, 2015 to provide over \$305 billion for fiscal years FY 2016 through FY 2020.

For the purposes of this edition of the FY 2017-2020 STIP, the funding levels for FY 2017 through FY 2020 are in accordance with the summary of estimated apportionments under the conference report for H.R. 22 (FAST Act) provided to state DOTs. These state-specific levels of funding are broken down into individual program funding categories as determined by FAST Act application to Federal Highway Trust Fund formulas.

Kentucky’s federal highway program will be largely matched with “toll credits” through FY 2020. Toll credits are attributed to Kentucky by federal highway law in accordance with calculations that consider past levels of state fund investment, such as state-sponsored toll roads, in the federal highway system. Toll credits do not generate cash and cannot be accounted as such; however, they do permit the KYTC the flexibility to use 100% federal funding on federal-aid projects. By doing so, the KYTC can allocate more of its own state funding for state-funded projects, yielding increased cash management controls.

The federal funding target amounts used to fiscally balance the FY 2017-2020 STIP, based upon projected estimated apportionments of category-by-category federal funding expectations of total federal-aid dollars available during Fiscal Years 2017 through 2020, is anticipated to be approximately \$2.77 billion. Adding the carry-over federal funding from FY 2016, the total revenue expectation that supports projects in this edition of the STIP is approximately \$3.35 billion. The total of the scheduled federal-aid funding obligations for the FY 2017-2020 STIP is approximately \$3.37 billion. The ratio of the scheduled federal-aid obligations to the scheduled federal-aid apportionments is 1.01 for the planned projects listed in the FY 2017-2020 STIP. Thus, the FY 2017-2020 STIP is fiscally constrained.

It is possible that the final federal appropriation for any given year may change these estimates slightly, but these changes should not substantially alter the ability of the KYTC to deliver planned federal-aid highway projects. The anticipated apportionments scheduled in FY 2020, have been reduced by \$128 million as per the projected Congressional rescissions outlined in the FAST Act for FY 2020. As to planned obligations, the listing of project phases contains some construction phases listed as an “Illustrative Project” in the event that additional federal-aid highway funding becomes available beyond the anticipated planned apportionments. Those projects may be moved into the fiscal constraint calculation in accordance with the process of the KYTC receiving new additional federal-aid highway

funding. In August prior to the end of the federal-aid highway funding fiscal year, the KYTC conducts a “fiscal constraint” recalculation overview within each of the STIP funding programs to compare the federal funding obligations to the planned obligations for the current fiscal year, to assure that the federal program is “fiscally-constrained.”

It is important to note that Kentucky oftentimes utilizes federal pre-financing provisions in programming federal funding through FHWA, defined as “Advance Construction” (AC). The federal pre-financing AC process is defined as “Advance Construction of Federal-aid Projects,” whereby the state may request and receive approval from FHWA that the requested project phase meets federal-aid regulations as being eligible for federal-aid funding for reimbursement of project expenditures, but the state elects to defer the use of the current available federal-aid apportionments and obligation authority to a future time period based upon actual project expenditures. By using the AC funding mechanism, this provides Kentucky the ability to maximize the use of federal-aid funding, while at the same time accelerating many federal highway projects.

The KYTC’s Cash Flow Management Process for using the federal AC pre-financing process outlines that the goal of KYTC is keep the federal-aid highway program “Earned Unbilled” to less than \$50 million. The “Earned Unbilled” federal-aid highway funding amount is the amount of state dollars that have been used to pay expenditures on federal AC pre-financed project phases that eventually will be converted to current federal-aid highway funding apportionments and obligation authority, and then a request will be sent to FHWA for reimbursement of eligible project expenditures. Kentucky’s current AC total is approximately \$274 million, and the current “Earned Unbilled” total for those projects, is under \$30 million.

The projected end of fiscal year “advance construction” is \$367 million for FY 2017; \$421 million for FY 2018; \$384 million for FY 2019; and \$367 million for FY 2020. However, the amount of “advance construction” will depend upon several factors including the timing of the actual congressional release of yearly federal-aid highway funding obligation authority and the programming of federal-aid highway funded projects near the end of each federal fiscal year.

The KYTC continually monitors the “net cash balance” of these federal AC pre-financed projects, and these results are included within the month-to-month consideration of the federal-aid highway funding program’s flexibility in the overall cash flow management procedures of the state and federally-funded programs. Through the “Cash Flow Management” procedures, using state funding from the state “Road Fund” cash balance until the federal share of these costs can be billed to the federal government, the KYTC can maximize the usage of both state road funds and federal-aid highway funding to deliver the overall state and federal funded transportation program.

It is also important to note that the KYTC utilizes innovative financing options permitted under federal transportation law. In particular, during the 2004 General Assembly’s legislative session, House Bill 418 was passed, enabling the KYTC to pursue a specific group of interstate widening projects through an innovative financing technique known as “Grant Anticipation Revenue Vehicles (GARVEEs).” The General Assembly’s

enactment of House Bill 267 (Appropriations Bill) during the 2005 legislative session, provided to the KYTC, approval of \$150 million in appropriation authority in Fiscal Years 2004-2005 for GARVEE bond funds. In addition, during the 2006 General Assembly's legislative session the General Assembly provided within House Bill 380 approval to the KYTC an additional \$290 million in appropriation of authority in Fiscal Years 2006-2008 for GARVEE bond funds. The 2008 General Assembly made available the ability to use \$231 million of GARVEE bond funds to support the Louisville Bridges project within House Bill 410. Also, during the 2010 Extraordinary Session, the General Assembly made available the option to use an additional \$105 million of GARVEE bond funds to support the Louisville Bridges project within House Bill 3. In addition, the option to use \$330 million of GARVEE bond funds to support the construction of the two US 68/KY 80 bridges over Kentucky Lake and Lake Barkley was made available within House Bill 3. Therefore, the Kentucky General Assembly has provided the KYTC the ability to use \$1.1 billion in GARVEE bond funds, along with the approval of usage of federal-aid highway funding to provide debt service payments on the GARVEE bonds.

The GARVEE financing technique is permitted by federal law and involves the commitment of future federal-aid appropriations as leveraging for current year highway improvements. The primary benefit of such an arrangement is that major highway improvements can be purchased at today's prices and paid for with interest over a multi-year timeframe. The application of the GARVEE principle is very similar to home mortgage financing, but is used to purchase major highway investments when "pay-as-you-go" is not the desirable course.

With the passage of the enabling legislation by the Kentucky General Assembly to use GARVEE bond funds, the KYTC has begun activities on the corresponding approved projects. The breakdown of the required federal-aid highway funding to cover the corresponding debt service for each of the GARVEE bond funded projects is shown under the "ZVarious" County item numbers as shown on Table 1, on page 13.

Each of these projects constitutes a necessary investment in Kentucky's future. The need to accommodate both people movement and freight movement is critical to Kentucky's economy in the years ahead. Without the GARVEE bond program, these highway projects would continue to be piecemealed over time, and likely not completed until beyond 2025. The innovative idea of GARVEE bonds, along with determined state leadership, will yield the kind of realistic solution necessary to reverse the "always behind" mentality of the past and help restore hope to Kentucky's transportation program.

The federal funding for the construction phases identified within the GARVEE bond program will be programmed through FHWA as Advance Construct (AC) projects. Again, as explained previously, the AC process is defined as "Advance Construction of Federal-Aid Projects," whereby the state may request and receive approval to construct federal-aid projects in advance of the apportionment of authorized federal-aid funds. The AC conversion of the federal funding for the GARVEE bond program will be distributed over a period of fourteen years, and will be in accordance with the GARVEE bond program Memorandum of Agreement (MOA). At the beginning of each federal fiscal year, federal programming documents for GARVEE bond projects AC conversions will be submitted to

FHWA to use current federal-aid highway funding apportionments and current formula funding obligation authority. The total amount of the AC conversions will be the amount of federal funding required to cover the yearly debt service (principal, interest, and other costs incidental to the sale of eligible bond issue) as outlined within each of the approved GARVEE bond programs. The required NHPP and STP funding to cover the yearly debt service amount for the GARVEE bonds will be included in the end-of-year “Fiscal Constraint” determination, and will be included within the preparation of future STIPs and fiscal constraint calculations. The KYTC is setting aside the required amount of “toll credits” for the matching funds for the federal-aid highway funding to cover the GARVEE bond debt service payments through 2027.

As noted, the list of projects within the FY 2017-2020 STIP includes federally-funded projects and only the state-funded projects that are regionally significant to meet transportation air quality conformity requirements, including the projects within the MPO areas. The projects located within each of the MPO areas included within the STIP are subject to approval and inclusion within the respective MPO’s TIP and subsequent amendments for each of these MPO areas. In addition, like the FY 2017-2020 STIP, in accordance with 23 CFR 450.326(g) each MPO TIP is required to be financially constrained by year and include a financial plan that demonstrates which projects can be implemented using current revenues, and which projects are to be implemented using proposed revenue sources, while the existing transportation system is being adequately operated and maintained. Each of the MPO’s TIP financial plans are developed in cooperation with the KYTC and the transit operators, based upon projected estimates of available federal and state funds within the MPO areas. Based upon the financial plan, the MPOs’ TIPs contain only project phases that funding can be reasonably expected to be available for each of the project’s identified phase, funding source, fiscal year schedule, and the estimated cost.

Kentucky has several transportation “Mega Projects” (projects having a total estimated cost of greater than \$500 million as identified within Section B-10) underway throughout the Commonwealth of Kentucky. As required by federal regulations, each of the “Mega Projects” require the preparation of financial plans on projects funded with federal funding, and the financial plans for the “Mega Projects” must be updated each year. The updates to the financial plans outlines current project expenditures, updates current cost estimates in year of expenditure dollars for each remaining project phase, and outlines the required remaining funding to complete the “Mega Project.” As the “Mega Projects” financial plans are updated, changes in estimated costs and required funding for future project phases will be addressed through the STIP and MTP/TIP amendment or administrative modification processes, as necessary.

As evidenced by Table 3, Kentucky’s STIP is fiscally-constrained for the next four years. For informational purposes, the STIP also contains several state-funded projects, shown in Appendix A, Exhibit A-5 C, which are critical for SIP compliance and conformity determinations. As future allocation of state road funds are being considered for funding authorizations, each of these state-funded projects that are critical for SIP compliance and conformity determinations, will be included in the KYTC prioritization process for the utilization of available state road funds.

The authorization and programming of all state and federal funding for the transportation program will be accommodated through the KYTC's cash flow management program. When the planned obligations exceed estimated apportionments by program category, unobligated previous apportionments will be used, or moneys will be transferred between categories, or flexible funding such as "Minimum Guarantee" will be used to close the program-specific funding gap to the extent that air quality conformity for the region is not jeopardized.

To reiterate, the KYTC's goal is to fund the federal-aid highway program as outlined in the 2016 Enacted Highway Plan as approved by the 2016 Kentucky General Assembly, unless Congress and FHWA direct otherwise. The project phases listed in no way constitute an effort to denigrate the importance of any project to the community or region it serves. The KYTC will work diligently to implement all STIP projects as quickly as funding limitations will permit.

Shifting projects between fiscal years of the STIP may be conducted when determined essential to the effective use of federal-aid highway program dollars. It is expected that such changes would normally be "minor," for example; advancing a non-controversial project to replace a project not able to meet the assigned schedule, with respect to STIP activity. If such adjustments involve actions determined by the KYTC to be "major" in nature (e.g., acceleration of a controversial project), then a formal STIP amendment would be pursued.

The operation and maintenance of existing transportation facilities within the state is a primary concern among Kentucky citizens, and included within the FY 2017-2020 STIP are federally-funded system preservation projects. In addition to the federally-funded system preservation projects, Table 2 contains a line-item outlining the FY 2017-2020 scheduled state and local funding for none "Toll Credits" matching funds and for the KYTC's operations and maintenance program.

Included within each MPO's TIP is a financial plan that demonstrates how the TIP can be implemented, identifies funding resources from public and private sources, and identifies innovative financing techniques to finance projects and programs. The development of the projected estimates of funding resources is developed through cooperative efforts of the MPO, the KYTC, and Public Transportation Agencies. Also included within the financial plan are grouped project line-items for projected funding and obligations for operations and maintenance activities for existing facilities. Again, the projected funding resources were prepared through cooperative efforts of the MPO, the KYTC, and Public Transportation Agencies by utilizing expenditures data from the KYTC Fiscal Year Audit Reports for actual operations and maintenance expenditures within the MPO areas. (See Appendix B-Metropolitan Planning Organization (MPO) Financial Plans).

NOTES FOR ITEMS WITHIN FY 2017 - 2020 STIP FISCAL BALANCE SHEET

- (1) THE APPORTIONMENT BALANCES USED TO BEGIN THE FISCAL CONSTRAINT CALCULATIONS AND THE APPORTIONMENT BALANCES SHOWN ARE AS OF JUNE 8, 2016.
- (2) FEDERAL FUNDS FOR FY 2017, FY 2018, FY 2019, AND FY 2020 ARE BASED ON THE 2016 FAST ACT TRANSPORTATION BILL ANTICIPATED APPORTIONMENT TABLES FOR FY 2016 - FY 2020.
- (3) SURFACE TRANSPORTATION PROGRAM BALANCES INCLUDE MINIMUM GUARANTEE AND EQUITY BONUS LIMITATION ADJUSTMENT FUNDING. THE DEDICATED STP FUNDING FOR SHN, SLO, SLX, AND SNK FUNDING CATEGORIES, ALONG WITH OTHER FEDERALLY FUNDED PROJECTS WITHIN THE MPO AREA ARE FISCALLY CONSTRAINED WITHIN EACH OF THE CORRESPONDING MPO TIP'S FINANCIAL PLAN.
- (4) TOLL CREDITS WILL BE USED FOR REQUIRED MATCHING FUNDS FOR FY 2017 THROUGH FY 2020 FUNDING FOR APD, BRO, BRX, BRZ, IA, NH, STP, HPP, AND KYD. IN FY 2020 KYTC ANTICIPATES HAVING TO USE \$40 MILLION STATE FUNDS IN ADDITION TO AVAILABLE TOLL CREDITS FOR MATCHING FUNDS FOR APD, BRO, BRX, BRZ, IA, NH, STP, HPP, AND KYD FUNDING. LOCAL MATCHING FUNDS WILL BE REQUIRED FOR CM, TAP, AND DEDICATED STP FUNDS IN THE MPO AREAS FOR FY 2017 THRU FY 2020.
- (5) IF PLANNED OBLIGATIONS ARE GREATER THAN THE ANNUAL APPORTIONMENTS IN A GIVEN FISCAL YEAR, THE DIFFERENCE WILL BE MANAGED USING THE FEDERAL "ADVANCE CONSTRUCTION" MECHANISM. THE GOAL OF THE KYTC IS TO MANAGE THE YEARLY TOTAL OF "ADVANCE CONSTRUCTION" THROUGH THE KYTC CASH MANAGEMENT PROCESS. THE PROJECTED END OF FISCAL YEAR "ADVANCE CONSTRUCTION" IS \$274 MILLION FOR FY 2016, \$367 MILLION FOR FY 2017, \$421 MILLION FOR FY 2018, AND \$384 MILLION FOR FY 2019. AND \$367 FOR FY 2020. HOWEVER, THE AMOUNT OF "ADVANCE CONSTRUCTION" WILL DEPEND UPON SEVERAL FACTORS INCLUDING THE TIMING OF THE ACTUAL CONGRESSIONAL RELEASE OF YEARLY FEDERAL-AID HIGHWAY FUNDING OBLIGATION AUTHORITY AND THE PROGRAMMING OF FEDERAL-AID HIGHWAY FUNDED PROJECTS NEAR THE END OF EACH FEDERAL FISCAL YEAR.

A-6. Revisions to the LRSTP or STIP

On various occasions revisions may be required to the LRSTP or STIP. Revisions to a LRSTP or STIP may involve a minor revision or may involve a major revision. On a case-by-case basis, the KYTC, FHWA, and/or FTA determines whether the revision is minor or major as per definition of “Administrative Modification” and the definition of “Amendment” outlined in 23 CFR 450.104. The KYTC, FHWA, and FTA will utilize applicable requirements and classifications of projects that are not considered to be of appropriate scale for individual identification a given program year as outlined in 23 CFR 771.117 (c) and (d) and/or 40 CFR part 93.126 “Exempt Projects” and 93.127 “Projects Exempt from Regional Emissions Analysis.” These appropriately identified projects may be grouped by function, work type, and/or geographic area into the ZVarious programs and other program placeholders to determine if a STIP revision is required.

Administrative Modifications to STIP

Administrative modifications are minor revisions to the STIP that include minor changes to:

- Projects/project phase costs.
- Funding sources of previously included projects.
- Project phase initiation dates.
- The delineation of projects in program placeholders which include:
 - Congestion Mitigation and Air Quality (CMAQ) projects
 - Transportation Alternatives (TA) projects
 - High Cost Safety Improvement (HSIP-HCS) projects

An administrative modification is a revision that does not require:

- Public review and comment.
- Re-demonstration of fiscal constraint.
- A conformity determination (in air quality conformity nonattainment and maintenance areas).

For administrative modifications to the STIP, the official STIP mailing list will be utilized to distribute information pertaining to the revision. As STIP administrative modifications are made, each administrative modification will be posted on the KYTC web site. Each of these documents will be provided in an electronically accessible format with the means to search and print as appropriate.

Amendments to the STIP

Amendments are revisions to the STIP that include major changes to a project included in the STIP. This includes a major change in:

- Project cost.
- Project/project phase initiation dates.

- Design concept or design scope (e.g., changing project termini or the number of through traffic lanes or changing the number of stations in the case of fixed guideway transit projects).
- The addition or deletion of projects, except those types of projects not considered to be of appropriate scale for individual identification as outlined in 23 CFR 771.117 (c) and (d) and/or 40 CFR part 93.126 “Exempt Projects” and 93.127 “Projects Exempt from Regional Emissions Analysis,” which are the grouped projects listed in the ZVarious programs and other program placeholders such as the Transportation Alternatives (TA) and Congestion Mitigation and Air Quality (CMAQ).

An amendment is a revision that requires:

- Public review and comment.
- Redemonstration of fiscal constraint.
- A conformity determination (in air quality nonattainment and maintenance areas).

For STIP amendments that have not undergone public involvement through the MPO process or the Highway Plan process, a 15-day public review period will be provided and public notice advertisements will be placed in statewide, significant regional, and demographically targeted newspapers. Selected newspapers will be identified through assistance from the corresponding ADDs and MPOs. In addition, other possible public outreach efforts targeted to the specific region of the state directly affected by the proposed STIP amendment may be required and will be determined on a case-by-case basis.

The proposed amendment will be displayed at the KYTC Central Office as well as the appropriate Highway District, ADD, and MPO offices for public review and comment. KYTC will make available to the public the description of project, location of project, proposed project phases, proposed type of funding, and scheduled fiscal year of each phase that KYTC wants to amend into the STIP. Also, KYTC will revise the “Fiscal Constraint” tables outlined in the STIP to reflect the required funding for the proposed new project vs. available funding. KYTC will provide hard copies of the information and the information will be made available on the KYTC STIP web site. The public will be provided the means to submit written and electronic review comments on proposed STIP amendment.

At the conclusion of the 15-day review period, public comments will be addressed, additional public outreach may be conducted as necessary, and the final STIP amendment will be provided to FHWA and FTA for approval. For amendments to the STIP from areas within MPO boundaries, the public involvement process conducted for the respective MPO TIP will suffice as the required public involvement for the STIP.

As STIP amendments are approved, each amendment will be posted on the KYTC web site. Each of these documents will be provided in an electronically accessible format with the means to search and print as appropriate.

B. STIP Projects

The FAST Act advocates that transportation planning processes be broadened to include the intermodal aspects of the nation's transportation system. Each state is to establish a statewide transportation planning process that enhances the integration and connectivity of the transportation system, across, and between modes throughout the state, for people and freight. The KYTC has incorporated an intermodal planning process through the statewide and regional transportation planning process that identifies and assesses intermodal facilities and systems and highway access to these facilities on a continuous basis. The KYTC hopes to further develop its processes to use performance criteria and relevant data to determine the efficiency and effectiveness of these facilities and systems, and identify projects and strategies to improve the intermodal movement of people and freight.

The KY Freight Plan will be published in fall 2016. This plan does not currently contain specific projects. Highway and multimodal projects will be added with input from the Kentucky Freight Advisory Committee for Transportation (KY FACT) before the 2017 federal deadline in accordance with requirements of the National Highway Freight Program (NHFP) found in the FAST Act. The KYTC plans to use 10% or approximately \$2 million per year of the NHFP for multimodal projects to improve the National Highway Freight Network. Specific activities the KYTC has undertaken to develop an intermodal planning process included integrating freight generator identification and modal access tasks into the Annual Work Program of the ADDs and identifying and discussing intermodal issues through the statewide transportation planning meetings. A four tiered KY Freight Highway Network was developed using a data-driven process with ADD, MPO, HDO, and freight peer input.

Specific activities that the KYTC has undertaken to develop this intermodal planning process included integrating freight movement and modal access tasks into the Annual Work Program of the ADDs, identifying and discussing intermodal issues through the statewide transportation planning meetings, the identification of intermodal access projects and the dedication of specific staff to the freight movement issues. Improvement projects and strategies resulting from the studies and prioritization process based on selected criteria, as well as the other pertinent data, will be considered for inclusion in the statewide transportation plan for future implementation. The FAST Act further required that (1) the plans and programs for each state provide for development of integrated management and operation of transportation systems that will function as an intermodal transportation system for the state, and an integral part of an intermodal transportation system for the United States, and (2) the process shall provide for consideration of all modes and be continuing, cooperative, and comprehensive.

The FAST Act requires that each State shall carry out a continuing, cooperative, and comprehensive statewide transportation planning process that provides for consideration and implementation of projects, strategies, and services that will support the economic vitality of the United States, the states, metropolitan areas, and nonmetropolitan areas, especially by enabling global competitiveness, productivity, and efficiency.

In accordance with the FAST Act requirements, the KYTC mission is "to provide a safe, secure, and reliable highway system that ensures the efficient mobility of people and freight, thereby enhancing both the quality of life and economic vitality of the Commonwealth." Simply stated, the

KYTC's goal is to provide "safe and reliable roads, roads that lead to jobs," and the 2016 Enacted Highway Plan and FY 2017-2020 STIP have been developed to support that goal.

B-1. Planned Highway Improvements

In developing the highway element of the FY 2017-2020 STIP, the KYTC relied heavily upon its ongoing project identification and scheduling mechanisms, particularly the long-range planning process. The KYTC projected federal and state funding levels were used in the development of the Recommended FY 2016-2022 Highway Plan submitted to the Kentucky General Assembly in January 2016. The Kentucky General Assembly by law has the right to remove, add to, or edit projects contained in the Recommended Highway Plan. The 2016 General Assembly approved Kentucky's 2016 Highway Plan (FY 2016-2022) in April 2016. The 2016 Highway Plan is the primary basis for the federal-aid highway element of the FY 2017-2020 STIP. Included within the 2016 Highway Plan are projects shown as having HPP funding and KYD funding. These are projects that have been earmarked by Congress to be funded with special high priority (HPP) funding, or have been earmarked by Congress to receive federal discretionary (KYD) funding. Also, included within the 2016 Highway Plan are projects that are scheduled to use GARVEE bond funding as described within STIP Development; Section A-5: Fiscal Constraint.

To help achieve these goals, the identification of highway needs has been accomplished through in-house evaluations of highway performance and adequacy, meshed with input received from state legislators, local officials, MPO and ADD transportation committees, the general public, and from within our own agency's Central Office and District Offices. Each of these sources yielded valuable input for consideration in the development of the state's Long-Range Transportation Plan and the Highway Plan.

The KYTC considered technical data on the ability of candidate projects to improve safety, increase system reliability, and contribute toward enhancing regional economic attractiveness. Unfortunately, the needs of our highway system far outweigh available resources. The KYTC is working to improve the evaluation process for active and potential projects to ensure that every dollar we spend is used to address the most critical and cost effective improvements. In doing so, the KYTC can concentrate available funds on those projects that truly result in safer roadway conditions, better pavements and bridges, and improved local economies.

As the Highway Plan was developed, projects were selected from the KYTC's District Transportation Plans and from the MPOs MTPs within reasonably anticipated funding. By following this continuing process, the Cabinet's long-range planning efforts have served to maintain a stream of prioritized candidate projects for inclusion and advancement in Kentucky's Highway Plan. As the federally-required long-range planning process matures, the Highway Plan and STIP documents will be strengthened by the focus on longer-range program management considerations. It is expected that future editions of Kentucky's STIP will reflect a strategy for implementation resulting from more clearly defined longer-range transportation goals.

As outlined within the STIP Introduction, the FY 2017-2020 STIP is a planning document that covers a period of four years, and is updated every two years upon approval of the KYTC's Highway Plan by the Kentucky General Assembly. With the STIP being a planning document, the projects, schedules, and estimated costs identified within the FY 2017-2020 STIP are based upon the most current project information at the time of preparing the Highway Plan and STIP. As work progresses within each phase of the projects, the project team refines the project scope, schedules, and estimated costs to complete the project. The programming of project funding for project refinements will follow the STIP amendments/revisions process as described within STIP Development; Section A-6: Revisions to the LRSTP or STIP, along with the STIP end of fiscal year "fiscal constraint" recalculations.

The listing of FY 2017-2020 STIP projects is contained in Appendix A, Exhibit A-5. The KYTC will administer each of the projects listed unless clearly indicated in the project description as being handled otherwise. Included as part of the listing of projects, is the "Priority" column which is a quick reference for project priority of the corresponding project. The project priority is listed as Safety, Reliability, New Routes, or Economic Development as defined by the following definitions:

Safety: Providing for the safety and security of motorized and non-motorized users who travel Kentucky's highways is the KYTC's highest priority. The FY 2017-2020 STIP includes several programs of projects that serve to address the safety needs on Kentucky's highways. In accordance with the FAST Act, Kentucky has developed a Strategic Highway Safety Plan (SHSP) that combines all statewide enforcement, engineering, education, and emergency response issues into a single coherent plan. The "engineering" element of the SHSP is primarily addressed through the Highway Safety Improvement Program (HSIP) which funds infrastructure-related safety improvements. The "educational" and "enforcement" elements of the SHSP are addressed in the Highway Safety Plan (HSP) which funds behavioral-related safety improvements.

Reliability: The condition of roads and highways in the state is a primary concern among Kentucky's citizens. Poor pavements detract from the driving experience, and road maintenance and resurfacing are the top transportation investment needs in our state. These issues certainly resonate with the KYTC, as we too see the value in protecting the infrastructure in which the public has entrusted to us.

New Routes: This is for the development of a roadway that does not currently exist.

Economic Development: This is for the reconstruction of major interchanges.

In an effort to provide a consistent, ongoing set of performance measurements for the maintenance condition of Kentucky's state-maintained highway system, the KYTC has developed a Maintenance Rating Program (MRP). The purpose of the MRP is to assess maintenance activities as they relate to customer expectations, provide data to support needed performance improvements, ensure that the KYTC system preservation strategies are working, and to meet federal asset management requirements. Through the MRP, the KYTC has proposed some budgetary adjustments for the FY 2017-2020 STIP to increase

funding for the maintenance and resurfacing programs in an effort to improve conditions on Kentucky's roadways. There has also been a concerted effort to include essential, major pavement reconstruction projects in the FY 2017-2020 STIP. The KYTC's desire is to improve overall pavement conditions and meet the public expectation that Kentucky's roads will be kept in the best possible shape.

According to the KYTC inventory data, approximately 73% of Kentucky's bridges are performing the function that they were designed to fulfill without presenting any particular problems. Of the remainder, 7% are classified as "structurally deficient" and 20% are classified as "functionally obsolete." The phrase "structurally deficient" implies that there is a structural problem that will eventually require attention. Many times, these structural problems are addressed by posting the bridge at a specific maximum loading to prolong the life of the structure. The phrase "functionally obsolete" implies that a bridge is too narrow to accommodate the traffic it carries. While the KYTC is concerned that Kentucky's bridges are functionally wide enough, our major emphasis is on those bridges that present structural condition issues. As the KYTC works to keep Kentucky's bridges safe, the focus of the federal and state bridge replacement programs is first to repair or replace those bridges that carry relatively heavy traffic volumes and present the most severe structural problems.

Economic Development: Kentucky's future economy and congestion concerns: Highway congestion and its impact on economic development in Kentucky is very much a "relative" issue. While Kentucky does not have the overly-oppressive highway congestion found in many of the nation's very large cities, there are times when congestion in our urban centers is just as frustrating to Kentucky drivers. Morning and afternoon "rush hours" create traffic problems on many of our city streets, urban beltlines, and metro area interstate highway arteries. Additionally, "just in time" delivery schedules have created "rolling warehouses" on many of Kentucky's rural interstates, resulting in truck percentages of 50% in some instances. Such heavy truck volumes reduce levels of service on our major roadways, and create safety issues and driver frustration. As traffic and freight volumes increase in the years ahead, our existing highway network will become more and more constrained and potentially impact Kentucky's competitiveness in the global marketplace.

Each of the FY 2017-2020 STIP projects, whether identified with a purpose of safety, reliability, or economic development, truly has an effect on Kentucky's future economy and congestion concerns.

B-2. Highway Safety Improvement Program (HSIP)

The HSIP is a core Federal-aid highway program, the purpose of which is to achieve a significant reduction in fatalities and serious injuries on all public roads. The HSIP is a federally-funded, state administered program that is legislated under 23 U.S.C. 148, 23 U.S.C. 150, and 23 U.S.C. 130 and regulated by 23 CFR Parts 924 and 490.

23 CFR 924.5 states:

Each State shall develop, implement, and evaluate on an annual basis an HSIP that has the objective to significantly reduce fatalities and serious injuries resulting from crashes on all

public roads. HSIP funds shall be used for highway safety improvement projects that are consistent with the State's SHSP (Strategic Highway Safety Plan). HSIP funds should be used to maximize opportunities to advance highway safety improvement projects that have the greatest potential to reduce the state's roadway fatalities and serious injuries.

To be eligible for HSIP funds, all highway safety improvement projects must:

1. Address Strategic Highway Safety Plan (SHSP) priority,
2. Be identified through a data-driven process, and
3. Contribute to a reduction in fatalities and serious injuries.

In addition, all highway safety improvement projects are subject to general requirements under Title 23 of the United States Code.

In general, non-infrastructure projects that promote the awareness of the public and educate the public concerning highway safety matters or enforce highway safety laws are not eligible for HSIP funds. However, eligible non-infrastructure projects include road safety audits, improvements in the collection and analysis of data, or transportation safety planning activities.

Most projects are identified through emphasis area lists such as High Friction Surface, Cable Median Barrier, Guardrail Installation, Roadway Departure, Intersections, and Horizontal Alignment Signing. Systemic safety treatments are often implemented with the emphasis area projects but some systemic-only safety projects are implemented based on statewide trends observed in crash data.

Projects meeting the program's requirements listed above are submitted to FHWA for review and approval into the program. Upon approval of the identified projects, funding for the projects are initiated based upon statewide priorities for activities that are most likely to reduce the number of, or potential for, fatalities and serious injuries and upon available funding. An annual report is submitted to FHWA that describes the progress being made, assesses the effectiveness of the improvements, and describes the extent to which the improvements funded contribute to the safety goals.

As part of the HSIP report, the state must report annually on these categories:

1. Number of fatalities;
2. Rate of fatalities;
3. Number of serious injuries;
4. Rate of serious injuries; and
5. Number of non-motorized fatalities and non-motorized serious injuries.

Each safety performance measure is based on a 5-year rolling average that accounts in regression to the mean.

Railway-Highway Crossings Program

This program funds safety improvements to reduce the number of fatalities, injuries, and crashes at public grade crossings. The railway-highway crossing program will be conducted in accordance with regulations as outlined in the corresponding section of the FAST Act, Section 1108; and 23 USC 130.

The railway-highway crossings program funding level determined for each state is set aside from the state's HSIP amount. Activities funded under this program are also eligible for funding under the broader HSIP eligibilities. The federal-aid highway funding anticipated apportionments and planned obligations for the Railway-Highway Crossings railroad protective devices (RRP) and the railroad separation (RRS) projects are included within the HSIP – Safety categories in the Fiscal Constraint tables.

Highway Safety Plan (HSP)

The purpose of the Highway Safety Plan (HSP) is to identify problem areas of the state regarding the behavioral aspects of highway safety, develop performance goals and objectives, and establish programs and projects to reduce fatalities and serious injuries on Kentucky's highways. The federal funding is a combination from FHWA and the National Highway Traffic Safety Administration (NHTSA). The HSP is an integral part of Kentucky's overall Strategic Highway Safety Plan (SHSP) as required by the FAST Act. Emphasis areas are as follows:

- a. Impaired Driving
- b. Occupant Protection
- c. Police Traffic Services
- d. Planning and Administration
- e. Motorcycle Safety
- f. Non-motorized transportation
- g. Crash Investigation
- h. Roadway Safety
- i. Traffic Records
- j. Data Incentives

Grants Management

Grants are a significant part of the HSP for law enforcement, communities, research and data. It takes a cooperative effort by many agencies to reduce fatalities and serious injuries on our highways. Both FHWA and NHTSA provide federal funding that is dispersed to various agencies based upon the identified problem areas. Three national law enforcement mobilizations are conducted each year to specifically draw attention to safety belt usage and drunk driving. These are "Click It or Ticket," U Drive, U Text, U Pay," and "Drive Sober or Get Pulled Over." Our summer-driving state initiative is "Blue Lights Across the Bluegrass," which focuses on speeding but also encompasses other emphasis areas.

Highway Safety Education Program

The Highway Safety Education Program (Education Branch) was created in 1994 as

the educational arm of the Cabinet's Safety Corridor Program. The Education Branch is now one of the two branches under the Division of Highway Safety Programs. Funding for these programs has come primarily from FHWA. The Education Branch focuses heavily on schools and communities to target the newest and youngest drivers to get them started in the right direction. There are many programs, including simulators that focus attention on different problem areas regarding highway safety. Below is a listing of these.

- a. Monitoring FHWA grantees executing non-law enforcement grants
- b. Active in local highway safety committees
- c. Ghost Out
- d. Mock Crash
- e. Judgement Day
- f. Fatal Vision Goggles
- g. D2 Distracted Driving Simulator
- h. 3D Drunk and Drugged Driving Simulator
- i. Motorcycle Safety events
- j. Mature driving presentations

All of these programs focus on targeted areas of the state where there are unusually high fatalities and injuries, low safety belt usage, and high incidences of drunk or drugged driving.

B-3. Intelligent Transportation System (ITS)

The KYTC has a variety of Intelligent Transportation System (ITS) programs both operational and under construction throughout Kentucky. The Cabinet has operational freeway traffic management systems in Northern Kentucky (Ohio TMC) and Metro Louisville (TRIMARC). The City of Lexington operates an independent operation center. The Cumberland Gap Tunnel (CGT) Center provides traffic management, as well as other tunnel-related services. The Cumberland Gap Tunnel Authority operates for KYTC, but is independent from the State Transportation Operations Center (TOC). The TOC in Frankfort provides support to those facilities, and also provides traffic management services to the rural areas of Kentucky.

The KYTC has implemented ITS projects in the Lexington, Elizabethtown, Bowling Green, Paducah, and Ft. Campbell areas. These projects include Dynamic Message Signs (DMS), cameras, and roadway sensors. Obsolete DMS and cameras are being replaced within the Northern Kentucky and Elizabethtown areas, and Speed Data services are available statewide. Our ITS Architecture was updated in 2015.

The TRIMARC system has been expanded within the Louisville Metro area as part of the Ohio River Bridges project. KIPDA is using the reporting capabilities of TRIMARC. Other operational systems include the Road Weather Information Stations (RWIS) in 39 locations to provide Highway District Maintenance personnel, as well as others, with vital roadway weather information for critical purposes such as snow and ice maintenance.

On a statewide level, the KYTC has an operational Freeway Service Patrol (SAFE

Patrol) which provides motorist assistance and Incident Management services on Kentucky's interstates and parkways. The KYTC has implemented the Condition Acquisition and Reporting System (CARS) and associated 511 systems. Because of the requirements of 23 CFR 511 and compliance with the Real Time System Management Information Program (RTSMIP), the KYTC is implementing a new real time Roadway Advisory Map to process and publish data. This new program is scheduled to replace the current 511 system. The partnerships with the Cabinet's District Offices, Transportation Operations Center in Frankfort, Division of Maintenance, Kentucky Vehicle Enforcement, WAZE, and Kentucky State Police ensures the highest level of information provided to the traveling public.

B-4. Maintenance and Traffic Operations

The KYTC is responsible for ensuring that the State Road System is maintained and operated in such a manner as to ensure the safest and most reliable roadways possible. The Cabinet's goal is to provide the highway user maximum safety and comfort with minimum travel interruptions. Table 2 contains a line-item outlining the FY 2017-2020 scheduled state funding for the KYTC's operations and maintenance program, and Appendix B contains the MPOs Financial Plans, which includes a line-item outlining the operations and maintenance program within each MPO area.

The annual state-funded Maintenance and Traffic Operations Programs are comprised of four major sub-programs: Roadway Maintenance, Bridge Maintenance, Rest Area and Weigh Station Maintenance, and Traffic Operations. The Roadway Maintenance unit is responsible for maintenance of the highways in the State Road System. This unit is responsible for routine upkeep such as pavement repairs, ditch cleaning, mowing, litter pickup, snow and ice removal, and maintenance relating to drainage, shoulders, signs, markings, delineation, and guardrails on the approximately 27,629 miles of highways in Kentucky.

The Bridge Maintenance Program performs activities on bridges such as inspections, load ratings, painting, deck repair, and structural work on the Commonwealth's 9,000 total state-maintained structures. The Rest Area Maintenance Program provides upkeep and janitorial services at 22 rest area facilities and 4 truck rest havens across the state, along with the maintenance and upkeep of the various truck weight stations located throughout the Commonwealth. All of these sites are maintained through contracts with private vendors.

The Traffic Operations Program is responsible for the installation and maintenance of traffic signals, flashing beacons, school flashers, roadway lighting, navigational lighting, and aviation obstruction lighting on state-maintained highways. This program includes the administration of the Highway Safety Improvement Program (HSIP). Traffic Operations is also responsible for the establishment and maintenance of coordinated traffic signal systems to support the efficient movement of traffic.

In addition to the ongoing highway maintenance and traffic operations programs, the KYTC also budgets annual funding to resurface roads on the state road system. These funds are in addition to the monies funneled through the Cabinet's Rural and Municipal-aid Programs for improvements to county roads, city streets, and the state rural-secondary road

system. Each of the rural and municipal-aid program components is accomplished through an ongoing dialogue with Kentucky's city and county governmental entities.

B-5. Transportation Alternatives Program (TAP)

Section 1122 of MAP-21 established TAP in 23 U.S.C. 213. The program was eliminated by the FAST Act in name only. The FAST Act replaced TAP with a set-aside of Surface Transportation Block Grant (STBG) funding. These set-aside funds include all projects and activities that were previously eligible under TAP, encompassing a variety of smaller-scale transportation projects such as pedestrian and bicycle facilities, conversion of abandoned rail corridors to trails, and community improvements such as historic preservation of transportation facilities, vegetation management, and environmental mitigation related to stormwater and habitat connectivity. The former Safe Routes to School Program (SRTS) activities are now eligible under this program, with the same 20% match requirement as other TAP awards.

Funding for a state's Recreational Trails Program is taken off the top of the state's TAP apportionment unless the Governor opts out. 50% of a state's TAP funds are sub-allocated to urbanized areas with populations over 200,000, urban areas with populations of 5,001 to 200,000, and areas with population of 5,000 or less. The remaining 50% may be used in any area of the state. The funding sub-allocated to areas with populations over 200,000 is awarded through a competitive application process within the MPO area and managed by the area's MPO. The MPO selects the projects that are then administered through the Office of Local Programs (OLP). The other funding categories are awarded through a statewide competitive selection process and also administered by OLP. All TAP projects require a 20% match. Application cycles are typically held each year but are dependent on the availability of funds. As new project selections are made, the new projects will be incorporated into the STIP thru the STIP Administrative Modification process.

