

KAVIS Production Release 07/30/2026:

Instructions: Please clear your internet browser cache after each deployment to ensure you are accessing the latest system updates and to help prevent unexpected issues.

One-time scripts: 7

Priority Backlog Items:

1. 45147: Web Renewal; Trailer can now Renew Online. Expired Registration and Delinquency (limit of 1 delinquency) can now renew online

Description: This release expands online renewal eligibility in KAVIS by allowing trailers and certain vehicles with recently expired registrations to be renewed through the Web Renewal process. Trailers will no longer be incorrectly stopped by insurance validations, and vehicles expired for less than one year, or boats expired for less than 20 months, may renew online when the only delinquency is associated with the vehicle being renewed. Applicable delinquent taxes and clerk lien fees will also be included during online renewal processing.

2. 45382: Fleet Decal and Fleet Accounts

Description: This release introduces support for **Fleet Accounts** and **Permanent Fleet Decals** in KAVIS. Authorized organizations can now be designated as Fleet Accounts, allowing eligible vehicles to receive permanent fleet decals during first-time registration or renewal. The update also includes new validations, fee processing, and account enhancements to support fleet registration in accordance with Kentucky statute.

3. 45628: KY Agriculture Plate Fund Stream changes

Description: This release updates KAVIS remittance reporting to separately identify funds collected for **Friends of Kentucky Agriculture** and **National Guard** license plates. New fund lines will appear on the Remittance Detailed and Verified Remittance reports, providing clearer financial reporting for the benefiting organizations and KYTC.

4. 45856: MVL Suspend for Unpaid Bus Stop Fine

Description: This release introduces the ability for MVL Supervisors to suspend and restore vehicle registrations in KAVIS to support enforcement of unpaid school bus stop violation fines. Suspended registrations will prevent most title and registration transactions until the suspension is removed, while still allowing eligible users to restore the registration once the requirements have been satisfied.

Priority Bugs:

1. 46361: Remittance Summary Report is not capturing Lien Fees Reversals

Description: This release fixes an issue where reversed lien filing fees were not reflected on the **Remittance Summary Report**. Reversed lien fees are now correctly included in remittance totals and state fee calculations, ensuring the Summary and Detailed Remittance reports remain accurate and consistent.
