SIGN UP NOW, SAVE TIME LATER

All online licensing services require a myDrive account. Create an account, connect it to your Kentucky credential on file, and use your unique Letter ID code to complete the account verification process.

Don't have a Letter ID?

Request one to be mailed to the address on file when creating your myDrive account. Delivery takes 5-10 business days so plan ahead to avoid waiting. You can also request a Letter ID at any Driver Licensing Regional Office or find it printed on your temporary ID given at the end of your office visit.

Commercial Driver License (CDL) Changes:

To save you time, trips and paperwork:

Medical certificates are submitted electronically from approved medical examiners directly to the National Registry II under the Federal Motor Carrier Safety Administration. KYTC will no longer accept paper copies of medical certificates from CDL drivers.

Commercial Learner's Permits will be valid for one year and cannot be renewed. Current CLP holders will need to schedule a skills test with the Kentucky State Police before it expires or will be required to take the written tests again.

The MyCDL portal has been discontinued. Waivers and self-certifications can be submitted through myDrive.