Transportation Alternatives Program (TAP) Projects are listed in Appendix A, Exhibit A-7.

Transportation Enhancement (TE), National Scenic Byways and Highways (NSB), Transportation Community and System Preservation (TCSP), and Safe Routes to School (SRTS) Programs

Dedicated funding for the following programs was eliminated with the passage of MAP-21:

- Transportation Enhancements (TE)
- National Scenic Byways and Highways (NSB)
- Transportation Community and System Preservation (TCSP)
- Safe Routes to School (SRTS)

States with balances of TE and SRTS funds are still allowed to spend the remaining dollars apportioned to their state. Since NSB and TCSP projects were awarded at a federal level, any state with an open NSB or TCSP project may finish out the project. However, no new federal funding will be provided for these programs.

Transportation Enhancements (TE) (see Appendix A, Exhibit A-7)
Safe Routes to School (SRTS) (see Appendix A, Exhibit A-8)

B-6. Recreational Trails Program

The Recreational Trails Program provides funds to develop and maintain recreational trails for motorized and non-motorized recreational trail users. Funds are apportioned under 23 U.S. Code 206 (d). Funds may be used to provide and maintain trails, trailside, and trailhead facilities, including provisions to facilitate access for people with disabilities. Funds may also be used to acquire easements or land for trails.

The Governor of a state designates an agency to administer the program, which may be an agency other than the State Department of Transportation. The Kentucky Recreational Trails Program is administered by the Governor's Office, Department for Local Government (DLG).

Planned Recreational Trails Projects are included in Appendix A, Exhibit A-9.

B-7. Planned Public Transportation (Transit) Projects

The Federal Transit Law (49 U.S.C. Chapter 53), is the basis for the federally-assisted public transportation programs. Program funds included for the rural portion of the state (Section 5311), for the small urban and urbanized portions of the state (Section 5307), for seniors and persons with disabilities in the state (Section 5310), for technical assistance and transit planning (Section 5303 & Section 5304), training for rural transit operators (RTAP), for capital bus and bus facilities (Section 5339) and have included discretionary capital (Section 5309) grants that include Veterans and Livability grants. Projects that go beyond the Americans with Disabilities Act (ADA) and that provide transportation for the low income to work and training are included under the Section 5311, 5307 and 5310 programs. Local coordinated plans are required.

Section 5311 program funds are used for planning, capital, and operating assistance by local public bodies, nonprofit organizations, and operators of public transportation services. These funds are used to give people access to health care, shopping, employment, education opportunities, public services, recreation, etc. Public transportation systems in rural areas assume the responsibility of meeting these needs. Kentucky utilizes 15% of these funds for provision of intercity bus services.

Section 5307 program funds are used by transit operators in urbanized areas. The KYTC has approval authority for operating, planning and capital funding for operators in areas of 50,000 to 200,000 populations. These funds do not flow through the Cabinet for all areas, but the allocation is done by the Governor. Areas larger than 200,000 are allocated a specific grant amount by the FTA.

Section 5303 program funds are used for planning purposes by the MPOs and the KYTC. MPO funds are formula allocated by the KYTC and are identified for use in

urbanized area unified planning work programs. Statewide transit planning for the rural areas is also funded with Section 5304 funds.

Section 5309 has evolved into a formula capital program that provides capital for three primary activities: new fixed-guideways or extensions to fixed-guideways, bus rapid transit projects operating in mixed traffic, and projects that improve capacity on an existing fixed-guideway system. State of Good Repair Grants provide capital assistance for maintenance, replacement, and rehabilitation projects of existing high-intensity fixed guideway and high-intensity motorbus system to maintain a state of good repair.

Section 5310 program funds are used primarily for capital purposes. Vans and other equipment critical to providing transportation services for seniors and individuals with disabilities are purchased through this program. Up to 45% of these funds may also be used for public transportation projects that exceed the requirements of the ADA, that improved access to fixed-route services and decrease reliance on complementary paratransit, and/or utilize alternatives to public transportation that assist seniors and individuals with disabilities. This funding can be operating or capital.

The Section 5339 program is a formula capital program that replaces, rehabilitates, and purchases buses and related equipment and constructs bus-related facilities for rural or urbanized public transportation systems.

The Rural Transit Assistance Program (RTAP) is designed to provide training, technical assistance, research, and other related support services for rural transit operators.

Low or No Emission Vehicle Deployment Program (LoNo Program) is funding that is to deploy the cleanest and most energy efficient U.S.-made transit buses that have been largely proven in testing and demonstrations but are not yet widely deployed in transit fleets. It provides funding for transit agencies for capital acquisitions and leases of zero emission and low-emission transit buses, including acquisition, construction, and leasing of required supporting facilities such as recharging, refueling, and maintenance facilities.

In general, the KYTC receives applications from areas and agencies for the FTA program funds. These applications describe the needs for public transit funds (type of service needed, etc.), the funding required, and local matching sources. The KYTC allocates the money based on several factors including potential ridership, area to be served, availability of services, etc. Each agency is accountable to the Cabinet for the allocated funds. Required monthly report submissions, site visits and compliance reviews, vehicle inspections, drug and alcohol testing, timely invoicing, and audits are among the monitoring activities the Cabinet performs.

With regard to transit project identification, the KYTC advertises annually for competitive proposals for Sections 5310, 5311, 5303, 5304, 5307 (where KYTC is the designated recipient) and 5339, as well as relying heavily upon past experience to develop the transit element of the FY 2017-2020 STIP. Since the passage of MAP-21 and under the current authorization, Fixing America's Surface Transportation Act (FAST Act), the KYTC has been cognizant of the many opportunities for combining highway and transit funding

for individual projects and programs, and fully expects to take advantage of these opportunities in the future. Kentucky's MPOs are seriously studying transit options for addressing metropolitan traffic issues, and are engaged in the project prioritization efforts which truly represent a multimodal approach to overcoming urban congestion.

Planned transit improvements are listed in Appendix A, Exhibit A-10.

B-8. Human Service Transportation Delivery Process

Welfare reform legislation has greatly influenced changes in the Human Service Transportation Delivery (HSTD) process. This process/program utilized combined transportation resources of the Health and Family Services Cabinet and the Education Cabinet's Vocational Rehab and the Department of the Blind to provide a coordinated network of transportation providers to provide safe, efficient, and accessible transportation for Kentucky's health, human service, and workforce program clients.

Medicaid, Vocational Rehabilitation, and Department for the Blind funds will flow from the two human service Cabinets to the KYTC for operating funds for providers and administrative funds for the KYTC to manage the program.

The Commonwealth is divided into fifteen Human Service Transportation Delivery Regions. This division was based upon items such as operating authority, fleet sizes and capacities of existing providers, and historical transportation utilization.

Through the use of a financial consultant, the Cabinets developed a "capitated rate" payment system, essentially a flat rate (a fee paid per member, per month). This will reward providers for operating efficiency, discourages over utilization, and significantly reduces fraud and abuse. Some parts of the program will be paid on a fee-for-service basis.

There will be one broker per region who will be responsible for securing transportation from private and public transportation subcontractors in order to guarantee transportation to non-emergency medical services for eligible recipients. The Kentucky Finance Cabinet will secure and contract with the transportation brokers on behalf of all the programs. The KYTC will monitor all other service requirements of the brokers. A Coordinated Transportation Advisory Committee (CTAC) includes representatives of each of the different programs and will monitor the programs' interests in the network. The KYTC staff will monitor the brokers to make sure they operate as CTAC agrees. Details of each trip will be recorded by the broker and will be used to report program results to state and federal agencies.

In order to fully implement this program, two accomplishments were needed. One was getting legislation passed (HB 468 and HB 488) which requires brokers and subcontractors to meet safety standards, and the other was getting emergency regulations signed so this initiative could begin operation. This legislation has been passed and the emergency regulations are signed.

The KYTC's Office of Transportation Delivery receives funding from the Department of Medicaid to finance the transportation brokerage for Human Service

Transportation Delivery non-emergency medical transportation. The Department of the Blind and Vocational Rehab reimburse the transportation broker at the local level, and funding does not flow through the Transportation Cabinet. Each funding stream meets the respective program requirements. Public Transit, Vocational Rehab, Department of the Blind, and non-emergency medical trips are coordinated at the transportation broker level. Non-Emergency Medical Transportation ridership is over \$3.6 million annually.

B-9. Planned Aviation Improvements

The Airport Improvement Program (AIP) was established by the Airport and Airway Improvement Act of 1982 (Title V of the Tax Equity and Fiscal Responsibility Act of 1982, Public Law 97-248), and amended by the Airport and Airway Safety and Capacity Expansion Act of 1987, (Public Law 100-223), and the Wendell H. Ford Aviation Investment and Reform Act for the 21st Century of 2000 (AIR-21). Current legislation supports and provides funding for the following: (1) airport planning, (2) noise compatibility planning, and (3) noise compatibility programs as set forth in the Aviation Safety and Noise Abatement Act of 1979, (Public Law 96-193).

The funds for the AIP are distributed in accordance with provisions contained in the 2000 Act, as amended. In grant parlance, funds distributed by formula for use at a specific airport or in a specific state or insular area are referred to as apportionment funds. The remaining funds are for use at the discretion of the Secretary of the U.S. Department of Transportation, and are known as discretionary funds.

The estimated federal apportionment level for Kentucky is \$2.8 million for FY 2016 and \$3.5 million for FY 2017. The location and amount of spending using the federal apportionment money in Kentucky is unknown at this time. This decision is made at the FAA district level and these projects are typically not identified until late in the federal fiscal year. At present, there is no way to estimate the level of federal discretionary funding that may be made available during the upcoming biennium. Both federal apportionment and federal discretionary funding will be matched using a 90% federal, 5% state, 5% local ratio.

FY 2016 current projects are identified in Appendix A, Exhibit A-11.

B-10. Kentucky's "Mega Projects"

As the 2016 Highway Plan was developed, strong consideration was given to the funding needs associated with six (6) "Mega Projects" located in Kentucky. The six (6) "Mega Projects" in Kentucky are (1) the Louisville Bridges project, (2) the Interstate 71/75 Brent Spence Bridge congestion relief project in northern Kentucky, (3) the proposed Interstate 66 in southeastern Kentucky, (4) the proposed Interstate 69 in far western Kentucky, (5) proposed I-69 Spur; I-66/I-65 Spur; and I-67 Spur, and (6) the reconstruction of US 68/KY 80 Aurora, Kentucky to Cadiz, Kentucky. Each of these projects would be an expensive, but welcome, addition to Kentucky's highway system.

In addition, the FAST Act, Title 23, requires an annual financial plan for projects having a cost between \$100 million to \$500 million. For all new projects or projects that are

currently underway, and the construction phase funding has not been authorized, the annual financial plan will be completed in accordance with Title 23 guidelines, outlining the project cost estimates, implementation plan, funding resources, cash flow, environmental, and legal status. The financial plan will not be required for a project in this category that is currently under construction.

Each of the six (6) “Mega Projects” is underway, with varying levels of progress achieved. The following information provides a description, an approximate total cost, and a brief report on the progress to-date for each project.

The Louisville Bridges

The Louisville Bridges project is located in the Louisville metropolitan area and involves a two-part approach to resolving traffic congestion problems in the region. The existing highway network features a myriad of interstate highway facilities (Interstates 64, 65, and 71) that all meet in a tangled maze of ramps known locally as “Spaghetti Junction” in downtown Louisville. Immediately associated with Spaghetti Junction is the Interstate 65 Kennedy Bridge, which links downtown Louisville with Jeffersonville, Indiana. Since there are no true outer beltways linking the Kentucky and Indiana portions of the Greater Louisville Area, virtually all north-south and east-west traffic is forced through Spaghetti Junction. This creates traffic delays of major proportions during peak morning and afternoon rush hours.

While Spaghetti Junction and the Kennedy Bridge certainly need to be modernized, transportation professionals understand that a major culprit in downtown Louisville’s traffic congestion is the absence of a “relief valve.” To truly accommodate future traffic in the Louisville area, it is essential to connect together the dangling ends of Interstate 265 east of Louisville. This can be accomplished by building a new bridge over the Ohio River in the vicinity of Prospect, Kentucky, and Utica, Indiana. This new “East End Bridge” would provide an alternative route to Spaghetti Junction and would work in concert with the “Downtown Bridge” to move traffic efficiently through the region.

In 2003, a Record of Decision (ROD) to meet the purpose and need of the project was signed, and the project cost was estimated to be \$2.49 billion. By 2009, the cost had risen to \$4.1 billion and there was a general acknowledgement that traditional federal-aid funding would not be sufficient to complete the project. In response, the 2009 General Assembly, in special session, provided for the creation of a bi-state authority whose purpose was to develop a reasonable funding concept for the Louisville Ohio River Bridges project. The bi-state authority was created under Kentucky Revised Statute (KRS) 175B.030 and on March 25, 2010, Kentucky Governor Steve Beshear signed into law Senate Joint Resolution 169, pursuant to which the Kentucky General Assembly ratified the formation of the bi-state authority. An Executive Order was issued by Indiana Governor Mitch Daniels for Indiana’s participation in the bi-state authority for the Louisville Ohio River Bridges project.

Once approved in 2010, the Louisville and Southern Indiana Bridges Authority immediately began to complete two financial plans. One was a financial plan that would meet the requirements for fiscal constraint and allow the approval of the Louisville MPO’s long range planning document. The other financial plan was the Metropolitan

Transportation Plan (MTP), which included the project with updated costs. Without the approval of the MTP, the project could no longer use traditional federal-aid funds. Concurrently, the Authority began working on the major projects financial plan, which required details about funding sources beyond traditional federal-aid funding. Both financial plans that were developed relied on funding sources including traditional federal-aid funding, GARVEE bond funding, and user-fees through tolling scenarios.

In early 2011, Kentucky Governor Steve Beshear, Indiana Governor Mitch Daniels, and Louisville Mayor Greg Fischer jointly suggested changes that lowered the estimated cost by \$1.5 billion – to \$2.6 billion (\$1.3 billion for the Downtown Crossing and \$1.3 billion for the East End Crossing) from \$4.1 billion – and cut construction time in half. Their suggestions, embodied as the Modified Selected Alternative, had two major elements: rebuilding the Kennedy Interchange in place, rather than moving it southward, and scaling down the East End Bridge from a six-lane to a four-lane facility that could, with restriping, be expanded to six traffic lanes when the need finally arose.

On March 5, 2012, Governors Beshear of Kentucky and Daniels of Indiana announced an historic agreement on a jointly developed and updated financial plan for this project, and they signed a Memorandum of Understanding that outlined each state's terms and responsibilities. Under the agreement, the two states would pursue separate and simultaneous procurements – Indiana for construction of the East End Crossing at an estimated cost of \$1.3 billion and Kentucky for construction of the Downtown Crossing at an estimated cost of \$1.3 billion, including the Kennedy Interchange – though it remained a single project. Under the financial plan, which was approved by both the Louisville and Southern Indiana Bridges Authority and the Kentucky Public Transportation Infrastructure Authority, the two states will use a combination of traditional transportation funding and toll revenues.

The Modified Selected Alternative received federal approval on June 20, 2012, when the revised ROD was signed. The financial plan was approved by FHWA on August 1, 2012, and the 2013 Annual Update to the Financial Plan was approved by FHWA on January 31, 2014. Both the East End Crossing, led by Indiana, and the Downtown Crossing, led by Kentucky, selected their teams to deliver their respective portions of the project. The KYTC selected a design-build team and awarded an \$860 million contract on December 28, 2012. Design work commenced in January 2013 and is complete. Construction began in July 2013 and is approximately 87% complete as of June 2016. The substantial completion date of the Downtown Crossing is December 9, 2016.

The 2016 General Assembly approved through 2017 the use of \$50 million per year of traditional federal-aid funding for the project. In July 2013, the Kentucky Asset Liability Commission issued \$236 million in GARVEE bonds. On December 12, 2013, the Kentucky Public Transportation Infrastructure Authority (KPTIA) closed on a \$452.2 million loan with the US Department of Transportation (US DOT) through the Transportation Infrastructure Finance and Innovation Act (TIFIA) program. On December 20, 2013, KPTIA sold approximately \$275.67 million in toll revenue bonds and \$452.2 million in bond anticipation notes (BANs) to complete Kentucky's LSIORB financing. The BANs will be retired on or before July 1, 2017, when the TIFIA loan proceeds will be

drawn. The Major Project Management Plan and other detailed project information can be found on the web site: www.kyinbridges.com.

The Interstate 71/75 Brent Spence Bridge

The Interstate 71/75 Brent Spence Bridge is the focal point for some of the heaviest traffic volumes in Kentucky as these two major north-south interstates cross the Ohio River between Covington, Kentucky, and Cincinnati, Ohio. This bridge not only serves traffic between two major urban centers, but it also connects the downtown areas with one of the world's busiest airports, the Greater Cincinnati/Northern Kentucky Airport, located in Boone County, Kentucky. In recent years, the existing double-deck bridge has been "restriped" to carry additional lanes of traffic and, although the bridge is still structurally strong as indicated by its sufficiency rating of 64.0 out of a possible 100 points, it is functionally outdated. However, in an effort to maintain and extend the useful life of the existing Brent Spence Bridge, the KYTC is working closely with the Ohio Department of Transportation (ODOT) to let to construction projects to make repairs and to paint the existing Brent Spence Bridge.

Recognizing the old bridge's inability to meet today's traffic demands, and knowing that the situation will only worsen in the years ahead; metropolitan transportation planners are working with the KYTC and the Ohio Department of Transportation (ODOT) to craft a reasonable solution. Design studies and evaluation of financial implementation are currently underway to determine the most feasible and efficient way to deliver this project to construction in order to address the safety concerns and traffic problems at this location. There are environmental issues, downtown redevelopment concerns, and physical alignment constraints that work together to make this a very challenging project. Accordingly, one of the most challenging considerations will be the project cost, which is estimated at \$2.8 billion. Kentucky's share of the project cost is estimated to be approximately \$1.8 billion.

Proposed Interstate 66

The Proposed Interstate 66 (TransAmerica) Corridor in southeastern Kentucky extends from Interstate 65 near Bowling Green along the Cumberland Parkway to west of Somerset, from which it departs and extends north and east around Somerset, then along KY 80 and south to Interstate 75 south of London. From Interstate 75, the Corridor extends eastward along the Hal Rogers Parkway to Hazard before heading east to US 23 south of Pikeville. From US 23 south of Pikeville, the Proposed Interstate 66 would extend across the rugged mountainous terrain of Pike County to the existing US 52 (Proposed Interstate 74 Corridor) near Matewan, West Virginia. Along this course, the Proposed Interstate 66 would pass through some of the most severely economically distressed counties in the Appalachia region.

At the present time, there are three independent segments of the Proposed Interstate 66 that have been involved in some degree of highway project development. The first of these segments is the Northern Bypass of Somerset, which will serve to provide a high-speed connection from the Cumberland Parkway to KY 80 east of Somerset. Preliminary engineering and environmental studies have been completed, with design and right-of-way

activity underway. Construction of the Northern Somerset Bypass is complete from the Cumberland Parkway east to US 27 north of Somerset. Construction from US 27 north to KY 80 east of Somerset is expected to cost \$127 million in 2014 dollars.

The second active Proposed Interstate 66 project in southeastern Kentucky is the connector between KY 80 east of Somerset and Interstate 75 south of London. Preliminary engineering, environmental work, and the financial plan are currently on hold for this section, pending resolution of funding issues. There are many environmental issues associated with this project, including involvement with the Daniel Boone National Forest, a wild and scenic stretch of the Rockcastle River, and numerous cliffline, cave, and cultural/historic concerns. There has been, and will continue to be, considerable public involvement and coordination with resource agencies to minimize the environmental effects of this project. The total estimated cost of the Somerset to London section of the Proposed Interstate 66 is over \$500 million.

The third section of the Proposed Interstate 66 that was being developed is the portion of the route between US 23 south of Pikeville and US 52 (Proposed Interstate 74) in West Virginia. An Environmental Impact Statement for this segment of Interstate 66 has been completed, and the preliminary right-of-way plans have been completed for a 6-mile section in Pike County. While environmental issues have proven to be minimal in the Pike County area, the rugged terrain makes this one of the most expensive sections of the Proposed Interstate 66 to build. It is expected that it will cost more than \$1 billion to complete this connection between US 23 and US 52. Due to funding concerns, this segment of I-66 is on hold at this time.

Proposed Interstate 69

The Proposed Interstate 69 corridor is being pursued in some manner by every state it traverses, from south Texas to the Michigan border with Canada. The impetus for Interstate 69 is Latin American trade and the overland transportation need to link Latin America with Canada and the northeastern United States. The states involved in this project are Texas, Louisiana, Arkansas, Mississippi, Tennessee, Kentucky, Indiana, and Michigan. An Environmental Impact Statement has been prepared for the entire route, with the “purpose and need” of the project focused squarely on freight movement.

In Kentucky, Interstate 69 follows the existing Purchase Parkway from the Tennessee State line to Interstate 24, then Interstate 24 to the Western Kentucky Parkway, then the Western Kentucky Parkway to the Pennyrile Parkway, then the Pennyrile Parkway north to Henderson. At Henderson, a new route (including a new Ohio River Bridge) will be required to connect to Interstate 64 in southern Indiana. Both Tennessee and Indiana are actively engaged in pursuing their own segments of Interstate 69, and each state has cooperated in studies to assess connections at the state lines.

As of June 2016, the KYTC has 95 miles under shield as I-69. This includes 17 miles of common route with I-24 from Calvert City to the interchange with the former Western Kentucky Parkway, 38 miles along the former Western Kentucky Parkway to the Pennyrile Parkway, and 40 miles of the former Pennyrile Parkway. Improvements are currently

underway to reconstruct the Purchase Parkway/I-24 interchange in Calvert City and the Purchase Parkway/US 45 interchange in Mayfield. Once completed the Purchase Parkway from mile point 25 to I-24 will be re-signed as I-69. This work is anticipated to be finished in 2018. The KYTC estimates that it will cost a total of \$252 million to complete the I-69 corridor through Kentucky. This includes the connection with Tennessee but not the connection to Indiana. The KYTC has invested \$164 million on the improvements completed or currently under construction.

At Henderson, the new route and its new Ohio River Bridge will likely cost an estimated \$1 billion or more to complete. The KYTC is working with INDOT to initiate preliminary engineering and environmental work for the new Ohio River crossing at Henderson. Continuing work on the Interstate 69 connection between Kentucky and Indiana will depend upon the financial support that can be garnered for the project through bi-state funding cooperation and our continuing partnership with FHWA.

Proposed Interstate I-69 Spur; I-66/I-65 Spur; and I-67 Spur

The KYTC has completed a strategic corridor planning study and high level overview of the proposed I-66/I-65 Spur, the I-67 Spur, and the I-69 Spur to evaluate the upgrades necessary for the Audubon Parkway between Henderson, Kentucky and Owensboro, Kentucky (I-69 Spur approximately 24 miles); the Natcher Parkway between Bowling Green, Kentucky and Owensboro, Kentucky (I-66/I-65 Spur approximately 70 miles); the US 60 Wendell Ford Expressway from Audubon Parkway to Natcher Parkway in Owensboro, Kentucky (part of I-69 Spur approximately 7 miles); and the US 60 Wendell Ford Expressway from the Natcher Parkway to KY 54 Interchange with the new US 60 Bypass to US 60 to US 60/US 231 intersection near Maceo, Kentucky and following US 231 to the William H. Natcher Parkway Bridge over the Ohio River to Indiana (I-67 Spur approximately 14 miles). For these Interstate Spurs to become fully functional in Kentucky, it is expected that the existing parkway system will have to be upgraded.

These corridors are expected to improve traffic flow between Owensboro, Henderson, Madisonville, Bowling Green, and Indiana, and enhance economic development in this portion of western Kentucky. Preliminary estimates to provide the required upgrades is estimated to cost approximately \$412 million (I-69 Spur-\$87 million; I-66/I-65 Spur-\$148 million; and I-67 Spur \$177 million) or more to accomplish. Continuing work on Interstate 69 Spur, Interstate 66/65 Spur, and Interstate 67 Spur in Kentucky will depend upon the financial support that can be garnered for the project through federal reauthorization and appropriations processes. The 2016 Highway Plan identified funding to begin the conversion work necessary to upgrade the Natcher Parkway to interstate standards between Bowling Green and Owensboro.

Reconstruction of US 68/KY 80 Aurora, Kentucky to Cadiz, Kentucky

The KYTC proposes to continue and complete the widening and improvements to the existing two-lane US 68/KY 80, from KY 94 at Aurora in Marshall County for approximately 17 miles to the western terminus of the Cadiz Bypass in Trigg County. US Highway 68 (US 68), also designated as Kentucky State Route 80 (KY 80), is the only east-west arterial in the region of southwestern Kentucky, and serves local, recreational, and

through traffic. The project will pass easterly through Kenlake State Resort Park, cross Kentucky Lake (Tennessee River), traverse the Land Between the Lakes (LBL) National Recreation Area, over Lake Barkley (Cumberland River), and extend to the Cadiz Bypass. Portions of the roadway are proposed to be built on a new location while other portions will follow the existing roadway.

The western terminus of this project is the recently relocated and widened four-lane section of US 68 between Kenlake State Resort Park and the city of Mayfield. The eastern terminus of this project is the western terminus of the Cadiz Bypass. Outside of the two public recreation areas, the project corridor is comprised of a mixture of commercial, residential, and agricultural land. This project is consistent with the KYTC's plans to improve the alignment of US 68/KY 80 in western Kentucky.

The project from the Kentucky Lake Bridge extending easterly to the Cadiz Bypass is broken into the following four independent sections that do not rely on the other roadway portions for completion:

Section 1: Kentucky Lake Bridge

Section 2: Land Between the Lakes Design-Build Section

Section 3: Lake Barkley Bridge

Section 4: Reconstruction of US 68/KY 80 from Lake Barkley to Cadiz Bypass

With the Land Between the Lakes Design-Build section completed, the Initial Financial Plan focuses on the bridge replacements over Kentucky Lake and Lake Barkley, and the remaining reconstruction of US 68/KY 80 from Lake Barkley to the existing Cadiz Bypass.

The Kentucky Lake Bridge replacement project and the Lake Barkley Bridge replacement project has independent logical termini, and represent construction segments of proposed improvements to the overall corridor of US 68/KY 80 between Aurora and the Cadiz Bypass. On the eastern end, the project connects with the recently constructed Cadiz Bypass, a two-lane roadway that intersects with Interstate 24 east of Cadiz.

The US 68/KY 80 Corridor reconstruction is to correct numerous geometric deficiencies of the existing roadway and the two major bridges (Eggner's Ferry Bridge and Lawrence Memorial Bridge over Kentucky Lake and Lake Barkley, respectively). The correction of those deficiencies would provide a safer travel way for persons using US 68/KY 80. Also, this project is to enhance regional tourism and economic development by vastly upgrading this principal east-west highway which serves as the only highway into and through the Land Between the Lakes.

As per the October 2015 Financial Management Plan Update, the projected total costs in "Year of Expenditure" dollars of all project segments of the Selected Alternatives are estimated to cost \$512 million. The projected \$512 million total cost is less than the \$583 million as outlined in the FHWA's October 2011 "Cost Estimate Review Report" for the US 68/KY 80 Corridor from Aurora, Kentucky to Cadiz, Kentucky project. In October 2015, the expenditures to-date for all segments of the US 68/KY 80 Corridor from Aurora,

Kentucky to Cadiz, Kentucky project was approximately \$247 million, thus, leaving approximately \$265 million future remaining project expenditures.

The KYTC has awarded a project for the construction of the Kentucky Lake Bridge. The project was awarded February 10, 2014, for approximately \$132 million. Work on the project began April 16, 2014, and as of June 2015, the project is 92 percent complete. Also, the KYTC has awarded a project for the construction of the Lake Barkley Bridge. The project was awarded February 6, 2015 for approximately \$128 million. Work began on the project March 26, 2015 and as of June 2016 the project is 51% complete. In addition, KYTC let to construction the reconstruction of US 68/KY 80 from the Lake Barkley Bridge to the Cadiz Bypass at Cadiz, Kentucky. The project was awarded December 4, 2015 and work began February 8, 2016. The project is approximately 3% complete.

B-11. FAST Act Grants

ADVANCED TRANSPORTATION AND CONGESTION MANAGEMENT TECHNOLOGIES DEPLOYMENT (ATCMTD)

As outlined in the FAST Act funding fact sheets, “the Advanced Transportation and Congestion Management Technologies Deployment Program is to provide competitive grants for the development of model deployment sites for large scale installation and operation of advanced transportation technologies to improve safety, efficiency, system performance, and infrastructure return on investment.” For a complete detailed description and eligible activities please see the following link to the FHWA FAST Act website: <http://www.fhwa.dot.gov/fastact/factsheets/advtranscongmgtfs.cfm>

FOSTERING ADVANCEMENTS IN SHIPPING AND TRANSPORTATION FOR THE LONG-TERM ACHIEVEMENT OF NATIONAL EFFICIENCIES (FASTLANE) GRANTS

As outlined in the FAST Act funding fact sheets, “the Nationally Significant Freight and Highway Projects (NSFHP) program to provide financial assistance—competitive grants, known as FASTLANE grants, or credit assistance—to nationally and regionally significant freight and highway projects.” For a complete detailed description and eligible activities please see the following link to the FHWA FAST Act website: <http://www.fhwa.dot.gov/fastact/factsheets/fastlanegrantsfs.cfm>

SURFACE TRANSPORTATION SYSTEM FUNDING ALTERNATIVES PROGRAM (STSFA)

As outlined in the FAST Act funding fact sheets, “the Surface Transportation System Funding Alternatives Program is to provide grants to States or groups of States to demonstrate user-based alternative revenue mechanisms that utilize a user fee structure to maintain the long-term solvency of the Highway Trust Fund.” For a complete detailed description and eligible activities please see the following link to the FHWA FAST Act website: <http://www.fhwa.dot.gov/fastact/factsheets/surftransfundaltfs.cfm>

Matthew G. Bevin
Governor

Greg Thomas
Secretary

The Honorable Matt Bevin
Governor, State of Kentucky
Office of the Governor
700 Capitol Avenue, Suite 100
Frankfort, KY 40601

Dear Governor Bevin:

Subject: Delegation of Transportation Planning Approvals

As Governor of Kentucky, 23 C.F.R. §§ 450 and 460 require your approval for the following documents and activities related to transportation planning:

- Statewide Transportation Improvement Programs and Amendments
- Metropolitan Transportation Improvement Programs and Amendments
- Metropolitan Transportation Plans and Amendments
- Designation of Metropolitan Planning Organizations
- Annual Certification of Public Road Mileage

Approval of these documents and activities is normally a routine matter, but approvals are required on a regular basis, and delays in approval could potentially lead to delays in implementing transportation projects. To streamline the process and minimize the potential for project delays, I respectfully request that you consider delegating approval authority to the Secretary of Transportation for the documents and activities listed above. A copy of your January 25th letter designating this approval authority to the former acting secretary is attached for your reference.

Sincerely,

A handwritten signature in blue ink, appearing to read "Greg Thomas".

Greg Thomas
Secretary

Kentucky Transportation Cabinet

RE: Delegation of Transportation Planning Approvals

Dear Secretary Thomas:

I hereby delegate to you my approval authority for the following actions:

- Statewide Transportation Improvement Programs and Amendments
- Metropolitan Transportation Improvement Programs and Amendments
- Metropolitan Long-range Transportation Plans and Amendments
- Metropolitan Planning Organization Agency Designations
- Annual Certification of Public Road Mileage in Kentucky

I authorize you to act on my behalf to ensure that Kentucky's transportation planning efforts are accomplished as directed by federal transportation law.

Sincerely,

A handwritten signature in blue ink, appearing to read "Matthew G. Bevin".

KENTUCKY

Transportation Planning Process Certification

In accordance with 23 CFR 450.220 (a), the Kentucky Transportation Cabinet hereby certifies that, to the best of its knowledge and belief, the federally required transportation planning process is being carried out in accordance with all applicable requirements of:

- (1) 23 U.S.C. 134 and 135, 49 U.S.C. 5303 and 5304, and this part;
- (2) Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
- (3) 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
- (4) Section 1101(b) of the FAST Act (Pub. L. 114-357) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in DOT funded projects;
- (5) 23 CFR part 230, regarding implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
- (6) The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37, and 38;
- (7) In States containing nonattainment and maintenance areas, sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) and (d)) and 40 CFR part 93;
- (8) The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
- (9) 23 U.S.C. 324, regarding the prohibition of discrimination based on gender; and
- (10) Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

Frankfort, Kentucky 40601

Dear Mr. Nelson:

Subject: Certification Regarding Debarment, Suspension,
and Other Responsibility Matters – Primary Covered Transactions

The Kentucky Transportation Cabinet hereby certifies, to the best of its knowledge and belief, that it and its principals:

- (a) Are not presently debarred, suspended, proposed for debarment, declared ineligible or voluntarily excluded from covered transactions by any federal department or agency.
- (b) Have not, within a three-year period preceding this proposal, been convicted of or had a civil judgement rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (federal, state, or local) transaction or contract under a public transaction, violation of federal or state antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property.
- (c) Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (federal, state, or local) with commission of any of the offenses enumerated in paragraph (b) of this certification.
- (d) Have not within a three-year period preceding this application/proposal had one or more public transactions (federal, state, or local) terminated for cause or default.

Sincerely,

Greg Thomas
Secretary

Mr. John Moore, PE
Director of Planning
Kentucky Transportation Cabinet
200 Mero Street, 5th Floor
Frankfort, Kentucky 40622

Dear Mr. Moore:

The Kentucky Division of the Federal Highway Administration, in consultation with Region 4 of the Federal Transit Administration, has reviewed the following document and found the proposed activities eligible for federal planning funds under 23 U.S.C. 134, 135, 505 or 49 U.S.C. 5303-5305, 5313(b) and the provisions of 49 CFR §18, 23 CFR § 420 and 23 CFR§ 450.

**Planning Work Program
SP 0017 (001)
(2017 SPR Work Program - Subpart A)**

The work program should be administered in accordance with the provisions of 49 CFR§ 18 and 23 CFR § 420. **The effective time period for funding is from June 16, 2016 – June 15, 2017.** Authorization of this work is subject to the availability of funds.

Prior approval is required for the following changes to the SPR Work Program:

- Budgetary changes,
- Increase in federal funds,
- Cumulative transfer among already approved work program line items of 10% of the total federal funds or \$100,000,
- Programmatic changes,
- Change in the scope or objectives of activities (e.g., adding or deleting items),
- Extending the period of performance past the approved work program period,
- Transferring substantive programmatic work to a third party (e.g., consultant work not identified in the original work program), and/or
- Capital expenditures including purchase of equipment.

There are two additional program monitoring and reporting requirements associated with the SPR Work Program, an

- independent audit and an
- annual performance and expenditure report.

The Single Audit Act of 1984, subsequent amendments, and corresponding regulations, required an annual audit require that an independent audit be completed of any non-federal entity expending \$500,000 or more in Federal funds from all sources in a fiscal year. (2 CFR § 200, OMB Circular A-133 Part 4).

The annual performance and expenditure report is required to be submitted within 90 days after the end of the report period. The report may be more frequent if deemed necessary by FHWA. [23 CFR 420.117 (b) and (c)].

We appreciate the work that went into the development of this work program and thank you for working with our office to make improvements.

Sincerely yours,

Bernadette Dupont
Transportation Specialist

Mr. John W. Moore, P. E.
Director of Planning
Kentucky Transportation Cabinet
200 Mero Street, 5th Floor
Frankfort, KY 40622

Dear Mr. Moore:

The Kentucky Division of the Federal Highway Administration, in consultation with Region 4 of the Federal Transit Administration, has reviewed the following Unified Planning Work Programs (UPWPs) and found the proposed activities eligible for federal planning funds.

2017 Bowling Green-Warren County MPO UPWP	(Policy Committee Approval 4/11/16)
2017 Cincinnati Area MPO	(Board of Directors Approval 4/14/16)
2017-2018 Evansville MPO	(Policy Committee Endorsement 4/07/16)
2017 KYOVA MPO UPWP	(Policy Board Endorsement 2/26/16)
2017 Lexington Area MPO UPWP	(Policy Committee Adopted 4/27/16)
2017 Louisville/Jefferson County MPO UPWP	(Policy Committee Approval 4/28/16)
2017 Owensboro-Daviess County MPO UPWP	(Policy Committee Approval 4/26/16)
2017 Radcliff/Elizabethtown MPO UPWP	(Policy Committee Approval 4/14/16)

We appreciate the effort that went into the development of these work programs and thank you for working with our office to make improvements.

A separate eligibility letter will be written for the following UPWP when received.

2016-2017 Clarksville Area MPO UPWP
(Policy Board Approval 07/16/15, anticipated amendment date 07/21/16)

Sincerely,

Bernadette Dupont

METROPOLITAN TRANSPORTATION PLANNING PROCESS CERTIFICATION

In accordance with 23 CFR 450.334, the Kentucky Transportation Cabinet and Bowling Green-Warren County Metropolitan Planning Organization (MPO) for the Bowling Green and Warren County Urbanized Area hereby certify that the transportation planning process is addressing the major issues in the metropolitan planning area. Further, the Kentucky Transportation Cabinet and the Bowling Green-Warren County MPO certify that the transportation planning process is being conducted in accordance with all applicable requirements of Titles 23 and 49 USC, specifically:

1. 23 U.S.C. 134, 49 U.S.C. 5303, and this subpart;
2. Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
3. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
4. Section 1101(b) of the SAFETEA- LU (Pub. L. 109-59) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;
5. 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
6. The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 *et seq.*) and 49 CFR parts 27, 37, and 38;
7. The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
8. Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender;
9. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

RESOLUTION

**OF THE BOARD OF DIRECTORS OF THE
OHIO-KENTUCKY-INDIANA REGIONAL COUNCIL OF GOVERNMENTS**

**CONCERNING CERTIFICATION OF THE
URBAN TRANSPORTATION PLANNING PROCESS**

WHEREAS, the Ohio-Kentucky-Indiana Regional Council of Governments (OKI) is designated as the Metropolitan Planning Organization (MPO) by the Governors of Ohio, Kentucky and Indiana, acting through the Ohio Department of Transportation (ODOT), the Kentucky Transportation Cabinet (KYTC) and Indiana Department of Transportation (INDOT) in cooperation with locally elected officials in the Cincinnati, Middletown urbanized areas as evidenced in the Agreement, number 3206, between ODOT and OKI dated July 1, 1979 and the Agreement between KYTC and OKI dated July 1, 1983 encompassing the Counties of Butler, Clermont, Hamilton and Warren in the State of Ohio, and Boone, Campbell and Kenton in the Commonwealth of Kentucky and Dearborn County, Indiana; and

WHEREAS, the federal regulations pertaining to Urban Transportation Planning, published as 23 CFR 450.334, require the MPO, ODOT, KYTC and INDOT to certify that the transportation planning process cooperatively conducted is in conformance with the regulations; and

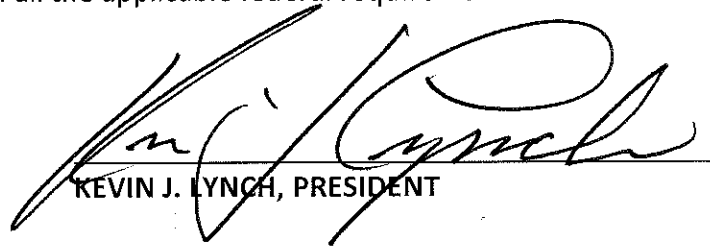

WHEREAS, the federal regulations also require that the metropolitan transportation planning process be carried out in accordance with all applicable requirements including:

1. 23 U.S.C. 134 and 135, 49 USC 5303-5304, and 23 CFR Part 450;
2. Section 174 and 176 (c) and (d) of the Clean Air Act (if applicable), and 40 CFR Part 93;
3. Title VI of the Civil Rights Act of 1964 and the Title VI assurance, and 49 CFR Part 21;
4. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex or age in employment or business opportunity;
5. Section 1101(b) of FAST Act (P.L. 114-357) and 49 CFR Part 26 regarding involvement of disadvantaged business enterprises in US DOT funded planning projects;
6. 23 CFR Part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
7. Americans with Disabilities Act and US DOT regulations governing transportation for people with disabilities (42 U.S.C. 12101 et seq.) and 49 CFR Parts 27, 37, and 38;
8. Older Americans Act, as amended, prohibiting the discrimination on the basis of age in program and activities receiving Federal financial assistance;
9. Section 324 of title 23 USC regarding the prohibition of discrimination based on gender;
10. Section 504 of the Rehabilitation Act of 1973 and 49 CFR Part 27 regarding discrimination against individuals with disabilities; and

11. All other applicable provisions of Federal law (e.g., while no longer specifically noted in a self-certification, prohibition of use of federal funds for "lobbying" still applies and should be covered in all grant agreement documents - see 23 CFR 630.112).

