Traffic Control Plan
Page 3 of 3

LAW ENFORCEMENT OFFICER

If requested by the Contractor, the Engineer may approve Law Enforcement Officer Police Support to supplement the Contractor's temporary traffic control. If approved, provide one (1) police support unit for each lane and/or shoulder closure, each unit consisting of an off-duty law enforcement officer from any police agency having lawful jurisdiction and a police car equipped with externally mounted flashing blue lights. Place the police support unit at a location that is most effective to alert traffic of the work, but safe for the workers and the officer. The Department will measure and pay for each approved individual police support unit on a per hour basis for the officer with the police vehicle. If police support is utilized without prior approval by the Engineer, the Department may deny payment for any invoiced hours prior to the approval date.

PAVEMENT MARKINGS

Consider the locations listed on the summary and/or shown on the plan sheets as approximate only. If there is to be a deviation from the proposed striping plan, the Engineer will furnish the Contractor with an updated striping plan prior to placement of the proposed pavement markings. See the Special Note for Staking for instructions regarding layout approval prior to installation of the markings.

PROPOSAL BID ITEMS
