

Get your vehicle winter ready

- *Check the condition of your vehicle's battery. Cold weather drains batteries of their power*
- *Check your vehicle's anti-freeze and make sure it's suitable for cold weather*
- *Fill your windshield washer reservoir with no-freeze fluid*
- *Check for proper tire pressure and tread condition*
- *Check brakes and brake fluid*
- *Maintain a half tank of gas to keep the fuel line from freezing*
- *Change your oil. Check your owner's manual for the right oil to use during cold weather*
- *Make sure windshield wipers work properly and replace if necessary*

Weather impacts travel.

Learn what these winter weather alerts mean.

Advisory:

Conditions are expected to cause significant inconveniences that may be hazardous.

Watch:

Severe winter conditions, such as heavy snow and/or ice, may affect your area but the location and timing are still uncertain. A watch is issued 12 to 36 hours in advance of a potential severe storm.

Warning:

4+ inches of snow or sleet are expected in the next 12 hours, 6+ inches in 24 hours or ¼ inch or more of ice accumulation is expected. A warning may also be issued if the storm is expected to hit during high-traffic times. Minimize driving.

Share the road with snow plows

- Be patient and **don't pass the plow.**
- **Be aware.** A snow plow may create snow clouds which can cause zero visibility.
- **Stay back.** Give the plow room to work. It tends to speed up and slow down.

**More salt isn't always the answer.
The goal of salt is not to melt
snow, but to make it easy to plow.**