WHEREAS, the United States Department of Transportation conducted an on-site certification review at the Ohio-Kentucky-Indiana Regional Council of Governments offices in December 2012, and issued a subsequent finding, including five commendations, that the Ohio-Kentucky-Indiana Regional Council of Governments was fully certified as meeting all pertinent requirements: Now, therefore,

BE IT RESOLVED that the Board of Directors of the Ohio-Kentucky-Indiana Regional Council of Governments, at its regular public meeting of April 14, 2016 certifies, in consideration of the requirements listed herein and to the degree appropriate for the size of the area and the complexity of its transportation problems, that the urban transportation planning process is being carried out in conformance with all the applicable federal requirements.

KEVIN J. LYNCH, PRESIDENT

Metropolitan Planning and Federal Certifications

In accordance with 23CFR 450.334, Clarksville Metropolitan Planning Organization and the Kentucky Transportation Cabinet hereby certify that the transportation planning process is addressing the major issues in the metropolitan planning area and is being conducted in accordance with all applicable requirements of:

(a) The State and MPO shall certify at least every four years that the metropolitan transportation planning process is being carried out in accordance with all applicable requirements including:

X (1) 23 U.S.C. 134, 49 U.S.C. 5303, and this subpart;

X (2) In non-attainment and maintenance areas, sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) and (d)) and 40 CFR part 93;

X (3) Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;

X (4) 49 U.S.C. 5332, prohibiting discrimination, on the basis of race, color, creed, national origin, sex or age in employment or business opportunity;

X (5) Section 1101 (b) of the SAFETEA-LU (Pub. L 109-59) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;

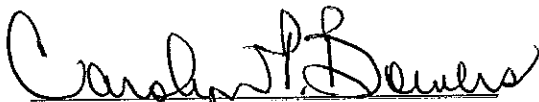

X (6) 23CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;

X (7) The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et. seq.) and 49 CFR parts 27, 37 and 38;

X (8) The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;

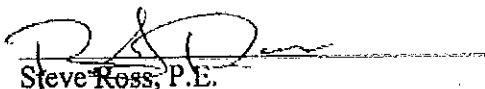

X (9) Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and

X (10) Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

MPO PLANNING PROCESS CERTIFICATION

METROPOLITAN TRANSPORTATION PLANNING PROCESS CERTIFICATION

In accordance with 23 CFR 450.334, the Kentucky Transportation Cabinet and the Evansville Metropolitan Planning Organization for the Evansville urbanized area hereby certify that the transportation planning process is addressing the major issues in the metropolitan planning area and is being conducted in accordance with all applicable requirements of Titles 23 and 49 USC, specifically:

- II. 23 U.S.C. 134, 49 U.S.C. Section 5303, and 23 CFR part 450.300;
- III. In nonattainment and maintenance area, section 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) and (d) and 40 CFR part 93;
- IV. Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
- V. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or in business opportunities;
- VI. Section 1101 (b) of the MAP-21 (Pub.L. 112-41) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;
- VII. 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
- VIII. The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 Et. seq.) and 49 CFR parts 27, 37, and 38;
- IX. The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
- X. Section 324 of title 23 U.S.C. regarding prohibition or discrimination based on gender; and
- XI. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

In February 2013, the United States Department of Transportation conducted an on-site certification review of the Evansville MPO urban transportation planning process. The USDOT issued a subsequent finding that the Evansville MPO was fully certified as meeting all pertinent requirements.

**RESOLUTION OF THE POLICY COMMITTEE OF THE
LEXINGTON AREA METROPOLITAN PLANNING ORGANIZATION
CERTIFICATION OF THE URBAN TRANSPORTATION PLANNING
PROCESS**

WHEREAS, the Lexington Area Metropolitan Planning Organization (MPO) is the officially designated agency for transportation planning in the Lexington Urbanized area; and

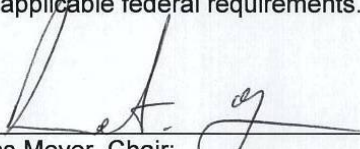

WHEREAS, the federal regulations pertaining to Urban Transportation Planning, published as 23 CFR 450.334, require the MPO and the Kentucky Transportation Cabinet to certify that the transportation planning process be carried on cooperatively in conformance with the regulations; and

WHEREAS, the federal regulations also require that the metropolitan transportation planning process be carried out in accordance with all applicable requirements including:

- (1) 23 U.S.C. 134, 49 U.S.C 5303;
- (2) Sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) and (d)) and 40 CFR part 93;
- (3) Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
- (4) 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
- (5) Section 1101(b) of the MAP-21 (Pub. L. 112-141) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;
- (6) 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
- (7) The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37, and 38;
- (8) The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
- (9) Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
- (10) Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

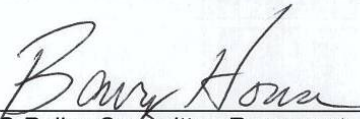

WHEREAS, the U.S Department of Transportation conducted an on-site certification review at the Lexington Area MPO offices in June, 2011, and issued a subsequent finding that the Lexington Area MPO was fully certified as meeting all pertinent requirements; and

THEREFORE BE IT RESOLVED, that the Lexington Area MPO Policy Committee at its regular public meeting of April 24, 2013, certifies, in consideration of the requirements listed herein and to the degree appropriate for the size of the area and the complexity of its transportation problems, that the urban transportation planning process is being carried out in conformance with all the applicable federal requirements.

**KENTUCKY TRANSPORTATION CABINET
THE PUBLIC INVOLVEMENT PROCESS
FOR STATEWIDE TRANSPORTATION PLANNING AND PROJECT DELIVERY:
Interested Parties, Public Involvement, and Consultation Process**

1. INTRODUCTION

The Kentucky Transportation Cabinet (KYTC) has established procedures for the development of the Long Range Statewide Transportation Plan (LRSTP) and the Statewide Transportation Improvement Program (STIP) as mandated by the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA), the Transportation Equity Act for the 21st Century (TEA-21), the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), and the Moving Ahead for Progress in the 21st Century Act (MAP-21), the Congressional Acts that authorized ongoing federal-aid transportation programs. In developing these procedures, the KYTC complied with 23 CFR 450.210 for “Interested Parties, Public Involvement, and Consultation” processes by providing opportunities for public review and comment at key decision points.

Within this document, the KYTC has established the following procedures to cover the LRSTP, the STIP, the Consultation Process, and the development and delivery of transportation improvements. The work that the KYTC conducts in pursuing its mission through project development and delivery moves in a continuous life cycle rather than a linear path. This process links the four main areas of transportation system development and maintenance as shown in **Figure 1.0-1** -- planning, design, construction, and operations -- to deliver a safe, efficient, environmentally sound and fiscally responsible transportation system that facilitates safe and efficient movement of people and goods.

A knowledge-driven process based upon valid, broad-based input is essential to the effective decision-making required to address the maintenance and improvement of Kentucky’s transportation system. This input comes from political, public and technical sources as graphically displayed in **Figure 1.0-2**.

Analysis of the existing system’s form and function as well as the impacts of anticipated improvements is the primary source of technical input. Political input includes guidance, as well as financial support, from state and national political leadership. Public input is generated from all users of the system, including those citizens in communities which are directly affected by proposed improvements.

Figure 1.0-1 - KYTC Transportation Project Life Cycle

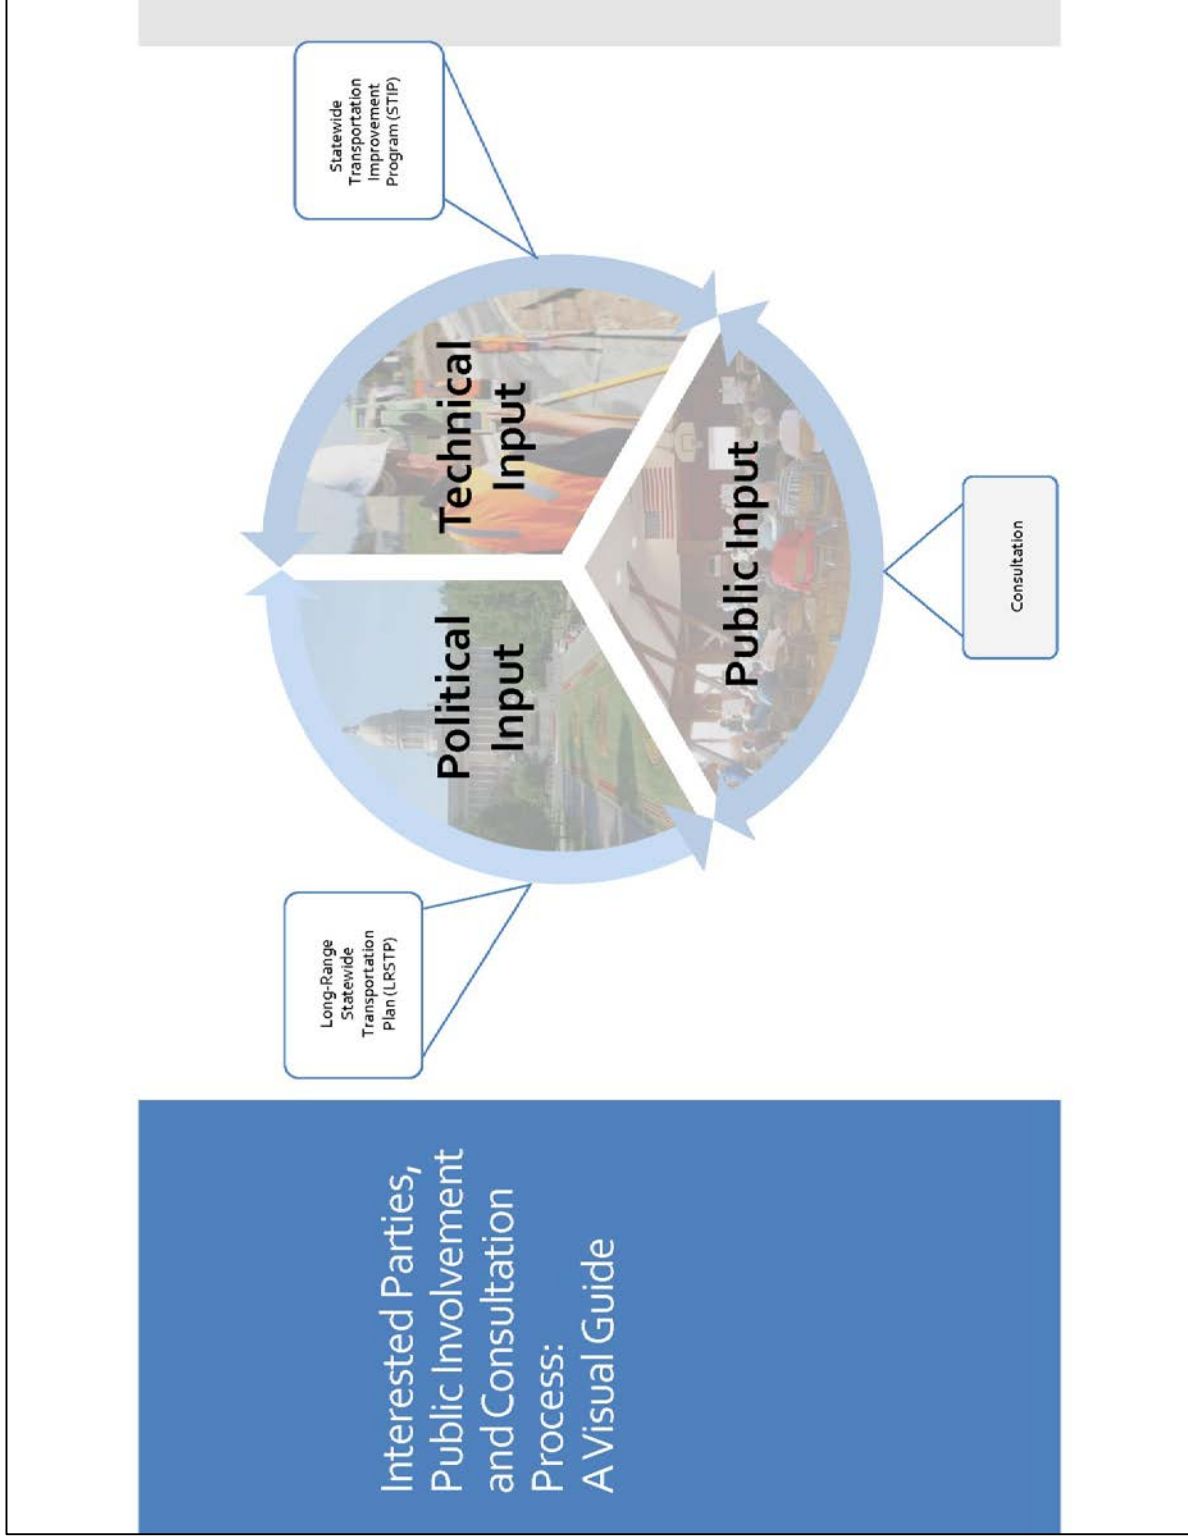

Figure 1.0-2 – Public Involvement with STIP, LRSTP and Consultation Process

The Public Involvement Process goal is to provide Kentuckians the opportunity to aide in the identification of transportation needs and priorities, the planning for how to meet those needs and priorities, and the development and delivery of transportation projects to turn those plans into realized improvements to the transportation system. In order to achieve this goal, the following public involvement objectives should be followed:

- “Identify” the affected population, particularly in the traditionally underserved communities, with consideration for their strengths and challenges.
- “Invite” these citizens to participate in the planning process.
- “Inform” the public of the planning and the project development processes for transportation needs.
- “Involve” the affected community during the planning and project development and delivery process so that concerns and needs can be expressed.
- “Improve” the participation process by measuring the success of public participation and incorporate those “lessons learned” into future efforts.

The connection of these objectives also known as the “Five I’s of Public Involvement” is shown visually in **Figure 1.0-3**.

These procedures include the identification of interested parties, the use of Area Development District(s) (ADD), Metropolitan Planning Organization(s) (MPO), KYTC Central Office and KYTC Highway District Office(s) (HDO), where applicable, to assist in engaging the public, through the consultation process for the identification and prioritization of transportation needs. Located within this document in **Appendix A** is a visual interpretation of the diversity of the state’s population (demographics) as it relates to public involvement activities.

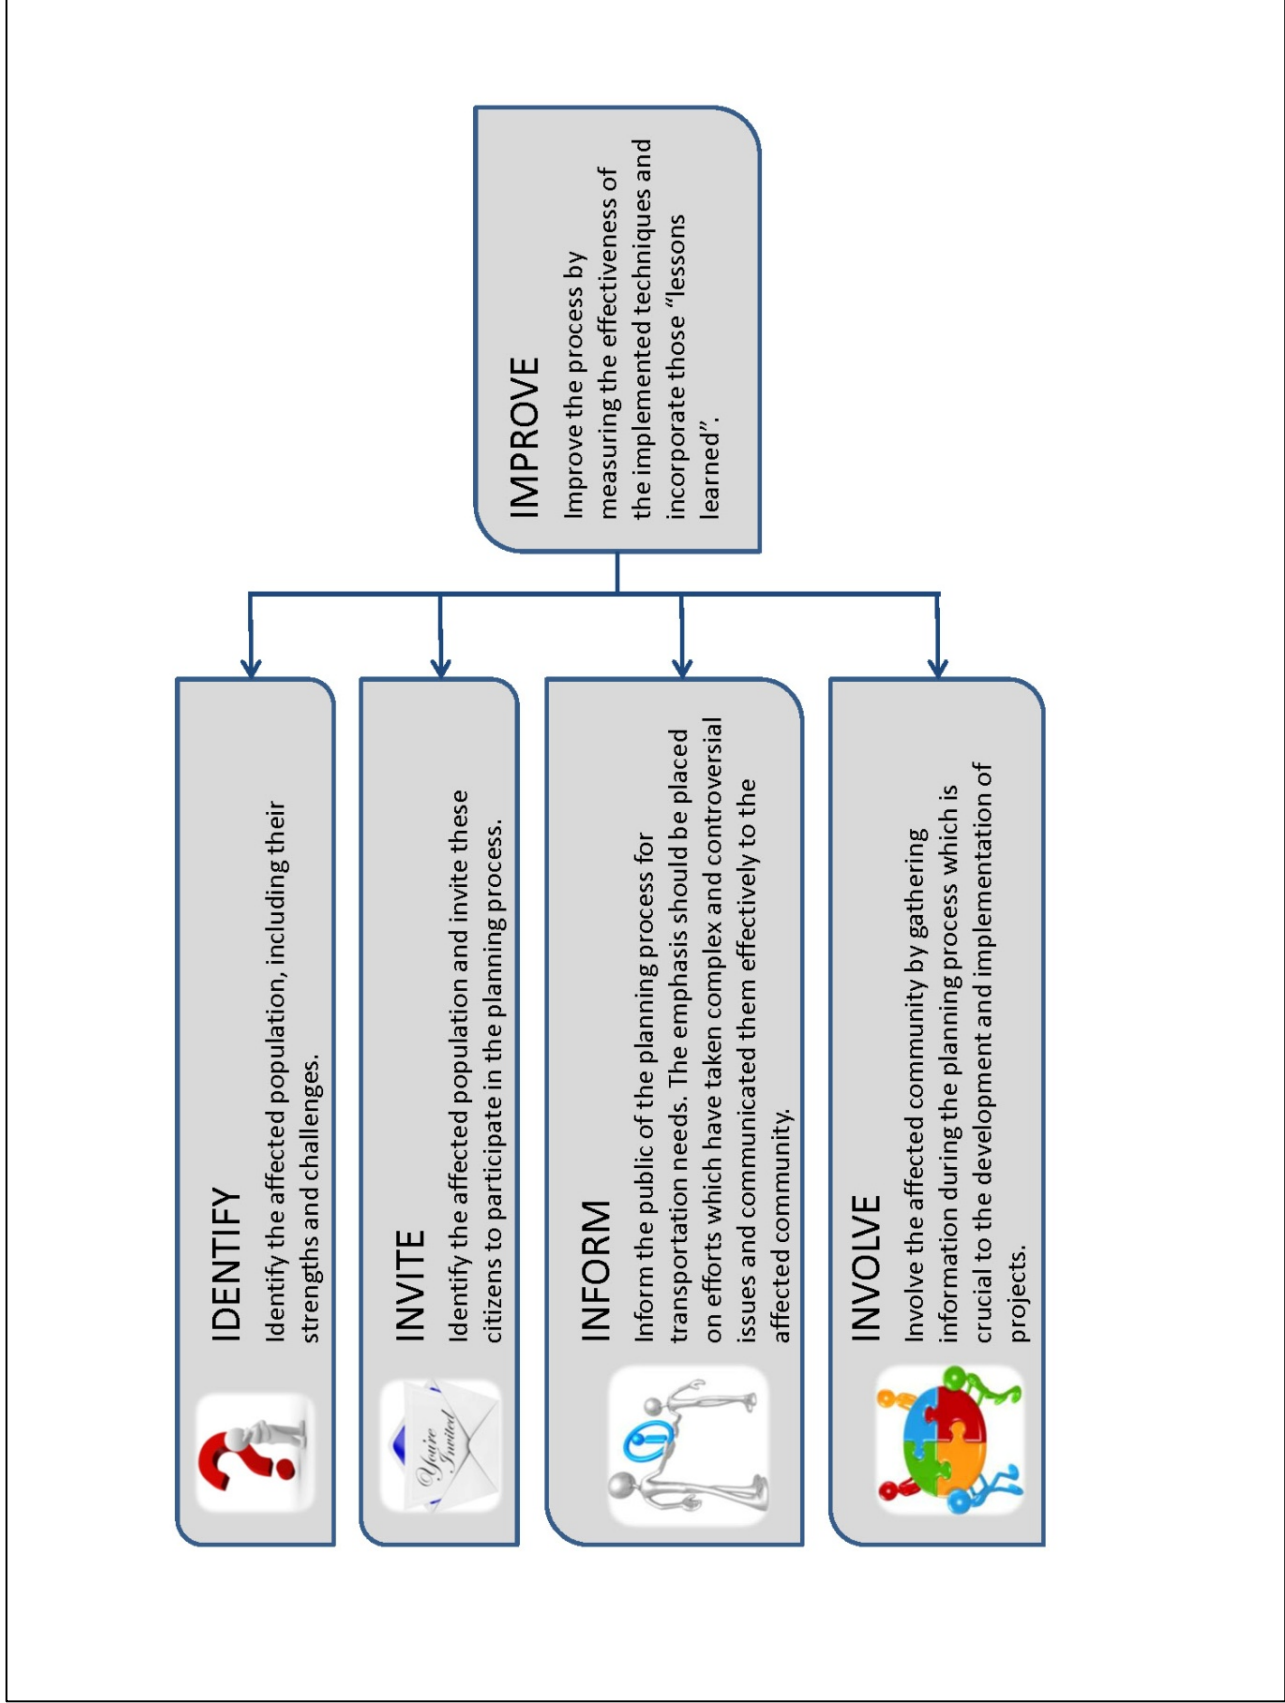

Figure 1.0-3 – Public Involvement Objectives

2. INTERESTED PARTIES

The KYTC LRSTP and the KYTC STIP are developed with the mission to provide a safe, secure, and reliable transportation system that ensures the efficient mobility of people and goods, thereby enhancing both the quality of life and the economic vitality of the Commonwealth of Kentucky.

The entire process is developed with a spirit of cooperation by working with the Federal Highway Administration (FHWA), the Federal Transit Administration (FTA), Metropolitan Planning Organizations (MPOs), Area Development Districts (ADDs), local city and county governmental agencies, and other interested parties located throughout the Commonwealth of Kentucky.

The entire planning process and the identification of transportation needs throughout the Commonwealth, utilizes input from the KYTC Central Office Divisions, the 12 KYTC HDOs, city mayors, county judges, MPOs, ADDs, state legislators, and through written comments and requests from a variety of sources such as:

- Citizens,
- Affected public agencies,
- Representatives of public transportation employees,
- Freight shippers,
- Providers of private transportation services,
- Representatives of the disabled,
- Representatives of users of pedestrian walkways and bicycle transportation facilities,
- Representatives of users of public transportation,
- Providers of freight transportation services,
- Other interested parties.

A visual interpretation of possible public involvement sources of input into planning and project delivery are shown in **Figure 2.0-1**.

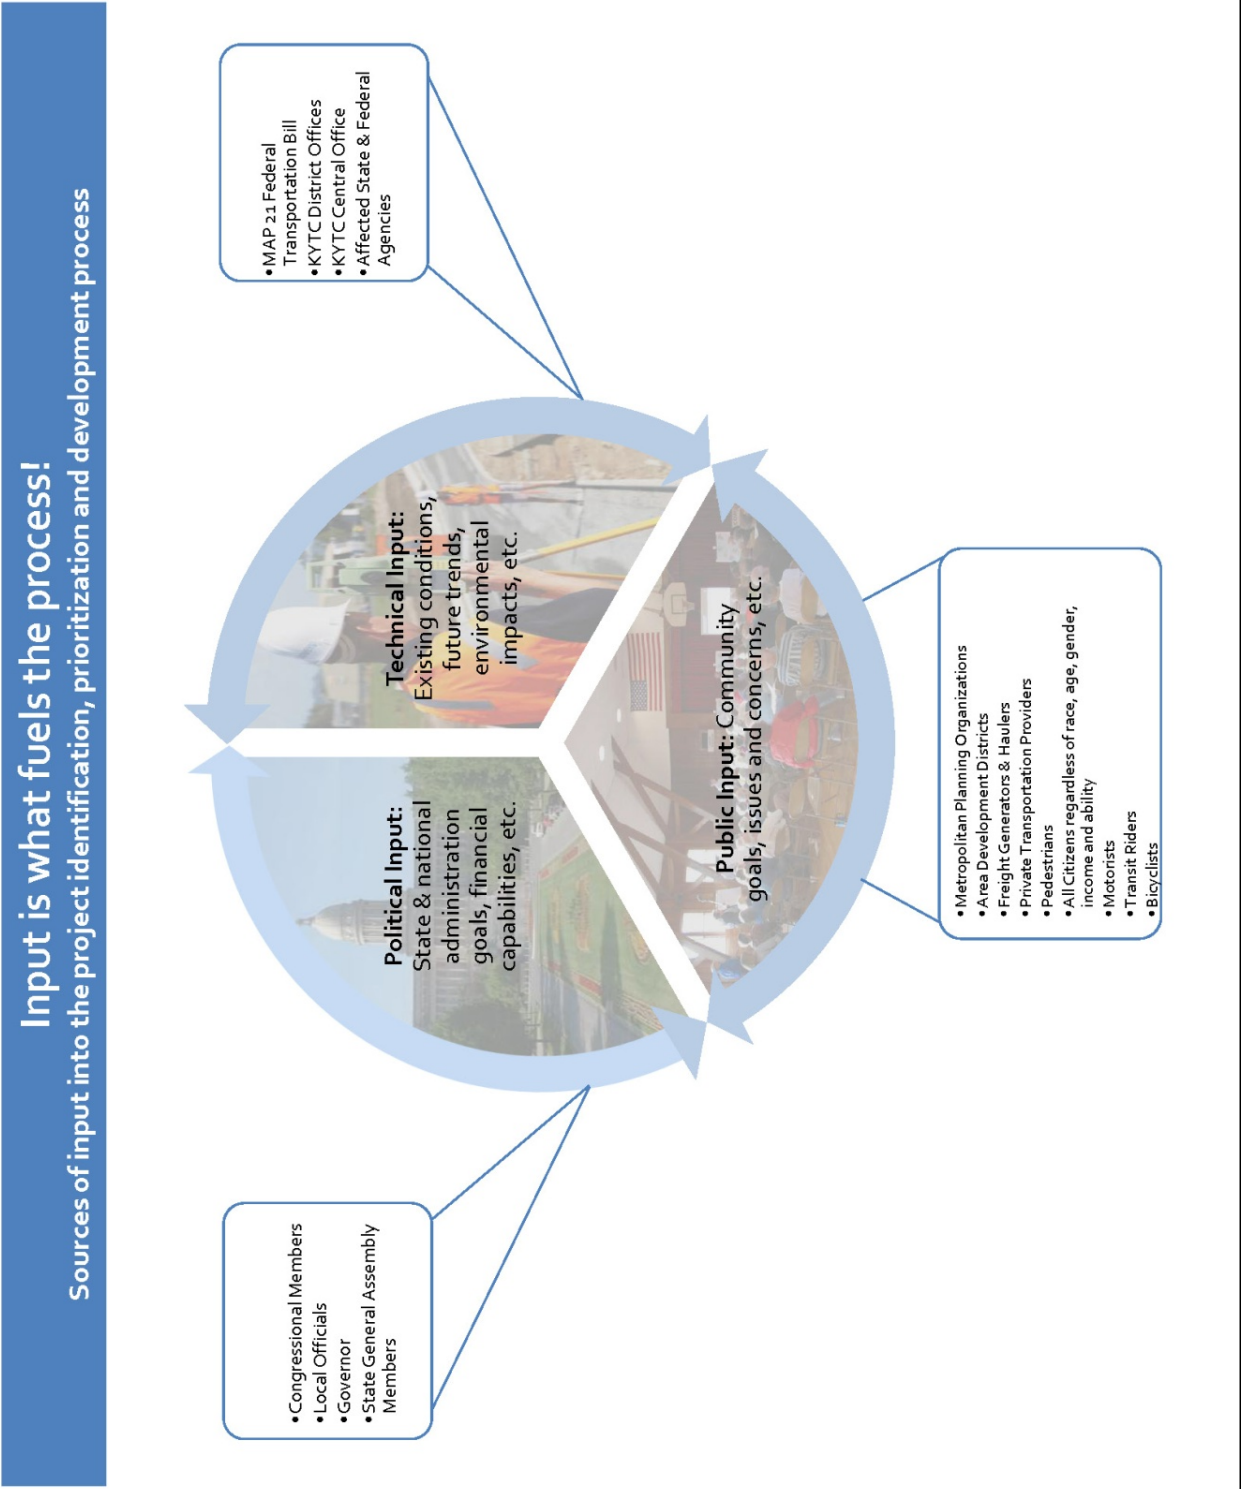

Figure 2.0-1 – Public Involvement Sources

3. PUBLIC INVOLVEMENT PROCESS

The KYTC is working in concert with the ADDs and MPOs to ensure that public involvement processes are utilized that provide opportunities for public review and comments throughout the LRSTP and STIP document development, the consultation process as well as the project identification, prioritization, development, and delivery process.

3.1 AREA DEVELOPMENT DISTRICT PUBLIC INVOLVEMENT PROCESS

Kentucky has fifteen ADDs, and they are represented graphically in **Figure 3.1-1**.

Supplemental to the Cabinet’s public involvement efforts are the public involvement procedures utilized by the ADDs. Each ADD documents their process and those documents may be available on the individual ADD Office website as well as being made available upon request.

In addition, a “transportation committee” for the area has been established. The membership of this committee includes a diverse group of interests that impact or are impacted by the transportation system. These committees are charged with setting goals and objectives for the regional transportation system; evaluating the transportation systems; identifying needs; and evaluating, prioritizing, and ranking transportation needs every two years as input to Kentucky’s transportation project selection process. Efforts are made in establishing these committees to identify and involve the underserved populations, such as low-income and minority households, to ensure that their needs are considered.

ADD Transportation Committee meetings are held several times each year to continually evaluate the regional transportation system and to educate committee members about the statewide transportation planning process and current transportation issues and projects.

The ADDs may attend public meetings and various civic meetings to discuss the statewide transportation planning process and to solicit direct input from interested individuals or groups at key decision points as required. Minutes of committee meetings and public meetings are maintained. These minutes are available upon request and are posted on the websites of the ADD and MPO offices. The process is periodically reviewed to determine its effectiveness. Revisions are made as deemed appropriate.

Each ADD incorporates members with a specific interest in highway safety on their transportation committees to ensure that safety-conscious planning is continually incorporated into the transportation planning process.

Area Development Districts

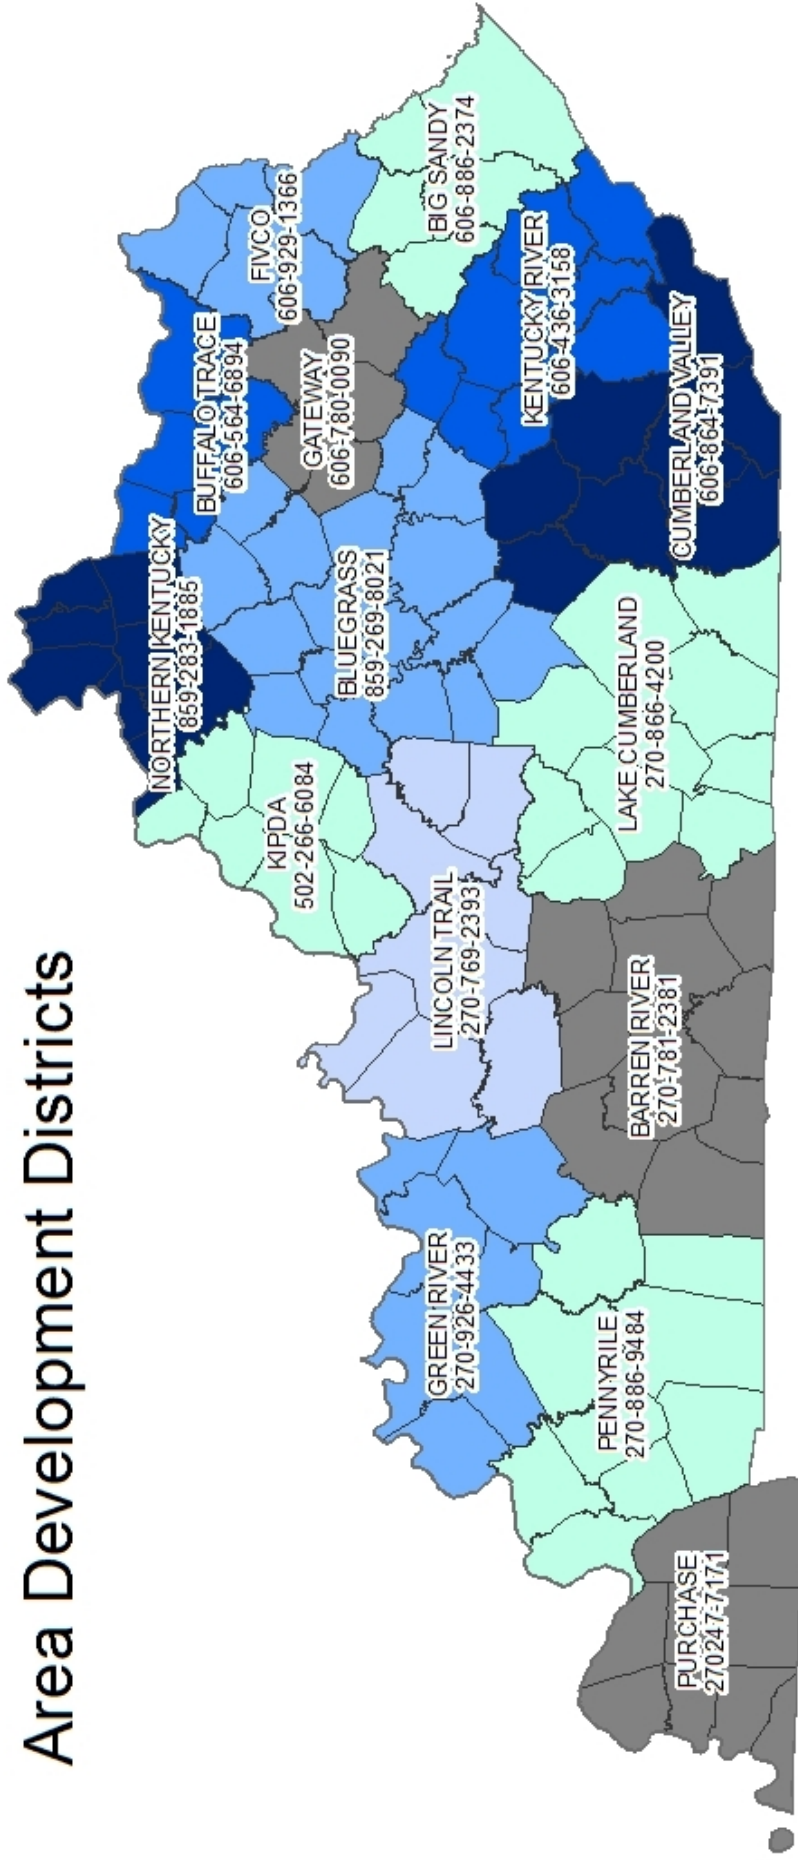

Figure 3.1-1 – Kentucky Area Development District Offices and Boundary Map

3.2 METROPOLITAN PLANNING ORGANIZATION PUBLIC INVOLVEMENT PROCESS

Kentucky consists of nine MPOs, and they are represented graphically in **Figure 3.2-1**.

Supplemental to the Cabinet's public involvement efforts are the public involvement procedures utilized by the MPOs in the development of their respective Metropolitan Transportation Plans (MTPs) and their Transportation Improvement Programs (TIPs). All activity pursuant to development of the MPOs TIPs is considered part of the STIP and complies with 23 CFR 450.324 "Development and Content of the Transportation Improvement Program (TIP)." In addition, each MPO is required to develop a Public Participation Plan that defines reasonable opportunities for interested parties to be involved in the MPO transportation planning process. MPO documents are available electronically on the respective MPO's web pages, as well as being available upon request.

MPO meetings are held several times each year to continually evaluate the metropolitan transportation system and to educate committee members about the metropolitan transportation planning process and current transportation projects and issues. The MPO members may attend various civic meetings to discuss the metropolitan planning process and to solicit direct input from interested individuals and groups. Minutes of committee meetings are maintained, are available upon request, and may be posted on the MPO web pages. The process is periodically reviewed to determine its effectiveness. Revisions are made as deemed appropriate.

Metropolitan Planning Organizations

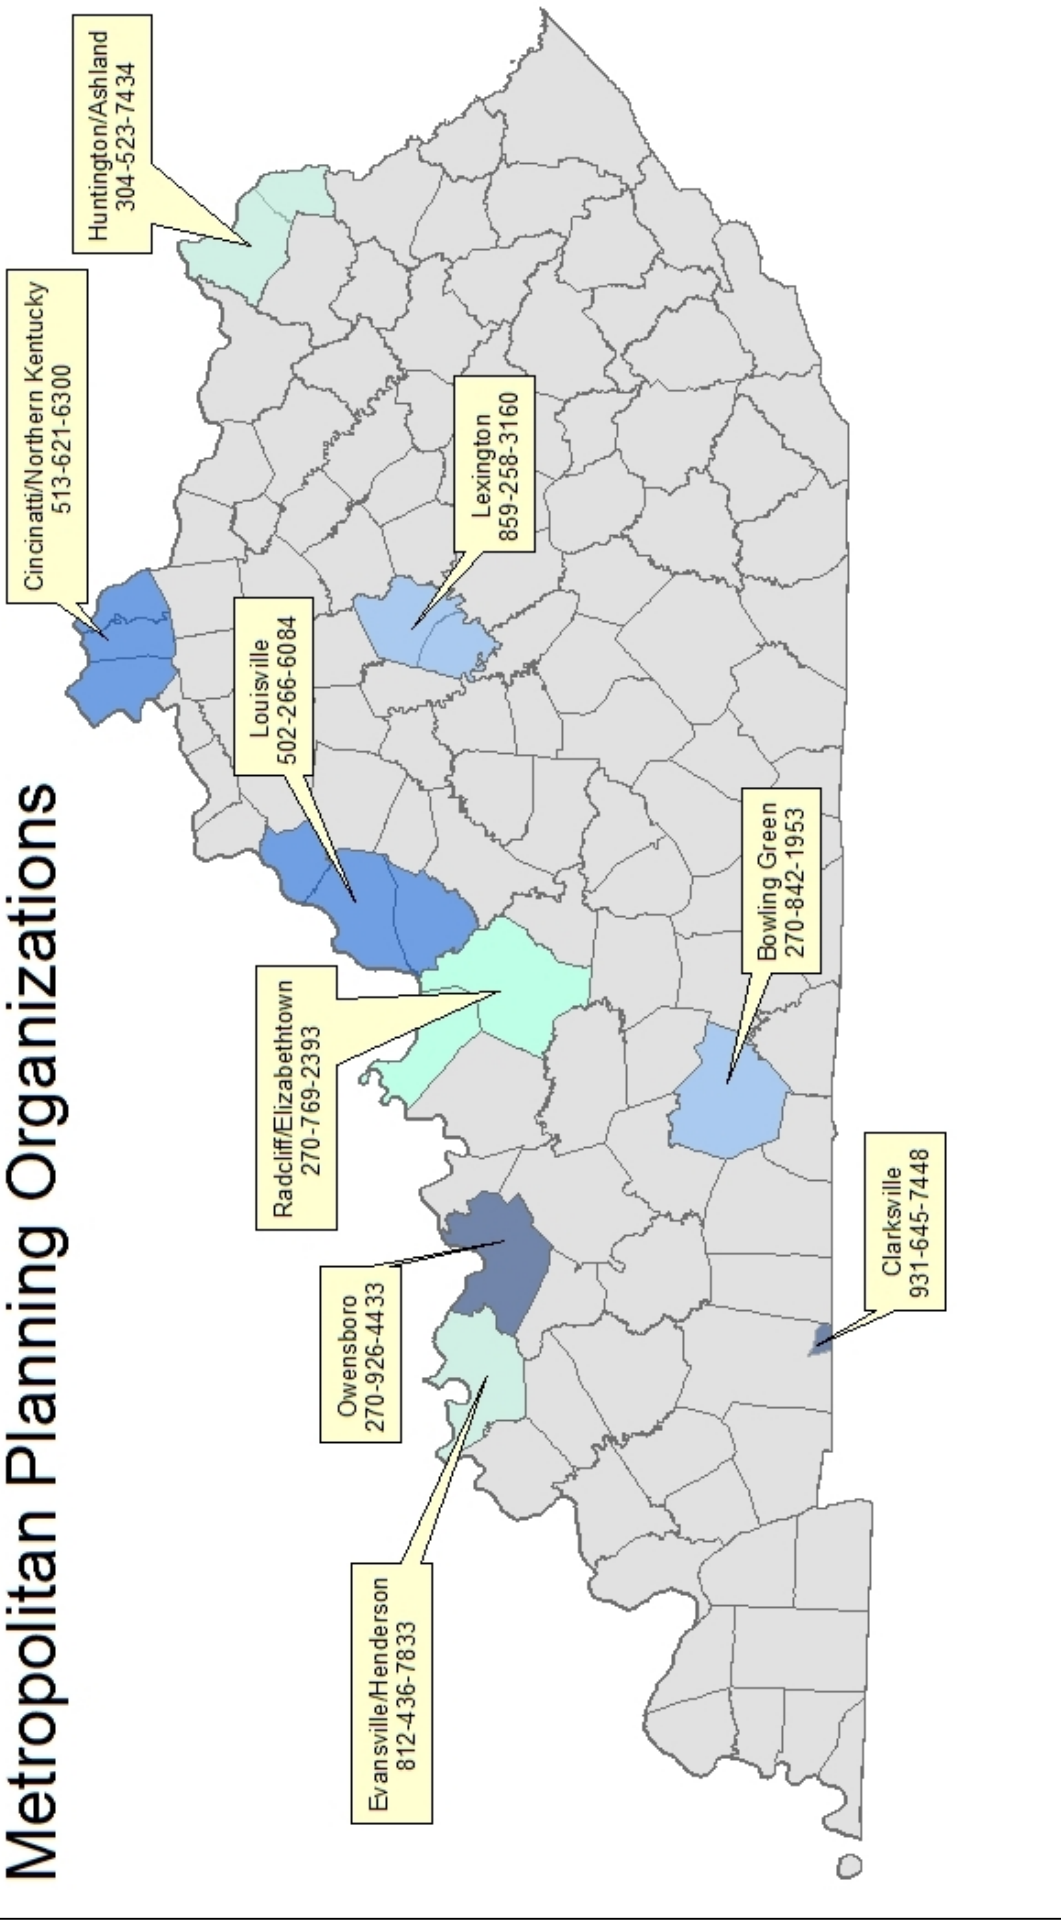

Figure 3.2-1 – Kentucky Metropolitan Planning Organization Offices and Boundary Map

3.3 KENTUCKY TRANSPORTATION CABINET PUBLIC INVOLVEMENT PROCESS

In carrying out the statewide transportation planning process, including development of the LRSTP and the STIP, the KYTC has developed a public involvement process that provides opportunities for public review and comment at key decision points.

