Russell Co. KY 379

## Shouldering Detail

### Installing Channel Lining to Create Additional Shoulder Width

#### NOTES

- \* Contractor shall install and compact the Channel Lining in 18 inch Lifts.
- \* Contractor shall create a small bench at the bottom of the existing slope, midway up the slope, and near the top of the slope.
- \* Benches are expected to be about 2' tall. The width of the bench will vary depending on the existing embankment slope.
- \* Benches shall be considered incidental to the bid item CHANNEL LINING CLASS 2.
- \*\* **Locations that are limited due to R/W, utility poles, trees, fences, or other sensitive obstructions will still require Channel Lining, but only out to the edge of R/W or sensitive obstruction(s). In these situations, with the approval of the Engineer, the slope may be constructed steeper than 3:1, but shall not be constructed any steeper than the existing slope, unless a steeper slope is approved by the Engineer.**