Through assistance from the ADDs and MPOs, the KYTC will pursue appropriate measures to reach the general public including those traditionally underserved within the state. The ADDs, MPOs, and the KYTC may hold public meetings in places where these populations are comfortable gathering. As citizen concentrations are identified, the KYTC will include a process for seeking out and considering the needs of those traditionally underserved. The notices concerning public review and comments on the LRSTP and the STIP shall be advertised within statewide, significant regional and demographically targeted newspapers as appropriate. The notices for public review and comments may be advertised within statewide and/or regional newspapers including the following:

- Ashland Independent
- Bowling Green Daily News
- Covington Kentucky Enquirer
- Lexington-Herald Leader
- Louisville Courier-Journal
- Owensboro Messenger Inquirer
- Paducah Sun
- Somerset Commonwealth Journal
- Others as appropriate

Based upon the demographic diversity of the state as indicated through an analysis of the most recent United States Census Bureau data and applicable American Community Survey (ACS) data, as shown in Appendix A, efforts will be made for an effective outreach to the broad spectrum of citizens across Kentucky. This effort will include outreach to our traditionally underserved populations, specifically targeted to Environmental Justice (EJ) populations based upon low income, minority status, and low English proficiency.

To reach minority or underserved populations within the state, notices may be published in the following:

Minority Newspapers

- Cincinnati Herald
- Key News Journal – Lexington
- Louisville Defender
- Others as appropriate

Spanish Newspapers

- Al Dia en America – Louisville
- La Jornada Latina - Cincinnati
- La Voz de Kentucky – Lexington
- Others as appropriate

These newspaper advertisements will specify the number of calendar days for the public review and comment period, will identify an individual to whom comments can be sent, and will inform the public of the appropriate web site address. The KYTC will consider other accommodations upon request as required.

Minority radio stations may also be considered, as appropriate, in addition to the national, state and regional radio stations with the largest coverage areas. Some of these minority radio stations to consider are listed as follows:

<u>Call Letters</u>	<u>Band</u>	<u>Frequency</u>	<u>City of License</u>	<u>State of License</u>	<u>Primary Format</u>
WCND	AM	940	Shelbyville	KY	Regional Mexican
WCVG	AM	1320	Covington	KY	African-American Gospel
WIZF	FM	101.1	Erlanger	KY	Urban Contemporary
WUBT	FM	101.1	Russellville	KY	Urban Contemporary
WLRS	AM	1600	Eminence	KY	Spanish
WLou	AM	1350	Louisville	KY	African-American Gospel
WMJM	FM	101.3	Jeffersontown	KY	Urban AC
WENS	LP	96.9	Vine Grove	KY	Spanish Religious
WDPJ	LP	93.5	Danville	KY	Spanish Religious

The number of calendar days for public review and comment periods is based upon the following schedules:

- Interested Parties, Public Involvement & Process Consultation Process Document 45 calendar days
- New LRSTP or STIP Amendments to LRSTP or STIP 30 calendar days
- Administrative Modifications to LRSTP or STIP 15 calendar days
- Administrative Modifications to LRSTP or STIP Not Required

3.3.1 KYTC Interested Parties, Public Involvement and Consultation Process Documents

The KYTC continuously evaluates ways of reshaping current public involvement procedures to comply with 23 U.S.C., 450.210 “Interested Parties, Public Involvement, and Consultation Processes.” As the STIP is updated every two years, the effectiveness of the public involvement process will be reviewed and revised as appropriate. The KYTC will allow a minimum of 45 calendar days for public review and written comments before revisions to the public involvement process are adopted. The final document will be posted to the KYTC website at www.transportation.ky.gov and KYTC Your Turn website at <http://yourturn.transportation.ky.gov> as part of the Cabinet’s commitment to the use of visualization techniques and public involvement.

3.3.1-1 New LRSTP and/or STIP

The formal LRSTP document will cover a minimum 20-year planning horizon, and periodically the KYTC will evaluate, revise, and update the LRSTP as appropriate as noted in **Figure 3.3-1**. The MPOs Metropolitan Transportation Plans will be incorporated into the LRSTP by reference. Common points of discussion to be addressed through the LRSTP are displayed graphically on the following page in **Figure 3.3-2**.

Long-Range Statewide Transportation Plan (LRSTP)

A policy plan with a 20 year scope that sets the vision for the state transportation system and defines the goals which support its development.

Figure 3.3-1 – What is the LRSTP

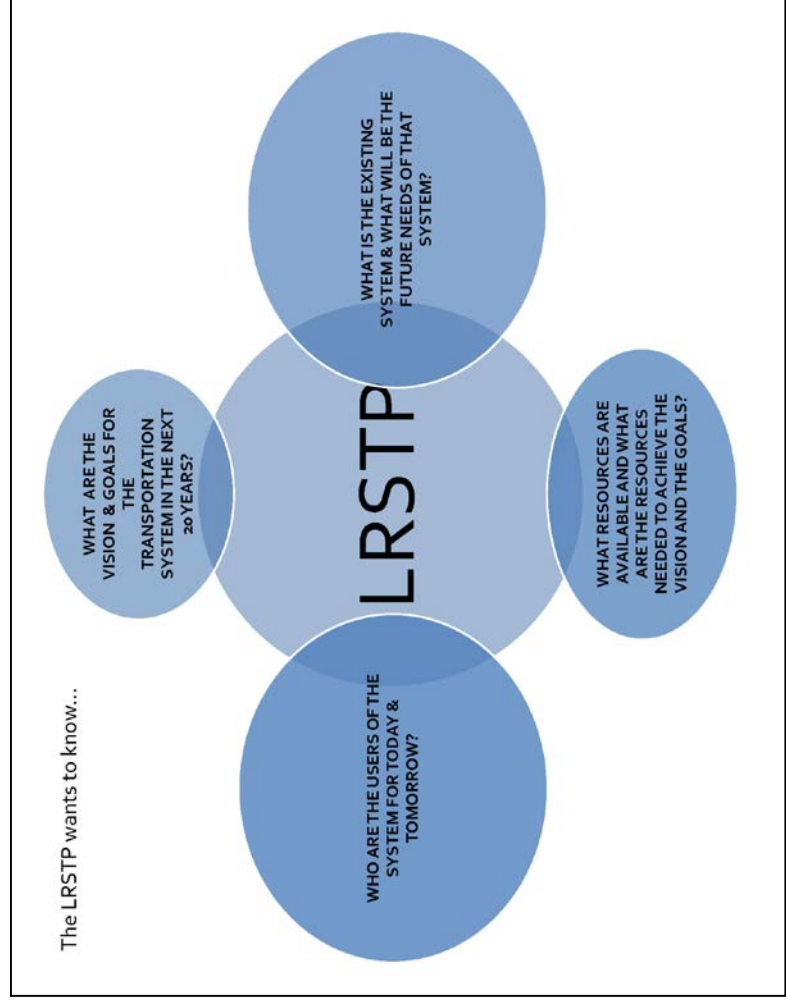

Figure 3.3-2 – The LRSTP Connection

The formal STIP document as defined in **Figure 3.3-3** may be prepared on a biennial basis (every two years) to coincide with state legislative approval of the biennial update of the Transportation Cabinet’s Highway Plan, will cover no less than four years, and will be updated at least once every four years as shown graphically in **Figure 3.3-4**. The MPOs TIPs will be incorporated into the STIP by reference to their specific federally-required documents.

As required by the Kentucky Revised Statutes (KRS), Chapter 176, the KYTC submits the Governor’s Recommended Highway Plan (Recommended Plan) to the Kentucky General Assembly in January of even numbered years for their review and approval through the middle of April. During this same time period, the Recommended Plan is made available to the general public, who can contact the General Assembly members voicing their concerns and/or support of projects. As per KRS, the General Assembly by law has the authority to make revisions, additions, and deletions of highway projects, along with having the responsibility of voting on and approving a final Highway Plan by the middle of April of even numbered years. As per KRS, the approved Highway Plan serves as a supplement to the Commonwealth’s Executive Branch Biennial Budget, and the entire Highway Plan process is repeated every two years.

Derived from the approved Highway Plan, the listing of highway improvement projects in the STIP consists of projects that have gone through an extensive identification process and where the public has been provided the opportunity to comment at various key decision points such as project identification and prioritization. In addition, the general public and concerned citizens have the opportunity to contact their legislators prior to the approval of the Highway Plan by the Kentucky General Assembly.

Figure 3.3-3 – What is the STIP

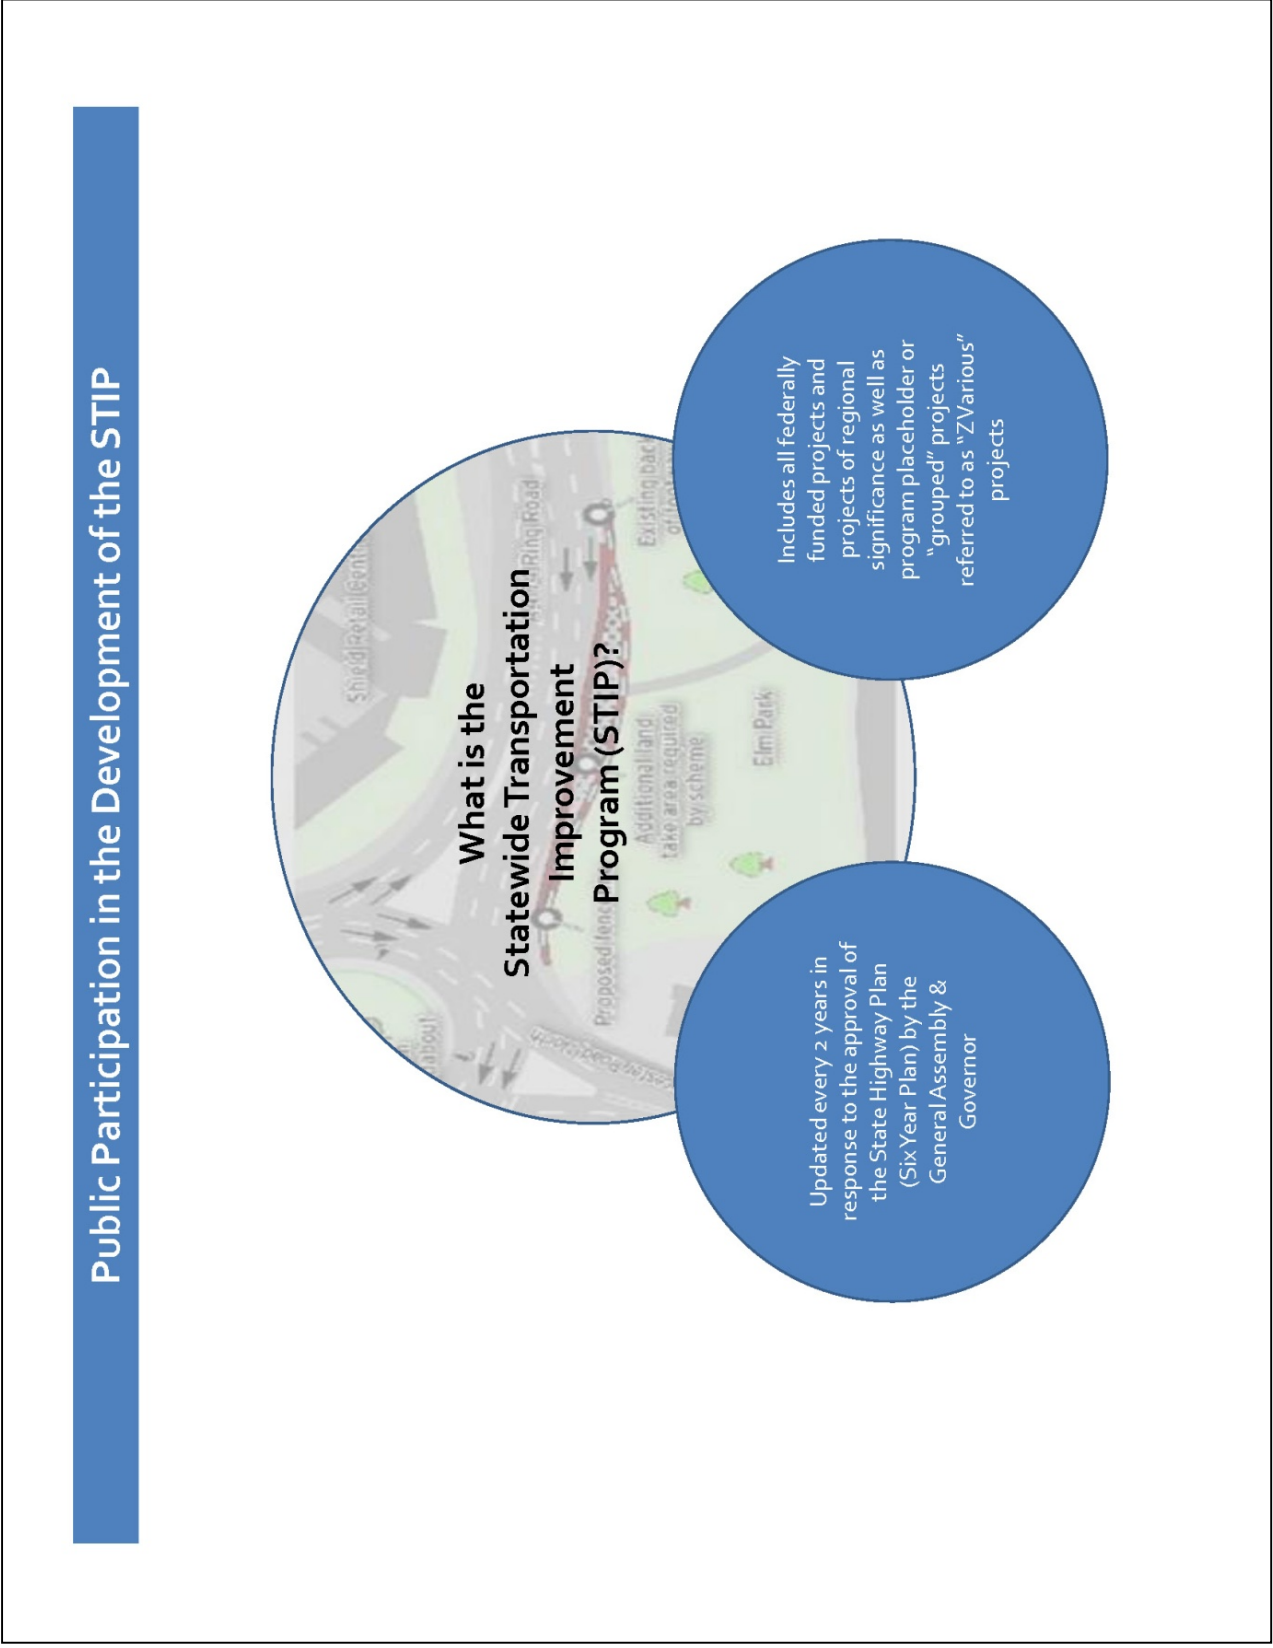

Figure 3.3-4 – The STIP Connection

Upon completion of the approved Highway Plan, the final stages of preparing the new STIP begins. Around the first of May in even-number years, the process to prepare the Draft STIP begins in which projects from the approved Highway Plan are incorporated into the document. Once the entire process of having the 30-day public review and comment period, as well as the review and approval of the Draft STIP by FHWA and FTA is completed, the final approved STIP document is printed and distributed in September of even-number years.

The process of preparing the STIP information, in conjunction with preparing the Highway Plan, begins in the winter of odd-number years and continues through the approval of the STIP by October 1 of even-number years. This STIP outreach effort is displayed visually on the following page in **Figure 3.3-5**.

As required by 23 CFR 450.216 (e), Federal Lands Highway Program TIPs shall be included without change in the STIP, directly or by reference, once approved by the FHWA.

To ensure that the public has ample opportunity to review and comment on the LRSTP as shown graphically in **Figure 3.3-6** and with the STIP documents, the KYTC will allow a minimum of 30 calendar days for public review and written comments for each proposed new LRSTP and each proposed new STIP. Notice of the 30-day public review and comment period will be advertised in statewide, significant regional and demographically targeted newspapers throughout the Commonwealth of Kentucky through assistance from the ADDs and MPOs as appropriate.

During this 30-day review and comment period, the FHWA and FTA will be provided the Draft LRSTP and Draft STIP documents for their review and comment.

The Draft LRSTP and Draft STIP will be publicly displayed in the KYTC Central Office, each of the 12 Highway District Offices, each of the 15 ADD Offices, and each of the 9 MPO Offices. Upon release of the Draft LRSTP and Draft STIP, a letter providing information on the availability of these documents will be sent to:

- Transit providers,
- FTA,
- USDA Forest Service,
- FHWA Eastern Federal Lands Highway Division,
- Other federal, regional, and state agencies responsible for land use management, natural resources, environmental protection, conservation, and historic preservation,
- All county judge/executives,
- Mayors of all communities over 5,000 in population,
- Any individuals who ask to be included on an official mailing list maintained by the KYTC.

Public Participation in the Development of a NEW STIP

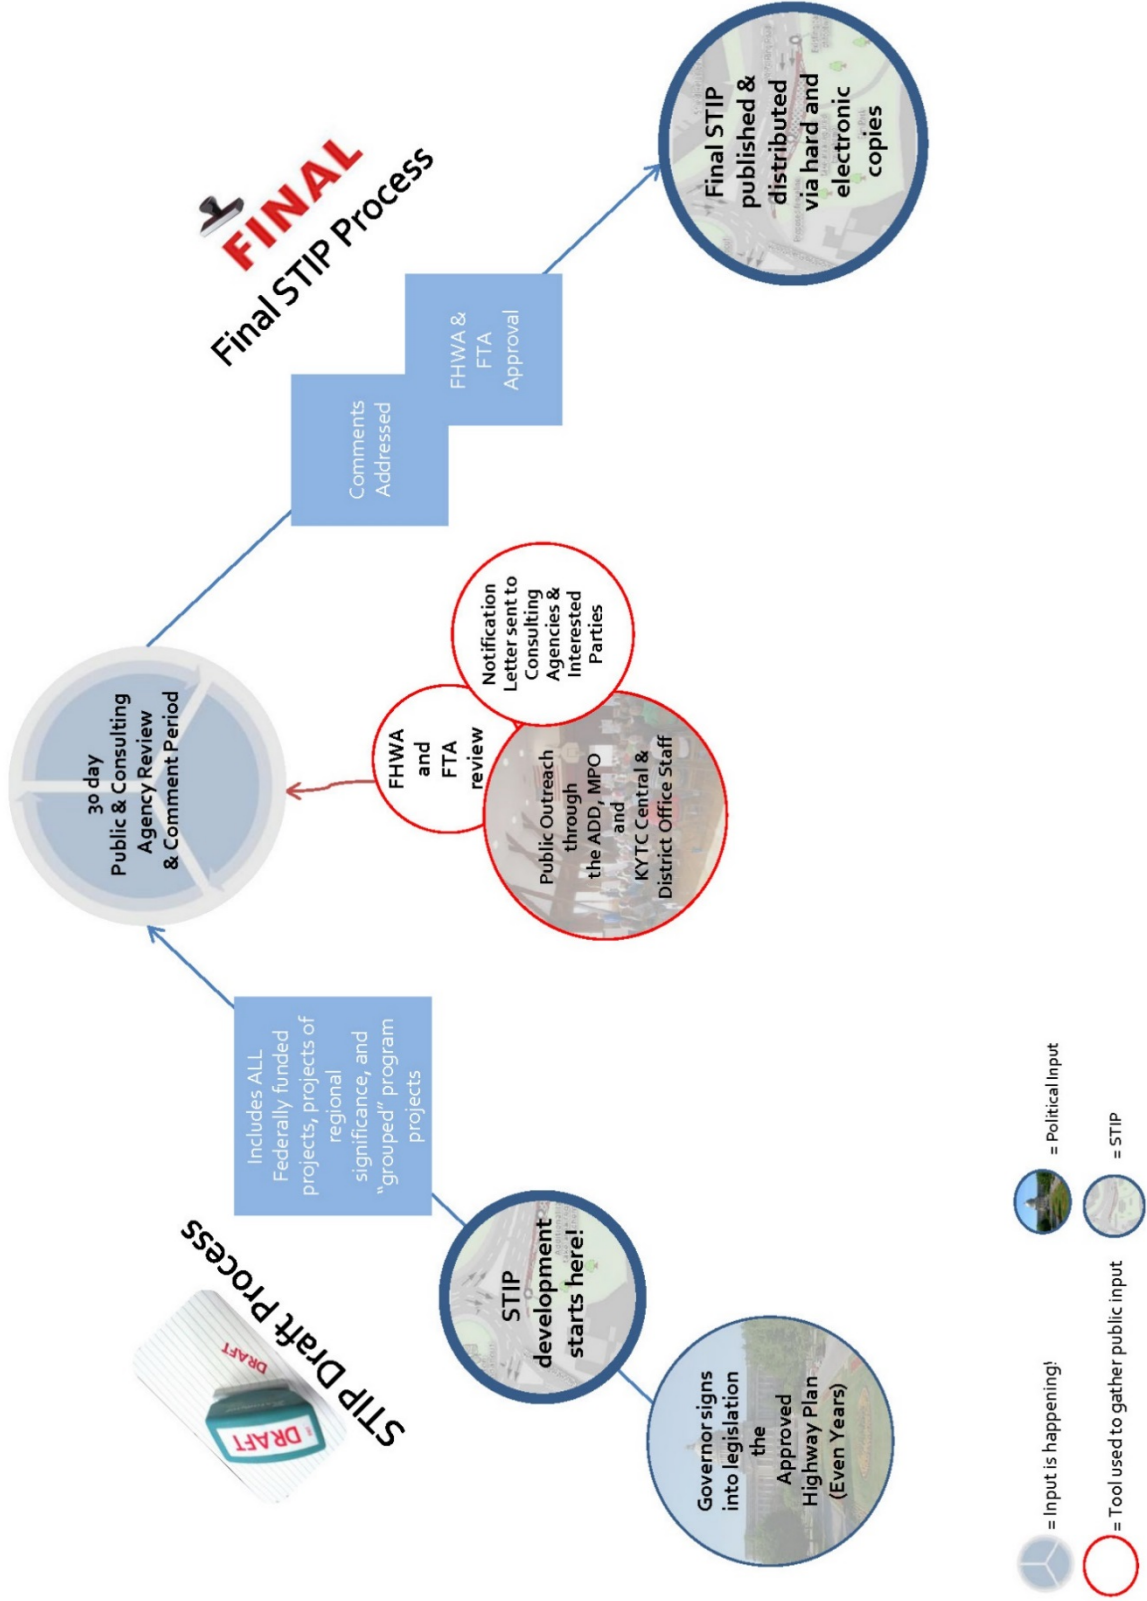

Figure 3.3-5 – The STIP Process and Public Involvement

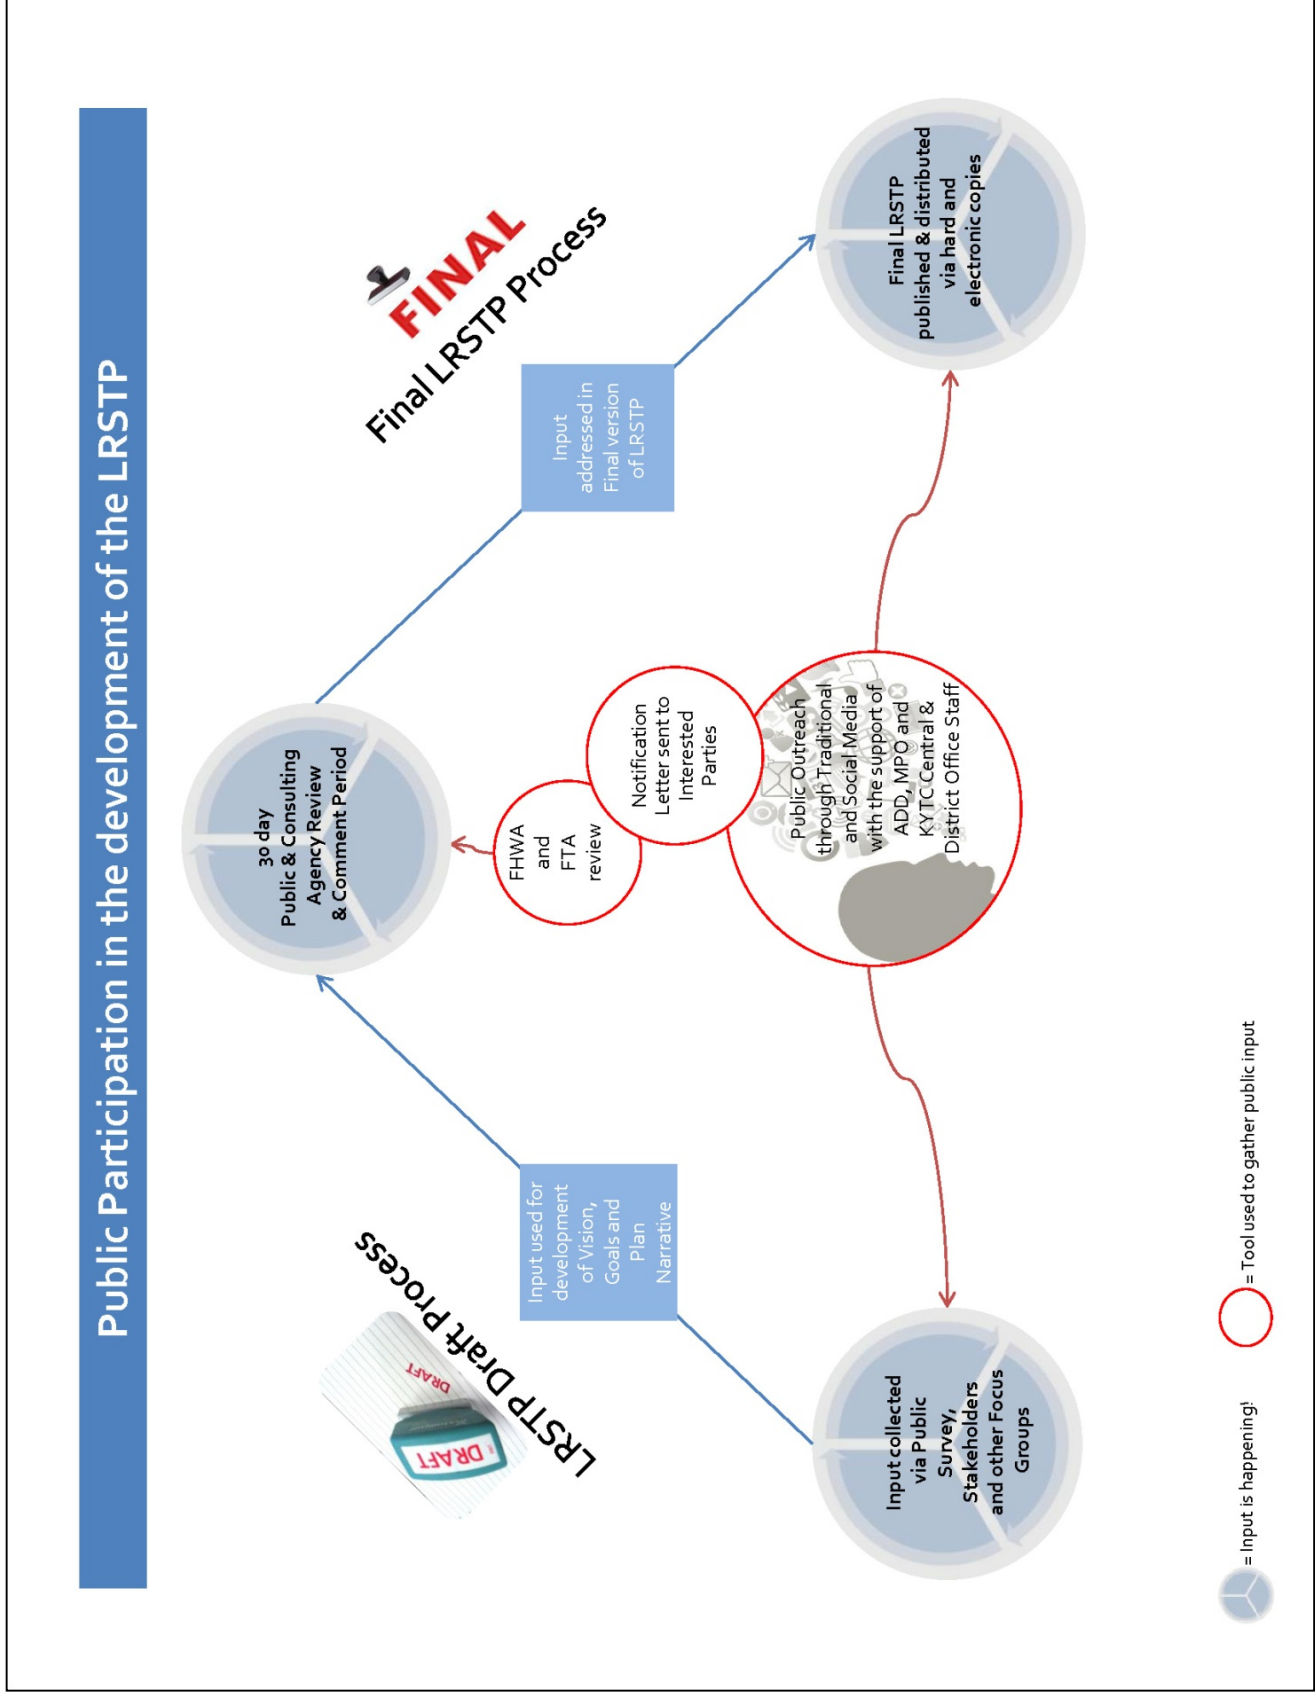

Figure 3.3-6 – The LRSTP Process and Public Involvement

Additional public involvement will be considered in those instances where the complexity of the LRSTP and STIP, or magnitude of public response indicates to the KYTC the need for additional efforts.

The Draft LRSTP or Draft STIP document will be posted to the KYTC web site. An electronically accessible format of the Draft LRSTP and Draft STIP will be available to search and print as appropriate. An electronic process will be established for those reviewing the Draft LRSTP and Draft STIP to submit electronically their comments and questions to the KYTC. According to 23 CFR 450.210 (a)(1)(v), visualization techniques will be used to the maximum extent practicable to describe the Draft LRSTP and Draft STIP documents.

In reviewing a Draft LRSTP or Draft STIP, the KYTC shall involve various interagency groups that represent environmental, traffic, ridesharing, parking, transportation safety and enforcement, airports, port authorities, toll authorities, and appropriate private transportation provider concerns. The KYTC will also involve city officials as appropriate, as well as local, state, and federal environmental resources and permit agencies. In each case, the reviewing entity will be expected to provide comments within the specified review period. As noted in Section 1 – Interested Parties and Section 3 – Consultation Process, the various state, federal, and local agencies are involved in the development process of the LRSTP and STIP at key decision points throughout the entire process.

Review of the Draft LRSTP and Draft STIP may consist of public meetings held at convenient and accessible locations and times, notices to neighborhood associations, legal notices in local newspapers, or any additional efforts that will significantly enhance the public's understanding of the planning-level recommendations being presented by the LRSTP or STIP document. The number, time, and location of any public meetings will be tailored to fit the circumstance being addressed. If such public outreach is deemed necessary, the Draft LRSTP or Draft STIP comment period may be extended to allow adequate time for receipt of post-meeting comments. Whenever possible, ADD and MPO public involvement processes will be coordinated with the statewide process to enhance public consideration of the issues, plans, and programs, and to reduce redundancies and costs.

3.3.1-1.1 For the LRSTP, the following apply:

After the initial 30-day public review and comment period, the KYTC will aggregate comments, prepare responses, and finalize the LRSTP document. Copies of the final edition of the LRSTP document will be made available for public information and also to both the FHWA and FTA. The final LRSTP document will be posted on the KYTC web site.

3.3.1-1.2 For the STIP, the following apply:

After the initial 30-day public review and comment period, the KYTC will aggregate comments, prepare responses demonstrating explicit consideration and response to public input, and finalize the STIP document. Copies of the final edition of the STIP document will be made available to both the FHWA and FTA for review and comment. When the FHWA and FTA comments have been addressed, the final STIP document will be prepared and will include a copy of the joint approval letter from FHWA and FTA. Copies of the final STIP will be prepared and copies will be available for public information and distribution. Copies of the final STIP will be made available to the consulting partner agencies (in the list noted earlier in this section) and to any individuals who ask to be included on an official mailing list maintained by the KYTC. Also, the final approved STIP document will be posted on the KYTC web site.

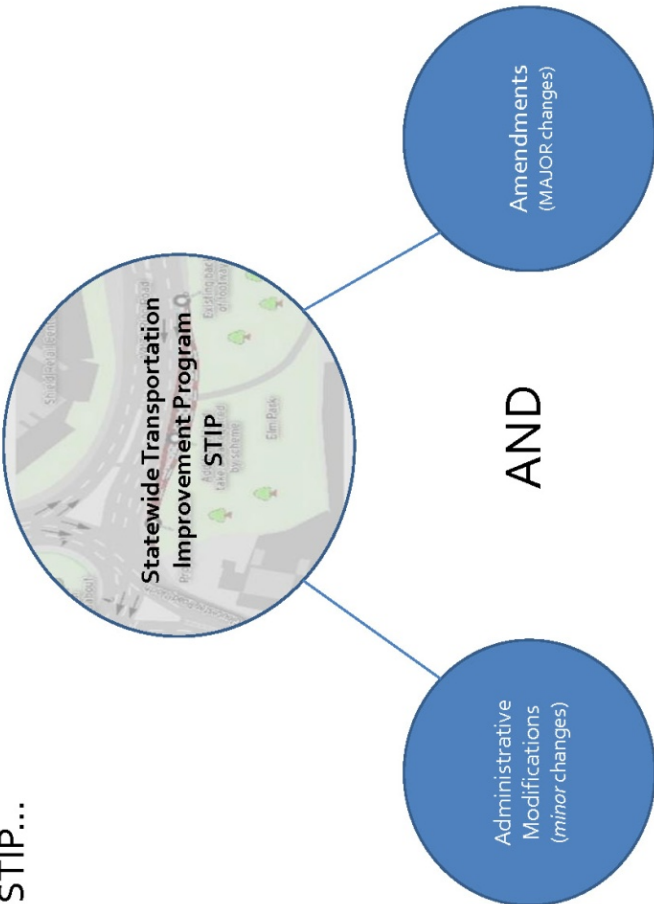

3.3.1-2 Revisions to the LRSTP and/or STIP

On various occasions revisions may be required to the LRSTP or STIP. Revisions to a LRSTP or STIP may involve a minor revision or may involve a major revision. On a case-by-case basis, the KYTC, FHWA and/or FTA determines whether the revision is minor or major as per definition of “Administrative Modification” and the definition of “Amendment” outlined in 23 CFR 450.104. These two types of revisions are displayed graphically regarding the STIP on the following page in **Figure 3.3-7**.

The KYTC, FHWA, and FTA will utilize applicable requirements and classifications of projects that are not considered to be of appropriate scale for individual identification a given program year as outlined in 23 CFR 771.117 (c) and (d) and/or 40 CFR part 93.126 “Exempt Projects” and 93.127 “Projects Exempt from Regional Emissions Analysis.” These appropriately identified projects may be grouped by function, work type, and/or geographic area into the ZVarious programs and other program placeholders to determine if a STIP revision is required.

Public Participation in Revisions to the STIP

There are two types of revisions to the STIP...

How are the types different?

Figure 3.3-7 – STIP Revision Types

3.3.1-2.1 Administrative Modifications to STIP

Administrative modifications are minor revisions to the STIP that include minor changes to:

- Projects/project phase costs,
- Funding sources of previously included projects,
- Project phase initiation dates,
- The delineation of projects in program placeholder which include:
 - Congestion Mitigation and Air Quality (CMAQ) projects,
 - Transportation Alternatives (TA) projects,
 - High Cost Safety Improvement (HSIP-HCS) projects.

An administrative modification is a revision that does not require:

- Public review and comment,
- Re-demonstration of fiscal constraint,
- A conformity determination (in air quality conformity nonattainment and maintenance areas).

For administrative modifications to the STIP, the official STIP mailing list will be utilized to distribute information pertaining to the revision. As STIP administrative modifications are made, each administrative modification will be posted on the KYTC web site. Each of these documents will be provided in an electronically accessible format with the means to search and print as appropriate.

The changes that would require one revision type over another are shown below in **Figure 3.3-8**.

3.3.1-2.2 Amendments to the STIP

Amendments are revisions to the STIP that include major changes to a project included in the STIP. This includes a major change in:

- Project Cost,
- Project/project phase initiation dates,
- Design concept or design scope (e.g., changing project termini or the number of through traffic lanes).

The differences between the requirements for Amendments and Administrative Modifications are provided visually in **Figure 3.3-9**.

Public Participation in Revisions to the STIP

The difference is...

Administrative Modifications

Minor revisions to the STIP that include *minor* changes to:

- Projects/project phase costs
- Funding sources of previously included projects
- Project phase initiation dates
- The delineation of projects in a program place holder
 - Congestion Mitigation and Air Quality projects (CMAQ)
 - Transportation Alternatives (TA) projects
 - High Cost Safety Improvement (HSIP-HCS) projects

VS.

Amendments

MAJOR revisions to the STIP that include **MAJOR** changes. This includes a **MAJOR** change in:

- Project cost
- Project/project phase initiation dates
- Design concept or design scope (e.g., changing project termini or the number of through traffic lanes)
- The addition or deletion of projects, except those types of projects not considered to be of appropriate scale for individual identification as outlined in the 23 CFR 771.117 (c) and (d) and/or CFR part 93.126 "Exempt Projects" and 93.127 "Projects Exempt from Regional Emissions Analysis," which are the grouped program placeholders such as the Transportation Alternatives (TA) and Congestion Mitigation and Air Quality (CMAQ)

Figure 3.3-8 – Differences between STIP Revision Types

Public Participation in Revisions to the STIP

The difference in requirements...

Administrative Modifications

- DO NOT require...**
- Public review and comment
 - Re-demonstration of fiscal constraint
 - A conformity determination (in air quality conformity nonattainment and maintenance areas)

VS.

Amendments

- DO require...**
- Public review and comment
 - Re-demonstration of fiscal constraint
 - A conformity determination (in air quality conformity nonattainment and maintenance areas)

Figure 3.3-9 – Requirements between STIP Revision Types

Amendments are also required with the addition or deletion of projects, except those types of projects not considered to be of appropriate scale for individual identification or outlined in 23 CFR 771.117(c) and (d) and/or 40 CFR part 93.126 “Exempt Projects” and 93.127 “Projects Exempt from Regional Emissions Analysis,” which are the grouped projects listed in the ZVarious programs and other program placeholders.

An amendment is a revision that requires:

- Public review and comment,
- Re-demonstration of fiscal constraint,
- A conformity determination (in air quality nonattainment and maintenance areas).

The decision-making process for the different STIP revision types are shown graphically in **Figure 3.3-10**.

For STIP amendments that have not undergone public involvement through the MPO process or the Highway Plan process, a 15-day public review period will be provided and public notice advertisements will be placed in statewide, significant regional, and demographically targeted newspapers. Selected newspapers will be identified through assistance from the corresponding ADDs and MPOs. In addition, other possible public outreach efforts targeted to the specific region of the state directly affected by the proposed STIP amendment may be required and will be determined on a case-by-case basis.

The proposed amendment will be displayed at the KYTC Central Office as well as the appropriate Highway District, ADD, and MPO offices for public review and comment. KYTC will make available to the public the description of project, location of project, proposed project phases, proposed type of funding, and scheduled fiscal year of each phase that KYTC wants to amend into the STIP. Also, KYTC will revise the “Fiscal Constraint” tables outlined in the STIP to reflect the required funding for the proposed new project vs. available funding. KYTC will provide hard copies of the information and the information will be made available on the KYTC STIP website. The public will be provided the means to submit written and electronic review comments on proposed STIP amendment.

At the conclusion of the 15-day review period, public comments will be addressed, additional public outreach may be conducted as necessary, and the final STIP amendment will be provided to FHWA and FTA for approval. For amendments to the STIP from areas within MPO boundaries, the public involvement process conducted for the respective MPO TIP will suffice as the required public involvement for the STIP.

As STIP amendments are approved, each amendment will be posted on the KYTC website. Each of these documents will be provided in an electronically accessible format with the means to search and print as appropriate.

Public Participation in Revisions to the STIP

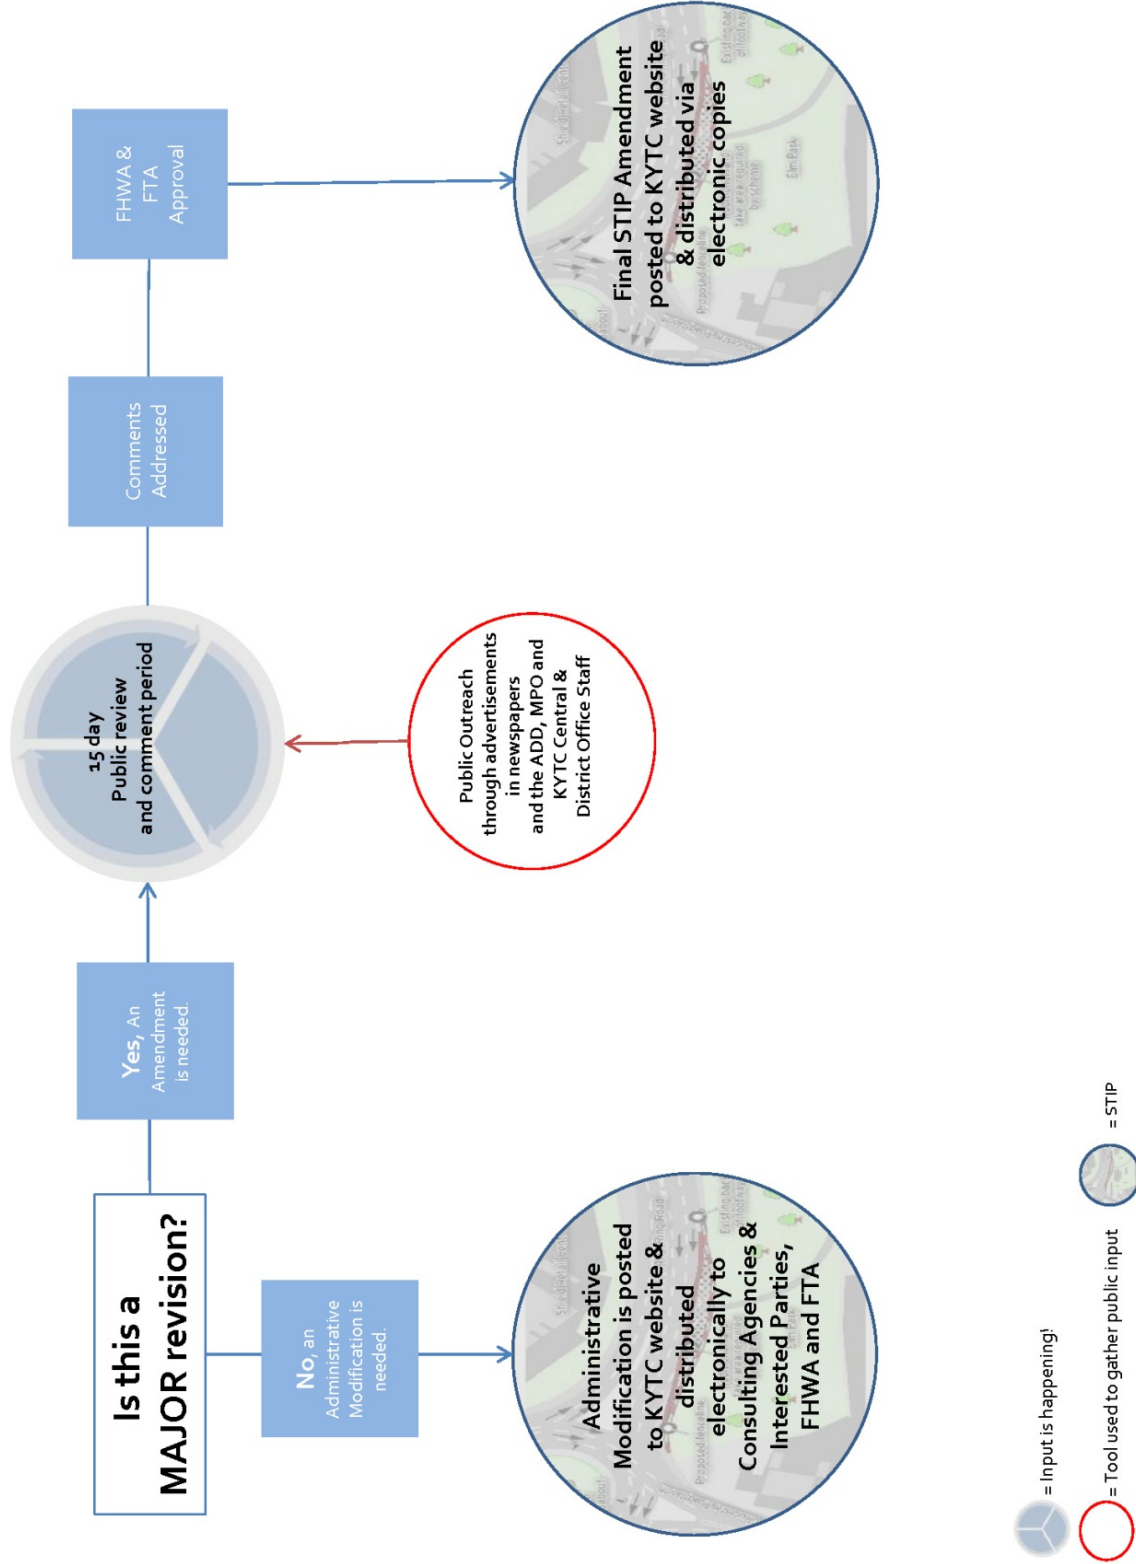

Figure 3.3-10 – STIP Public Involvement Process for Different Revision Types

4. CONSULTATION PROCESS

The KYTC receives numerous requests each year from the 12 KYTC Highway District Offices, input from city mayors, county judges, MPOs, ADDs, state legislators, and through written comments and requests from the general public and concerned citizens. The KYTC has established guidelines for ADDs, MPOs, local city and county elected officials, and other interested parties located throughout the Commonwealth of Kentucky to identify and recommend potential projects.

The requests are considered on a case-by-case basis, and each requestor may be provided with written correspondence explaining what can be done at the current time and recommendations for future actions. These requests are assembled within an electronic transportation needs database (Project Identification Form (PIF) database) along with maintaining hard copies of project requests and corresponding project information. This listing of identified transportation needs is referred to as the “Unscheduled Needs List (UNL).”

The KYTC maintains the “Unscheduled Needs List (UNL),” and these projects may include highway, bikeway, pedway, intermodal access, and intelligent transportation system (ITS) projects. Safety projects, bridge projects, other operations and maintenance projects may be noted as such and referred to the appropriate KYTC Highway District Office (HDO). Each newly suggested project will be checked against the current STIP, Highway Plan, and UNL to make sure that the project is not already identified.

As projects are being identified, all project requests should include the following information to be considered as a UNL project:

- Route number or “new route”,
- A clear problem statement that describes the need for the project in terms that can be verified by data analysis or from professional studies,
- A thorough description of the project and location (including road or street names, if applicable),
- Beginning and ending termini mile points for projects located on state-maintained roads,
- Length of project to the nearest tenth of a mile,
- Any existing data concerning the condition, safety, or capacity of the roadway,
- Cost estimates for the proposed projects which are prepared by the Highway District Offices,
- Any other information available to describe the purpose, need, and/or justification for the project.

Through this consultation process as shown graphically in **Figure 4.0-1**, individual projects or needed corridor improvements are identified and may be assigned relative priorities and rankings by local officials, ADDs, and MPOs. Relative priorities and rankings may then be applied by KYTC HDO and KYTC Central Office staff to needs district-wide and statewide, respectively.

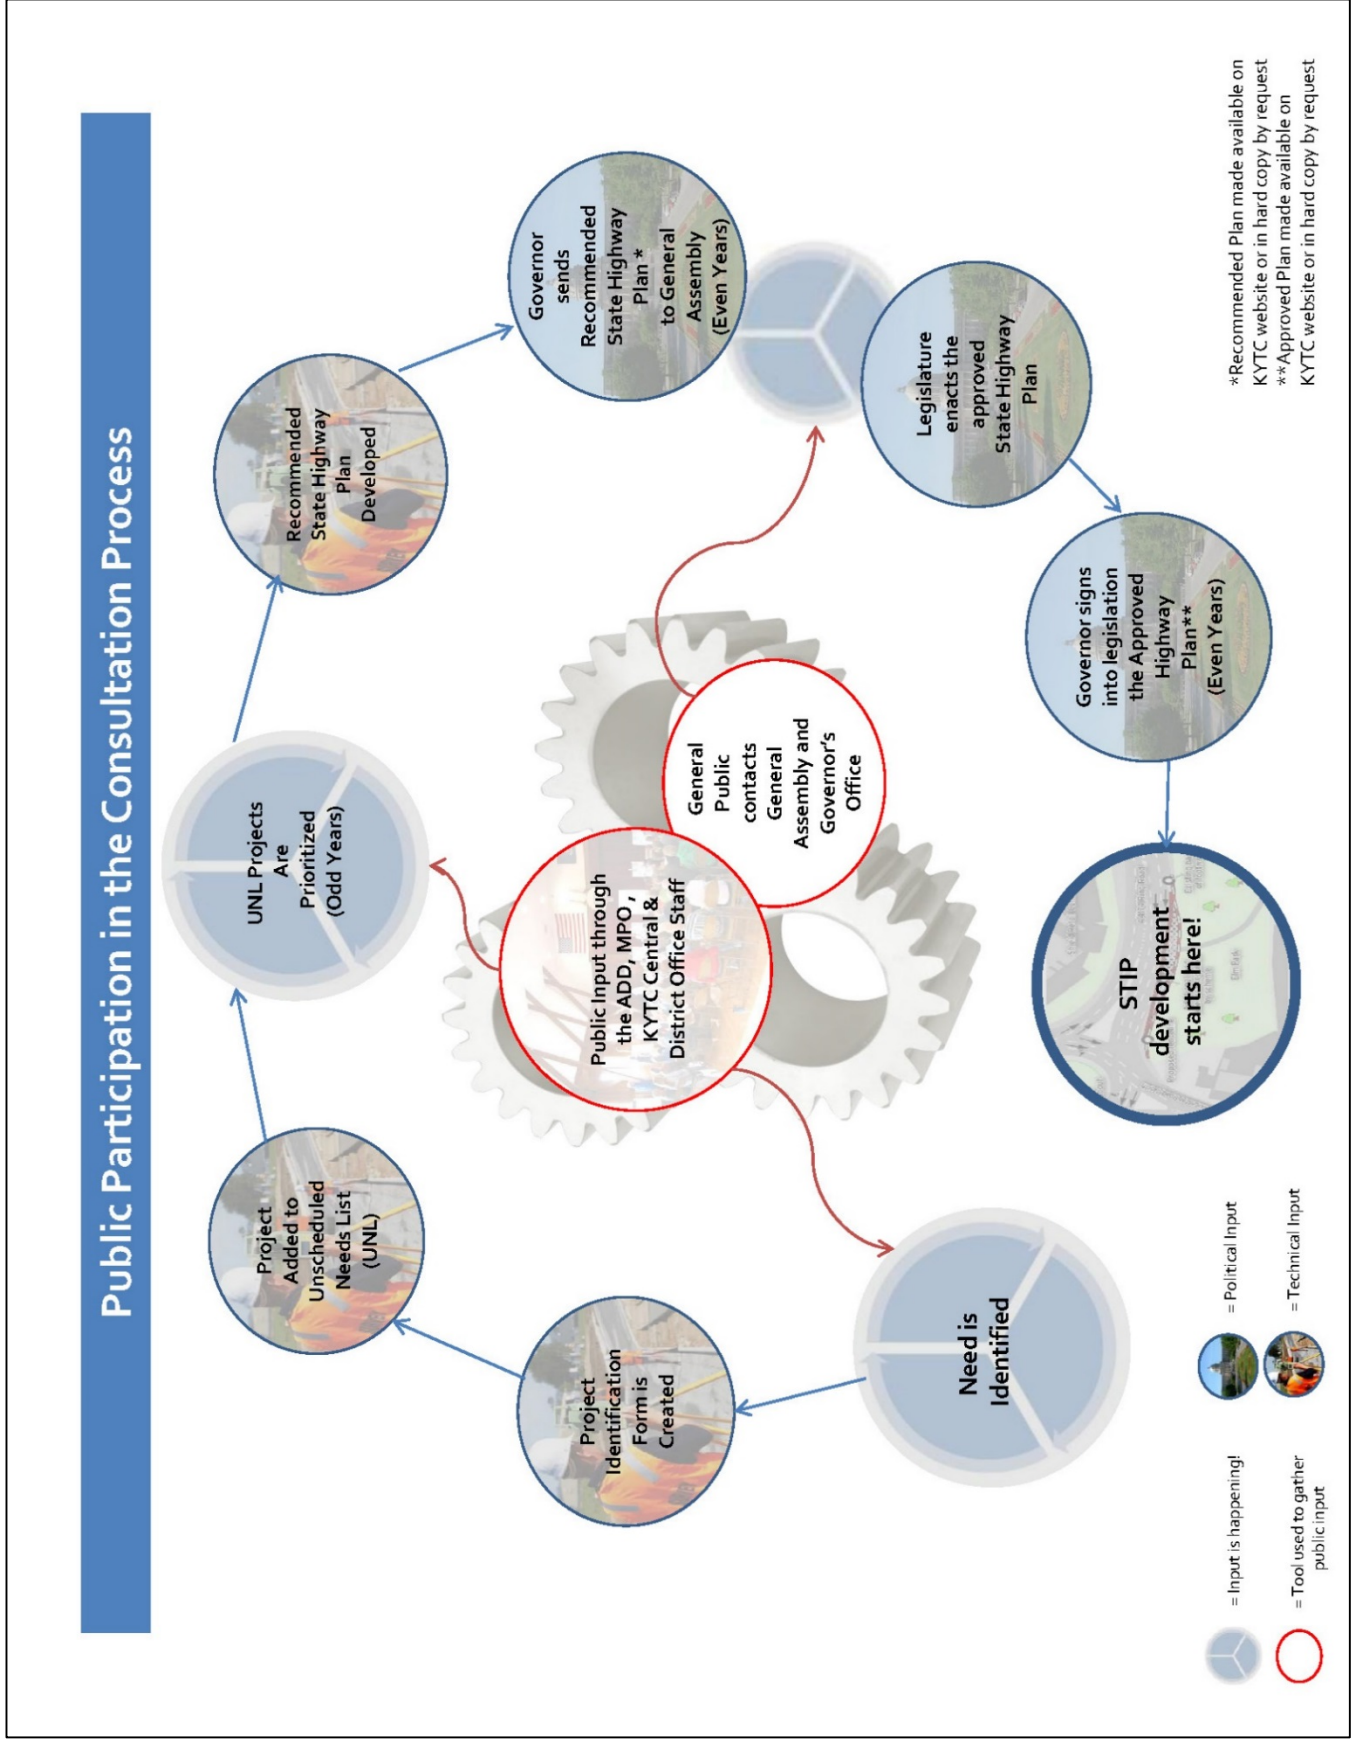

Figure 4.0-1 – Public Involvement in the Consultation Process

Those projects that rank consistently high at the local, regional, highway district, and statewide levels, and meet other data-driven selection criteria, may be recommended for inclusion in the Highway Plan from which the STIP is developed. This prioritization process is repeated every two years to ensure that the KYTC keeps the transportation needs current and assures a continuing and proactive planning process.

4.1 DETERMINATION OF CONSULTATION EFFECTIVENESS

In accordance with 23 CFR 450.210, at least every 5 years the KYTC will review and solicit comments from non-metropolitan local officials and other interested parties for a period of not less than 60 calendar days regarding the effectiveness of the KYTC statewide transportation planning consultation process including proposed changes. The KYTC will send specific requests for comments to the Kentucky Association of Counties, Kentucky League of Cities, regional planning agencies, or directly to non-metropolitan local officials as to the effectiveness of the KYTC consultation process and any proposed changes.

Upon receiving the comments and proposed changes, the KYTC will review the comments and proposed changes, and at its discretion, determine whether to adopt any of the proposed changes. If a proposed change is not adopted, the KYTC will make publicly available its reasons for not accepting the proposed change, including notification to non-metropolitan local officials or associations. If the KYTC elects to revise their current public involvement process to include any of the proposed changes, a 45-day public review and comment period will be conducted prior to officially adopting the proposed changes to the public involvement process.

5. PUBLIC INVOLVEMENT DURING THE PROJECT LIFE CYCLE

Public involvement is more than just a single hearing or only one meeting near the end of the project development process. Public involvement should be early and continuous throughout the life cycle of a project. The four principal phases of that project life cycle are illustrated on the following page in **Figure 5.0-1**.

A key element of effective communication with the public is to cultivate their general understanding of the KYTC project development and delivery process as described in **Figure 5.0-2**.

Furthermore, it is essential for the KYTC staff to understand the community's values in order to avoid, minimize, and mitigate impacts as well as to narrow the range of alternatives for a transportation improvement. The community also should be made aware of the tradeoffs and constraints involved in the process, which should encourage public acceptance of the project. If involved early, the public can provide significant insight (directly or indirectly) into the project's goals and needs and its effects on their community.

Figure 5.0-1 - Transportation Phases of Project Life Cycle

How We Build Roads

Step 1: Long-Range Planning

- Identify/prioritize purpose & need
- Identify & address public concern
- Identify priorities for State Highway Plan

Step 2: State Highway Plan

- Project revenue for federal & state funds
- Break revenue into funding categories
- Match required state funds to federal funds
- Balance all fund categories
- Determine projects & programs that can be funded with projected revenues

Step 3: Project Planning

- Determine project limits
 - Verify funding needs
 - Identify public concerns
 - Verify project needs
 - Identify project goals
 - Identify environmental concerns
 - Coordinate with resource agencies
 - Make project recommendations
- Duration: 1 – 2 Years*

Step 4: Preliminary Design & Environmental Analysis

- Conduct field surveys
 - Inventory existing resources to identify protected, endangered & important resources
 - Identify & address public concerns by conducting meetings & distributing reports
 - Develop alternatives
 - Prepare environmental documentation
- Duration: 1 – 2 Years*

Step 5: Final Design

- Develop final alignments
 - Develop right-of-way needs
 - Drill for soil & rock samples
 - Identify & address public comments
 - Review environmental commitments
 - Develop construction plans
- Duration: 1 – 2 Years*

Step 6: Right-of-Way Purchase (Land Acquisition)

- Determine property values
 - Meet with property owners
 - Address property owner concerns
 - Make offers & buy property
 - Sign deeds
 - Assist with relocations
- Duration: 1 Year*

Step 7: Utility Relocation

- Move utilities out of construction zone
 - Pay utility companies for relocations
- Duration: 1 Year*

Step 8: Construction

- Address public concerns
 - Construct roadway
 - Fulfill environmental commitments
 - Maintain traffic
- Duration: 1 – 2 Year*

Step 9: Maintenance

- Remove snow & ice
 - Patch potholes & resurface
 - Mowing & many other items
- Duration: The Life of the Road*

Figure 5.0-2 – KYTC Project Development and Delivery Process

The viewpoints and opinions of the public are important considerations in the transportation decision-making process. The public includes:

- Users of the facility
- Nearby property owners affected by the project
- Elected officials
- Others interested in the outcome of the project

The seven basic steps for effective public involvement in any project are:

1. Create a plan for public involvement activities. Costs for public involvement should be accounted for in the project budget. When public involvement is significant, a separate budget should be created.
2. Identify the interested and affected public.
3. Invite the public to participate in the process. Provide adequate accessibility to the meeting space and meeting materials.
4. Inform the public of the existing conditions, issues and concerns, and potential solutions. If significant time lapses between the public involvement meetings and the letting of the project, consider updating the public through media, newsletters, websites or other means as appropriate.
5. Conduct public involvement activities to collect the concerns and preferences of the public. Provide assistance to the public to facilitate their involvement. This can include but is not limited to providing interpreters.
6. Review and consider input, and provide feedback to the public. If significant time lapses between the public involvement meetings and the letting of the project, consider updating the public through media, newsletters, websites or other means as appropriate.
7. Evaluate the public involvement activities and improve the process accordingly.

This process is referred to as the “Five I’s of Public Involvement” as illustrated in **Figure 5.0-3**.

5.1 PROJECT DEVELOPMENT

During the project life cycle, public involvement activities are the most extensive during the project development phase. This phase is critical because it links the planning process with the actual human and natural aspects of the project, as well as design, and eventual construction and operation. The responsible party for the public involvement efforts on a particular project goes primarily through the associated KYTC HDO and the designated project manager or resident engineer(s). **Figure 5.1-1** provides the contact number for each of the 12 HDOs throughout Kentucky as well as their color coded district boundaries by county and associated interstates and parkways for reference.

Kentucky Interstates and Parkways

AU	Audubon Parkway	1	(270) 895-2431	7	(859) 246-2355
BC	Bert T. Combs Mountain Parkway	2	(270) 824-7080	8	(606) 677-4017
BC	Martha Layne Collins Bluegrass Parkway	3	(270) 745-7898	9	(606) 845-2551
EB	Edward T. Breathitt Pennyrite Parkway	4	(270) 765-5066	10	(606) 686-8841
HR	Hal Rogers Parkway	5	(502) 210-5400	11	(606) 598-2145

LN	Louie B. Nunn Cumberland Parkway				
WK	Wendell H. Ford Western Kentucky Parkway				
WN	William H. Natcher Parkway				

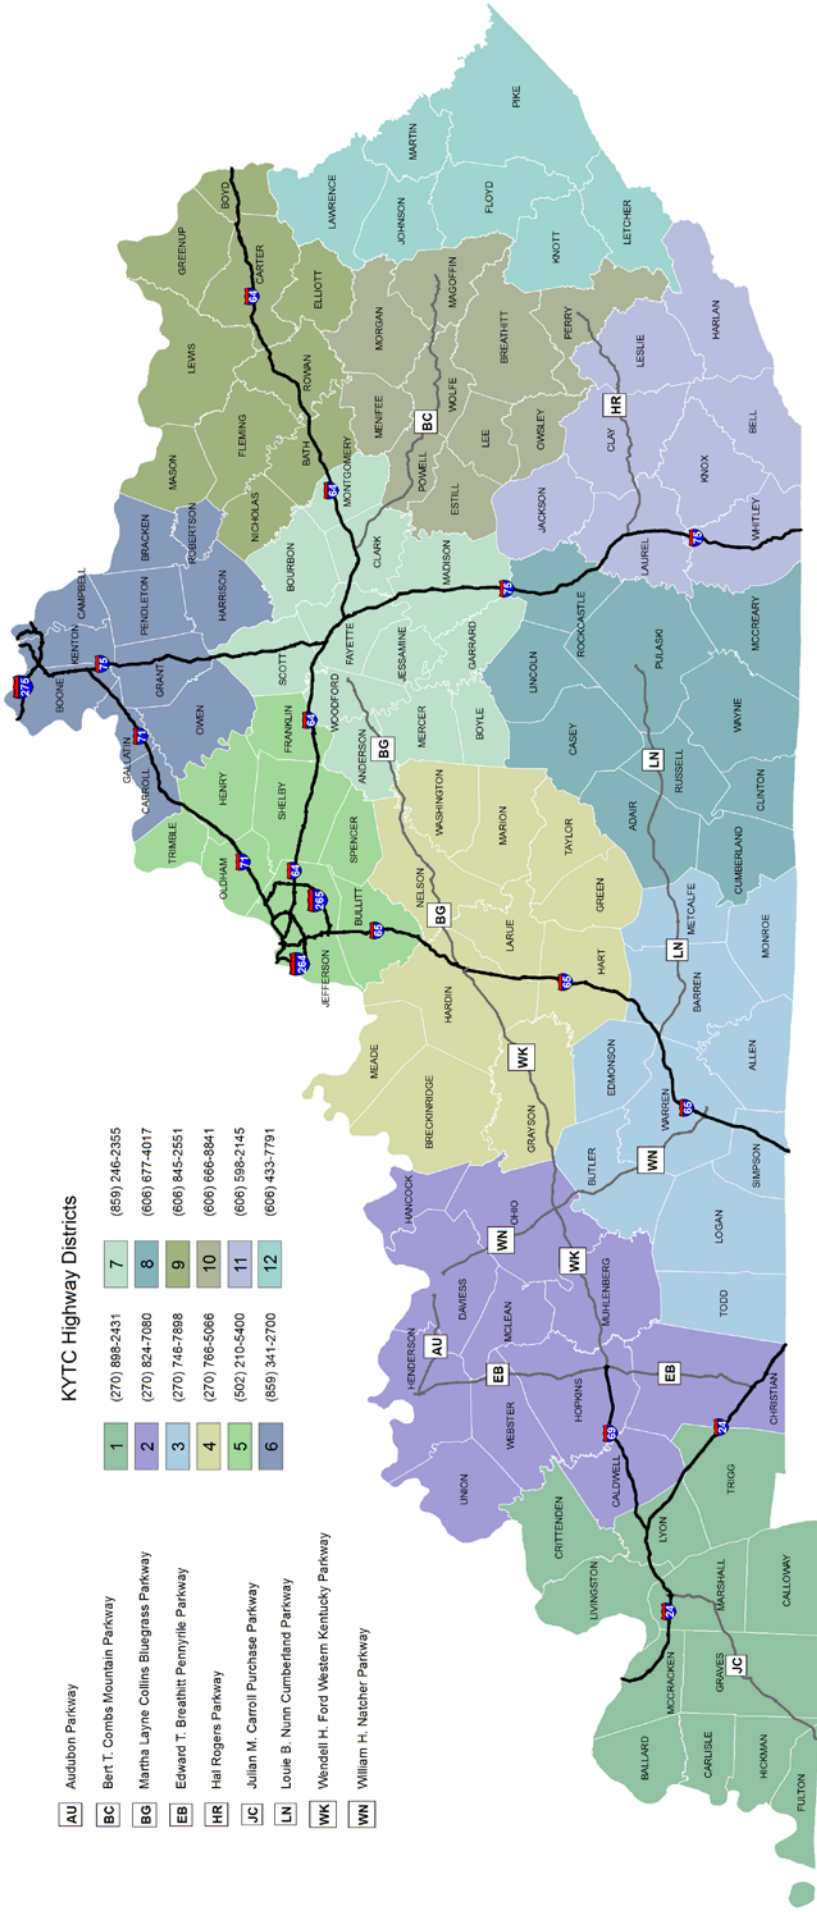

Figure 5.1-1 – Kentucky Highway District Offices and Boundary Map

5.1.1 Corridor or Area Transportation Planning Studies

While system-wide plans have a policy-based focus, corridor or area transportation planning studies are more narrowly focused on either a specific facility, such as a roadway, or the transportation needs for a defined area such as a rural county, a small community, or a neighborhood. Corridor planning activities can include the planning for new corridors which provide for the future mobility or access needs of a region or community or the identification of improvements to existing corridors in order to preserve or enhance the ability of that facility to move traffic safely and efficiently. Area transportation planning studies focus upon the transportation needs within a small geographic unit such as town or county. Both planning efforts must consider possible environmental impacts upon the human and natural resources within the study area.

Throughout corridor or area transportation planning studies, extensive effort should be made to reach out to as many groups as possible to receive comments directly from the people who will benefit from and be impacted by the identified transportation improvements. These studies provide the public and interested stakeholders opportunities to learn about the planning process, possible outcomes, and project schedules, as well as provide an opportunity to build relationships and show the public the importance of their participation.

5.1.2 Design, Right-of-Way Acquisition and Utility Relocation

The KYTC Division of Professional Services (DPS) in accordance with KRS 45A.825 (2)(c), maintains their website by providing procurement bulletins and public notices of a request for proposals as well as notices of the materials that the procuring agency will provide to a firm to assist that firm in responding to a request for proposals concerning planning and design engineering services. These materials shall include, but are not limited to, the request for proposals form and the project evaluation sheet to be used by the relevant selection committee. The notice shall also set a deadline for filing responses to a request for proposals with the procuring agency. It is intended that firms in all regions of the Commonwealth are given an equal opportunity to be selected.

The request for professional engineering services are advertised on the KYTC DPS website on the 2nd Tuesday of each month, and the Consultant Selection Results are also posted on this website immediately following each consultant selection meeting in accordance with the previously noted KRS and the DPS Guidance Manual.

This selection process includes the Chairperson of the Professional Engineering and Engineering-Related Services Selection Committee notifying the Director of Professional Services, or designee, of the firms determined by the committee to be the three (3) best qualified and their order of ranking. The director, or designee, will then notify these top-ranked firms of their selection and send a letter to these three (3) finalists advising them of their ranking.

Once the source for engineering services have been determined and any necessary contracts are executed, the project proceeds into the design phase. Public involvement outreach for the design of highway projects is dependent on project location, type of project, and magnitude. The review of demographic information can identify any underserved or special audiences within a project area and will assist in the determination of the appropriate level of outreach.

In project areas where demographics indicate a population of non-English speaking individuals, public involvement will include a mechanism to access project information. Efforts shall be made to identify and accommodate any disabled or any other special need participants.

Public Meetings, formal and informal, are the backbone of a public involvement program. People expect and need opportunities to discuss agency programs and plans.

A primary objective of early public meetings is to identify issues and concerns that need to be addressed as the project advances. A primary objective of public hearings or public meetings during later stages of a project is to provide details for public review and comment and to discuss the resolution of the issues and concerns that were developed in the earlier meetings, particularly when involved with environmental commitments.

With approval from the Chief District Engineer, the Project Development Manager (PDM) will be directly responsible for initiating all public meetings, public hearings, or other public involvement as early as feasible in the design process. The PDM will determine the level of public involvement for state-aid projects. The PDM has the responsibility and authority for scheduling and holding public meetings and public hearings or for offering the opportunity to request a public hearing.

In compliance with 23 Code of Federal Regulations (CFR) 771.111 (h)(2)(iii), the KYTC will provide the opportunity to request a public hearing or will hold a preliminary line and grade corridor and/or design public hearing for any major federal-aid project. A public hearing or the opportunity to request a public hearing shall be required on any federal-aid project that:

- Requires an Environmental Assessment, Findings of No Significant Impacts (EA/FONSI) or an Environmental Impact Statement (EIS) document
- May require significant amounts of right of way
- May substantially change the layout or functions of connecting roadways or of the subject facility
- May have a substantial adverse impact on abutting property
- May have a significant social, economic, environmental or other effect
- The FHWA has determined that a public hearing is in the public interest

The code specifies that the KYTC is to submit a copy of the hearing transcript to FHWA along with the certification and report.

Projects approved as a categorical exclusion (CE) may utilize a public meeting. When no major relocations are involved and little controversy appears likely, a project approved as a CE may not require any direct public involvement. As such, public hearings are more regulatory in nature than public meetings. Public meetings may be conducted the same way as public hearings, but this is not a requirement.

Before a public hearing is scheduled, the PDM may elect to offer an “Opportunity to Request a Public Hearing.” Offering the opportunity for a public hearing may be appropriate if a public meeting has been recently held and additional information would not be gained.

Design, right-of-way acquisition, and utility relocation phases of project development happen concurrently and are dependent upon one another. Considering this relationship among these phases, representatives from all phases of project development should be present at these public meeting and public hearings.

5.2 PROJECT DELIVERY AND PRESERVATION

5.2.1 Construction

During the construction phase of the project life cycle, public involvement takes on more of a public information role, informing citizens about the award of construction project contracts, lane closures, median changes, business access impacts, work hours and work zones, detours, as well as and ribbon cuttings. The KYTC HDO is responsible for providing up-to-date information and solicits the public’s concerns in order to minimize the disruption to businesses, residents, and commuters during the construction phase.

The KYTC Division of Construction Procurement (DCP) website contains vital information relating to the procurement of highway construction and maintenance projects. This includes the notices for project lettings. Projects are advertised 3 weeks in advance of the letting. The notice is posted on the DCP website and in a statewide paper (Lexington Herald Leader).

The Division of Construction Procurement posts the results of each letting on their website immediately after the letting. These results include the bids and the Engineer’s Estimate for every project in the letting. The Awards Meeting is held approximately 10 days after the letting deadline and this schedule is also on the DCP website. After the Awards Meeting, the website is updated to provide the status of the project, if the project was awarded, and the contractor to whom it was awarded.

The Office of Public Affairs attends the Awards Meeting as their office provides the public notice on larger projects or projects that will have a significant impact on the public. The District Public Information Officers (PIO) disseminate information about the awarded projects and the effects these projects will have on traffic.

Just prior to beginning and during the construction phase, the public must be kept informed of construction-related activities. This includes the use of alternative routes during construction, contacts for additional information, and so on. If a significant amount of time has elapsed (because of funding or other issues) between the end of the project design (and its associated coordination activities) and the start of construction, extra effort may be necessary to remind the public of the upcoming improvements and changes to travel routes. Media advisories, a project social media campaign, project website, dynamic message boards, and sometimes public meetings are examples of possible techniques for public involvement activities during this phase.

5.2.2 Operations and Maintenance

Public involvement during the operations and maintenance phase is typically focused on informing the public about lane closures, work zones, detours, and temporary access impacts, but also utilizing public outreach for certain proposed improvements. Examples of operations activities include but are not limited to the following: modifications to traffic signals, pavement markings, and signage. Some examples of maintenance activities include roadside mowing/landscaping, winter weather activities, pavement or bridge repairs, and drainage system upkeep. The KYTC HDO uses a menu of various possible techniques for public involvement activities during this phase which may include: media advisories, a project social media campaign, specific project website, dynamic message boards, and public meetings as needed. Specific example applications of these techniques are the use of social media to inform the public of specific lane closures in construction and maintenance zones and the use of smart phone apps to report major scheduled disruptions to traffic flows for large work zone issues or for major events such “Thunder over Louisville”, the Kentucky Derby, marathon races, etc.

5.3 EVALUATING THE PUBLIC INVOLVEMENT PROCESS FOR THE PROJECT LIFE CYCLE

Public involvement evaluation is not a single event but a continual review and analysis of the public participation processes, strategies, and techniques. The KYTC is committed to constantly improve its process to achieve its goal of ensuring that anyone wishing to do so have sufficient knowledge and participation opportunities in the transportation decision-making process.

6. CONTACT INFORMATION

As a method to capture comments for this plan review, please click on the following KYTC “Your Turn” website link <http://yourturn.transportation.ky.gov>, and then click on the associated brief survey link for eight short questions concerning this Public Involvement Process (PIP). This survey link will be active from Monday, November 16, 2015 through Friday, January 1, 2016.

Additionally, any individual, agency, or organization may provide written comments at any time concerning the public involvement process to:

State Highway Engineer
Department of Highways
Transportation Cabinet Office Building, 6th Floor
200 Mero Street
Frankfort, Kentucky 40622
Phone: 502-782-4966

For special accommodations or additional information, please contact KYTC Public Affairs at 502-564-3419.

**GUIDELINES
FOR
IDENTIFICATION OF NEW PROJECTS FOR UNSCHEDULED NEEDS LIST**

- **New Projects** may include: Highway, Intermodal Access, and Intelligent Transportation System (ITS) Projects among others.
- Safety projects, bridge projects, etc. should be noted as such and referred to the Highway District Office first. The Highway District Office staff will advise you as to whether this project should be included in the Unscheduled Needs List (UNL) process or referred through another program.
- Check any NEW Project against the current Highway Plan and Unscheduled Needs List first, to make sure that this project has not already been added to the Highway Plan or previously been identified. When the Highway Plan is approved by the Kentucky Legislature, projects should be checked against the approved list of projects.
- All New Projects should include the following:
 - Route Number or “New Route”
 - A thorough description of the project and location (including road or street names, if applicable)
 - The beginning and ending termini
 - Milepoints, using HIS Route Log (accessible on the Internet)
 - Length of project to the nearest thousandth of a mile
 - Any existing data concerning the condition, safety, or capacity of the roadway
 - A clear problem statement for the project
 - Any other information available to describe the purpose, need and/or justification for this project
 - Cost estimates to be prepared by the Highway District Offices, unless otherwise available.
- Purpose Statement - Provide a purpose statement that describes the need for the roadway in terms that can be verified by data analysis or from professional studies. Typical statements can include needs such as capacity, safety, system linkage, geometric deficiencies, transportation demand, social demands, economic development, and intermodal relationships. The purpose statement should focus on the need for a project instead of possible solutions to solve the problems.
- Need Statement - Provide as thorough a description of the project and termini as possible. Consult the Highway District Office for clarification of road/route names of state-maintained routes. The project description should utilize the information presented in the purpose statement to identify the actions to be taken. These may include terms such as capacity additions, safety improvements, corridor completion, alignment improvements, freight movement, and connections to other transportation modes.

- Milepoints - Locate the beginning and ending points of the road improvement as closely as possible. If you have questions, call the Highway District Office or some other local expert to clarify this information.
- New Routes - For new routes on the state-maintained system, contact the Highway District Office and ask for help in determining the point where the new road diverges from an existing road, marking the milepoint and the route number on the project list, and then do the same at the other end. If the new route is to serve as a bypass or draw traffic off roadway, please indicate the existing route that is to be relieved along with the milepoint range affected.
- Project Cost - ADDs do not provide the cost for a totally new project. The Highway District Offices will provide the cost estimates for a project. For MPOs, the Highway District Offices will clarify any cost estimates. Cost estimates should be periodically reviewed and updated to reflect current year construction costs.
- Please provide the total miles of the project as accurately as possible, to the nearest thousandth. For new routes and bypasses where the exact location is not known, please make an estimate as to the expected length of the project.
- Segmenting a New Project - When adding a new project, please try to determine the segments as realistically and logically as possible. Please consult with the Highway District Office staff if in doubt. Further segmenting of projects will not be allowed after the prioritization process begins.
- Segmenting an Existing Project - Segmenting of existing projects is allowed during the Identification/Evaluation Phase only. Please consult the Highway District Office for logical and realistic segmenting of projects.
- Format - Please use the most current electronic version of the Project Identification Form when submitting any new projects and include as much data as possible. You may attach listings of new projects on separate sheets using the same format as the Unscheduled Needs List. Include a new Project Identification Form for each new project or an updated Project Identification Form for projects with changed or updated information.
- Please complete the Project Identification Form as thoroughly as possible. This form is available in electronic format and may be obtained by contacting the Division of Planning at 502-564-7183.

TRANSPORTATION CABINET

Frankfort, Kentucky 40622
www.transportation.ky.gov/

Steven L. Beshear
Governor

Michael W. Hancock, P.E.
Secretary

November 7, 2014

Mr. Jose Sepulveda
Division Administrator
Federal Highway Administration
330 West Broadway
Frankfort, KY 40601

Dear Mr. Sepulveda:

Subject: 2014 Long-Range Statewide Transportation Plan for Kentucky

In accordance with 23 CFR 450.210 and 23 CFR 450.214, the Kentucky Transportation Cabinet (KYTC) has finalized and hereby certifies the 2014 Update of the Kentucky Long-Range Statewide Transportation Plan (LRSTP) for the twenty year period of 2014 through 2035 as the "Official" Long-Range Statewide Transportation Plan for Kentucky. Kentucky has made every attempt to develop this update of the Statewide Transportation Plan in accordance with Federal statutes, regulations, and guidelines, as available in 2014. Please note that the subject Plan supersedes the first Statewide Transportation Plan for Kentucky submitted to FHWA in 1995, the Update submitted to FHWA in 1999, and the 2006 Long-Range Statewide Transportation Plan.

In accordance with the Cabinet's "Public Participation Process for Statewide Transportation Planning," the draft 2014 LRSTP was available for public review for an extended period of forty-five days (May 7, 2014 – June 23, 2014) with copies made available at the offices of the state's fifteen Area Development Districts, twelve Highway District Offices, nine Metropolitan Planning Organizations, and in three locations in the State Transportation Office Building in Frankfort. A separate document, entitled "Public Involvement for the 2014 Long-Range Statewide Transportation Plan", will be provided which fully demonstrates the Cabinet's extensive efforts to provide the public full and complete opportunities for input and comments at key decision points during the development of the 2014 LRSTP. We have revised this Plan to incorporate comments made through the review and comment process. All comments received and public involvement efforts will be included in the Public Involvement Document.

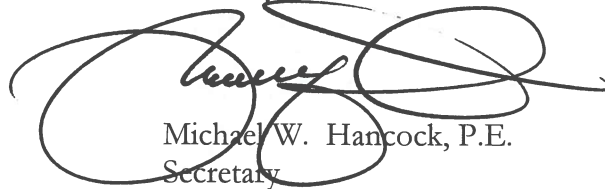

An Equal Opportunity Employer M/F/D

Mr. Jose Sepulveda

Ms. Yvette G. Taylor
Regional Administrator
Federal Transit Administration, Region IV
230 Peachtree, NW
Suite 800
Atlanta GA 30303

Dear Ms. Taylor:

Subject: 2014 Long-Range Statewide Transportation Plan for Kentucky

In accordance with 23 CFR 450.210 and 23 CFR 450.214, the Kentucky Transportation Cabinet (KYTC) has finalized and hereby certifies the 2014 Update of the Kentucky Long-Range Statewide Transportation Plan (LRSTP) for the twenty year period of 2014 through 2035 as the "Official" Long-Range Statewide Transportation Plan for Kentucky. Kentucky has made every attempt to develop this update of the Statewide Transportation Plan in accordance with Federal statutes, regulations, and guidelines, as available in 2014. Please note that the subject Plan supersedes the first Statewide Transportation Plan for Kentucky submitted to FHWA in 1995, the Update submitted to FHWA in 1999, and the 2006 Long-Range Statewide Transportation Plan.

In accordance with the Cabinet's "Public Participation Process for Statewide Transportation Planning," the draft 2014 LRSTP was available for public review for an extended period of forty-five days (May 7, 2014 – June 23, 2014) with copies made available at the offices of the state's fifteen Area Development Districts, twelve Highway District Offices, nine Metropolitan Planning Organizations, and in three locations in the State Transportation Office Building in Frankfort. A separate document, entitled "Public Involvement for the 2014 Long-Range Statewide Transportation Plan", will be provided which fully demonstrates the Cabinet's extensive efforts to provide the public full and complete opportunities for input and comments at key decision points during the development of the 2014 LRSTP. We have revised this Plan to incorporate comments made through the review and comment process. All comments received and public involvement efforts will be included in the Public Involvement Document.

An Equal Opportunity Employer M/F/D

Ms. Yvette G. Taylor

PUBLIC INVOLVEMENT DOCUMENTS AND COMMENTS FOR THIS EDITION OF THE STIP

PUBLIC PARTICIPATION PROCESS

As part of the 30-day public participation process, copies of the “Draft” FY 2017-2020 STIP were available for public inspection at statewide Highway District Offices, Area Development District (ADD) Offices, Metropolitan Planning Organizations (MPOs), and Transportation Cabinet Offices in Frankfort. Letters were mailed to Kentucky’s County Judge/Executives, Mayors of Kentucky’s cities (with population over 5,000), Transit Providers, and persons on our STIP distribution list that stated the locations of the “Draft” STIP that was available for public inspection.

In addition, the “Draft” FY 2017-2020 STIP was available for public review via the KYTC web site, with email capabilities for sending review comments and questions concerning the “Draft” FY 2017-2020 STIP. We received 31 emails with comments regarding the “Draft” STIP.

The Public Notice was published in the following newspapers outlining the 30-day public availability period for public review and comments on the “Draft” FY 2017-2020 STIP.

from the two cities have visited each other, and Montgomery has held a Bastille Day event annually.

"It's great celebrating their national day here in Montgomery," Dobrozsi said. "It brings together our community, adjoining communities, our neighbors and friends. This is what it's really about. This is old time America."

About seven delegations from France have visited, event organizer Marcallene Shockey said. She recalled during their most recent visit in 2014 they took the group to Woodford Reserve and to Sun Watch near Dayton. In 2015, a small Montgomery delegation traveled to Neuilly-Plaisance where the town threw of a Fourth of July celebration.

Shockey said it's meant to be a cultural exchange that fosters support and goodwill between the towns and the countries. Dobrozsi explained that in times of mourning it's especially important to offer support however possible.

"We're a very small part of the equation on the world," the mayor said. "It takes all of us to make this happen."

SAY, WRITE & CRY: "NAM MYOHO RENGE KYO" repeatedly for greater good fortune by simulating Nichiren Daishonin True Buddha, include Goshu, Lotus Sutra or Mahaparinirvana Sutra. Is the sighting of the Udumbara Flower recently, an auspicious event to herald the arrival of a great sage or enlightened being? Honor a Buddhist teacher of the Law/Holy Priest. Do not harass, abuse or strike. If not those that want to be honored, won't be honored properly.

PUBLIC NOTICE OF PERIOD FOR REVIEW AND COMMENT ON THE DRAFT FY 2017-2020 STATEWIDE TRANSPORTATION IMPROVEMENT PROGRAM (STIP) FOR KENTUCKY

The Kentucky Transportation Cabinet (KYTC), in accordance with its established "Statewide Transportation Planning and Project Delivery: Interested Parties, Public Involvement, and Consultation Process," hereby provides notice of the availability of the Draft FY 2017-2020 Statewide Transportation Improvement Program for public inspection, review, and comment for a 30-day period beginning July 18, 2016, and ending August 16, 2016.

The Draft FY 2017-2020 Statewide Transportation Improvement Program will be displayed at the following locations throughout the Commonwealth of Kentucky:

- KYTC Highway District Offices in Paducah, Madisonville, Bowling Green, Elizabethtown, Louisville, Covington, Lexington, Somerset, Flemingsburg, Jackson, Manchester, and Pikeville.
- Area Development District Offices in Mayfield, Hopkinsville, Owensboro, Bowling Green, Elizabethtown, Louisville, Florence, Maysville, Lexington, Owingsville, Catlettsburg, Prestonsburg, Hazard, London, and Russell Springs.
- Metropolitan Planning Organization Offices in Clarksville, Tennessee; Proctor Campbell; Evansville, Indiana (Henderson); Owensboro; Louisville; Lexington; Cincinnati, Ohio (Northern Kentucky); Catlettsburg; Bowling Green; and Elizabethtown.

• KYTC's Division of Transportation Planning Offices located in the Transportation Cabinet Office Building, 5th Floor, 200 Mero Street, Frankfort.

• KYTC's Division of Program Management Office located in the Transportation Cabinet Office Building, 6th Floor, 200 Mero Street, Frankfort.

• KYTC's Web site at: <http://transportation.ky.gov/Program-Management/Pages/2017-Draft-STIP-Book.aspx>

Any individual, agency, or organization may provide written comments to:

Workers who have been given a second chance in the "Jesus and A Job" program joined with other in prayer at the sight of a home in the California Neighborhood that they are renovating as part of the Jobs program. Photos by Bud Dorsey

Community members and others join hands in prayer with Rev. Charles Elliot, Pastor of King Solomon Baptist Church as they celebrate the "Jesus and A Job" program that is putting felons and others who make mistakes on the wrong side of the law. The program provides a second chance in giving those persons employment and a chance to get back on the right side of the law. LMPD Chief Steve Conrad and Louisville Metro Mayor Greg Fischer were also at the event.

Subject: U.S. 25E Corbin

Mr. Rigney,

As you know, U.S. 25E connects I-75 in Corbin with I-81 and I-40 in the south. We get a lot of traffic from motorist travelling to the Smokey Mountains region and the coasts of the Carolina's. I've worked in businesses and I was a server at the Cracker Barrel in Middlesboro. The biggest complaint I have heard from motorists is too many traffic lights. That is why I am reaching out to you. U.S. 25E in Corbin has something like fourteen traffic lights! That is more than any town between Corbin and the I-81 junction in the south. I have heard talk of a bypass around Corbin to the north. This is a great idea. I would simply reroute US 25E around Corbin and create a new exit with I-75. Rerouting the roadway and keeping it the same name would be less confusing for our tourists travelling through our area. But something needs to be done and soon. I believe Barbourville has four traffic lights, Pineville three, Middlesboro three, Harrogate, TN has four, Tazewell, TN has two and Morristown has one just outside of town. (I may have left one out but that's close). That's seventeen and Corbin has around fourteen! Please talk with your team, Representative Hal Rogers, Senator McConnell and anyone else who can help us. We are losing motorists. This route was the buzz once construction was completed making this a four lane highway. But the buzz has calmed down now that motorists have travelled this route and came face-to-face with the traffic lights. We need our tourists travelling through a dying coal country to give us a little hope.

Regards,

Dear Ms. Curry,

It has come to my attention that you are the Ky State contact concerning funding of the above project and that in 2019 allocation has been made to purchase land for this project. Is this the case?

We have repeatedly asked which of the four routes have been chosen and have not yet received an answer to this question. Three of the four destroy our farm and the threat of all of them makes it impossible for us to sell. For four generations, the [REDACTED] has been preserving this beautiful river place and the wildlife here. There is a grandfathered development in the river bottom and an greatly improved cattle operation in the higher ground. We have build a new log home here which is our farm house and retirement house. There is a cabin build by the Boone family and this is proven Boone owned land.

Our basic roads for getting to a store or medical help are in great disrepair and are too dangerous to travel at night. Why are these roads considered a need for the funds?

[REDACTED]

We look forward to hearing from you.

Ms. Curry,

I understand that you should receive the comments on the proposed construction of a connector from Nicholasville to I-75.

This project is an absolute waste of money!!! Unnecessary, cannot be justified, and another example of more land disappearing forever under another road. It is too expensive besides. Dollars spent on any part of the project should be directed elsewhere.

Subject: project 7-8404

Hello Ms. Curry,

I am writing to you to comment on the above state highway project — the proposed connector road between U.S. 27 and I-75 in Jessamine and Madison Counties.

The STIP for FY 2017 -FY 2020 contains \$15 million for design, right-of-way acquisition and utility relocation.

I live in the affected area and I have attended numerous meetings and public forums concerning this project.

The most recent cost estimate for this project that I am aware of (a couple of years ago) was in excess of \$400 million.

In this day and age when we can barely take care of infrastructure we have it is beyond comprehension that a project of this magnitude is still being seriously considered.

What's more, building this connector road will be of marginal benefit to the people and businesses of Jessamine Co. and Central Kentucky. Its proponents claim a saving of 20 or so minutes for gaining access to I-75 from Jessamine Co. Can this "saving" be worth what will surely approach a half billion dollars? I certainly think not.

Additionally the construction of this road would involve building bridges over ecologically sensitive areas along the Kentucky River palisades and Marble Creek.

This road is a bad idea whose time should never come.

Thank You

[REDACTED]

Hello,

I am writing to protest study project of \$15 million dollars for Project 7-8404. It is a waste of the taxpayers' money. Why don't we take that money to help pay for the bridge going over the Ohio River from Covington to Cincinnati before it collapses and kills motorists. Thank you. [REDACTED]

Subject: I-75 Connector

To Whom it may Concern,

In reviewing the projects listed in the STIP, I see there is still an enormous amount of money dedicated to the I-75 Connector project. I personally disagree with the need for this road and I am concerned about the numerous negative impacts that the construction of this road would create. The project has been on hold for quite some time now, but the monies continue to be allocated for it. By allocating these large sums of money toward this project, many projects will not make the list. The Transportation Cabinet's own survey showed that the citizens of Kentucky want more money to be spent on repairing the current transportation infrastructure rather than building new roads. There is approximately \$15 million in the STIP for the I-75 Connector. I personally feel that that money would be better used/allocated for needed repair projects such as bridge repair/replacement. The number of deficient bridges in each county is astonishing, yet the plans to repair them are minimal.

Please consider removing the I-75 Connector money from the updated STIP.

Follow Up Flag: Follow up
Flag Status: Flagged

Dear Ms. Curry,

While I do not live in Jessamine County , I feel compelled to comment on the plans to connect Nicholasville with I-75 by destroying the wonderful land that the road is scheduled to traverse.

For nearly 50 years I have been involved with Girl Scout Camp Shawano that has brightened the lives of thousands of Girl Scouts who have a love affair with the land. Shawano is at the end of Newman Rd which is a very short distance from the proposed Connector road. No longer will young women experience the tranquility that exists there with the advent of such an invasion.

Why not expend that money on road repair and improvements without causing new destruction of our precious land. Marble Creek is a treasure that should never be compromised. We should be preserving the Palisades, not destroying them.

Sincerely, [REDACTED]

Good Morning,

As an very active and well informed member of the Disconnectors, a grass roots effort to stop the I 75 Connector, I strongly oppose any further efforts to continue the proposed road project between the White Hall exit on interstate 75 to Nicholasville. Too much time and money has been spent on a this project, resources that should have been spent on maintaining, repairing or widening busy roads and bridges in Jessamine and Madison Counties.

This project keeps resurrecting itself and should have been permanently shelved years ago.

Subject: I-75 Connector in July 2016 STIP Draft

Follow Up Flag: Follow up
Flag Status: Flagged

Good Morning,

In reviewing the current STIP Draft I see that the **I75 Connector project** from Nicholasville to Richmond continues to raise its ugly head and is threatening to siphon another **\$15million** from our already way overspent government. This is an absurd allocation of sparse resources and an insult to every hard working American taxpayer. Stop this nonsense. Too much time and money has been spent on this project. These resources should be spent maintaining, repairing, and improving those much used winding, hilly, dangerous roads and bridges that we all travel every day going to our grocery stores, schools, friends, and businesses in our own communities, not on this way too expensive boondoggle to improve connectivity between Jessamine and Madison Counties that the residents of these counties will use only occasionally.

[REDACTED]
[REDACTED] What is with the continued spending of this kind of money on this project?

Let the record show that I and virtually all of my friends in Jessamine County are opposed to spending another dime or another minute on this project while we drive narrow dangerous roads within our own communities every day.

Respectfully,

[REDACTED]

Subject: Comment on STIP (Item 7-8404)

Follow Up Flag: Follow up
Flag Status: Flagged

Ms. Curry:

Thank you for the opportunity to comment on the State Transportation Improvement Plan. It is so important that citizens be given the opportunity to comment on the processes of government and it is too bad that so few take the opportunity.

I am writing as a taxpayer in the Commonwealth and as a resident of Nicholasville, Jessamine County. My opposition to Item No. 7-8404, the I-75 Connector, in Jessamine County, is strong. This project is a waste of taxpayer dollars and will do little to nothing to alleviate or reduce traffic along the US 27 corridor in northern Jessamine County.

The costs of the project should be prohibitive, especially as there is failing infrastructure elsewhere in the Commonwealth. It makes little sense to construct new roads while the bridges and roads we have are deteriorating. The advantage of connecting Nicholasville with the interstate only benefits those heading southbound on I-75; there will be no time gained for those needing to travel east, west, or north.

Additionally, the environmental and cultural/historical impact of this project would be huge. Once a new major road is cut, development will naturally follow further destroying the Bluegrass region which was designated as an endangered site in 2006 by the World Monuments Fund.

Over the years, I've written several posts in opposition to the proposed I-75 Connector that would slice through Jessamine and Madison counties to connect Nicholasville with the interstate. The proposed road is expensive, wouldn't add much time savings for travelers, would destroy natural landscapes and historic places, and is an all-around bad idea.

In addition to being a practicing attorney, I maintain a historic preservation and Kentucky history website called the Kaintuckeean. The site has been profiled in the Herald-Leader and has won an award from the Blue Grass Trust for Historic Preservation. In one post, I wrote about how the [Economies of I-75 Connector Don't Add Up](#). The proposed cost of this 13-mile road is about \$400-500 million. All to build a new road while existing infrastructure needs critical repairs. In another post, [Marble Creek is a Jessamine County Treasure](#), I observed that "once lost, natural and historic resources cannot be created." There is too much to lose with the connector. By reference, I incorporate the full text of these posts in my comment.

Thank you again for the opportunity to comment and voice my opposition to Item 7-8404, the I-75 Connector.

Ms. Curry,

As a citizen of Jessamine County, I would like to make a stand against item No. 7-804, the I-75 Connector in Jessamine County. It is an expense the state and taxpayers don't and shouldn't waste money on. Myself and most of the citizens and neighbors I've spoken within heard discuss the proposed connector quite frankly don't want it. When looking at where to spend roads money in the coming years, please don't make this a consideration.

Thank you for your time,

Ms. Curry,

Good afternoon, I am writing to express my opposition to STIP Item No. 7-8404 in Jessamine County, the I-75 Connector. The proposed road is expensive, wouldn't add much time savings for travelers, would destroy natural landscapes and historic places, and is an all-around bad idea.

Thank you

Dear Ms Curry,

I am opposed to the I75 connector. It will cost far too much money and cross many environmentally sensitive areas.

Not enough people will benefit to justify the destruction of historical, natural, and agricultural resources.

We would end up with a wasteful road and far too many resources depleted.

Keep rural Kentucky rural!!

My friends and family are in hearty agreement with me.

Sincerely,

[REDACTED]

Dear Sherry!

First I want to say thank you for taking emails and listening to the desires of the Jessamine County citizens.

I grew up in Lexington but 20 years ago when my 4 children were still in their teens we moved to a beautiful, calm, serene, and slower pace of life in Jessamine County. We worked hard to build our home and have loved being part of a smaller town away from the noise and busyness of a larger city.

I ask you today to please help us end the craziness of the I 75 connector...(Item No...7-8404). On a personal level I am devastated that the connector is proposed to begin across the road from my home. On a historical level I am saddened that we would take this road through areas of the county that would disturb history, nature, Marble Creek, and the beauty of the land. On a cost level it is beyond ridiculous to ask tax payers to pay for this connector...the cost far outweighs the convenience that a small amount of people want for access to a major highway. Any accesses out of Lexington whether going north or south are simply a few miles down the road....and believe me....tax dollars need to be spent on much needed infrastructure items. It truly is just plain ludicrous to build this connector.

Please be our voice and say NO to this connector. The majority of Jessamine County citizens feel much like I do and for once would love to have our voice and concerns heard.

Thank you again!

Dear Ms. Curry,
I am writing to express opposition to the I75 connector road from Nicholasville, state project #7-8404.

This is a project that will destroy historical, natural and agricultural resources for short-sighted construction gain. The benefit of this road is questionable at best, and cannot be proven. The costs are extreme and would take money from other projects that have already been started that do not have adequate funding to be completed.

Please allocate resources effectively to complete current projects, rather than planning for the destruction of our precious state resources and environment.

Sincerely,
[REDACTED]

Dear Ms. Curry;

As a member of the I-75 Connector Citizens Advisory Committee, I have wondered what happened to the DOT's promise that they were committed to following a process with complete transparency and with information available to all citizens. We have been waiting since June of 2015 to learn which of the four remaining routes has been chosen and to hear anything about the status of the project. And yet, two million dollars has been allocated in 2017 for design and ten million for right-of-way acquisition. With the huge amount of money badly needed for many infrastructure projects in Kentucky and the lack of information and clarity about this particular project, I respectfully suggest that allocating any money at all to the I-75 Connector at this time is at best premature and at worst a failure to honor a promise of honesty and transparency made to the Citizens Advisory Committee and the citizens of Jessamine and Madison Counties.

Sincerely,

I would like to express my concerns about the money that continues to be considered for this I-75 connector road . It is not a road that needs to be built . There are far too many other road projects worth spending the exorbitant amount of money that this road would cost . These other projects such as widening and repairing existing roads and bridges need this money first before any unneeded I-75 connector project is considered .

Thank you

Subject: Road Improvement Plan - Item No. 7-8404 in Jessamine County.

Follow Up Flag: Follow up
Flag Status: Flagged

Dear Ms. Curry,

I would like to express my opposition to the I-75 Connector Plan No 7-8404 in Jessamine County. At a time when infrastructure repairs are badly needed in Kentucky for existing roads and bridges, at a time when money is sorely needed in the teacher retirement fund, at a time when services for those in need of health care are being slashed, it seems ill advised to spent tens of millions, then hundred of millions of dollars on a project that will benefit very few people and all in the name of saving up to ten minutes of driving time. I strongly suggest this money be put to better use on other highway projects, or as the state seems to do on occasion, move dedicated money from one source into a different area of need. This project will also cause extensive damage to the natural landscape and historic sites along Marble Creek, the Kentucky River Palisades, and in Madison and Jessamine Counties. It will also disrupt a rural landscape that is part of the charm and attraction of Central Kentucky.

The planning and discussion of this project was supposed to include a certain amount of transparency and openness to the public and to input. But it seems if specific sums of money are already being suggested before there has been any input, perhaps a bit of window cleaning needs to take place for the taxpayers of the state to have a better view.

Please pass along this feedback to the group making these preliminary plans on this project and thank you for your time.

> I am writing to say that placing more money toward the I-75 connector is a huge mistake. There are already many roads and bridges in the state of Kentucky that badly need repairs and updating.

> I also wanted to stress the unnecessary need for this particular route. The \$200,000 scope study revealed that there are like 30 cars a day that commute this route (169- to spears rd- to jacks creek) every day. It seems like the results from the scoop study should be taken with more intellect than it has been. The study showed that this road in not need, I would like to ask the question, why would we designate more money to this road project? Widening/ straightening Jacks Creek Rd instead (safety first right?) seems like it would achieve the same goals with significantly less funds.

Dear Ms. Curry,

I am concerned about the amount of money being allocated for road development in our state. The roads we have are in great disrepair and building new roads is a waste of money. From my experience, these highways have little traffic, except for the Interstates. I do not understand why we would want to build new roads that will have to be maintained in addition to our old roads that people rely on for local commutes. Who is this for, anyway? I oppose this plan. My tax dollars could be better spent by protecting our natural resources and maintaining our existing roads.

If we really want to get ahead, we need to consider a more stable and efficient energy grid that will be able to support the upcoming alternative energy plans of our utilities companies.

Sincerely,
[REDACTED]

Dear Ms Curry,

I am really not sure what motivates the state in pursuing the construction of yet another eyesore and future maintenance obligation.

I realize that progress comes with its pains, but this is one pain people in Madison and Jessamine counties can do without.

Let's repair and maintain what we have and not burden the taxpayer with future obligations while adding yet another way to gobble up and split up old family farms.

Sincerely

Dear Sherry Curry,

As a tax paying citizen of this great country I'd like to express my opposition to the proposed monies spent/will spend for Item #7-804, I-75 Connector in Jessamine (and Madison) Co - - this is a total waste of taxpayer money, a waste of government time and effort spent on this proposal where the monies could be spent more wisely on existing infrastructure in need of critical repairs and improvements, this would destroy forever natural landscapes, historical places and critical farmland for future generations. This is an extremely and horrendously bad idea from start to end and I'm hoping that "BIG Government" will listen to the people living, working and enjoying the beautiful land that this proposed road would destroy.

Thank you,

Subject: Time to put a stake in the heart of the Vampire Road

Follow Up Flag: Follow up
Flag Status: Flagged

As a tax payer and longtime resident of Central Kentucky I am writing to express my continuing opposition to the proposed I-75 connector between Nicholasville and Madison County. That \$15 million is earmarked for the continuation of such a destructive, low ROI project in today's economic climate is simply incomprehensible.

As a marketing professional I am well aware of the fact that tourism is Kentucky's signature industry creating a colossal impact that trickles through our entire economy. The impact numbers in the recently released study conducted for the Tourism, Arts & Heritage Cabinet by Certec, Inc. tell an impressive story.

The tourism and travel industry contributed nearly \$11.7 billion to Kentucky's economy in 2011. Direct expenditures by tourists accounted for \$7.4 billion of this total. The 2011 tourism industry generated over \$1.224 billion in tax revenues to government – \$1.06 billion to the state and \$157.5 million locally.

Scenic beauty is invariably cited as the number one reason visitors come to Kentucky. And visitors mean jobs -- a total of 169,932 jobs in Kentucky resulted from the industry in 2011 and direct expenditures from tourists created 118,917 of these jobs. The tourism-generated jobs provided over \$2.6 billion in wages to Kentucky workers.

In 2011, total travel expenditures in Jessamine County totaled \$83,635,372 and in Madison County, \$154,300,628.

I find it hard to understand why elected officials in these counties, rather than focusing on enhancing their appeal to visitors are actually bent on destroying the very Bluegrass countryside that puts our state on the world tourism map. And why, rather than working to capture even more visitor revenue, they seem intent on squandering \$350 million of taxpayer dollars on a road that will, at best, save truckers a mere 15 minutes in travel time.

The unspoiled beauty of the Kentucky countryside attracts visitors from around the country and across the globe. What a shame we appear to have elected the few people who appear to be immune to its charm – and blind to its value. I trust you will do the right thing and pull the plug on this ill-considered project before it wastes any more money our economically strapped state can ill afford to squander.

It's time to finally put a stake through the heart of the vampire road.

Dear Sherry,

I am a resident of Jessamine County and reside [REDACTED]. The connector will not be near my residence, but I understand you were interested in comments about the road.

I am very much opposed to the road. Funding to even study further seems such a waste of our hard earned taxpayer dollars.

The roads and infrastructure in Jessamine County would benefit from the monies allocated to such an unnecessary and wasteful proposal.

I found a statement in the Summer 2106 Jessamine Matters, page 3, attributed to an unnamed Jessamine County Judge/Executive "...Jessamine County is dealing with the fact that so many of our roads and bridges have been in place for decades. Those roads and bridges are now getting older and falling in disrepair. At the same time, our county budget is under a tremendous strain, so we are working to do more with less."

I agree with his perception and ask that the state not allocate any further funding to this project.

Thank you,
[REDACTED]

Dear Director Wray:

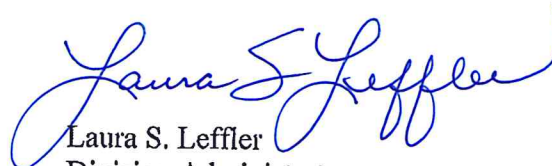

This is in response to your letter dated May 1, 2015 regarding requests for USDOT conformity determinations for each Ohio air quality area. We have completed our review of the conformity documentation to support the adoption of Resolution 2015-09 by the Ohio Kentucky Indiana (OKI) Regional Council of Governments. The conformity documentation includes analyses to demonstrate conformity for the 8-hour ozone and PM2.5 standards for the Cincinnati-Hamilton, Ohio area.

Based on our review, in consultation with the United States Environmental Protection Agency (EPA) and through coordination with the Kentucky and Indiana Divisions of FHWA, we find that the OKI 2016-2019 Transportation Improvement Program and 2040 Metropolitan Transportation Plan conform to the applicable state implementation plan in accordance with the provisions of the EPA's Transportation Conformity Rule (40 CFR Parts 51 and 93).

In Reply Refer To:
HPD-KY

Mr. Jack Couch, Executive Director
Louisville Area Metropolitan Planning Organization
c/o Kentuckiana Regional Planning and Development Agency
11520 Commonwealth Drive
Louisville, KY 40299

Dear Mr. Couch:

The Kentucky Division Office of the Federal Highway Administration (FHWA) and Region 4 of the Federal Transit Administration (FTA), in consultation with the Indiana Division Office of the Federal Highway Administration and Regions 4 and 5 of the United States Environmental Protection Agency (EPA), have reviewed the following documents:

**Amendment 4 to the 2015-2018 Transportation Improvement Program (TIP) and
Amendment 4 to the 2035 Metropolitan Transportation Plan (MTP) for the
Louisville Area Metropolitan Planning Organization (MPO)
(MPO approval documented on August 27, 2015 resolution)**

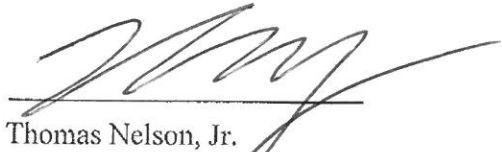

The Kentucky Environmental and Public Protection Cabinet's Division for Air Quality, the Kentucky Transportation Cabinet's Division of Planning, the Kentucky Transportation Cabinet's Office of Transportation Delivery, the Louisville Metro Air Pollution Control District, and the Transit Authority of River City also had an opportunity to review and comment on the aforementioned documents.

We found that this amendment can rely on the regional emissions analysis that was used to support the most recent conformity determination made on April 1, 2015. It was further found that this document meets the five primary criteria of the Transportation Conformity Rule:

- use of the latest planning assumptions,
- use of the latest emissions model,
- use of appropriate consultation procedures,
- consistency with the mobile source emission budgets in the State Implementation Plan (SIP), and
- provisions for timely implementation of transportation control measures in the SIP.

It was also found that these documents met the criteria outlined in the Transportation Conformity Rule Revisions for the PM_{2.5} Standards.

We therefore find that the aforementioned document conforms to the 1997 PM_{2.5} annual standard.

**RECREATIONAL TRAILS
PROJECTS**

2015 RECREATIONAL TRAILS FINAL SELECTION LIST

County	Project No	Project Name	Applicant	ADD	CD	Project Description	RTP Request	Local Match
Breathitt	24	Breathitt/Knott OHV Connector Trail	Breathitt County Fiscal Court	Kentucky River		Construct 20 miles of ATV trail 4-6 ft wide with crushed rock surface beginning at the Arrowhead Campground/T railhead in Breathitt Co to nearly 100 miles of OHV trails in Knott Co. Need to obtain permanent easements from willing landowners..	\$100,000.00	\$25,000.00
Carter	32	Olive Hill Downtown Trail	City of Olive Hill	FIVCO	5	Extend dirt trail and purchase and install a foot bridge.	\$12,500.00	\$12,500.00
Carter	3	Olive Hill Restroom/Shower & Trail Restoration	City of Olive Hill	FIVCO	4	Construct a 24x24 restroom/shower facility at the trailhead along with installing security cameras, landscaping, signage, and trail restoration.	\$32,500.00	\$32,500.00
Clark	18	Winchester Urban Trail	City of Winchester	Bluegrass	6	Construct 1/2 mile asphalt trail, 10 ft wide for walking, biking and skating. The trail will link to 9.1 miles of urban pedestrian and bicycle trails. Trail will be located in the Community and Harmon Parks and City owned parcel of land.	\$55,530.00	\$55,530.00
Estill	19	Kentucky River Park & Recreation Center Phase III Trails Project	Estill County Fiscal Court	Bluegrass	6	Construct 1500 ft of asphalt trail, 9 ft wide. There is 2.7 miles of existing trail in the park. Trail uses are for walking and biking. Project includes 2 pedestrian bridges and paving existing trails and a 68x108 trailhead parking lot.	\$50,520.00	\$50,520.00
Floyd	8	Elk Horn Park Switch Back Connector Trail/ Maintenance	Floyd County Fiscal Court	Big Sandy	5	Construct .75 mile trail, 8 ft wide of earth surface and provide maintenance to 12 miles of existing trails for walking and biking.	\$16,350.00	\$16,560.00
Green	28	Greensburg Greenway Belt	City of Greensburg	Lake Cumberland	2	Construct asphalt trail, 5 feet wide for walking, biking, and access to canoeing.	\$65,675.00	\$108,901.00
Leslie	15	River Front Park Walking Trail	City of Hyden	Kentucky River	5	Construct a 1 mile trail, 5 ft. wide, asphalt trail for walking that connects to an existing 1/4 mile walking trail at the City of Hyden's Riverside Park.	\$100,000.00	\$144,000.00
Letcher	7	Downtown Trail of the Tanglewood Down Hill	City of Whitesburg	Kentucky River		Construct 5 miles of new trail, 20 ft. wide. Project includes 4 foot bridges, and signage. Trail surface is a recycled asphalt millings and limestone dust for walking and biking.	\$70,200.00	\$96,300.00
Madison	6	Battle of Richmond Recreation & Interpretive Trail Project	Madison County Fiscal Court	Bluegrass	9	Construct 1.5 miles of asphalted trails, 10 feet wide for walking and biking located at the Battle of Richmond Site. The project includes trailside facilities (signage/interpretive/rules, benches, trashcans).	\$75,000.00	\$75,000.00
Perry	28	Rowdy OHV Looped Trail System	Perry County Fiscal Court	Kentucky River	5	Construct 20 mile looped OHV trail system that will be part of a four county initiative between Breathitt, Knott, Perry, and Magoffin Co. motorized trail system that will be known as the Breathitt - Knott Connector Trail, Phase 2.	\$96,000.00	\$24,000.00
Pulaski	5	Eagle Scout Trail System Maintenance Project	Pulaski County Fiscal Court	Lake Cumberland	5	Repair an existing 8.5 miles of trail, that is 6-8 ft wide including bridge and culverts, installing signage, and landscaping. Trail use is for walking.	\$25,000.00	\$25,000.00
Todd	4	Guthrie Trailhead Facility and Improvements	City of Guthrie	Pennyrile	1	Construct a Trailhead/Trailside facility- Need to amend project description to take out what is not eligible.	43,000.00	100,000.00

*Clarksville MPO average was estimated by multiplying the average maintenance expense for Christian County by the ratio of the number of functionally classified lane-miles in the Kentucky portion of the MPO to the number of functionally classified lane-miles in Christian County.

**Bowling Green FY 2016-2020 TIP
Financial Plan**

Quality Standards (NAAQS) for wide-spread pollutants from numerous and diverse sources considered harmful to public health and the environment. The Clean Air Act established two types of national air quality standards. Primary standards set limits to protect public health, including the health of at-risk populations such as people with pre-existing heart or lung disease (such as asthmatics), children, and older adults. Secondary standards set limits to protect public welfare, including protection against visibility impairment, damage to animals, crops, vegetation, and buildings. The Clean Air Act requires periodic review of the science upon which the standards are based and the standards themselves (<http://www.epa.gov/ttn/naaqs/>).

In November 2014, EPA recommended strengthening the National Ambient Air Quality Standards (NAAQS) for ground-level ozone, based on extensive scientific evidence about ozone's effects. EPA proposes to lower the standard from the current value of 0.075 ppm to a value within the range of 0.060 ppm to 0.070 ppm.

Areas will have two years after official designations are made to show conformity. It is also proposed that the designations be based on data collected during the three-year period 2014 - 2016. Based on 2012 - 2014 data for the Bowling Green area (the most current three-year period for which data is available), if the standard is set at 0.070 ppm, the area would have no air quality conformity issues. If the standard is set at 0.065 ppm, then Warren and Edmonson Counties may be designated as nonattainment. If the standard is set at 0.060 ppm, then Warren, Edmonson, and Simpson Counties may be designated as nonattainment.

Financial Constraint

Transportation planning regulations require that Transportation Improvement Programs be financially constrained. That is, this document should include the estimated cost associated with each project and the anticipated revenue source. Additionally, only those projects for which a current or proposed revenue source can be identified may be listed, thus ensuring a balance between total project costs and revenues. This requirement helps the MPO and State develop a deliverable program of projects.

Although the Bowling Green – Warren County MPO has significant input in the identification of needs and the determination of project funding priorities, it should be understood that the MPO does not have direct control over any source of funding identified herein. Final decisions regarding the allocation of funds (project selection, revenue source, schedule, etc.) are made by the KYTC and the State Legislature. The roadway projects included in this TIP have been coordinated with the projects included in the KYTC 2014 Highway Plan as approved by the 2014 Kentucky General Assembly. All projects included in the TIP are also a part of the MTP. Thus, the 2016-2020 TIP projects have undergone the same prioritization process used to rank projects in the MTP.

In order to address the full range of transportation needs, on a statewide level and within the Bowling Green – Warren County urbanized area, KYTC makes use of a variety of available revenue sources (or funding types). The revenue sources eligible and currently allocated for use within the Bowling Green – Warren County area are identified on *page 6*.

The specific projects shown in the Project Listing tables beginning on *page 13* have been identified by KYTC, along with associated programmed or planned revenue source and schedule

in the KYTC Statewide Transportation Improvement Plan (STIP) and/or the Kentucky Highway Plan. It should be expected that this program of projects will be subject to periodic changes in schedules and/or revenue sources due to the adjustments that must be made to balance costs and revenues (or maintain financial constraint) at the statewide level, and also due to various project related delays. These changes will be initiated by KYTC and will be reflected in this document by TIP Administrative Modifications or Amendments.

This plan is financially constrained, including only projects with designated federal or state funding. Timetables shown on these projects are estimated based upon available funds and were developed cooperatively with the MPO, KYTC, and Public Transit Agencies. Funding is allocated across program years for each TIP project. Funding years are consistent with MPO priorities. The table on *page 7* provides a summary of costs and revenues by funding type and year (all costs and revenues here and elsewhere in this document are shown in Year-of-Expenditure dollar values).

Project Types and Project Funds Classification

The type of funds to be utilized for the projects involving federal and state funds are in accordance with the Moving Ahead for Progress in the 21st Century Act (*MAP-21*) and are abbreviated as follows:

Federal Transit Programs

FTA – Federal Transit Administration

Section 5307 – Capital Projects and Operating Assistance for Transit Systems

Section 5310 – Enhanced Mobility for Seniors and Individuals with Disabilities

Section 5339 – Bus and Bus Facilities Program

Federal Highway Programs

BRO – Federal Bridge Replacement on Federal System

BRX – Federal Bridge Replacement off Federal System

BRZ – Federal Bridge Replacement Local System

HES – Hazard Elimination System

HPP – High Priority Projects

HSIP – Highway Safety Improvement Program

IM – Interstate Maintenance

KYD – Demonstration Funds to Kentucky

NH – Federal National Highway System

NHPP – National Highway Performance Program

RRP – Safety – Railroad Protection

RRS – Safety – Railroad Separation

SAF – Federal Safety Funds

STP – Surface Transportation Program

TAP – Transportation Alternatives Program

State Programs

SP – State Construction Funds

SPB – State Bonds

SPP – State Construction High Priority

TABLE 1 SUMMARY OF HIGHWAY FUNDING TYPES Bowling Green-Warren County MPO Transportation Improvement Program FY 2016-2020												
Funding Type	FY 2016		FY 2017		FY 2018		FY 2019		FY 2020		TIP Total

**Cincinnati-Northern KY FY 2016-2019 TIP
Financial Plan**

CHAPTER 3: FINANCIAL

Fiscal Constraint for Federal Funds Allocated to the OKI Region

An additional feature of the TIP is that the projects listed in the document are financially constrained. All highway and transit programs list associated funding sources and amounts that are needed to complete the projects. These sources include federal, state and local funds that have been committed to a project in a specific fiscal year. In some cases, matching funds may be available only in certain fiscal years and OKI works with sponsors to match the needed federal funds with local funds in a required fiscal year.

In Ohio, ODOT allocates STP and TAP federal funds to OKI for the fiscal years covered by the current TIP. Table 4 illustrates the federal funding, by type, allocated from ODOT to OKI for fiscal years 2016 through 2019 and the associated programmed amounts.

The Ohio fiscal analysis shows that the OKI budget is fiscally constrained in Ohio during the period fiscal year 2016 through 2019. Transfers between OKI STP and TAP funds are completed during the period with all original amounts of funding returned to their respective funding levels. The Ohio CMAQ program is now a statewide program for the MPO's and fiscal constraint is demonstrated on a statewide level rather than on an individual MPO level.

Table 5 provides information on the fiscal constraint analysis for Northern Kentucky. The Kentucky Transportation Cabinet sub-allocates SNK and TAP federal funds; the Cabinet does not pass through CMAQ funding to the MPO's, nor does it require constraint against a pass-through obligation ceiling. The comments listed in the table provide information on the specific highway or planning projects that are utilizing the sub-allocated SNK federal funds for each fiscal year covered with the current TIP. The table documents that the Kentucky portion of the region has achieved fiscal constraint for pass-through funds with the FY 2016 – 2019 TIP.

Table 6 provides information on the fiscal constraint analysis for the Indiana portion of the region. The Indiana Department of Transportation (INDOT) sub-allocates STP, CMAQ, HSIP and TAP federal funds to the MPO's in Indiana. The table demonstrates that the Indiana portion of the region has achieved fiscal constraint with pass-through funds between FY 2016 – 2019.

Fiscal Constraint for Federal Funds Allocated to the States

The majority of projects shown in the highway section of the TIP are financed through ODOT, KYTC and INDOT managed funding sources. The fiscal constraint analyses for these projects are recorded in the State Transportation Improvement Program (STIP) for each of these states.

Tables 7 through 9 provide a listing of programmed highway projects by funding category for all the highway projects in the Ohio, Kentucky and Indiana portions of the region using federal funds for any phase of the development during the four year period 2016 - 2019.

Fiscal Constraint for Funds Allocated to Transit Agencies

There are six transit agencies in the OKI region: Butler County RTA, Clermont Transportation Connection, Middletown Transit System, SORTA, TANK and Warren County Transit System. In addition, OKI acts as the designated recipient for the Section 5310 program. These funds have been awarded to various private non-profit agencies in the region. Administration of these projects, in conjunction with SORTA, will continue until the programs are completed and the federal funds have been depleted.

All of the transit agencies in the region have transit tables that illustrate anticipated funds and projects from FY 2016-2019.

Table 10 demonstrates fiscal conformity for FTA Section 5307 funds for all six transit agencies in the OKI region.

**Evansville-Henderson FY 2016-2019 TIP
Financial Plan**

Federal regulations require the programming of state and local transportation programs and projects into a transportation improvement program (TIP). This section will provide explanations of the various types of funding options, list specific sources of federal, state, and local transportation funds, and update current funding and revenue levels in the Evansville MPO Planning Area.

FUND TYPES

There are a variety of funding options available for programmed improvements in the TIP. The majority of transportation projects programmed in the TIP involve a combination of federal, state, and local funding sources.

CHAPTER 3

FUNDING THE TIP

transportation improvement program / 2016-2019

FEDERAL FUNDS

Federal transportation funding is authorized through the federal transportation funding bill (MAP-21), as described in Section 1. MAP-21 restructured the core highway formula programs. Activities carried out under some existing formula programs – the National Highway System Program, the Interstate Maintenance Program and the Highway Bridge Program are incorporated into the new core formula program structure comprised of: National Highway Performance Program (NHPP), Surface Transportation Program (STP), Congestion Mitigation and Air Quality Improvement Program (CMAQ), Highway Safety Improvement Program (HSIP), Railway-Highway Crossings (set-aside from HSIP) and Metropolitan Planning. MAP-21 also established a new formula program, Transportation Alternatives (TA), with funding derived from the NHPP, STP, HSIP, CMAQ and Metropolitan Planning programs. The TA program encompasses most activities funded under the Transportation Enhancements, Recreational Trails, and Safe Routes to School programs under SAFETEA-LU.

Federal fiscal constraint for the FY 2016-2019 TIP is demonstrated in Table 2. Federal funds are within the anticipated Federal funding levels, indicating fiscal constraint for local federal-aid projects. The various federal surface transportation funds available to the Evansville-Henderson Urbanized Area reflect funding from the current bill, as well as funds from earlier bills, include:

NATIONAL HIGHWAY PERFORMANCE PROGRAM (NHPP)

This program is newly authorized in MAP-21 and provides support for the condition and performance of an expanded National Highway System (NHS), for the construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a State's asset management plan for the NHS. The federal share is up to 90% for projects on the Interstate System and up to 80% for all other projects. Beginning

in FY 2016, the NHPP share for a state that has not developed and implemented an asset management plan will be reduced to 65% until it develops and implements its plan.

NATIONAL HIGHWAY SYSTEM (NHS)

These funds are dedicated for roadway facilities of national importance, due to direct access to interstates, transportation centers, and defense facilities. The pre-MAP-21 NHS includes the Interstate system and all federal and state highway facilities classified as principal arterial. In order for a project to qualify to receive NHS funding, it must be initiated by the state DOT. Therefore, priority for NHS projects is also set by the state. Interstate construction and maintenance projects are eligible to receive 90% federal obligation, while other NHS project types are eligible for 80%.

SURFACE TRANSPORTATION PROGRAM (STP)

MAP-21 continues the STP, providing funding that may be used by States and localities for projects to preserve or improve conditions and performance on any Federal-aid highway, bridge projects on any public road, facilities for nonmotorized transportation, transit capital projects and public bus terminals and facilities. Most current STP eligibilities are continued, with some additions and clarifications. Activities of some programs that are no longer separately funded are incorporated, including transportation enhancements (replaced by "transportation alternatives" which encompasses many transportation enhancement activities and some new activities), recreational trails, ferry boats, truck parking facilities, and Appalachian Development Highway System projects (including local access roads). A portion of STP funds (equal to 15% of the State's FY 2009 Highway Bridge Program apportionment) is to be set aside for bridges not on Federal-aid highways (off-system bridges), unless the Secretary determines the State has insufficient needs to justify this amount.

Funding priority within the urbanized area is determined by the MPO (EMPO), while projects in rural areas must compete for statewide STP funds. STP funds can qualify to be used for interstate construction and maintenance. These projects receive 90% federal obligation, while all other STP funds receive 80% obligation.

CONGESTION MITIGATION AND AIR QUALITY (CMAQ)

These funds are allocated to both states and localities that have not attained national ambient air quality standards, or NAAQS, mandated under the Clean Air Act Amendments of 1990. Projects or programs which demonstrate air quality benefits, such as reductions in ozone or carbon monoxide levels, are eligible to receive these CMAQ funds. These projects may include traffic flow improvements, transit strategies, and other demand management techniques. However, projects which result in expanded capacity for single-occupant vehicles (such as added travel lanes) are ineligible for CMAQ funds. The federal obligation for CMAQ projects and programs is 80%.

HIGHWAY SAFETY IMPROVEMENT PROGRAM (HSIP)

MAP-21 continues the successful HSIP, established with SAFETEA-LU, for safety improvement projects to reduce traffic fatalities and serious injuries on all public roads. The federal participation for HSIP projects is 90-100%.

BRIDGE PROGRAM

Bridge Program funds are available to be used to reconstruct, replace, or rehabilitate deficient bridge structures. Any bridge on a public road is eligible to receive funding, but funding discretion is the responsibility of the state. The federal share of Bridge Replacement and Rehabilitation funds is 80%. While Bridge funds remain in this TIP period, the bridge project eligibility has been incorporated into the core formula programs as a part of MAP-21's program streamlining effort.

INTERSTATE MAINTENANCE (IM)

Interstate Maintenance funds are available for the maintaining the interstate system. The state is responsible for programming of maintenance funds. IM funds remain in this TIP period, though MAP-21's integrates IM eligibility in the NHPP core program.

TRANSPORTATION ALTERNATIVES PROGRAM (TAP)

MAP-21 establishes a new program to provide for a variety of alternative transportation projects that were previously eligible activities under separately funded programs. Eligible activities include: Transportation alternatives (new definition incorporates many transportation enhancement activities and several new activities), recreational trails program, safe routes to schools program.

RECREATIONAL TRAILS PROGRAM (RTP)

Another legacy of SAFETEA-LU, the RTP provides funds to develop and maintain recreational trails and trail-related facilities for both nonmotorized and motorized recreational trail uses. A sliding scale applies to the federal share for RTP projects.

STATE FUNDS

State funds can be used as the sole funding instrument for a project or as matching funds to the federal assistance for state-initiated highway projects or programs.

LOCAL FUNDS

There are a variety of transportation funding mechanisms available to local governments. Although many options are available, not all revenue sources may be used to fund or serve as a match to federal

transportation improvement program / 2016-2019

funds for improvement projects. Portions of some revenue sources are allocated to fund routine maintenance of transportation facilities, pay employee wages, and maintain equipment. Table 3 summarizes local revenues and costs for the first four years of the TIP. Based on historical averages, a shortfall is indicated for the Metropolitan Evansville Transit System. Consultation with the agency established that the required funds for transit operations will be made up with a general fund transfer adjustment.

LOCAL ROAD AND STREET FUNDS

This resource provides revenue to both city and county highway departments in Indiana. These funds may be used for various improvements to the local transportation systems, including right of way acquisition, preliminary engineering, construction, or reconstruction activities. They may also be used for bond repayment.

THE MOTOR VEHICLE HIGHWAY ACCOUNT

This is the principal source of revenue for operation of the county highway departments. This fund is used for the purchase of materials, equipment, and labor for the maintenance and construction of county transportation facilities.

THE CUMULATIVE BRIDGE FUND

These funds may be used to finance the construction or repair of county bridges and grade separations.

LOCAL OPTION AUTO EXCISE AND WHEEL TAX

The State of Indiana also provides for a local option auto excise and wheel tax. Both Vanderburgh and Warrick Counties exercise this taxing option. Revenue must be distributed evenly between the county and the municipalities based upon the ratio of city miles to total county miles.

TAX INCREMENT FINANCING (TIF)

Tax Increment Financing funds are funds collected from a specific area and can be spent to provide infrastructure improvements to encourage development in the area.

GENERAL OBLIGATION BONDS AND CUMULATIVE CAPITAL IMPROVEMENT FUNDS

Local governments may also use general obligation bonds and cumulative capital improvement funds to fund transportation improvements.

STATE-MUNICIPAL ROAD AID, STATE-COUNTY ROAD AID, AND LOCAL ECONOMIC ASSISTANCE

Local governments in Kentucky may receive State-Municipal Road Aid, State-County Road Aid, and Local Economic Assistance funds.

TRANSIT FUNDS

SECTION 5303 METROPOLITAN PLANNING FUNDS

These funds are available to both state and LPAs to fund transit related planning activities.

5307 URBANIZED AREA FORMULA GRANTS PROGRAM

This is a Formula Grant program for urbanized areas. Formula is based on urbanized area's demographic profile such as population and transit service provisions such as ridership. The grant program funds operating expenses (up to a predetermined amount) and capital projects for transit agencies within an urbanized area. Capital projects require a 20% match. Operating projects require a 50% match.

SECTION 5310 ENHANCED MOBILITY OF SENIORS AND INDIVIDUALS WITH DISABILITIES PROGRAM

This is a Formula Grant program for urbanized areas. This grant program specifically targets the transportation needs of seniors and persons with disabilities. Projects are selected through a competitive selection process within each urbanized area. Funds are available to transit agencies and non-profits entities. Capital projects require a 20% match. Operating projects require a 50% match.

SECTION 5339 BUS AND BUS FACILITIES FORMULA GRANTS PROGRAM

This is also a Formula Grant program for urbanized areas. This capital program provides funding to replace, rehabilitate, and purchase buses and related equipment, and to construct bus-related facilities. Capital projects require a 20% local match.

STATE TRANSIT FUNDING

The State of Indiana Public Mass Transportation Fund (PMTF) provides grant funds to public transit systems within the State of Indiana that receive federal funds under the Federal Transit Act. Capital and operating funds are allocated through a performance based formula. Projects require a 50% local match.

The Commonwealth of Kentucky matches capital funds at 10% of the total cost of projects under Section 5307 and 5309. Toll Credits, or excess toll revenues, may be used as a credit toward the non-Federal matching share of federally assisted transit projects. Toll Credits do not provide cash to the project to which they are applied, but their use effectively raises the federal share up to 100% on projects receiving Toll Credits. Kentucky does not provide funding for planning and operating costs.

¹ Latest available annual general fund transfer assumed as best available data for projected transit revenues. Transfers necessary to balance Local Public Agency and transit budgets are assumed.

² Indiana Public Mass Transportation Funding. State funds allocated to public transit systems on a performance based formula.

³ Transit Operations/Maintenance reflected in TIP costs and not deducted from available revenues.

**Huntington-Ashland-Ironton FY 2016-2019 TIP
Financial Plan**

TRANSIT-ALLOCATED FUNDS

Each of the transit agencies in the urbanized area provides KYOVA Interstate Planning Commission with a Fiscally Constrained projected budget for the years the document will cover.

Funds for the Specialized Transportation Program (FTA Section 5310) are programmed into the TIP by Tri-State Transit Authority, the Designated 5310 recipient for the Huntington, WV-KY-OH Urbanized Area. Ohio continues to program a portion of the 5310 allocation into their numbers for the TIP. The TIP tables reflect Ohio's projects, but with the caveat that the portion they project for 5310 is a part of the entire allocation for the TMA area, and is not counted towards totals for the TMA. Any eligible agencies may apply for these funds as a subrecipient.

Funds for Section 5307 and Section 5339 (Bus and Bus Facilities) are equitably split between the three Urban Transit Agencies in a split letter, a copy of which is then sent to each FTA region involved. The transit agencies may then apply to FTA for the portion of the 5307 or 5339 funds to which they agreed.

MATCHING FUNDS FOR TIP PROJECTS

Some Projects included in the TIP are funded up to 95% federal funds. However, other TIP projects are not federally funded at this level. This fact requires that matching state or local funds be committed to these other projects. The typical local match is 20% but varies from 5% to 50% of the total project cost for certain fund types.

FINANCIAL ASSESSMENT

This section summarizes highway and transit revenues anticipated to be available and compares them to the project costs identified as needed to implement the FY 2016-2019 TIP. Projects listed in the four years of the TIP are limited to those for which funds are available or committed.

Project cost estimates in the TIP were developed by individual project sponsors and are using updated WVDOT, KYTC, and ODOT cost inflation factors that account for year of expenditure dollars. That is, the year in which a project is programmed in the TIP reflects the cost of that project for that particular year.

FISCALLY CONSTRAINED TIP

As mandated by federal and state agencies the TIP must be fiscally constrained. It must be developed with the recognition of anticipated local and state revenue and authorized federal funding levels.

FINANCIAL FEASIBILITY

Based on presently known federal-aid obligation limitations, all projects appearing in the TIP have been programmed by WVDOT, KYTC, and ODOT and can be expected to be funded as programmed within the time frame of the TIP. Transit projects are based on future section 5307 funding at current levels and section 5339 funding which can be

reasonably anticipated. Tables 6-8 display the Financial Plan for West Virginia, Kentucky, and Ohio.

FISCAL CONSTRAINT ANALYSIS FY 2016-2019

The KYOVA Interstate Planning Commission has developed the TIP in cooperation with the West Virginia DOT, Kentucky Transportation Cabinet and Ohio DOT. Based on information provided by the respective state Departments of Transportation concerning funding availability, KYOVA has concluded that the projects identified in the TIP are financially feasible.

**Lexington FY 2013-2016 TIP
Financial Plan**

Chapter 3 FINANCIAL PLAN

The following information summarizes the Lexington Area MPO's FHWA and FTA program funding. Fundamental features of the TIP are: (1) a listing of the financial resources that are available to carry out TIP programs and projects which demonstrates financial constraint by balancing the estimated cost of projects and the expected revenue (an important aspect of financial constraint is to ensure costs are listed in an estimate of "year of expenditure dollars"); and (2) the inclusion of highway and transit operations and maintenance costs and revenues. All funding estimates have been developed together with the MPO, KYTC and public transit providers.

3.1 Financial Resources

MAP-21 identifies federal funding sources for road, highway, transit, and other transportation related improvements. The key aspect of MAP-21 is its flexibility of funds, empowerment of local jurisdictions in assigning project priorities, public participation to a greater extent in planning and decision making, and fiscal constraint.

Most all federal transportation funding programs require a local match commitment for projects. This local match may come from a variety of state or local fund sources; however, the match cannot come from any federally allocated source.

Major MAP-21 programs that provide funding are:

- Surface Transportation Program (STP).
- Surface Transportation Program – dedicated to Lexington (SLX)
- National Highway Performance Program (NHPP) – incorporates NHS, IM, and Bridge programs.
- Congestion Mitigation and Air Quality Improvement Program (CMAQ).
- Highway Safety Improvement Program (HSIP/SAF).
- Transportation Alternatives Program (TAP)
- Section 5307 transit urbanized area formula funds.
- Section 5309 transit capital investment funds
- Section 5310 elderly and disabled transportation funds

3.1.1 Highway Fiscal Considerations

Highway programs and projects are listed in the project tables beginning on page 21 with various funding categories identified.

The funding is shown by fiscal year and includes: a "pre FY 2013" cost column; the required FY 2013 through FY 2016 activities; and a "Future" cost column. The TIP provides programming information on planned future-year funded projects to give a current and accurate total cost estimate. However, cost estimates can be subject to change as more detailed information is gathered through the project development process.

The MPO works closely with its federal and state transportation partners when planning, selecting, and prioritizing Surface Transportation Program funds dedicated to the Lexington MPO area (SLX). The SLX program consists of federal funds matched with state or local program funds. The MPO has decision authority over the SLX funds and is responsible for selecting and prioritizing SLX projects within the fiscal constraints of the current SLX allocation (see Table 1 for SLX projects). The MPO currently receives an allocation of approximately \$5.8 million in SLX funds each fiscal year.

Although the Lexington Area MPO has significant input in identifying local needs and in determining project funding priorities (the MPO has complete control for SLX projects), it should be understood that the MPO does not have direct control over many sources of funding identified herein. Final decisions regarding the allocation of funds (project selection, revenue source, schedule, etc.) are made by the Kentucky Transportation Cabinet (KYTC). In order to address the full range of transportation needs on a statewide level and within the Lexington urbanized area, the Cabinet makes use of a variety of available revenue sources (or funding types).

3.1.2 Transit Fiscal Considerations

The transit financial element is listed in Figure 3.2 which identifies the various Federal Transit Administration (FTA) funding categories. The MPO coordinates with LexTran and other transit/paratransit service providers to ensure FTA funding obligations and forecasts are current and accurate. The transit financial forecast was compiled from existing financial data and the previous Lexington Area Long Range Transit Plan.

The transit financial element is estimated to average \$32 million per year in funding over the TIP’s four fiscal year period, totaling \$128 million from FY 2013 through 2016 as shown in Figure 3.2.

3.1.3 Financial Constraint

Federal law requires that TIPs be financially constrained. That is, this document should include the estimated cost associated with each project and the anticipated revenue source. Additionally, only those projects for which a current or proposed revenue source can be identified may be listed, thus ensuring a balance between total project costs and revenues. This requirement helps the MPO and the State develop a deliverable program of projects.

As indicated in the figure below, the estimated ratio of revenues to expenditures for all funding sources for FY 2013-2016 is 1.0, which means our planned expenditures balance with our anticipated revenues. A complete summary by program and fiscal year is provided in TIP Summary Table (Table 7).

HIGHWAY ELEMENT	FY 2013 – FY 2016 TOTALS
Total Programmed Expenditures	\$298,396,000
Total Anticipated Revenues	\$298,396,000
Ratio of Expenditures to Revenue	1.0
Note: SLX projects receive anticipated revenue of \$5,800,000 per year as allocated by the State.	

Figure 3.1 Anticipated Highway Revenue and Expenditures

TRANSIT ELEMENT	FY 2013 – FY 2016 TOTALS
Expenditures	
Total Operating Expenditures	\$ 98,217,976
Total Capital Outlays	\$ 29,787,000
Total	\$ 128,004,976
Revenue	
FTA 5307	\$ 17,783,000
FTA 5309	\$ 8,780,000
FTA 5310	\$ 778,000
FTA 5311	\$ 290,000

CMAQ	\$ 150,000
State Funding	\$ 256,000
Local Tax Levy	\$ 60,987,505
Passenger Fares & Other Operating Revenue	\$ 38,679,471
Total	\$ 128,004,976
Ratio of Expenditures to Revenue	1.0
Note: LexTran receives and expends a majority of transit funding	

Figure 3.2 Anticipated Transit Revenue and Expenditures

The specific projects and the associated programmed or planned revenue source and schedule that are shown in the Project Tables 1-7 beginning on page 21 have been identified by the KYTC in the Statewide Transportation Improvement Program and/or the Six Year Highway Plan. It should be expected that this program of projects will be subject to periodic changes in schedules and/or revenue sources due to adjustments that must be made to balance costs and revenues (or maintain financial constraint) at the statewide level, and also due to various project-related delays. These changes will be initiated by the Cabinet and will be reflected in this document by TIP Administrative Modifications or Amendments.

To show fiscal balance, the MPO has made the distinction in our project tables (see Chapter 4) to separate the region's federally funded projects (Tables 1 and 2) and state funded projects (Tables 3 and 4). Federally funded projects are identified in the fiscally constrained STIP. State-funded projects are included in the KY Highway Plan. The Highway Plan is approved by the State Legislature every two years and outlines the state's construction program over the next six years for both state and federal funding programs; however, the Highway Plan is not always fiscally balanced. In recent years, the Highway Plan has been fiscally balanced for federal funds but state-funded projects have been over-programmed. Thus, the programming for state-funded projects for the Lexington Area includes some level of uncertainty.

Table 7 of the TIP provides a summary of project/program costs and revenues by funding source and year for the Lexington Area from FY 2013-2016. A balance between costs and revenues is indicated; therefore, financial constraint is demonstrated.

Future Year programming information is also included in project tables (outside of the fiscally constrained 4-yr period) to provide an early glimpse of anticipated TIP program/project allocations needed to complete the project.

3.1.4 Year of Expenditure

MAP-21 requires inflationary cost factors to be used to provide a better assessment of future transportation project costs. The KYTC provided the MPO with the following Year of Expenditures (YOE) factors and adjustments to the cost of project phases:

- DESIGN PHASE (four-percent per year)
- RIGHT-OF-WAY PHASE (five-percent per year)
- UTILITIES PHASE (four-percent per year)
- CONSTRUCTION PHASE (four-percent per year)

Project cost estimate adjustments should be expected due to variation in economic conditions. To accommodate inflationary forces, YOE clarifies that fiscal constraint cost will reasonably match available revenue sources in order to support, operate and maintain the expected transportation system.

3.2 Operations, Maintenance and Preservation

One of the key goals of the TIP is to operate and maintain a high quality transportation network, and to preserve the significant investment that has been made in transportation facilities throughout the Lexington MPO area.

3.2.1 State Role

Kentucky's current Statewide Transportation Improvement Program (STIP) states that, "the operation and maintenance of existing transportation facilities within the state is a primary concern among Kentucky citizens, and included within the FY 2013-2016 STIP are federally-funded system preservation projects." In addition, it says "the KYTC is responsible for ensuring that the State Road System is maintained and operated in such a manner as to ensure the safest and most reliable roadways possible." The goal of any potential local funding would be to supplement, not supplant, the federal-level revenues that KYTC dedicates to maintenance and preservation in the Lexington MPO area.

Routine maintenance and operation of the regional freeway/highway network in the MPO area is accomplished by KYTC. The Cabinet is organized to provide services in four key functional areas: roadway maintenance; bridge maintenance; rest area maintenance; and traffic operations. Example activities include:

- maintenance of pavement,
- guard rails and median cable barriers,
- drainage channels, tunnels, retention basins, and sound walls,
- maintenance and restoration of landscaping,
- roadway lighting,
- traffic signals,
- signing and striping,
- freeway management system support,
- utility locating services,
- encroachment permits,
- crash clearing,
- repair of damaged safety features,
- litter pickup,
- snow and ice removal.

3.2.2 Role of Other Agencies

Lexington MPO member agencies (Lexington-Fayette Urban County Government, Nicholasville, Wilmore and Jessamine County) seek to maintain and operate the transportation system in a way that preserves past investments and maximizes the safety and efficiency of existing facilities. To achieve this goal, agencies apply state and local funds and their share of state highway user revenue funds (municipal and county-aid funds) towards maintenance and operation activities similar to those listed above.

Regional transit and paratransit providers must also operate and maintain service, with operating costs being the primary financial need for these transit services. For instance, LexTran has estimated they will spend over \$97 million to operate and maintain transit service over the four year period of this TIP.

3.2.3 Funding

The TIP and 2035 MTP identify existing and proposed revenues for anticipated capital, operating expenses, and maintenance costs. In order to preserve, protect, and maintain an evolving transportation system, the MPO will continue to coordinate with operational and maintenance agencies to ensure adequate funding.

Total maintenance expenditures estimated for major operation and maintenance agencies in FY-2013-2016 are over \$136 million (see Figure 3.3).

Short-Range Maintenance/Operations Funding 2013 – 2016	
Major O/M Funding Sources	O/M Funding Estimate
State Funding (KYTC)	\$22,815,000
Local Funding	\$16,000,000
LexTran	\$97,251,976
Total	\$136,066,976
Source: KYTC, LFUCG, LexTran	

Figure 3.3 Maintenance/Operations Funding Estimates

**Louisville FY 2015-2018 TIP
Financial Plan**

Funding

MAP-21 builds on, and strengthens, many of the funding programs for highways, transit, bicycle and pedestrian programs that were established in previous transportation acts. MAP-21 creates a streamlined, performance-based program and provides the funds necessary to maintain and improve our nation's transportation infrastructure.

Highway

MAP-21 is focused on the transportation investment in highways. It focuses on strengthening America's highways, establishes a performance-based program, creates jobs and supports economic growth, supports the Department of Transportation's safety agenda, streamlines transportation programs, and accelerates project delivery and promotes innovation. Funding for highways is provided for projects through several core highway formula programs.

National Highway Performance Program (NHPP)

The National Highway Performance Program provides funding for projects on the National Highway System (NHS), for construction of new facilities on the NHS, and to ensure that investments of federal aid funds in highway construction support the achievement of performance targets.

States must set aside the following amounts from their NHPP apportionment:

- A proportionate share of funds for the Transportation Alternatives (TA) program.
- 2% for State Planning and Research

NHPP projects must be on an eligible facility and support progress toward achievement of national performance goals for improving infrastructure condition, safety, mobility, or freight movement on the NHS. NHPP eligible activities include the following:

- Construction, reconstruction, resurfacing, restoration, rehabilitation, preservation, or operational improvements of NHS segments.
- Construction, replacement (including replacement with fill material), rehabilitation, preservation, and protection (including scour countermeasures, seismic retrofits, impact protection measures, security countermeasures, and protection against extreme events) of NHS bridges and tunnels.
- Bridge and tunnel inspection and evaluation on the NHS and inspection and evaluation of other NHS highway infrastructure assets.
- Training of bridge and tunnel inspectors.
- Construction, rehabilitation, or replacement of existing ferry boats and facilities, including approaches, that connect road segments of the NHS.
- Construction, reconstruction, resurfacing, restoration, rehabilitation, and preservation of, and operational improvements for, a Federal-aid highway not on the NHS, and construction of a transit project eligible for assistance under chapter 53 of title 49, if the project is in the same corridor and in proximity to a fully access-controlled NHS

route, if the improvement is more cost-effective (as determined by a benefit-cost analysis) than an NHS improvement, and will reduce delays or produce travel time savings on the NHS route and improve regional traffic flow.

- Bicycle transportation and pedestrian walkways.
- Highway safety improvements on the NHS.
- Capital and operating costs for traffic and traveler information, monitoring, management, and control facilities and programs.
- Development and implementation of a State Asset Management Plan for the NHS including data collection, maintenance and integration, software costs, and equipment costs.
- Infrastructure-based ITS capital improvements.
- Environmental restoration and pollution abatement.
- Control of noxious weeds and establishment of native species.
- Environmental mitigation related to NHPP projects.
- Construction of publicly owned intracity or intercity bus terminals servicing the NHS.

Additional eligible uses of NHPP funds are workforce development, training, and education activities.

The typical federal share of NHPP funds for a project is 80%, but that share is reduced to 65% as a penalty, if a state has not implemented an asset management plan within the established timeframe.

Surface Transportation Program (STP)

The Surface Transportation Program (STP) is a funding category that provides flexible funding to be used by states and Metropolitan Planning Organizations to preserve and improve the federal-aid highway, bridge and tunnel projects, pedestrian and bicycle infrastructure, and transit capital projects.

From the federal money allocated to a state for distribution through STP, a proportionate share of funds is set aside for the State's Transportation Alternatives program, as well as 2% for state planning and research, and not less than 15% of the State's FY 2009 Highway Bridge Program apportionment for off-system bridges.

Fifty percent of the apportionment is suballocated and obligated as follows:

- Urbanized areas with a population greater than 200,000 will receive a portion based on their relative share of population.
- Areas with population greater than 5,000 but no more than 200,000 receive funding for projects identified by the state in consultation with the regional planning organization.
- Areas with population of 5,000 or less.

The remaining 50% maybe used in any area of the state.

STP money, allocated to the Louisville urbanized area, is to be obligated on a priority basis that is determined by the MPO in consultation with the state's respective Department of

Transportation, in this case either the Kentucky Transportation Cabinet or the Indiana Department of Transportation. Under MAP-21, each state is to abide by the funding program for STP dollars designated to the urbanized area. STP monies obligated to the areas outside a TMA are to be spent at the discretion of the state department of transportation.

All STP monies other than those used for interstate completion or interstate maintenance projects receive an 80% federal obligation toward the cost of each project. STP monies used for interstate completion and interstate maintenance receive a 90% federal match.

Congestion Mitigation and Air Quality Improvement Program (CMAQ)

Projects and programs that assist in the attainment or maintenance of standards for air quality outlined in the Clean Air Act Amendments of 1990 are eligible to use Congestion Mitigation and Air Quality Improvement Program (CMAQ) funds. Eligible projects must:

- contribute to the attainment or maintenance of a national ambient air quality standard; or
- be an element of a strategy that will contribute to the attainment or maintenance of a national ambient air quality standard.

In Kentucky, the MPO recommends priorities for their non-attainment/maintenance area and the responsibility for determining final priorities for funding rests with the state. In Indiana, the responsibility for setting priority for CMAQ funds sub-allocated to the non-attainment/maintenance areas rests with the MPO. CMAQ monies typically receive an 80% federal obligation toward the cost of each project.

Highway Safety Improvement Program (HSIP)

The Highway Safety Improvement Program provides funding dedicated to highway safety. These are federal funds aimed at reducing traffic fatalities and serious injuries on all public roads. Responsibility for setting priority for Highway Safety Improvement Program projects in Kentucky rests with the state, and in Indiana, INDOT sub-allocates funds to the MPOs. The federal share of all Highway Safety Improvement Program projects is typically 90%.

Railway-Highway Crossings

The Rail-Highway Crossing Program provides funding for safety improvements to reduce the number of fatalities, injuries, and crashes at public railroad grade crossings. Of the total received by each state, 50% must be set aside for the installation of protective devices at railway-highway crossings. The federal share of Railway-Highway Crossings projects is 90%.

Transportation Alternatives (TA)

The Transportation Alternatives Program has been established by MAP-21 to fund alternative transportation projects. Fifty percent of the state's TA apportionment is suballocated to MPOs based on their relative share of the total state population.

TA funds can be used for the following eligible activities:

- Construction, planning, and design of on-road and off-road trail facilities for pedestrians, bicyclists, and other non-motorized forms of transportation.
- Construction, planning, and design of infrastructure-related projects and systems that will provide safe routes for non-drivers, including children, older adults, and individuals with disabilities to access daily needs.
- Conversion and use of abandoned railroad corridors for trails for pedestrians, bicyclists, or other non-motorized transportation users.
- Construction of turnouts, overlooks, and viewing areas.
- Community improvement activities, including—
 - inventory, control, or removal of outdoor advertising;
 - historic preservation and rehabilitation of historic transportation facilities;
 - vegetation management practices in transportation rights-of-way to improve roadway safety, prevent against invasive species, and provide erosion control; and
 - archaeological activities relating to impacts from implementation of a transportation project eligible under 23 USC.
- Any environmental mitigation activity, including pollution prevention and pollution abatement activities and mitigation to—
 - address stormwater management, control, and water pollution prevention or abatement related to highway construction or due to highway runoff; or
 - reduce vehicle-caused wildlife mortality or to restore and maintain connectivity among terrestrial or aquatic habitats.

In addition, the following activities can be funded using Transportation Alternatives funds:

- The recreational trails program under 23 USC 206.
- The safe routes to school program under §1404 of SAFETEA–LU.
- Planning, designing, or constructing boulevards and other roadways largely in the right-of-way of former Interstate System routes or other divided highways.

Transit

MAP-21 enhances safety in public transportation and emphasizes restoring and replacing our country’s aging public transportation infrastructure.

Section 5307: Urbanized Area Formula Grants

The Section 5307 program provides grants to urbanized areas for public transportation capital, planning, job access and reverse commute projects, as well as operating expenses in certain circumstances. Eligible activities include capital projects, planning, job access and reverse commute projects that provide transportation to jobs and employment opportunities for welfare recipients and low-income workers, operating costs in areas with fewer than 200,000 in population, and operating costs up to certain limits for grantees in

areas with populations greater than 200,000 and which operate a maximum of 100 buses in fixed-route service during peak hours (rail fixed guideway excluded).

The federal share is 80% for capital assistance, 50% for operating assistance, and 80% for Americans with Disabilities Act (ADA) non-fixed-route paratransit service using up to 10% of a recipient's apportionment.

Section 5309: Fixed Guideway Capital Investment Grants ("New Starts")

Section 5309 is a discretionary program that provides grants for new and expanded rail, bus rapid transit, and ferry systems that reflect local priorities to improve transportation options in key corridors. Eligible projects include new fixed-guideways or extensions to fixed guideways (projects that operate on a separate right-of-way exclusively for public transportation, or that include a rail or a catenary system), bus rapid transit projects operating in mixed traffic that represent a substantial investment in the corridor, and projects that improve capacity on an existing fixed-guideway system. The maximum federal share is 80%.

Section 5310: Enhanced Mobility of Seniors and Individuals with Disabilities

The Section 5310 program is to enhance mobility for seniors and persons with disabilities by providing funds for programs to serve the special needs of transit-dependent populations beyond traditional public transportation services and Americans with Disabilities Act (ADA) complementary paratransit services. Eligible activities include the following criteria:

- At least 55% of program funds must be used on capital projects that are:
 - Public transportation projects planned, designed, and carried out to meet the special needs of seniors and individuals with disabilities when public transportation is insufficient, inappropriate, or unavailable.
- The remaining 45% may be used for:
 - Public transportation projects that exceed the requirements of the ADA.
 - Public transportation projects that improve access to fixed-route service and decrease reliance by individuals with disabilities on complementary paratransit.
 - Alternatives to public transportation that assist seniors and individuals with disabilities.

The federal share for capital projects (including acquisition of public transportation services) is 80% and the federal share for operating assistance is 50%.

Section 5311: Formula Grants for Rural Areas

The FTA Section 5311 program provides capital, planning, and operating assistance to states to support public transportation in rural areas with populations less than 50,000, where many residents often rely on public transit to reach their destinations. Eligible

activities include planning, capital, operating, job access and reverse commute projects, and the acquisition of public transportation services.

The federal share is 80% for capital projects, 50% for operating assistance, and 80% for Americans with Disabilities Act (ADA) non-fixed-route paratransit service using up to 10% of a recipient's apportionment.

Section 5337: State of Good Repair Grants

The FTA Section 5337 program is a formula-based State of Good Repair program dedicated to repairing and upgrading the nation's rail transit systems along with high-intensity motor bus systems that use high-occupancy vehicle lanes, including bus rapid transit. Eligible activities include the following:

- Capital projects to maintain a system in a state of good repair, including projects to replace and rehabilitate: rolling stock; track; line equipment and structures; signals and communications; power equipment and substations; passenger stations and terminals; security equipment and systems; maintenance facilities and equipment; and operational support equipment, including computer hardware and software.
- Transit Asset Management Plan development and implementation.

The maximum federal share is 80%.

Section 5339: Bus and Bus Facilities

The FTA Section 5339 program provides capital funding to replace, rehabilitate, and purchase buses and related equipment and to construct bus-related facilities. This program replaces the Section 5309 Bus and Bus Facilities Program. Eligible activities include capital projects to replace, rehabilitate and purchase buses, vans, and related equipment, and to construct bus-related facilities. The maximum federal share is 80% with a 20% local match.

Other Funds

In 1976, the Kentucky General Assembly appropriated funds to allow the Kentucky Transportation Cabinet to begin matching public transportation capital grants. Since that time, KYTC has been able to provide up to half of the nonfederal share of capital costs, within budgetary limitations. All transit systems operating in Kentucky are requested to annually review their capital equipment needs for the coming three-year period. The resulting Kentucky Public Transportation Capital Improvement Program is used as the basis for awarding state funds.

The Indiana Department of Transportation provides funds from the Public Mass Transportation Fund to match federal transit grants. Created in 1980, the fund is derived from a dedication of .76 percent of the state's 5 percent general sales and use taxes. The state helps provide up to two-thirds of the nonfederal share required to match a federal capital or operating grant by matching up to 100 percent of locally derived income up to the allocation amount. State funds are allocated each calendar year by a performance-based

formula. Awards are limited to an amount equal to 100 percent of the projects' locally derived income or the system's formula allocation, whichever is less.

Local funding for TARC is provided by a one-fifth of one percent occupation tax approved by the voters of Louisville and Jefferson County on November 4, 1974. The occupational tax became legally effective on January 1, 1975, and can be used by TARC for operating and capital matching funds.

Federal Funds for Fiscal Years 2015 Through 2018

Federal funds are available for programming in the TIP in two basic formats. The first are those funds that are sub-allocated to the Louisville urbanized and non-attainment area; and the second are those funds that are utilized on a statewide level and are competitive between projects and jurisdictions throughout the state. Both Kentucky and Indiana receive federal funds for their respective states, some of which are sub-allocated to the Louisville urbanized area and others are available statewide.

The transportation act requires that all plan documents, including the Transportation Improvement Program be fiscally constrained. There should not be more dollars scheduled for programming in the Transportation Improvement Program than there are dollars available. KIPDA is responsible for programming all federal projects in the TIP. For those federal funds that are not sub-allocated to the Louisville urbanized area, a reasonable estimate of funds that may be obligated is to be made by the states.

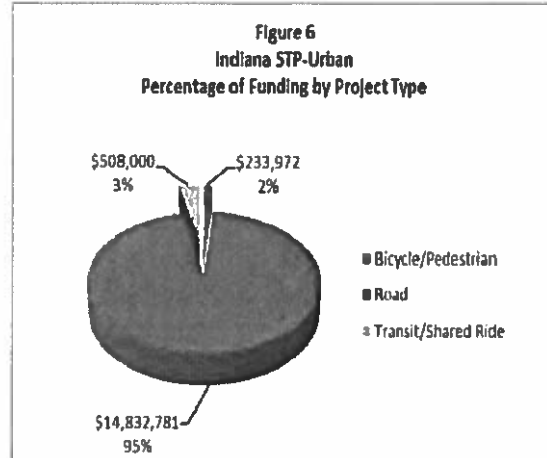

Most of the federal funding categories used for funding projects operate at the state's discretion. The projects requesting these funding sources originate from the states, but still require final approval for use through the Transportation Policy Committee's TIP approval process.

Surface Transportation Program-Urban

In the project listings of the TIP, Surface Transportation Program-Urban funds for Kentucky and Indiana are identified as "STP-Urban". In accordance with SAFETEA-LU and MAP-21, each urbanized area with a population greater than 200,000 is classified as a Transportation Management Area (TMA). TMAs are allocated a portion of the state's allocation of Surface Transportation Program dollars. Each area's portion is determined by a formula based on a population factor. The MPO designates how these funds will be used. KIPDA is a bi-state MPO and each state's portion of the urbanized area provides STP-Urban dollars for their respective state.

Indiana

The Indiana Department of Transportation has estimated that \$2,289,457 will be allocated to the urbanized area for each of FY 2015, FY 2016, FY 2017, and FY 2018. The Indiana Department of Transportation allows the MPOs to total four years of funds and program those funds within the TIP four-year period. Figure 6 provides a breakdown of STP-Urban funds by project type with 95% being programmed for road projects. The financial plan in Table 2 shows the amount of STP-Urban funds programmed for Clark and Floyd counties.

Surface Transportation Program				
	FY 2015	FY 2016	FY 2017	FY 2018
Annual Allocation (\$2,289,457 x 4 yrs.)	\$9,157,828			
Carryover From Previous Year	\$8,460,459	\$11,228,087	\$2,525,934	\$2,398,934
Balance of Funds Available	\$17,618,287	\$11,228,087	\$2,525,934	\$2,398,934
Dollars Programmed	\$6,390,200	\$8,702,153	\$127,000	\$355,400
Balance Remaining	\$11,228,087	\$2,525,934	\$2,398,934	\$2,043,534

Kentucky

The Kentucky Transportation Cabinet has estimated that \$17,000,000 will be allocated to the urbanized area for each of FY 2015, FY 2016, FY 2017, and FY 2018. Table 3 shows the financial plan for the Kentucky STP-Urban dollars in the TIP. The percentage of Kentucky STP-Urban funds programmed for road projects is 69%, while 25% is programmed for stand-alone bicycle and pedestrian projects, and 6% is programmed for transit, as shown in Figure 7.

Table 3				
Financial Plan of				
Kentucky STP-Urban Funds				
Surface Transportation Program				
	FY 2015	FY 2016	FY 2017	FY 2018
Annual Allocation	\$17,000,000	\$17,000,000	\$17,000,000	\$17,000,000
Carryover From Previous Year	\$29,216,821	\$6,158,706	\$11,039,918	\$15,935,578
Balance of Funds Available	\$46,216,821	\$23,158,706	\$28,039,918	\$32,935,578
Dollars Programmed	\$40,058,115	\$12,118,788	\$12,104,340	\$7,387,760
Balance Remaining	\$6,158,706	\$11,039,918	\$15,935,578	\$25,547,818

Congestion Mitigation and Air Quality

In the project listing of the TIP, Congestion Mitigation and Air Quality (CMAQ) funds are identified as "CMAQ". The CMAQ dollars are intended solely for projects and programs that will improve air quality in those areas designated as non-attainment or as maintenance areas for air pollutants. These dollars are intended to work closely with the Clean Air Act Amendments of 1990, and can be used only on projects that are able to demonstrate positive air quality benefits and do not add capacity for single-occupant-vehicles.

The U.S. Environmental Protection Agency had designated Clark and Floyd counties in Indiana, and Bullitt, Jefferson, and Oldham counties in Kentucky as a maintenance area for the 8-hour ozone standard. On July 2013, this standard was partially revoked for the Louisville area. (The local area is still eligible to receive Congestion Mitigation/Air Quality funding). The Louisville fine particulate matter (PM 2.5) nonattainment area consists of Clark and Floyd counties and the Madison Township of Jefferson County, IN, and Bullitt and Jefferson counties, KY.

Indiana

The state of Indiana sub-allocates the CMAQ dollars it receives to each non-attainment or maintenance area. The southern Indiana area is sub-allocated approximately \$1,021,653 each year. The financial plan of Indiana CMAQ funds is shown in Table 4.

Table 4				
Financial Plan of				
Indiana CMAQ Funds				
Congestion Mitigation and Air Quality				
	FY 2015	FY 2016	FY 2017	FY 2018
Annual Allocation (\$1,021,653 x 4 yrs.)	\$4,086,612			
Carryover From Previous Year	\$1,857,163	\$2,526,140	\$1,426,140	\$1,226,140
Balance of Funds Available	\$5,943,775	\$2,526,140	\$1,426,140	\$1,226,140
Dollars Programmed	\$3,417,635	\$1,100,000	\$200,000	\$965,000
Balance Remaining	\$2,526,140	\$1,426,140	\$1,226,140	\$261,140

Kentucky

The state of Kentucky does not sub-allocate CMAQ dollars to non-attainment or maintenance areas. Projects from all of these areas in the state compete with each other to receive funds. KIPDA submits applications to the Kentucky Transportation Cabinet for review. Once projects are selected for funding by the Kentucky Transportation Cabinet, those projects will be added to the Transportation Improvement Program.

Transportation Alternatives Program

Transportation Alternatives Program (TAP) dollars are to be used on projects that are transportation related, and do not necessarily impact the flow of travel on roadways. MAP-21 has identified many categories of uses ranging from on-road and off-road trail facilities for pedestrians and bicyclists, projects and systems that provide safe routes for non-drivers, conversion of abandoned rail corridors for trails, and environmental mitigation activities. TAP funds are sub-allocated to KIPDA by KYTC and INDOT and the MPO ranks and selects projects for funding.

Indiana

The state of Indiana sub-allocates the TAP dollars it receives to each MPO over 200,000. KIPDA is sub-allocated approximately \$229,772 each year for use in Clark and Floyd counties. The financial plan of Indiana TAP funds is shown in Table 5.

Table 5 Financial Plan of Indiana TAP Funds				
Transportation Alternatives Program				
	FY 2015	FY 2016	FY 2017	FY 2018
Annual Allocation	\$229,772	\$229,772	\$229,772	\$229,772
Carryover From Previous Year	\$2,031,287	\$949,054	\$1,178,826	\$1,408,598
Balance of Funds Available	\$2,261,059	\$1,178,826	\$1,408,598	\$1,638,370
Dollars Programmed	\$1,312,005	\$0	\$0	\$0
Balance Remaining	\$949,054	\$1,178,826	\$1,408,598	\$1,638,370

Kentucky

The state of Kentucky also sub-allocates the TAP dollars it receives to MPOs. KIPDA receives approximately \$1,000,000 each year for use in Bullitt, Jefferson, and Oldham counties. Since TAP funding is new with the implementation of MAP-21, projects have not yet been chosen to use these funds.

Highway Safety Improvement Program – Indiana

Beginning in FY 2010, the Indiana Department of Transportation sub-allocates Highway Safety Improvement Program (HSIP) funds to the Clark and Floyd counties. These are federal funds to be used for safety improvements on local public roads maintained by counties, cities, and towns. The program is designed to fund projects that reduce the number and severity of highway related crashes and to decrease the potential for crashes on all highways. KIPDA receives approximately \$509,316 annually for this program.

The Indiana Department of Transportation issues an annual call for applications for this funding. Applications from Clark and Floyd counties are submitted to KIPDA and then forwarded to the Indiana Department of Transportation for an eligibility finding. After projects are determined to be eligible for the funds, they are prioritized and reviewed for inclusion in the Transportation Improvement Program. Table 6 shows the financial plan for the Indiana HSIP funds dollars in the TIP.

Table 6				
Financial Plan of				
Indiana HSIP Funds				
Highway Safety Improvement Program				
	FY 2015	FY 2016	FY 2017	FY 2018
Annual Allocation	\$509,316	\$509,316	\$509,316	\$509,316
Carryover From Previous Year	\$1,158,553	\$524,284	\$1,033,600	\$1,542,916
Balance of Funds Available	\$1,667,869	\$1,033,600	\$1,542,916	\$2,052,232
Dollars Programmed	\$1,143,585	\$0	\$0	\$0
Balance Remaining	\$524,284	\$1,033,600	\$1,542,916	\$2,052,232

Financial Plan of Funds

A financial plan of federal funds that are programmed in the TIP for FY 2015 through FY 2018 is shown in Table 7. These estimates of funds are based on the project costs, which are supplied by the Kentucky Transportation Cabinet, Indiana Department of Transportation, TARC, and other project sponsors. Not all state funded projects are required to be included in the TIP; therefore state funds are not included in this table.

A requirement of MAP-21 is to reflect the Transportation Improvement Program in Year of Expenditure. As the term implies, Year of Expenditure involves adjusting project costs and revenues in the TIP so that they reflect anticipated dollar amounts in the year in which they are scheduled to be expended. Projects in the FY 2015 – FY 2018 Transportation Improvement Program have been adjusted for Year of Expenditure using adjustment factors developed in consultation with the Indiana Department of Transportation and the Kentucky Transportation Cabinet.

Table 7
FY 2015 - FY 2018 Transportation Improvement Program
Financial Plan of Federal Funds
Indiana

FY 2015				
Federal Funding Category	Projected Revenue	Programmed Project Cost		
		Federal Funds	State/Local Match	Programmed Project Cost
Bridge	\$3,751,500	\$3,185,600	\$565,900	\$3,751,500
CMAQ	\$6,018,251	\$3,058,815	\$764,704	\$3,823,519
HSIP	\$2,616,835	\$1,143,585	\$127,065	\$1,270,650
IM	\$1,791,300	\$1,537,170	\$254,130	\$1,791,300
NHPP	\$46,700,000	\$23,350,000	\$23,350,000	\$46,700,000
NHS	\$150,000	\$135,000	\$15,000	\$150,000
Safety	\$1,796,000	\$1,639,000	\$157,000	\$1,796,000

** Some projects in Kentucky are using Kentucky Toll Credits for state/local match.

The Ohio River Bridges Project of Kentucky and Indiana

The information used to depict the Louisville-Southern Indiana Ohio River Bridges (LSIORB) project in the metropolitan Transportation Improvement Program (TIP) comes from the, Louisville – Southern Indiana Ohio River Bridges Project Financial Plan – 2014 Interim Update (per TIFIA Requirement), February 2014. Because of the scope and significance of the LSIORB project, the FHWA requires the project sponsors (the Commonwealth of Kentucky and the State of Indiana) to submit annual finance plan updates to show how the project will be financed through construction. The annual updates demonstrate the shared commitments to complete this major project. The Financial Plan update that was approved in February 2014 can be found in Appendix F.

The financial plan update includes the annual update and updated expenditure information. It serves to not only inform the metropolitan area about the status of the project but also to provide funding information that will be reflected in the TIP through amendment or modification as appropriate.

The LSIORB project design and construction phases are currently being advanced. More detailed project information can be found at the LSIORB project web-site at: <http://www.kyinbridges.com/>.

Operations and Maintenance

The system of roadways that has been developed for the Louisville and Southern Indiana urbanized area must be maintained. The maintenance of all interstates and state routes is the responsibility of the Indiana Department of Transportation and the Kentucky Transportation Cabinet. The Indiana Department of Transportation projects spending \$15,703,034 over the four year period of the TIP to maintain the roadways in Clark and Floyd counties. The Kentucky Transportation Cabinet estimates that \$78,386,400 will be spent over the four year period to maintain roads in Bullitt, Jefferson, and Oldham counties. The transit system, operated by TARC, must also have funds to operate and maintain service. TARC has projected spending \$243,824,003 to operate transit in the five county area over the next four years.

Between Fiscal Year 2015 and Fiscal Year 2018 there will be approximately \$337,913,437 available to maintain and operate the transportation system for the Louisville and Southern Indiana urbanized area.

**Owensboro FY 2014-2019 TIP
Financial Plan**

TIP Approval Process

The TIP, once approved by the MPO Policy Committee, is the official document that directs the flow of transportation improvements in the MPO planning area. Following approval by the Policy Committee, the TIP is submitted to the Kentucky Transportation Cabinet (KYTC) who in turn submits it to the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA). KYTC uses the TIP as a basis for preparing its request for federal funding through their Statewide Transportation Improvement Program (STIP). The TIP is used by KYTC in the preparation of the commonwealth's Highway Plan, which is approved by the state legislature every two (2) years and outlines KYTC's construction program over the next six (6) years for both state and federal funding.

Financial Constraint

The Moving Ahead for Progress in the 21st Century Act (MAP-21) requires that Transportation Improvement Programs be financially constrained. That is, this document should include the estimated cost associated with each project and the anticipated revenue source. Additionally, only those projects for which a current or proposed revenue source can be identified may be listed, thus ensuring a balance between total project costs and revenues. This requirement helps the MPO and the State develop a deliverable program of projects.

Although the Owensboro – Daviess County MPO has significant input in the identification of needs and the determination of project funding priorities, it should be understood that the MPO does not have direct control over any source of funding identified herein. Final decisions regarding the allocation of funds (project selection, revenue source, schedule, etc.) are made by the Kentucky Transportation Cabinet and the Kentucky State Legislature. In order to address the full range of transportation needs, on a statewide level and within the Owensboro – Daviess County urbanized area, the Cabinet makes use of a variety of available revenue sources (or funding types). The revenue sources eligible and currently allocated for use within the Owensboro – Daviess County area are identified on page 8.

The specific projects shown in the Project Listing tables beginning on Appendix A have been identified by the Transportation Cabinet, along with the associated programmed or planned revenue source and schedule, in the Cabinet's Statewide Transportation Improvement Program and/or the Six Year Highway Plan. It should be expected that this program of projects will be subject to periodic changes in schedules and/or revenue sources due to adjustments that must be made

to balance costs and revenues (or maintain financial constraint) at the statewide level, and also due to various project related delays. These changes will be initiated by the Cabinet and will be reflected in this document by TIP Administrative Modifications or Amendments.

The table on page 10 provides a summary of costs and revenues by funding type and year (all costs and revenues here and elsewhere in this document are shown in Year-of Expenditure dollar values). A balance between costs and revenues is indicated; financial constraint is demonstrated.

Project Types and Project Funding Categories

The type of funds to be utilized for the projects involving Federal and State funds are in accordance with the Moving Ahead in the 21st Century Act (MAP-21) and are abbreviated as follows:

Federal Transit Programs

FTA – Federal Transit Administration

Section 5307

Section 5310

Section 5339

Federal Highway Programs

BR2 – JP2 BRAC Bond Projects Second Program

**Radcliff/Elizabethtown FY 2013-2018 TIP
Financial Plan**

TIP Approval Process

The TIP, once approved by the MPO Policy Committee, is the official document that directs the flow of transportation improvements in the MPO planning area. Following approval by the Policy Committee, the TIP is submitted to the Kentucky Transportation Cabinet (KYTC) who in turn submits it to the Federal Highway Administration and the Federal Transit Administration. KYTC uses the TIP as a basis for preparing its request for federal funding through their Statewide Transportation Improvement Program (STIP). The TIP is used by KYTC in the preparation of the commonwealth's Highway Plan, which is approved by the state legislature every two (2) years and outlines KYTC's construction program over the next six (6) years for both state and federal funding.

Financial Constraint

The Moving Ahead for Progress in the 21st Century Act (MAP-21) requires that Transportation Improvement Programs be financially constrained. That is, this document should include the estimated cost associated with each project and the anticipated revenue source. Additionally, only those projects for which a current or proposed revenue source can be identified may be listed, thus ensuring a balance between total project costs and revenues. This requirement helps the MPO and the State develop a deliverable program of projects.

Although the Radcliff-Elizabethtown MPO has significant input in the identification of needs and the determination of project funding priorities, it should be understood that the MPO does not have direct control over any source of funding identified herein. Final decisions regarding the allocation of funds (project selection, revenue source, schedule, etc.) are made by the Kentucky Transportation Cabinet. In order to address the full range of transportation needs, on a statewide level and within the Radcliff-Elizabethtown urbanized area, the Cabinet makes use of a variety of available revenue sources (or funding types). The revenue sources eligible and currently allocated for use within the Radcliff-Elizabethtown area are identified on page 8.

The specific projects shown in the Project Listing tables beginning on Appendix A have been identified by the Transportation Cabinet, along with the associated programmed or planned revenue source and schedule, in the Cabinet's Statewide Transportation Improvement Program and/or the Six Year Highway Plan. It should be expected that this program of projects will be subject to periodic changes in schedules and/or revenue sources due to adjustments that must be made to balance costs and revenues (or maintain financial constraint) at the

statewide level, and also due to various project related delays. These changes will be initiated by the Cabinet and will be reflected in this document by TIP Administrative Modifications or Amendments.

The table on page 9 provides a summary of costs and revenues by funding type and year (all costs and revenues here and elsewhere in this document are shown in Year-of-Expenditure dollar values). A balance between costs and revenues is indicated; therefore, financial constraint is demonstrated.

Project Types and Project Funding Categories

*The Kentucky Transportation Cabinet's Statewide Transportation Improvement Program (STIP) covers the years 2013-2016. The additional years in the Radcliff/Elizabethtown MPO TIP will be considered information only by the Federal Highway Administration (FHWA) and Federal Transit Administration (FTA).

APPENDIX C

**GLOSSARY OF
TRANSPORTATION TERMS AND
ABBREVIATIONS**

GLOSSARY OF TRANSPORTATION TERMS AND ABBREVIATIONS

Access Control Codes

- 1 Full control of access
- 2 Partial control of access
- 3 No access control or access by permit

ADA – Americans with Disabilities Act of 1990 - The ADA requires accessible public transportation services and facilities for persons with disabilities, including supplemental service in areas where fixed route transit service is operated.

ADD – Area Development District - One of 15 regional planning organizations covering the state. See: <http://www.kcadd.org> for more information.

Adequacy Rating – A numerical score from 0 to 100 evaluating the current condition of a roadway segment based on congestion, safety, and pavement condition. See: http://www.e-archives.ky.gov/pubs/transportation/TC_Rpt/KTC_02_30_SPR_256_01_1F.pdf

ADHS – Appalachian Development Highway System - An administrative designation of a highway system in the ARC region of Kentucky.

ADT – Average Daily Traffic Volume (sometimes referred to as AADT, Average Annual Daily Traffic).

AASHTO – American Association of State Highway and Transportation Officials - An organization of state Departments of Transportation. See: <http://www.transportation.org>

ASTM – American Society for Testing and Materials - One of the largest voluntary standards development organizations in the world; produces for technical standards for materials, products, systems, and services. See: <http://www.astm.org>

APD – Appalachian Development Highway Program - Geographically targeted matching funds, at an 80/20 ratio, for eligible roads (US 460 and US 119 are the only remaining eligible corridors).

Bike – Designated Kentucky bicycle system routes. Information is available in HIS. See also: <http://bikewalk.ky.gov/>

BR – Various Federal Bridge Replacement programs, including “on system” (BRO), “off system” (BRZ), and “on or off system” (BRX) which are, respectively, 65%, 15%, and 20% of the state’s total BR program. These categorical funds are matched 80/20 and are used to repair or replace bridges on state systems (BRO), local streets and roads (BRZ), and on the Rural Secondary system (BRX) based on an analysis of bridge condition. MAP-21 eliminated the designated allocations for the BR program, and combined the previously funded BR program within the NHPP and STP federal-aid highway funding programs.

BR2 – BRAC Bond Projects Second Program

BRC – BRAC Bond Projects

BTS – Bureau of Transportation Statistics - An agency of USDOT.

See: <http://www.bts.gov/>

C – for Construction Phase of project

CAA – Clean Air Act - The CAA was amended in 1990 (often referred to as the Clean Air Act Amendment) and imposes more stringent requirements for State Implementation Plans to improve air quality. The Environmental Protection Agency published the Transportation Conformity Rule in the Federal Register on November 24, 1994 (40 CFR 51). This rule established the criteria and procedures for determining that transportation plans, programs, and projects, which are approved in 23 United States Code or the Federal Transit Act, conform to the state or federal air quality implementation plans.

CBD – Central Business District - Generally considered being the downtown area of a metropolitan area.

CE – Categorical Exclusion - One possible result of an environmental assessment (EA). See EA below and also: <http://www.environment.fhwa.dot.gov/projdev/docuce.asp>

CIA – Community Impact Assessment - A process for evaluating the effects of proposed transportation projects on a community and its quality of life. The assessment should include all items of importance to people, such as mobility, safety, employment effects, relocation, isolation, and other community issues.

CMAQ – Congestion Mitigation and Air Quality - A category of federal-aid highway funds that may be used only to support projects in air quality nonattainment areas of Kentucky. Such projects must demonstrate an air quality improvement as a result of their use.
See: <http://www.fhwa.dot.gov/environment/cmaqpgs/>

Coal Haul - Those routes over which coal was reported transported by truck during the previous calendar year. This database is updated in July of each year; therefore, the previous calendar year's data will become available in July of each year. Number of tons is reported separately for each direction of travel for state-maintained roads. Information is available in HIS.

Conformity Determination – The Long-Range Plan and TIP/STIP must demonstrate that the projects and program, as a whole, emit less pollution than baseline or are less than a given budget as designated in the SIP (40 CFR 51). This is achieved through project and program evaluation using transportation Models (Mobile Model Analysis).

If the Long-Range Plan and/or the Transportation Improvement Program (TIP) do not conform according to the transportation conformity regulations (Federal Register; November 24, 1994 40 CFR 51), the subject document cannot be approved by the metropolitan planning organization. If this is the case, projects cannot be authorized for federal-aid funding.

Context Sensitive Design – A process through which the design of a transportation facility addresses safety, mobility, the preservation of scenic, aesthetic, historic, and environmental issues, and community values in a balanced manner to achieve design excellence.

See: <http://www.ktc.uky.edu/csd.html>

CRF - Critical Crash Rate Factor - The quotient showing the ratio of the crash rate for a roadway spot or segment divided by the critical crash rate for that roadway spot or segment based on roadway type, number of lanes, and median type. The critical rate for a roadway type is determined annually by the Kentucky Transportation Center.

See: http://www.ktc.uky.edu/Reports/KTC_09_16_KSP2_09_1F.pdf

D – for Design Phase of project

Defense - This network contains the routes and bridges to be used for defense material shipments, troop movements during a national defense emergency, and/or for evacuation of the general public from disaster areas. Information is available in HIS.

EA – Environmental Assessment - The general term used to describe the assessment of environmental impacts of a transportation development project. An EA may result in increasing order of level of detailed analysis in either (a) a CE (categorical exclusion) from formal assessment, (b) a FONSI (finding of no significant impact), or (c) the development of a formal EIS (environmental impact statement).

See: <http://www.epa.gov/compliance/resources/faqs/nepa/index.html>

EIS – Environmental Impact Statement - One possible result of an environmental assessment (EA); see EA above and also: <http://www.epa.gov/compliance/nepa/eisdata.html>

EJ – Environmental Justice - A term used to encapsulate the requirements of Federal Executive Order 12898 which state, in part, that “...each Federal agency shall make achieving environmental justice part of its mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of its programs, policies, and activities on minority populations and low-income populations...” and hence to ensure equal environmental protection to all groups potentially impacted by a transportation development project.

See: http://www.fhwa.dot.gov/environment/environmental_justice/index.cfm

Extended Weight – A designated highway network over which certain vehicular weight limits are relaxed for coal haul vehicles.

See: http://apps.transportation.ky.gov/HIS_EWBridge/

FAF – Freight Analysis Framework - A federal database that integrates data from a variety of sources to estimate commodity flows and related freight transportation activity among states, regions, and major international gateways.

See: http://www.ops.fhwa.dot.gov/freight/freight_analysis/faf/index.htm

FAST Act – Fixing America’s Surface Transportation Act. This Act was signed into law by President Barack Obama on December 4, 2015. This Act funds surface transportation programs, including, but not limited to, Federal-aid highways at over \$305 billion over fiscal years 2016 through 2020. It is the first long-term surface transportation authorization enacted in a decade that provides long-term funding certainty for surface transportation.

FONSI – Finding of No Significant Impact - One possible result of an environmental assessment (EA). See: <http://www.environment.fhwa.dot.gov/projdev/docuFONSI.asp>

Forest - Routes that are officially recognized jointly by the U.S. Forest Service and the KYTC as forest highway routes. The U.S. Forest Service assigns the ‘Road Number.’ Other U.S. Forest Service routes exist that are not included in this database. Information is available in HIS. FH or Federal Forest Highway Funding (annual amount for Kentucky is about \$400,000) is available solely for improvements on the system.

Functional Class Codes

- 1 Rural Interstate
- 2 Rural Other Principal Arterial
- 6 Rural Minor Arterial
- 7 Rural Major Collector
- 8 Rural Minor Collector
- 9 Rural Local
- 11 Urban Interstate
- 12 Urban Interstate Other Freeway or Expressway
- 14 Urban Other Principal Arterial
- 16 Urban Minor Arterial
- 17 Urban Collector
- 19 Urban Local

GARVEE – Grant Anticipation Revenue Vehicles - An innovative financing technique permitted by federal law and involves the commitment of future federal-aid appropriations as leveraging for current year highway improvements.

GIS – Geographic Information System - Refers to databases and/or software routines that store and graphically depict electronic data.

HCM/HCS – Highway Capacity Manual/Highway Capacity Software - A set of analytical tools that attempts to quantify the quality of service provided by a highway facility as perceived by the users of that facility. A common measure of that quality of service is the “Level of Service” provided, described as A through F.

HERS - FHWA's Highway Economic Requirements System - Software that evaluates the relationship between highway investment and system condition, performance, and user cost levels.

HES - Federal Hazard Elimination and Safety Program - Categorical funding matched at an 80/20 ratio for safety projects selected from among those with benefit/cost ratios >1.0.

Highway Plan - The Kentucky Transportation Cabinet’s legislatively mandated program (costs and schedule) of highway project development phases submitted biennially to the General Assembly in even numbered years.

See: <http://transportation.ky.gov/Program-Management/Pages/2016-Highway-Plan.aspx>

HIS – Highway Information System - A comprehensive database of highway inventory information maintained by, and in many cases collected by, the Division of Planning.
See: www.transportation.ky.gov/planning

Horizontal Alignment Adequacy Codes:

- 0 No curve data on urban segments
- 1 All curves meet design standards
- 2 While some curves may not meet current design standards, all can be safely and comfortably negotiated at prevailing speed
- 3 Infrequent curves with reduced speed necessary for safety
- 4. Frequent curves with reduced speed necessary for safety

HOV – High Occupancy Vehicle - A vehicle with at least a predefined number of occupants, generally two or more.

HPMS – Highway Performance Monitoring System - A data extract, in Kentucky's case from the HIS database, that is submitted annually to FHWA as a part of that agency's periodic reporting to Congress on the condition and performance of the nation's highway system.

HPP – Federal High Priority Program - Projects earmarked by Congress for Congressional High Priorities; funding is 80/20 match ratio.

IM – Federal Interstate Maintenance Program - Federal match monies at a 90/10 ratio dedicated to maintenance of Kentucky's interstate highways.

IRI - International Roughness Index - A measure of pavement roughness. IRI values less than 100 generally indicate smooth pavements; between 100 and 150 somewhat rough pavements, and greater than 150 very rough pavements.

ITS – Intelligent Transportation Systems - A generic description of signal systems, traffic monitoring devices, and other traffic operations projects to improve capacity and safety (or 'TOPICS' projects as they were known in the 1960's) without major capital investment in facility reconstruction. See: <http://www.its.dot.gov/>

KYD – Kentucky Demonstration Program - Represents Congressional earmarks, usually at an 80/20 ratio, for projects identified through the annual federal appropriations process.

Management Systems - These include a pavement management system (PMS), bridge management system (BMS), safety management system (SMS), congestion management system (CMS), public transportation facilities and equipment management system (PTMS), intermodal facilities and systems management system (IMS), and traffic monitoring system for highways (TMS/H). Current guidelines for setting up or revising these systems were issued on December 1, 1993 in the Federal Register, 23 CFR 500.

Management Systems is a systematic process designed to assist decision-makers in selecting cost-effective strategies/actions to improve the efficiency and safety of, and protect the investment in the nation's infrastructure. A management system includes performance measures, data collection and analysis, determination of needs, evaluation and selection of strategies/actions to address the needs, and evaluation of the effectiveness of the implemented strategies/actions. A management system is only one of the decision support tools available to the governing bodies of the region.

MAP-21 - Moving Ahead for Progress in the 21st Century Act. This Act was signed into law on July 6, 2012, and is the first multi-year transportation authorization enacted since 2005. This Act funds surface transportation programs for FY 2013 and 2014 and expired October 1, 2014.

Median Type Codes

- 1 Curbed
- 2 Positive Barrier
- 3 Unprotected
- 4 None

Metropolitan Planning Area Boundary – This boundary must enclose at least the existing urban area and the contiguous area expected to become urban in the next twenty years. This boundary establishes the area covered by the Transportation Improvement Program and is eligible for urban STP funds.

MP – Mile point - Used, along with county and route number, to identify location of a highway segment.

MPO – Metropolitan Transportation Planning Organization - A KYTC designated, FHWA approved organization to conduct ongoing transportation planning activities in areas with population greater than 50,000 persons.

See: <http://www.transportation.ky.gov/planning/pages/metropolitan-planning.aspx>

MUTCD – Manual of Uniform Traffic Control Devices - Defines the standards used by road managers nationwide to install and maintain traffic control devices on all streets and highways.

See: <http://mutcd.fhwa.dot.gov/>

NCHRP – National Cooperative Highway Research Program - Along with the Transit Cooperative Research Program (TCRP) and the new Airport Cooperative Research Program (ACRP), are applied, contract research programs that develop near-term, practical solutions to problems facing transportation agencies.

See: <http://www.trb.org/NCHRP/Public/NCHRP.aspx>

NH – National Highway System projects - Federal match monies at an 80/20 ratio to support projects on Kentucky's 3,294-mile portion of the National Highway System.

National Highway Freight Program – This program was established by the FAST Act to improve the efficient movement of freight on the National Highway Freight Network (NHFN).

NN – National Truck Network - Those routes on the state-maintained road system which have been specifically designated by the KYTC and approved by FHWA for use by motor vehicles (trucks) with increased dimensions (e.g., 102 inches wide, 13'-6" high, semi-trailers up to 53 feet long, trailers 28 feet long - not to exceed two (2) trailers per truck). Information is available in HIS.

Nonattainment Area – A nonattainment area is one where air quality monitors show that the area exceeds the level of toxic emissions (ozone or carbon monoxide) permitted by the Clean Air Act. The boundary of the area is determined by the Environmental Protection Agency. All nonattainment areas must demonstrate conformity, as required in the transportation conformity rule, before federal-aid funds may be authorized in the given area.

Nonexempt – A project that adds capacity to an existing roadway system, and the project is located within a designated “nonattainment” or “maintenance” area for air quality standards pursuant to the Federal Clean Air Act.

NR Properties – National Register of Historic Places Properties - An environmental concern that triggers a special analysis and/or treatment. Avoidance of such properties is almost always mandatory. See: <http://www.cr.nps.gov/nr/>

P – for Preliminary Engineering and Environmental Phase of project

PLH - Public Lands Highways Program - Originally established in 1930; intent of the program is to improve access to and within the federal lands of the nation.

See: <http://www.fhwa.dot.gov/discretionary/012304a3.htm>

PM 2.5 - Particulate matter that is 2.5 micrometers or smaller in size; an air quality issue.

See: <http://www.epa.gov/region4/sesd/pm25/p1.html>

P & N - Purpose and Need - A brief statement of the problem a potential transportation project is to address. In later project development phases, a concise purpose and need statement is essential in establishing a basis for the development of reasonable alternatives to be evaluated in accordance with a project’s EIS.

PUBLIC INVOLVEMENT PROCESS – The process that the KYTC uses to be compliant with 23 CFR 450.210 (a) which states that “In carrying out the statewide transportation planning process, including development of the long-range statewide transportation plan and the STIP, the State shall develop and use a documented public involvement process that provides opportunities for public review and comment at key decision points.”

R – for Right-of-Way acquisition phase of project

ROD – Record of Decision - A formal decision published in the federal register of a federal agency’s decision on a federally-funded project on which an EIS was prepared. See 23 CFR 771.127, 40 CFR 1505.2, 40 CFR 1506, et al. An example of a ROD for a Kentucky transportation project may be found at: <http://www.kyinbridges.com/pdfs/rod.pdf>.

RRP – Federal Railroad Protection Program - Match monies at an 80/20 ratio dedicated to installing protective devices at rail/highway crossings.

RRS - Federal Railroad Separation Protection Program - Federal match monies at an 80/20 ratio dedicated to replacing at-grade rail/highway crossings with a grade separation (overpass or underpass).

RSE – An identifier for GIS purposes consisting of county and route number.

RTPO – Regional Transportation Planning Organization – Added in the language of the FAST Act. A policy board that may be established by the Governor that consists of nonmetropolitan local officials or their designees created to carry out the regional transportation planning process.

SAFETEA-LU – Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users. This Act authorized the Federal Surface Transportation Programs for highways, highway safety, and transit for the 5-year period 2005-2009.

SB2 – State Bonds 2010

SC – State Contingency Account - A discretionary account available to the Secretary of the Kentucky Transportation Cabinet for emergency or economic development projects.

Scenic Byway - These routes are nominated by local support groups and designated by the Transportation Cabinet because they are deemed to have roadside or view sheds of aesthetic, historical, cultural, natural, archaeological, and/or recreational value worthy of preservation, restoration, protection, and/or enhancement. Information is available in HIS.

SIP – State Implementation Plan - A plan that provides for implementation, maintenance, and enforcement of primary and secondary air quality standards. It requires the development of a comprehensive emissions inventory and it includes enforceable emission limitations and other control measures, means, or techniques as well as schedules and timetables for compliance. www.air.ky.gov/

SP – State Funded Projects - Monies dedicated to a 100% state-funded project development program. Funding in this program is the “balancing account” within the transportation development program, and hence is subject to cash availability. Projects in this category are subject to substantial delay should cash not be available to support planned expenditures.

SPB – State Bonds 2009

SPP – State Funded Projects – High Priority Projects

STBG – Surface Transportation Block Grant Program – A program established with the FAST Act which was previously the Surface Transportation Program (STP). States and localities may use these funds for projects to preserve or improve conditions and performance on any Federal-aid highway, bridge projects on any public road, facilities for nonmotorized transportation, transit capital projects, and public bus terminals and facilities.

STP – Federal Surface Transportation Program – The FAST Act converted this long-standing program into the Surface Transportation Block Grant Program (STBG). (See STBG definition above). The STBG program under the FAST Act continues all prior STP eligibilities. Subcategories include:

- SAH – dedicated to Ashland Metro Area
- SHN – dedicated to Henderson Metro Area
- SLO – dedicated to Louisville Metro Area
- SLX – dedicated to Lexington Metro Area
- SNK – dedicated to Northern Kentucky Metro Area

STRAHNET – Strategic Highway Network - A designated system of public highways that provides access, continuity, and emergency transportation of personnel and equipment in times of peace and war. The 61,000-mile nationwide system, designated by the Federal Highway

Administration in partnership with the Department of Defense and the state DOTs, comprises about 45,400 miles of interstate and defense highways and 15,600 miles of other public highways. STRAHNET is complemented by about 1,700 miles of connectors - additional highway routes linking more than 200 military installations and ports to the network.

SUA – Small Urban Area - Population centers of between 5,000 and 50,000 persons.

TAP – Transportation Alternatives Program – This program was established by MAP-21 and eliminated by the FAST Act. The FAST Act replaces it with a set-aside of Surface Transportation Block Grant (STBG) funding for transportation alternatives. These set-aside funds include all projects and activities that were previously eligible under TAP, encompassing a variety of smaller-scale transportation projects such as pedestrian and bicycle facilities, Recreational Trails, Safe Routes to School projects, community improvements such as historic preservation and vegetation management, and environmental mitigation related to stormwater and habitat connectivity.

TCM – Transportation Control Measure - Transportation control measures may be identified in the State Implementation Plan as a means of controlling air quality and may consist of such projects as vehicle emissions testing program, ridesharing, transit improvements, etc.

TCSP – Transportation and Community and System Preservation (TCSP) Program - TCSP provides funding for a comprehensive initiative including planning grants, implementation grants, and research to investigate and address the relationships between transportation and community and system preservation, and to identify private sector-based initiatives. Projects eligible for TCSP funding include any project eligible for funding under Title 23 or Chapter 53 of Title 49 U.S.C. or any other activity relating to the purposes of this section determined appropriate by the Secretary. This includes corridor preservation activities necessary to implement transit oriented development plans, traffic calming measures, or other coordinated preservation practices. MAP-21 eliminated the TCSP Program.

TDM – Transportation Demand Management - TDM consists of techniques to control demand on roadways, such as offering incentives to use transit, raising parking costs in the CBD, and telecommuting.

TE – FHWA Transportation Enhancement Program - A category of federal highway funds, with strict eligibility requirements that exists to support non-traditional transportation-related projects. In Kentucky, this funding source has traditionally supported Renaissance Kentucky and other historic preservation projects. MAP-21 eliminated the TE Program, however, the states are permitted to use the remainder of allocated TE funding for projects.

TIP/STIP – Transportation Improvement Program/State Transportation Improvement Program - A fiscally balanced project listing that constitutes an agencies transportation project development schedule for a certain time period.

TMA – Transportation Management Area - An urbanized area over 200,000 in population as defined by ISTEA. A TMA is given responsibility, through the MPO, for making decisions as to how some categories of federal transportation funds will be spent.

TPC – Transportation Policy Committee - The TPC is the MPO committee responsible for deciding how local federal transportation dollars will be spent and for determining local transportation planning policy.

Transportation Study Area/Transportation Planning Area – This federally mandated area includes the urban area, the contiguous area expected to become urban in the next 20 years, and the nonattainment area.

Travel Forecasting Model – A travel model developed for use with a computer. This model utilizes a geographic and mathematical simulation of area travel which estimates traffic volume on the existing system, and projects future traffic volumes. Congestion problems may be located, and traffic impacts of a particular project can be evaluated.

TSM – Transportation System Management -TSM techniques are designed to improve the level of efficiency at which the existing transportation system works. A project to synchronize traffic signals along corridors, for instance, will improve traffic flow and the efficiency of the road.

U – for Utility relocation phase of project

UNL – Unscheduled Needs List (formerly Unscheduled Projects List, or UPL) - A list maintained by the Division of Planning, of potential transportation projects with project data derived from the KYTC Project Identification Form.

Urban Area – Defined as a place of 5,000 or more in population, including the urbanized area as defined by the Bureau of Census. An urban area boundary, which encircles the urbanized areas in a region, may be developed by states in cooperation with local officials. This boundary is the line of demarcation for rural/urban functional classification of roadways.

VMT – Vehicle Miles of Travel - VMT is a measure of the level of travel activity in an area. The figure is generally found by multiplying the average length of trip by the total number of trips. As vehicle miles of travel increase, congestion and auto emissions that degrade air quality may be expected to increase (see PMT).

V/SF – Volume to Service Flow ratio - A quotient showing the ratio of a facility's actual vehicular traffic volume to its theoretical maximum potential vehicular traffic volume. A ratio higher than about 0.6 indicates traffic volumes are approaching congested conditions. This is also referred to V/C or Volume to Capacity ratio.

APPENDIX D

IMPORTANT ADDRESSES AND PHONE NUMBERS

KYTC EXECUTIVE MANAGEMENT PERSONNEL LISTING

(Locations in Transportation Cabinet Office Building unless indicated otherwise)

EXECUTIVE OFFICES
